## Farmers and Gardeners, Greeting:

When Spring time comes and you begin to plow and sow for the expected harvest, what seeds will you use?

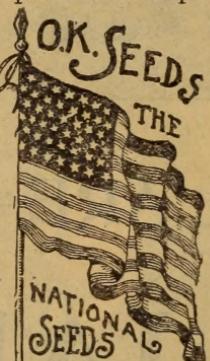

The seeds exert a great influence on the crops regardless of the soil or season. Therefore, in the first place, look carefully to the seeds you purchase and plant. **O. K. Seeds** are All Right Seeds. They are fresh and vital and will grow and produce the crops like you expect. **Planting Good Seeds is like taking out an Insurance Policy on your Crops.**

If you want seeds that den—that will supply your with tender, delicious veg- harvest in your fields, There is a vast difference is in animals. What is not come out in the crop. seeds on the market, but **bred Seeds**. Some others is a chance that they are cannot be any better, chance? Many farmers think they have been buy- past, yet they may be

**O. K. Seeds** are truly are planted in every county in every State in the country. Our ambition is to have them planted in every garden and on every farm in the country. We hope to accomplish this, because there are no others so good and few others so cheap. Also our Mr. J. A. Everitt has done more for farmers and gardeners than any other man in the country—he has taught them how to get good prices for their crops and is putting the plan in operation all over the country. You have been benefitted by this plan through better prices, but perhaps you did not know to whom to give Credit. You ought to ask for full particuiars.

We expect an order from every Catalogue sent out and will be disappointed if you don't send yours.

Yours truly,

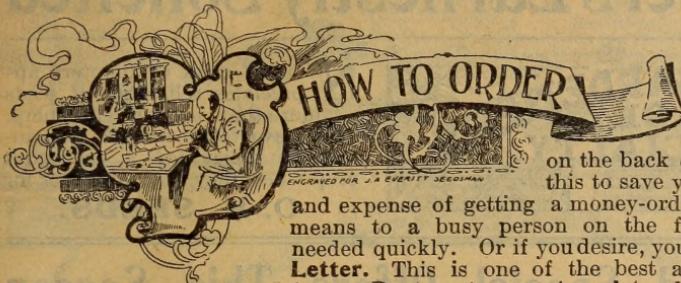

will make you a good gar- table through the year etables and make a glad plant the **O. K. Seeds**. in seeds, the same as there not bred in the seed can. There are many scrub **O.K. SEEDSMAN

# Instructions to Customers

ENGRAVED FOR J. A. ECKERLY JORDAN

We supply with this Catalogue a special envelope, in which you may enclose your order and money and mail at our risk, for \$10.00 or less. (See instructions

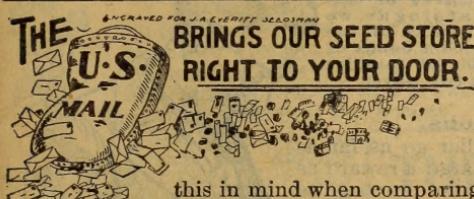

on the back of the envelope.) We do this to save you the trouble, annoyance

and expense of getting a money-order, as we know what this means to a busy person on the farm when some seeds are needed quickly. Or if you desire, you may send by a **Registered Letter**. This is one of the best and most convenient ways (every Postmaster must register letters); or by Postoffice

**Money-orders, Express Money-orders or Bank Draft.** Postage Stamps taken the same as money in small amounts, 2-cent stamps preferred. Don't send revenue stamps. Canadian customers can send any form of their currency or postage stamps, as we can use them at their face value.

## TERMS

**Our terms are cash with order.** We will occasionally send goods C. O. D. if enough is remitted to guarantee charges. Or go to your Banker, Express or Freight Agent and deposit the money with him and take his receipt for the money, to be paid to us on arrival, if the goods are as represented. Or send us a letter from your Banker, Freight or Express Agent to the effect that you will pay the money on arrival of the goods if found as represented. We want to make it possible, safe and easy for you to order your seeds, machines, etc., of us and you need not hesitate, no difference in what part of the country you reside.

### FREE BY MAIL

We deliver all seeds, grain and potatoes free by mail at prices quoted, in packet, oz.,  $\frac{1}{4}$  lb., 1 lb., 4 lbs., pint, quart and 4 quarts, unless stated to the contrary; also plants, unless stated otherwise. If sent by freight or express, postage may be deducted at the rate of

8c. per lb., 8c. per pint, 15c. per quart. Keep

this in mind when comparing prices. When goods are sent in large quantities by freight or express the purchaser invariably pays the transportation charges, except where stated to the contrary.

### THE MAILS

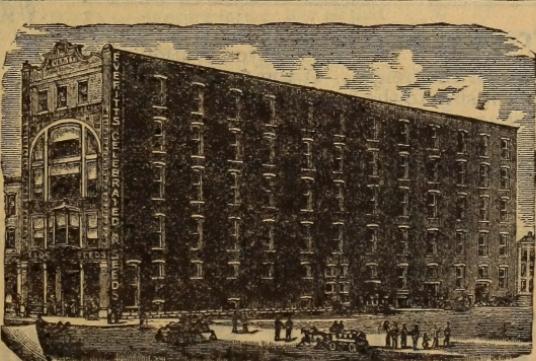

Are very reliable, and the development of the mail order business is one of the wonders of the present day. Many families have learned that they can obtain their supplies hundreds of miles away to better advantage than at their home stores. In no other line of goods is this more emphatically true than with seeds, and in no other line does there exist such peculiarly important reasons for doing so. You may buy clothing, groceries, harness, etc., away from your home store on account of price, but with seeds you have the additional reason of vitality. It may be all right to purchase nails, etc., at your store, but all wrong to risk it for living, vital, vigorous seeds.

### EVERY POSTOFFICE

Is a branch store where you can get **O. K. Seeds**, and if on a Rural Mail Route, Uncle Sam will bring them right to your door.

## WARRANTY

We exercise great care to have all our seeds pure, true and reliable, but we do not warrant the crop from any of the seeds we sell. We guarantee safe arrival of all shipments we make, except of perishable plants :.

# Early Orders Earnestly Solicited

NO other class of planters appreciates reliability of seeds more than market gardeners. They have taken out the best insurance policy for a successful crop when they send an order for

**O. K. SEEDS.**

## ...EVERY MAN... AND HIS POCKET BOOK

1st. In the outlay for seeds.

2d. In the income for the crops.

Everybody wants to make the almighty dollar go as far as possible in purchasing power, and return as large a reward as possible from the investment. We know it will not purchase as many high-grade seeds that can be depended upon in the crops, any other place as at **Everitt's O. K. Seed Store**. You are not working for pleasure only, but for profit also. **O. K. Seeds** are the kind that grow into dollars. The crop of dollars is what you are after.

As we issue  
500,000  
copies of this  
Catalogue, we  
appeal to the  
pocket books of  
500,000 families  
in two ways:

## Reduced Freight and Express

You can get them from Indianapolis. Ours is the most centrally located seed house in the country, and transportation charges are much less than from the far East or North. Keep this in mind.

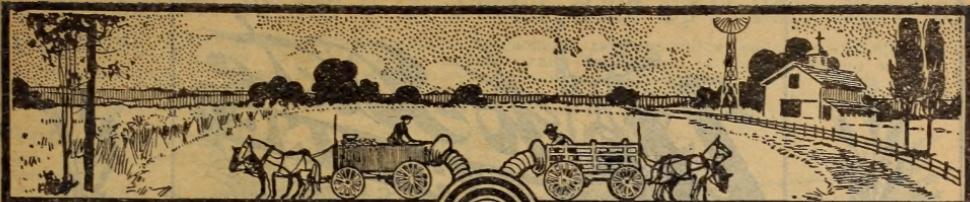

**Prepay Stations** If there is no agent at your station, remit extra for the freight. If you neglect to do this we will ship to the nearest station where there is an agent.

**References** We refer you to any commercial agency, to any bank in the country, or to any business house in Indianapolis as to our reliability.

**Give Full Address** every time you write. If you change your P. O., give old as well as new when you write. This is very important. Notify us immediately when you change your address.

Send all orders for everything in this Catalogue to

# FARMERS

**D**O you know that there is something more important in your business than raising big crops to be dumped into elevators, store-houses and stock-yards for the Boards of Trade to make prices on them?

**D**O you know that there is now a Society—organizing all over the country—that is setting the price on every important crop you grow, and what is more, farmers who are in the Society are getting the prices?

**D**O you know that this Society is only two years old yet it has had such enormous developments and influence that farmers got or will get \$1,194,233,917 more for six important crops; the last ones grown and marketed (or being marketed), than they ever got before for crops of the same kind and size.

These are facts that can be proved. You ought to know all about this movement that is sweeping the country. You ought to be a member of this Society.

You have had your Grange and Alliance and F. M. B. A. and other societies to help you buy cheaper or ship cheaper and regulate other people's business, but (The American Society of Equity) this society, is to regulate your own business **only** and put a **profitable price** on your goods **always**.

There is nothing visionary about this matter. We cannot tell you all about it here. But we want you to write for full particulars. You cannot make as much money on the farm if you are out of this society. We will put before you many letters from your brother farmers proving this, if you give us a chance. **THE AMERICAN SOCIETY OF EQUITY** needs every farmer, and all that every farmer needs, that he has not got, is the A. S. of E. They must get together. The expense is a mere trifle, the benefits are great. If you want always to get profitable prices, fill out the Coupon below and send it. It may be put in a letter to J. A. Everitt, Seedsman, and it will be delivered to the A. S. of E. and you will get full particulars.

## THE AMERICAN SOCIETY OF EQUITY

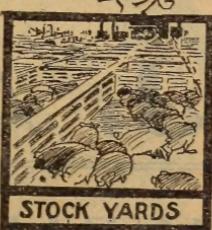

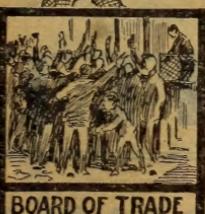

THE AMERICAN SOCIETY OF EQUITY, (J. A. EVERITT, PRES.)  
INDIANAPOLIS, IND.

Dear Sirs: I want to get profitable prices for my crops, therefore send me full particulars. If I can see that I can more than double my profits by belonging to this society, I will join.

NAME.....

RURAL ROUTE..... P. O. ....

COUNTY..... STATE.....

**T**HIS paper is different from all other farm papers. It teaches different things from any other farm paper. It goes further than any other farm paper ever did, because it not only advocates raising larger crops and better crops, but it teaches farmers how to get profitable prices for them.

**UP-TO-DATE FARMING** is fighting the 'farmers' battle against the speculators and gamblers in farm products, food trusts and unfair middle-men. **UP-TO-DATE FARMING** is teaching farmers, and organizing them, so the uncertainties of prices of farm products will be removed; so farming will be elevated as a business equal to the best of other industries; and so farming will be the preferred profession on earth.

All these things are largely accomplished already. All farmers need to do is to come forward and get their share of benefits.

Farmers labor longer hours and for poorer pay than any other class on earth. The pay for farmer's labor has been held up by a middle class who produce nothing, but grow immensely wealthy by the home labor of the millions of farmers and their families. This must stop, and **UP-TO-DATE FARMING** tells you how it is being stopped.

If you are not already a subscriber to this paper send **50 Cents** at once, or better yet, send **\$1.00** and become a full member of the A. S. of E. (see preceding page), and get the full benefits that this society only is able to give you.

No matter how many papers you take already you cannot afford to be without **UP-TO-DATE FARMING**.

**UP-TO-DATE FARMING** is the official organ of the American Society of Equity. Through this paper the society operates. This paper has been responsible for the establishment of the society, and the enormous benefits it has already given farmers.

**EDITOR AND PUBLISHER**

**INDIANAPOLIS, INDIANA**

# Every Farmer in the U. S. Should Read Up-to-Date Farming.

**BECAUSE** It is bringing farmers to the front. It teaches farmers how to get good prices for all the crops they grow. It has doubled the profits of many thousands of farmers and will do as much for every farmer if they want it to. It represents the best crop reporting system in the country. It sets a price on farmers' crops while they have them and not after they go into the hands of speculators. It teaches how to grow crops as well as any paper and is the only paper that teaches how to sell them profitably.

**Your Hands are Tied** When you let speculators price your crops, but when you price them yourself it is different. This is what UP-TO-DATE FARMING teaches. Don't you want to enjoy the benefits?

**There Will Be No Guessing** When you are a subscriber to Up-to-Date Farming. Then the prices of your crops will be as staple as are the prices of plows, binders, interest on money, taxes, etc. Don't you need such a paper in your business?

**There Are Many Other Reasons** But we cannot give them here. Order this paper to your address for the next year and the truth of all we say in this advertisement will gradually come to you and make a new man or woman of you as regards your understanding of agriculture. **WHAT WE SAY IS TRUE.**

**UP-TO-DATE FARMING** Is printed twice a month, at 50c a year. It has 150,000 subscribers already, but must have a million or more. If ALL farmers knew how valuable this paper can be to them, we would have a million subscribers in two weeks.

**The Subscription Price is 50c.** Each number will do more real practical good than a whole year's volume of any other paper, because it tells you the vital things about your business that other papers have not begun to print. It is the one paper that every farmer WILL SUBSCRIBE FOR, because, what it gives is your greatest need and you cannot get it elsewhere. When you begin reading this paper the possibilities that lie around the farming millions will begin to dawn upon you. **We** want you to send your order direct from this advertisement. For fear you will put it off we are going to offer you a valuable premium if you send promptly. Good seeds are as valuable as good teaching and both mean success. We will give you the four seed novelties as follows:

**1 Pkt. Smith's Prolific Corn.** New hybrid. Yields over 100 bu. to acre. Yellow Dent ears 10 to 14 inches long. Always 12 rowed. Grains  $\frac{5}{8}$  in. deep,  $\frac{1}{2}$  in. wide, nearly  $\frac{3}{4}$  in. thick. Cob 1 in. diameter. Stalk 8 ft. high, 2 in. thick at base; blades 6 in. wide. Bears often 3 ears to stalk. This is a remarkable variety. IT IS NOT OFFERED FOR SALE AT ANY PRICE.

**½ Lb. Snow White Sensation Potato.** A new seedling, and one that will create a sensation. Season medium late. The skin is the whitest of all and the flesh is as white as fine flour. There is no yellow tinge in the flesh whatever. A most remarkable potato indeed, and will take the country by storm. It outyields Carman and Sir Walter Raleigh. Others will not be wanted when Snow White Sensation comes on the market. This potato is not for sale at any price.

**1 Pkt. Cabbage.** THE VOLGA. A new variety from Russia. See description on Page 13 of this Catalogue.

**1 PKT. PEPPERS.** Mongolian Giant. Grow this pepper and you will have fruit that will be the wonder and admiration of the entire neighborhood. Seed description on page 24 of this catalogue.

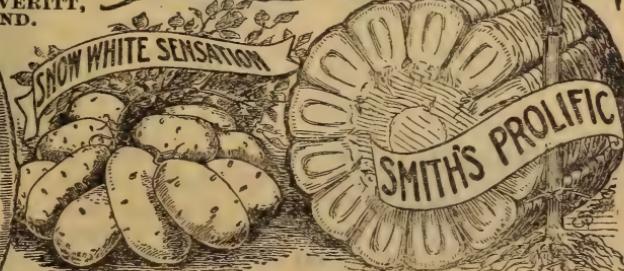

**REMEMBER.** We don't charge a cent for the seeds and potatoes. We give them to guarantee your subscription at once. We need it in carrying out our great undertaking. But you need this paper even worse than we need your subscription. Don't lay this aside until you have sent the order. **EXTRA SPECIAL.** We not only want your subscription but your neighbors'. The good that this paper can do is not for a few farmers but for all. Therefore, send us ten or more addresses on a separate sheet and we will send 25c worth of pkt. seeds (vegetable or flower) selected from this catalogue (your choice). Surely you will now come and help us to get the million subscribers. **We Repeat the Offer.** For 50c we will send Up-to-Date Farming (twice a month) for one year. Also four seed novelties as explained, and 25c worth of seed in pkts. **YOURS FREE** — Send a club of 4 at 50c each and we will send **YOURS FREE**.

That is, a club of five for \$2. **J. A. EVERITT,**

# EVERITT'S NOVELTIES IN SEEDS

## And Specialties

OUR list of NOVELTIES and SPECIALTIES is larger and more valuable this year than ever before. Each of the articles listed on the following pages up to page 32, we recommend to our friends without hesitation and we hope to see them included liberally in their orders.

TRADE  MARK  
SEEDS

THE  
BRITTLE  
STRINGLESS  
GREEN POD.

## BRITTLE STRINGLESS GREEN POD

THIS is a splendid bean. Grows similar to the Red Valentine but is earlier. It will develop the first pods for use in 4 or 5 weeks from planting. The pods are not quite as round as Valentine and are more nearly straight. It is very productive and unsurpassed for quality and endurance in bearing. It is entirely stringless. Seed should be planted every two weeks to keep up the best succession.

Pkt. 10c, pint 25c, quart 40c, by mail. By express or freight, 4 quarts \$1.00, peck \$1.75.

**Your Neighbor** may not be as fortunate as you and not receive a catalogue of O. K. Seeds. We suppose you love your neighbor as you should; therefore go and see him and get his order for the O. K. Seeds and send with yours.

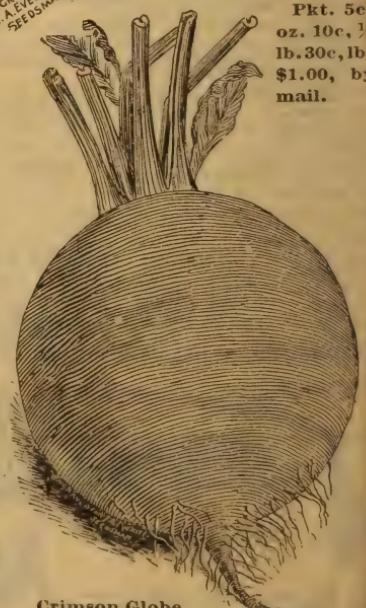

### CRIMSON GLOBE

## BEET

A Grand Variety from England

A very handsome root; second early or for main crop. Richly colored crimson flesh. Exquisitely tender and delicious and entirely free from stringiness. Size, medium; slender tap root. Small dark leaves borne on slender stems which start closely around the center of top of root. This is probably the finest beet of its class introduced in years. Don't neglect to include it in your order.

Pkt. 5c,  
oz. 10c,  $\frac{1}{4}$   
lb. 30c, lb.  
\$1.00, by  
mail.

Crimson Globe.

# A BEAUTIFUL, VALUABLE PROLIFIC NEW POLE BEAN GOLD AND CARMINE

**L**AST SEASON WE OFFERED THIS NEW BEAN FOR THE FIRST TIME AND it has fully met every claim made for it. Besides all the good qualities that any pole bean ever possessed in the past, this sort possesses an attraction that none of them could claim, namely: the novel coloring and beautiful appearance. The Gold and Carmine Pole Bean is an early variety and perpetual bearer until cut down by frost. It grows a robust stalk, climbs on anything that is available; pole, corn or trellis, and bears its long, thick pods in great branches and clusters. The pods are a bright yellow color when young, and change to an unusual bright carmine on the gold as they approach full size, and are ready for market or the table. They are entirely stringless. No variety excels the Gold and Carmine for table quality, which, of course, is the true test of any bean. We recommend it as the greatest novelty in beans, as well as the best in quality. Read some reports:

"I received a sample of your New Carmine Podded Pole Beans, and I would say we planted the same, and it proved exceedingly fine, and then such a large and beautiful bean as well as pod, which in this section is desired for the beautiful color of the pod."

HENRY C. ANTHONY  
Portsmouth, R. I.

"Our trials of Gold and Carmine show it to be a wonderfully valuable and distinctive sort. It should prove a most salable market bean, as it is most attractive in all stages of its development, as snap, shell and dry; and we predict for it a prominent place in both private and market gardens. It combines the advantages of the mammoth Horticultural with the added merit of the golden color instead of the green for back-ground, and being entirely stringless in all stages of its growth."

"I have made a cooking trial of your New Carmine Pole Bean as requested, and find that the young pods that we cooked as snap-shorts are extremely tender and mild in flavor, and quite as fine as any bean which we have ever used in this way during the late Summer months. As a shell bean, I find they cook very nicely quite dry and of a mild, chestnut flavor. Yours truly,

E. D. DARLINGTON,  
Fordhook, Pa.

"We are glad to report a very satisfactory trial of the Carmine Podded Pole Beans. We find them very vigorous and extremely prolific. The pods are large and handsome in appearance, and hang in great clusters on the vines. They are as you say entirely stringless. The quality is very good. The beans themselves are most excellent in all stages up to nearly complete ripeness.

"Thanking you for the opportunity to test these fine beans."

W. VAN FLEET,  
Little Silver, N. J.

Every family grows beans. Every family wants this most beautiful and best variety. Pkt. 15c, pt. 30c, qt. 55c, by mail. By express or freight, 4 qts. \$1.25.

## Mangel Wurzel Giant Eckendorf.

This Mangel is today the variety most sought after in Germany where thousands of acres are planted in Mangels every year. In regard to yield it is ahead of most kinds. Roots weighing from 15 to 25 pounds apiece are by no means rare when the proper culture is given. The roots grow cylindrical, are yellow and very nutritious. They grow almost on the surface of the soil hence easily harvested, and their chunky shape prevents them from being broken in handling. Per lb. 60c,  $\frac{1}{4}$  lb. 20c.

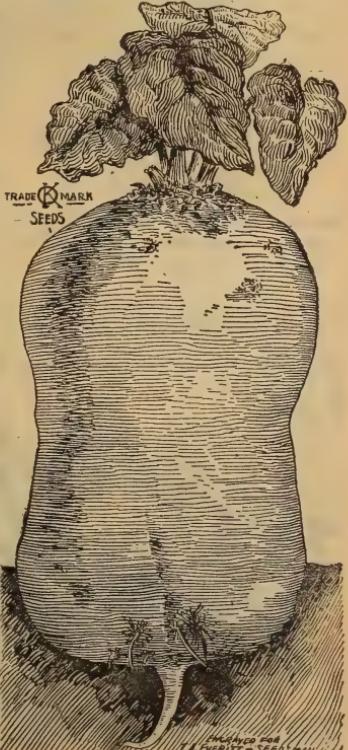

**• A Most Beautiful and Valuable Premium. See last Cover Page. Win it. You will Prize it.**

**O. K. SEEDS**

both private and market gardens. It combines the advantages of the mammoth Horticultural with the added merit of the golden color instead of the green for back-ground, and being entirely stringless in all stages of its growth.

J. B. R. SEED CO., Cambridge, N. Y.

# MAMMOTH STOCK FEEDING SUGAR BEET

A strain of beets that has been developed for size like the mangel wurzels and at the same time possesses a remarkable percentage of sugar and the highest possible nutritive value that it has yet been possible to attain in a root of this kind. For

feed this beet is worth ton for ton twice as much as common kinds or the mangels. Also there has been an improvement in the shape of the root and in the habit of growth, so that they may grow closer together and the crop may be harvested and handled much easier.

The large roots grow with about two-thirds their bulk or one-half their length above ground, but this upper part is not coarse and hard, the whole root being fine, tender, juicy and sweet. We recommend this beet to stockmen who want the most productive, best feeding variety, and who are seeking to reduce the labor of growing and handling it to a minimum. It leaves little to be desired as a stock food in the root line.

Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 60c. By freight or express, 50c per lb.

## EARLY SPRING CABBAGE

The Earliest Round Headed Cabbage. Yields Much More Than any Other Extra Early.

and good qualities make it of exceptional value for gardeners and truckers, while it has all the good qualities to recommend it to the private gardener. Don't omit it from your order. Price—

Pkt. 10c, 3 for 25c, oz. 30c,

$\frac{1}{4}$  lb. \$1.00, lb.

\$3.00.

This Cabbage is of the early summer type, but smaller. It has only four or five outside leaves and these are so small that it may be planted 21 inches apart, allowing 13,500 plants to an acre. The stem is short and almost the whole plant as it grows is edible. It has the most solid head of any early Cabbage and the head is solid even in the early stages of its growth. Its shape, large yield

## EARLY SPRING CABBAGE

A Novelty! Try It! A Novelty!

Everitt's Early Eureka  
A NEW EXTRA EARLY

CABBAGE

**IN** this extra early variety we have **the earliest flat variety of cabbage in the country**. It is also very valuable as a second early if planted later. In fact, it fills the bill for an all-summer sort by making three plantings at intervals. A cross of Succession and Early Jersey Wakefield, style of the former, and earlier than the latter. It forms splendid medium size heads almost as solid as a baseball. Has few leaves and can be planted close together. Every cabbage grower will be interested in this new variety and thousands of our customers who procured it last season found in it all that we recommended and qualities not possessed by any other. **IT IS AN EXTREMELY FINE AND EXTREMELY PROFITABLE VARIETY TO GROW.**

READ A FEW REPORTS:

We are much pleased with the new Early Eureka Cabbage and want two ounces of seed for next spring planting. It is extremely early, sure to head and beats everything for solidity. We consider it a most distinct and valuable sort.

BEEBE BROS.

Wever, Ia.

Early Eureka is the earliest cabbage I have raised in forty years—the time I have grown garden truck.

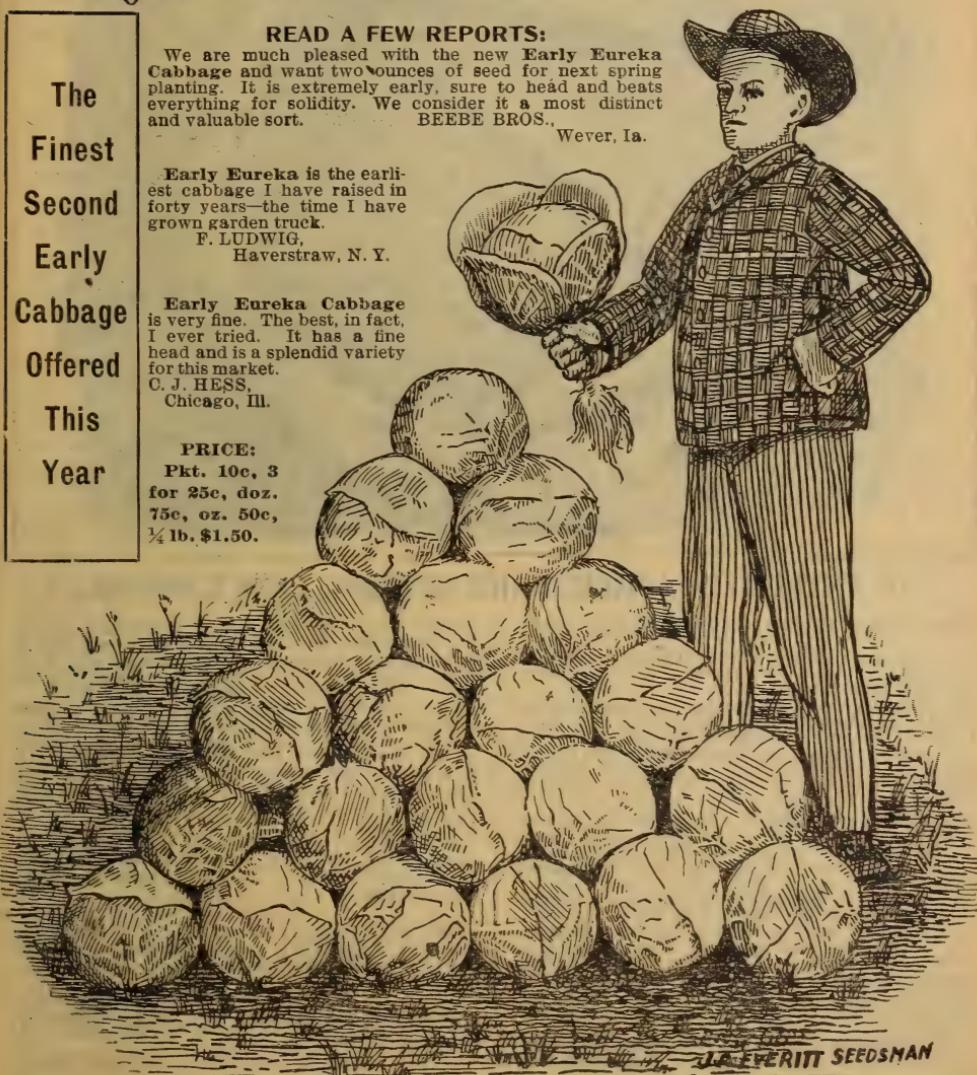

F. LUDWIG,  
Haverstraw, N. Y.

Early Eureka Cabbage is very fine. The best, in fact, I ever tried. It has a fine head and is a splendid variety for this market.

Everitt's Early Eureka Cabbage

# THE HOUSER CABBAGE

## AN EXTREMELY LARGE, HARD HEADING LATE CABBAGE.

*Some of our Claims for this Cabbage are:*

**1. Lateness.** It is the latest of all large cabbages being at least two weeks later than any strain of the Late Flat Dutch Type.

**2. Solidity.** The Houser Cabbage cannot be excelled in this respect by even the Danish Ball Head. Very compact, each leaf well overlapping the head.

**3. Size.** It is fully as large as any of the late varieties, the heads averaging from 10 to 12 pounds. Many specimens have been grown to weigh 18 to 20 pounds.

**4. Shape.** The heads are round and deep through, and should any of the heads crack, it is always at the stem end, which does not destroy its use for the market. The heart extends only 2 to 2½ inches into the head.

**5. Quality.** The main feature of a good cabbage is tenderness. In this respect it is unexcelled. It is free from that coarse rib found in other late cabbages.

**6. Yield.** By reason of the compact habit of growth of the Houser Cabbage, and its freedom from loose leaves, 500 to 800 more heads can be set out to to the acre than of any other large variety. Ninety-five per cent. of these plants, in an ordinary season, will make good merchantable heads.

The Houser Cabbage will be welcomed as a valuable addition to late varieties for fall, winter and

spring. In solidity and keeping qualities it excels the Danish Ball Head, so famous in some sections. Mr. Lupton, a large grower of cabbage seed on Long Island, and who is thoroughly acquainted with all new varieties, writes of this cabbage as follows:

"The Houser Cabbage is entirely distinct from anything I have ever grown or anything now on the market. It is fully two weeks later than other sorts, an excellent keeper, hard heading and is all right. It is a first-class keeper, retaining its color to a marked degree and will carry through the winter for early spring market without rotting, as many other varieties do." J. M. LUPTON, Long Island, N. Y.

I have 10,000 Danish Cabbage and 4,000 Houser Cabbage planted and find yours far the best—more heads are finer quality. I can recommend the Houser above all others.

S. T. BOKE, Muscatine, Iowa.

The Houser Cabbage did excellently. The weather here was very wet this season. My neighbor's cabbage burst and rotted, while yours kept solid. It is the best late cabbage I ever saw.

F. A. KEPHART, Kephart, Pa.

The Houser Cabbages are doing finely. A neighbor looked at them today and said they were beauties. Shall want more seed next season.

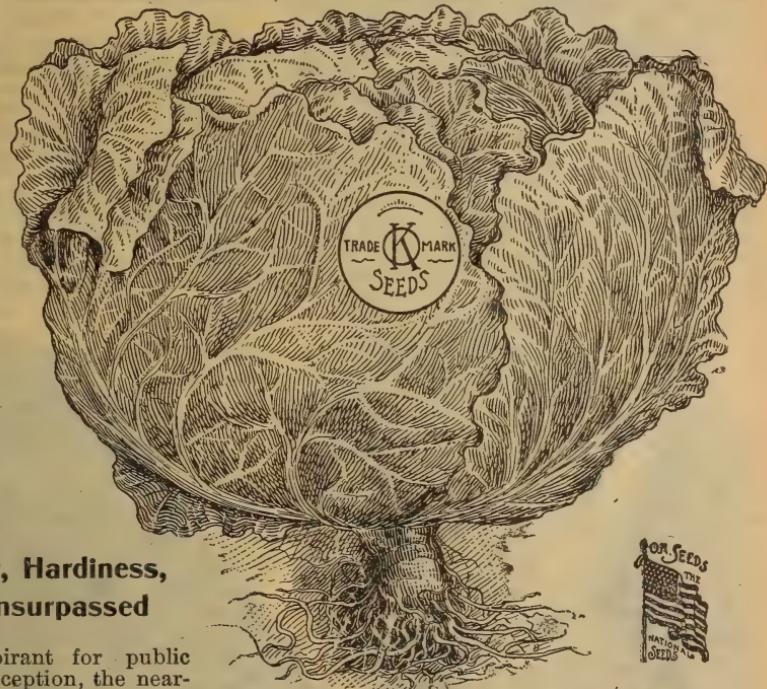

W. O. BARBER, Torringford, Conn.

**Price: Pkt. 10c, 3 for 25c, oz. 35c,  $\frac{1}{4}$  lb. \$1.25, lb. \$4. Don't omit it from your order**

# THE VOLGA CABBAGE

## A NEW CABBAGE FROM RUSSIA

Among the many new vegetables of recent introduction this is one of the most valuable.

### In Uniformity, Hardiness, Quality, Unsurpassed

"This new aspirant for public favor is without exception, the nearest approach to perfection of any variety we have ever grown, or seen grown, in this or any other country."

Above is the way the largest grower of cabbage for seed speaks about the Volga cabbage.

It had its origin as follows: Ten years ago some thirty varieties of the Brassica family, including every class grown for the seed trade, were obtained from Russia. This is the only variety that appears to possess any particular merit. Of the dozen or more plants of this type, all were uniform in every respect, and remarkable for perfection of form and solidity of head. From the lot were selected six of the best for seed. These were grown with ordinary care, and the next season the variety was given a crucial test.

The second generation was a decided improvement over the first, and from this trial another selection for seed purposes was made, and with the same results. The third generation was so pleasing that about one-half acre put out in the summer of

1902, not one plant failed to produce a most perfect head. All of this crop of seed was saved for seed purposes. The claims for this variety are:

1st. Uniformity. In one field of three acres there was not a single plant thrown out, or that showed, in any respect, any variation from a true and valuable type.

2nd. Uniformity and solidity of head. In this respect it is a vegetable wonder, as the heads are of about equal size and shape, weighing from 12 to 15 pounds each.

3rd. Quality. Unlike most types, the heads are perfectly solid, and the stem does not run up into the head nearly as far as in all other types and the flesh is exceedingly firm, tender and white, making it a most desirable form for kraut, as well as for all other purposes for which Cabbage is used.

4th. Hardiness. In this respect we have never seen a type which would favorably compare. Last winter, a most severe one, did not inflict the slightest injury to the Volga. While all other kinds suffered terribly, not a head of this was lost. We think this point of hardiness of great importance to the shipper.

5th. This type is remarkable for its quick growing habit, as are all vegetables that come from cold countries. We have noticed particularly this type, and find that it will mature its heads fully two weeks earlier than any of our late growing kinds.

PRICE—Pkt. 15c, 2 for 25c, oz. 35c,  $\frac{1}{4}$  lb. \$1.25, per lb. \$4.00.

**Cauliflower** **GARDENER'S FAVORITE.** The earliest and finest Cauliflower in the country. Resembling Snowball in habit, and sure heading under adverse conditions to the most marked degree. It will head when others fail. Dwarf erect habit, with few surplus leaves, allowing to be planted closely. Heads are very solid, pure white and finest table quality. Pkt. 15c,  $\frac{1}{2}$  oz. 75c, oz. \$1.25,  $\frac{1}{4}$  lb. \$4.00.

and Cauliflower Culture.

# NEW CELERY

## Winter Queen

Finest Dwarf Winter Celery. The Best Keeper.

This is certainly the most valuable variety of Celery for winter and spring use ever introduced. It can be kept and sold in the following May when all other Celeries are gone. It is dwarf, of stout growth, thick ribs and double as much crisp heart as any other variety. The plant is beautiful in appearance, of close compact growth and blanches readily to a rich cream white. Flavor delicious, nutty; ribs solid, crisp. Highly recommended for home and market. Don't omit it from your order.

Pkt. 8c. oz.  
25c.  $\frac{1}{4}$  lb.  
75c. lb.  
\$2.50.

## PREMO

The Earliest of All.  
5 to 7 Days Earlier than  
Extra Early Adams.

THIS is not an Imitation Sugar, but a genuine Sweet Corn, and to the best of our knowledge is the earliest Sweet Corn in the country. It not only combines all the merits of the leading extra early varieties, but possesses the qualities of size, table quality

PREMO  
Earliest  
Corn  
on Earth  
READY FOR  
MARKET  
60 DAYS  
AFTER  
PLANTING

ty and yield in greater degree. The Premo not only is ready for the table ahead of any other variety of Corn when planted at the same time, but the seed is very hardy and may be planted in the spring as early as is safe to plant the Adams. The seed does not rot in cold ground like other Sweet Corn, also the plants have withstood slight frosts. Stalks grow about four feet high and usually bear 2 good ears to the stalk.

The Premo Sweet Corn was planted May 24, 1900, tasseled July 5; ears were large enough for use Aug. 1 (68 days), ripening Aug. 15.  
C. S. CLARK.

In further evidence of the great value of the Premo Corn, we submit the following testimonials to the public:

Notwithstanding the exceedingly dry weather here this season your new corn was ahead of all. We had large ears of excellent quality. It was about 60 days in maturing. Under favorable circumstances it will beat that.

ASA HARRINGTON, Bloomfield, Iowa.

Planted your Premo and had large, well filled ears to cook 58 days from planting. The corn is the earliest I have ever seen.

MRS. WM. HEINLY, Albany, Pa.

I planted your Premo on May 30, with others, and it was the greatest surprise of all early Sweet Corns in earliness, being far ahead of Ferry's Extra Early. I have kept it all to use next year.

M. M. PERSON, Nullboch, Pa.

Every person who is ambitious to excel his neighbors in having the first table Corn, should plant the PREMO. Don't neglect to order it. Price, pkt. 10c., 3 for 25c., pt. 25c., qt. 45c., prepaid. Not prepaid, qt. 30c., 4 qts. 85c., peck \$1.50.

# Cumberland Cucumber

THE New Cumberland is a cross of the Japanese Climbing and the Peerless White Spine, combining prolificacy and vigor of growth with beauty and uniformity. It was originated by Mr. Coy, the veteran seed grower, who says: "I honestly believe that this is the best pickling cucumber ever produced." The variety is of the hardy white spine type; is a rapid, strong and vigorous grower and very prolific in fruit. The pickles differ from all other hardy sorts in being thickly set with fine spines over the entire surface, except the extreme stem end, during the whole period of growth, from the time they first set until fully grown. The form is exceptionally straight and symmetrical, thus being as choice as a slicing variety as it is for pickles. The flesh is firm in all stages of growth. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 40c, 1b. \$1.25.

ENGRAVED FOR J.A. EVERITT - SEEDSMAN.

Cumberland.

**Everitt's Perfection White Spine.**  
This is without exception the most profitable Cucumber for truckers. It is the earliest, most shapely and productive of the White Spine type. Of a rich green

color, straight and symmetrical. It is an ideal slicing Cucumber; flesh fine grained, white, delightful flavor and most refreshing. Equally valuable for the home garden. Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75, postpaid.

The best strain  
of this famous  
and popular  
Lettuce is what  
we offer. It is  
free from  
Rogues. It does  
not form heads,  
but makes large  
compact bunches  
of light leaves  
with finely curled  
or fringed edges.  
Its delicious  
quality and hand-  
some appearance  
make it most  
popular in winter  
markets. It is  
useful also for  
outdoor plant-  
ing during  
spring and fall.  
It will stand a  
week to ten days  
after fit to cut  
without spoiling.  
Pkt. 5c, oz. 10c,  
1/4 lb. 30c, 1 lb.  
\$1.00.

#### The Best Cabbage

I want to write and tell you that I have some good crops from O.K. Seeds. I have the best Cabbage around here. Your Corn is so nice and all your seeds produced the best vegetables around here. WM. J. NIEMAN, Niles, Mich.

#### O.K. Seeds Insure the Crop.

O.K. Seeds are the best I ever planted. They never fail to grow and do just as you recommend. I tried to do without O.K. Seeds a couple years and as a result I had no garden worth speaking of.

Your friend, HENRIETTA PHELPS, Kendrick, Miss.

#### The Best All Around.

Your Seeds are certainly all right. They are O.K. They are the best I ever planted. Your Six Weeks Market Potatoes are the best for early crop and I have planted them several years. Up-to-Date Farming is the best paper for us farmers that is printed. I enclose 50c for renewal. RICHARD STEEL, East Winfield, N.Y.

#### Would Not Plant Any Other Kind.

Knowing the superiority of O.K. Seeds is the reason I patronize you. I would not plant any other kind. Your Giant Seedling Tomato is simply immense. I enclose another order. J. N. PHILLIPS, Parkin, Ark.

#### My Neighbors Had No Garden.

Enclosed find P.O. order for seeds. O.K. Seeds have done so well that you can look for many orders from here. I had all the garden truck we could use and to spare, while my neighbors had no good gardens. They could not see why I had such fine vegetables and I told them I planted O.K. Seeds from J. A. Everitt.

MRS. NETTIE E. WINES, Barnard, Kan.

#### Always Speak for O.K. Seeds.

I have bought seeds from other seedsmen but can gladly and honestly say that I got more seeds from you for the money than from any other. Your packets are large. I am much pleased and will always speak a good word for O.K. Seeds. T. B. NEWSON,

Almaville, Tenn.

#### O.K. Seeds As Claimed.

I send another order for O.K. Seeds. I find your seeds are as claimed. I raised the finest Tomatoes that grew in this country. One Tomato measured 17 inches around and weighed 3 pounds

CHAS. E. PRIMM, Good Hope, W. Va.

#### Best Firm.

The Rose Bushes are growing nicely. I am well pleased with all your seeds. They always come up and are always good. Your firm is the best firm I ever ordered from.

MATTIE BAKER, Dickson, Tenn.

# EVERITT'S IMPROVED GRANDRAPIDS LETTUCE

THE BEST  
FOR  
FORCING.

ENGRAVED FOR  
J.A. EVERITT - SEEDSMAN

#### O. K. Seeds the Best.

I have used O.K. Seeds for three years and they are the best I ever used. I especially recommend your Cabbages, for they are the best grown.

MRS. SALLIE SESTER, Fleet, Tenn.

#### O.K. Seeds Best in Life.

I am 32 years old and can truthfully say that the O.K. Seeds bought of you gave the best satisfaction of any seeds I ever planted in my life. Of the many varieties not a single one gave us any trouble. No re-planting whatever, and the crops from each were good. Enclosed find my order for more O.K. Seeds.

D. BASHCRAFT, St. Paul, Kan.

#### Little Tiny O.K. Seeds.

From the Little Tiny O.K. Seeds I bought of you last spring came forth monstrous things. White Dutch Cabbage as big as a peck measure, and others in proportion. I set out 602 Cabbage Plants and only two failed to produce marketable heads. White Dutch Cabbage particularly can't be beaten for sureness to head, solidity and freedom from bursting. They are one solid mass of meat. We cut open many and the heart was not over  $1\frac{1}{4}$  in. long. Logan's Giant Tomato weighed  $1\frac{1}{2}$  lb. They are just grand and yielded  $\frac{1}{2}$  bu. to the vine. Ever-bearing Cucumber took the cake and the money too. It would like to crowd everything else out of the garden. Such bearers I never saw. I had the run on early Cucumbers a long time before my neighbors had any. T. R. BAILEY, Powell, O.

Considering the land it was planted on and the drought that prevailed I have the best Corn from your O.K. Seeds that I ever raised or saw raised. The crop is not only good, but remarkably fine. I want to say to my brother farmers, get thorough-bred O.K. Seed Corn of Mr. Everitt. Cultivate well and you will have fat hogs, fat cows, and fine horses.

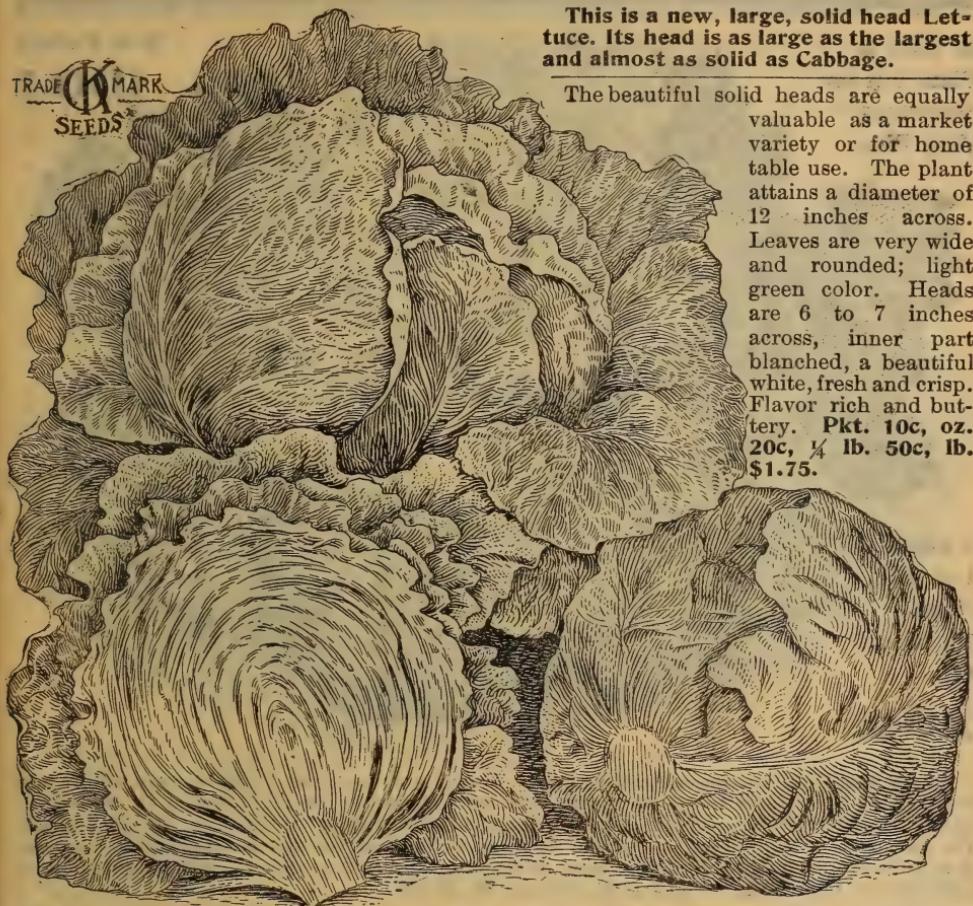

J. M. BLOFIELD, Marshall Co., Ky.

I will now write about the Seed Corn I sold from your house last spring. I have heard a great many words of praise. All who received the Central States Despatch Corn said it was the finest Corn they ever saw, and some who did not order said they wished they had. It came up sooner than expected, grew faster, and in many cases was the only Corn that did not need to be replanted.

J. W. M. WRIGHT, Defiance Co. Ohio.

# Everitt's Mammoth Butter Head Lettuce

TRADE  MARK  
SEEDS

This is a new, large, solid head Lettuce. Its head is as large as the largest and almost as solid as Cabbage.

The beautiful solid heads are equally valuable as a market variety or for home table use. The plant attains a diameter of 12 inches across. Leaves are very wide and rounded; light green color. Heads are 6 to 7 inches across, inner part blanched, a beautiful white, fresh and crisp. Flavor rich and buttery. Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

## NO OTHER SEEDS ARE TALKED ABOUT AS MUCH AS THE O.K. SEEDS.

Your Farmer's Interest Corn yielded about 70 bu. per acre. I am well pleased with it and you may expect an order for garden seeds next spring.

GEO. S. VINCENT, Prince George Co., Md.

The Yard Long Corn made about 100 bushels per acre. It was a sight to see it grow. I have sold lots of it for seed at \$1.00 a bushel. I had lots of ears that measured 17 inches long.

JOHN J. ZUKER, Montgomery Co., Ind.

**O.K. Seeds** are the best I ever tried. Your Farmer's Interest and Mortgage Lifter Corn are fine. Every person who saw them has engaged seed. The Six Week's Potatoes are the earliest I ever saw. I want more **O.K. Seeds** next year. I will help you all I can.

J. A. BURCHETT, Lancaster Co., Pa.

I got some of your Farmer's Interest Corn and I am well pleased with it. If I could have bought another bushel of it and planted I would have had 100 bus. more corn now than I have.

A. T. RENSHAW, Ford Co., Ky.

Your **O.K.** pepper seed was nice. Great Climbing Tomato grew 8 ft. high, and bore lots. The largest Tomato was 1½ lbs. The Kuttawas Tomato did well, also Magnificent Peas and other Seeds.

S. T. JONES, Clyde, Kas.

All the people of my club who planted the **O.K. Seeds** are well pleased. Mr. Josiah McGunnis raised five of the largest Pumpkins in one hill from the King of the Mammoth Pumpkins I ever saw. The 5 weighed 347 lbs. or an average of 69½ lbs.

D. E. GARRETT, Coal, Mo.

The Yard Long Corn is grand. It is just as recommended. The Potatoes can't be beat. They are the finest Potatoes I have. Such good keepers, and such good yielders. FRANK HOOPER, Grafton, Ill.

The Farmer's Interest Corn is certainly all right. I am well pleased with it. A large number of stalks have two ears each. It is ready to cut now (Sept. 17).

ARCHIE M. PETERS, Pickaway Co., O.

**O.K. Seed** gave perfect satisfaction. I expect to purchase seed from you as long as your seed give satisfaction as before. I have been taking Up-to-Date Farming.

ALICE V. BLOW, Pearson, Miss.

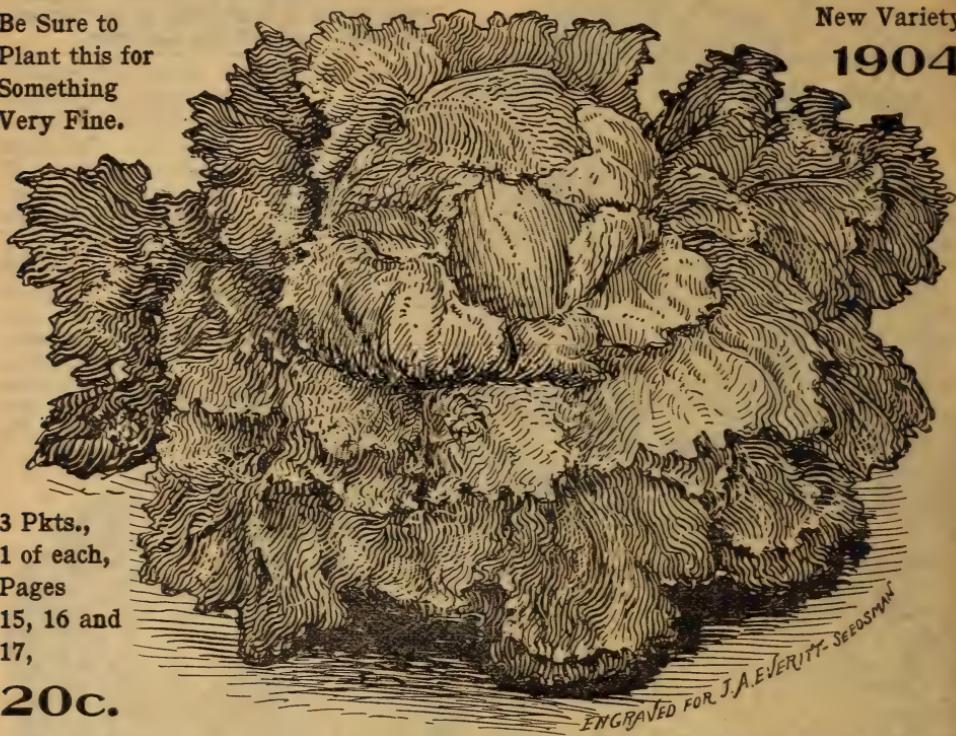

I got of you four different kinds of Corn last season. All did well, also some of your squash seed. I planted them on good land, and some of them weighed 75 lbs. I will want some more seed this spring, and myself and neighbors want to subscribe for Up-to-Date Farming.

T. D. BOWEN,  
Macomb, Ill.

# Everitt's Unrivalled Lettuce

Be Sure to  
Plant this for  
Something  
Very Fine.

New Variety  
1904

3 Pkts.,  
1 of each,  
Pages  
15, 16 and  
17,

**20c.**

A very large, light green cabbage variety. It forms a large head that is very yellow and buttery inside. It may be grown in open ground for summer and fall use or in frames for spring. It gives growers, handlers and consumers the greatest satisfaction at all seasons. The leaves are crisp, tender, sweet and delicious to the taste as well as delightful to the eyes. It is a variety for general and universal cultivation and will establish itself in the favor of everybody. **Pkt. 15c, oz. 25c, 2 oz. 40c,  $\frac{1}{4}$  lb. \$1.00.**

## DWARF WHITE HEART COS OR CELERY LETTUCE

This is the earliest and best of all Cos Lettuces. The plants grow in a very compact bunch of leaves, almost equaling a head Lettuce. Growth erect, about ten inches high. Outer leaves pale green, while the inner ones are snowy white. Tender, crisp, delicious, stands a long time before running to seed. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.**

**1906**

WE WILL CELEBRATE THE 25TH (QUARTER CENTURY) ANNIVERSARY OF OUR HOUSE BY ISSUING A REMARKABLE AND BEAUTIFUL CATALOGUE AND FARMERS' AND GARDENERS' GUIDE. IT WILL BE FREE TO

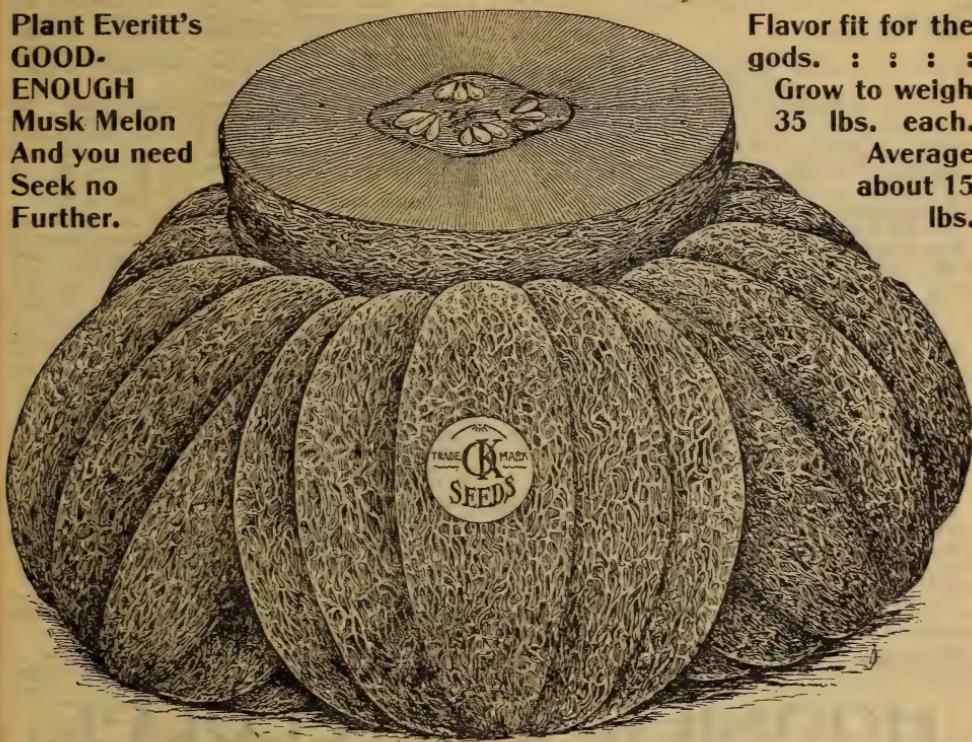

CUSTOMERS OF THIS YEAR. TO SECURE IT FREE BE SURE TO PLACE AN ORDER WITH US THIS YEAR, SO YOUR NAME WILL BE ON OUR MAILING LIST.

J. A. EVERITT, Seedsman.

# EVERITT'S GOOD-ENOUGH MELON

Plant Everitt's  
GOOD-  
ENOUGH  
Musk Melon  
And you need  
Seek no  
Further.

Flavor fit for the  
gods. : : : :  
Grow to weigh  
35 lbs. each.  
Average  
about 15  
lbs.

**EVERITT'S GOOD-ENOUGH MUSKMELON** is the latest novelty in Melons, and a long journey ahead of anything ever before offered. There is not a grower of Muskmelons in America who will not want some of the seed, because there is no other melon like it, and because there is no other equal to it, whether for home use or market. Read the letters and you cannot doubt the correctness of this statement.

The originator of Everitt's Good-Enough Melon has been engaged fifteen years in bringing it to its high state of development. His aim was to produce an **ideal** Melon. That he has succeeded, a critical and crucial test of general cultivation and marketing, which has been given the Melon before risking an introduction, will prove. The letters speak for themselves, but we can print extracts from only a few.

Everitt's Good-Enough Melon is nearly round, has nine large ribs, is as thick on the blossom end as on the side. Its exterior color is dark green until it begins to ripen when it turns yellow. At the first sign of yellow it is ripe enough to pick. This sign is of great advantage to the grower, who need never make a mistake in picking green or overripe Melons. In moderately hot weather it will reach its best condition in two or three days after this sign appears, thus giving handlers time to place them in the hands of consumers while they are improving in quality. The quality is better when ripened off, than when allowed to fully mature on the vine. It is shallow netted, and during the period of ripening the green and gold colors mingle with the fine netting making it the handsomest Melon imaginable. The seed cavity is small, flesh is very thick, firm, reddish-yellow meat, **with a flavor peculiarly its own that is not approached by any other melon on the market.**

It is a rampant grower, a few days earlier than Osage, fruit averages 12 to 15 lbs. and exceedingly productive. The receipts per acre on good ground will run about \$500. They always are sought after—**in fact they make their own market price.**

Everitt's Good-Enough Melon is good enough for any body and for any market. You will not make a mistake if you plant it, but you **will** make a mistake if you don't plant it. The supply of seed is very limited.

**DON'T FAIL TO READ THE SPLENDID REPORTS ON NEXT PAGE.**

# READ Some Reports. Did you ever read such splendifid Reports for any Melon before? REPORTS

Reference is made to Melon in blank as it did not bear its name until this season.

I take great pleasure in recommending very highly the Musk Melon which we have tested two seasons. —————— CHAS. ROE.  
(Hotel Normandie). —————— Detroit, Mich.

The Melon is without doubt the best we have ever eaten. My family bears me out in this statement. —————— PHILIP BREITMEYER,  
President of National Society of American Florists.

The Musk Melons are superior to any others I ever bought; I would not use any others when they can be had. —————— A. PARKER,  
President First Commercial Bank. —————— Pontiac, Mich.

The Musk Melons sell better with us at 25c each than Osage Melons do at 10c each. —————— DRUGGIST AND GROCERS. —————— WHITEFIELD & YOUNG.

I have bought and sold melons for the last twenty years, but I have never handled a melon that looks so well on the market or gave the universal satisfaction that the —————— does. —————— C. E. SAGENDORF.

Buyer for Turk Bros., Wholesale Grocers. For five years I have handled many melons at retail and can say that I never sold a melon that gave the trade the satisfaction or myself the profit to equal the —————— W. B. ANDERSON.

Grocer. I have been in the hotel business for twenty-five years and I never found any other melon to give near the satisfaction as —————— does. —————— J. A. LINDBURY.

Head Clerk of Hotel Hodges. For several years I have looked forward with pleasure to the ripening of the —————— Musk Melon. I can safely say that anyone who has not eaten one of your melons does not know what a good melon is.

Druggist. —————— PERRY WEED.

The following is from a traveling representative of a Colorado concern selling Rocky Ford Melons: "There is a Melon growing in Michigan which is the most

The supply of seed is very limited, and they will only be offered by packet and ounce at following prices. No price is too high for seed of this new Melon and great novelty: Pkt. 25c, 3 for 50c, oz. \$1.

## HOOSIER CANTELOUPE

THE HOOSIER CANTELOUPE is a cross between the Perfection and Hackensack, with six years' careful breeding to obtain a high-grade shipping Melon. The skin has a rich color of dark grey netting which changes to orange when ripe. Flesh is very thick and rich; orange color; flavor the best. The vines grow

heavy and vigorously and should have more space than any other variety. Fruit is a third larger than the Hackensack. The fruit is just the right size. The orange flesh is very thick and lusciously sweet. We urge all lovers of good Melons to grow this splendid sort.

I have made a business of raising Melons for five years, and the Hoosier Canteloupe is the best seller and keeper I ever handled.

ANDREW COLE  
Hillsburg, Ind.

The Hoosier Canteloupe has given my trade satisfaction in every respect. I think they are the best Melons on the market. They are far better than any other Melon ever grown about here before.

W. BARNARD,

Merchant. —————— Sullivan, Ind.

We have handled the Hoosier Canteloupe in our trade and find them strictly first-class in every respect and recommend them to any trade.

BELL & MCKINNEY,

Merchants. —————— Sullivan, Ind.

I have used the Hoosier Canteloupe and prefer it to any other that can be obtained in this market.

JOS. FREEMAN, Sullivan, Ind.

I have sold the Hoosier Canteloupe to my trade and do recommend it highly as a most excellent variety.

W. A. JENKINS, Merchant, Sullivan, Ind.

PRICE—Pkt. 7c, 4 for 25c, oz. 20c, X  
lb. 50c. lb. \$1.50.

We have handled some of the Hoosier Canteloupes and can recommend them as excellent Melons, both as sellers and eaters. —————— J. T. REID & SON.

Merchants. —————— Sullivan, Ind.

We have handled the Hoosier Melon grown by Mr. Nash, and recommend it as being first-class in every particular, and one that will bring the top price wherever offered for sale. —————— MASON & CO.,  
Merchants. —————— Sullivan, Ind.

luscious and of the finest flavor of any found in the world. I had a small one at the Waldorf-Astoria and paid one large, shining, Rocky Ford dollar for it. It was a stiff price, but knowledge is cheap at 100 cents on the dollar. That Michigan Melon made all the fruit from Rocky Ford appear to be on the discard. Yes sir! I am perfectly serious."

In justice to the —————— Musk Melon I would say that the barrel of Melons you sent me arrived here in excellent condition and only one of them showed any sign of being over-ripe before they were all used up. They were the most delicious melons we ever tasted.

A. C. HOOD,

Boston, Mass.

I have eaten of —————— Musk Melons and am acquainted with the originator. I am pleased to say they are magnificent in every respect. Large, with very thick, reddish-yellow meat, fine, juicy, and with a flavor fit for the gods. They are as near perfection as possible.

A. B. AVERY, M. D.

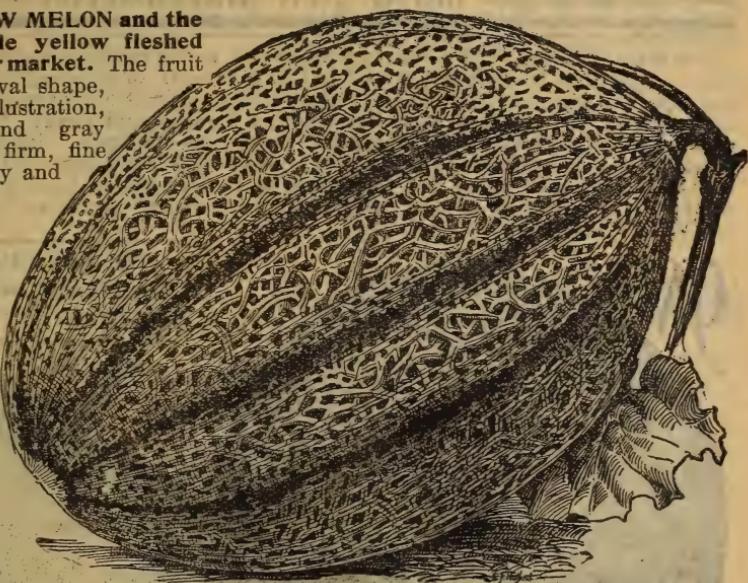

I have shipped the —————— Musk Melon a great deal and I find it universally an extra good shipper. The best Melons retail at from 25 cents to 75 cents each, according to the place they are sold. The smallest Melons of this variety I ever shipped ran eight to the bushel basket; the largest ran six to  $1\frac{1}{2}$  bushel basket. They wholesaled at 75 cents and \$1.00 respectively. One great advantage this Melon has over all others is the accuracy with which their state of ripeness can be told by a glance before they are at their best. This quality makes them the most reliable shipper I ever handled. When fully ripe they are unquestionably the finest and best-flavored Melon grown. The weight of the largest specimen I ever handled was 35 lbs. They average about 15 pounds.

O. M. CARPENTER, Melon Shipper.

Complete addresses are omitted from some of above letters for obvious reasons, but we have the complete address of each in our office.

# DEFENDER MUSKMELON

**A** SPLENDID NEW MELON and the most desirable yellow fleshed sort for home or market. The fruit is of medium size, oval shape, as shown in illustration, slightly ribbed and gray netted. The flesh is firm, fine grained, sweet, juicy and high, luscious flavor. The delicious flesh ripens as close to the rind as the famous "Rocky Fords," which is saying much for this melon. In fact the rind is no thicker than an orange peel. The flesh is not soft, like in some other yellow fleshed sorts.

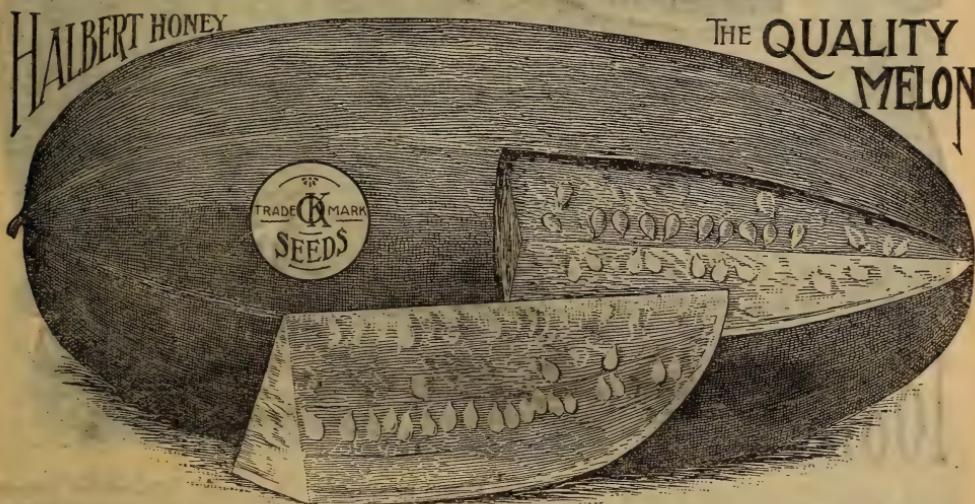

## DEFENDER

**MELON** grows a vigorous vine and is remarkably productive.

Season medium early. On account of the hard, firm, although thin rind, it bears shipping well. A very valuable acquisition. PRICE—Pkt. 6c, oz. 12c,  $\frac{1}{4}$  lb. 35c, lb. \$1.25.

# Halbert Honey Watermelon

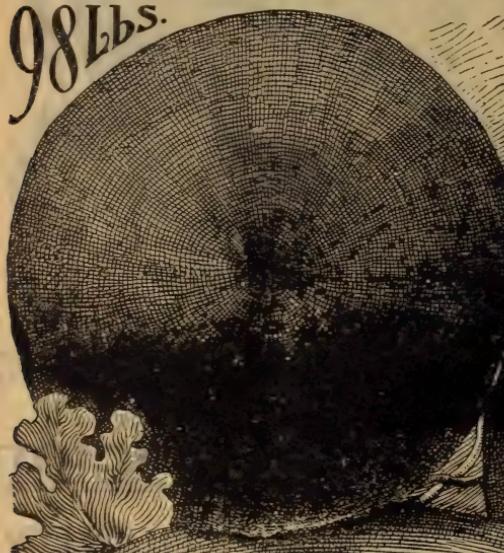

**O**RIGINATED IN TEXAS. It is especially recommended for family and home markets. It is equally as delicious as the popular Keckley Sweets and by some considered superior in color and shape, and is more productive. They grow 18 to 20 inches long, 6 to 8 inches in diameter. Color glossy, deep green, flesh a beautiful crimson extending almost to the surface leaving less than half inch of rind. It is highly recommended for home use and near-by markets. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

# Big Heart

## GREAT NEW WATERMELON

The state of Indiana has some famous water melon growing sections. This new melon was originated in Indiana in a township that is famous for growing and shipping more melons than any other township in the United States. It was originated by a very large grower and shipper, who operates extensively both in Indiana and Texas. The basis for his work was the well-known and popular market melon, the Triumph. By careful breeding and selection he has produced a melon that grows only a moderate but very sturdy vine, sets melons numerously, which are unexcelled in uniformity of shape, size and coloring. The color is very dark green, almost black. They are classed as "blues" by shippers, and represent the largest type of such melons.

98 Lbs.

The BIG HEART Melon is the Biggest and Best Big Melon you can Grow.

99  
Lbs

100 Lbs.

As compared with the Triumphs, the **Big Heart averages** larger size. The three melons shown in the illustration weighing 100, 99 and 98 lbs., when stood on end and one on top of the other, reached to the shoulders of a man 5 feet 10 inches tall. There are no small melons, and few medium size; nearly all are large size. The quality is exceptionally fine, shape oval, slightly flattened. Rind smooth, but not slick. Flesh deep red. **Seeds white.** Supply of seed is quite limited.

PRICE:—Pkt. 10c, 3 for 25, oz. 20c,  $\frac{1}{4}$  lb. 60c, per lb. \$2.00.

MAGNUM

BONUM

MAGNUM BONUM

The Great---The Good

# Parsnip

A very fine and greatly improved strain of Hollow Crown Parsnip which we can recommend to all marketmen as a **money maker**. The roots are smooth, not so long as those of the standard sort, somewhat thicker in diameter and much more easily pulled. A very heavy cropper. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

## MAMMOTH Golden Globe Pumpkin

**A New Variety from France.** A valuable addition to the list of mammoth pumpkins. The other leading mammoth pumpkins are flat or cheese-shaped, while this is round or globe-shaped. It is truly mammoth and has weighed over 150 pounds. The outside is a light yellow-russet color and very attractive. The flesh is a deep yellow color and very thick. The flesh is fine and the quality splendid for such a large pumpkin.

Golden Globe Pumpkin.

The Crop of Seed was very short again and will be offered only in small lots at pkt. 10c, oz. 20c.

## New and Distinct Salsify

Yellow Blossoms. Roots Yellow Color,  
Leaves dark green with crimped edges

It Makes  
the  
Richest  
Soup

It is a rare occurrence that a new variety of Salsify is introduced, but why should not improvements be made in this crop, which is becoming so popular in private families and as a market vegetable, as well as in the other vegetables? We advise every gardener who has not grown them to do so in the future and they will be a welcome addition to the bill of fare in fall, winter and spring. The roots may stay in the ground all winter.

Bond's Wisconsin Salsify is the richest in soup-making qualities, far exceeding the old varieties in this respect, and possesses a fine nutty flavor so much relished. The roots grow to a very large size.

PRICE.—Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c.

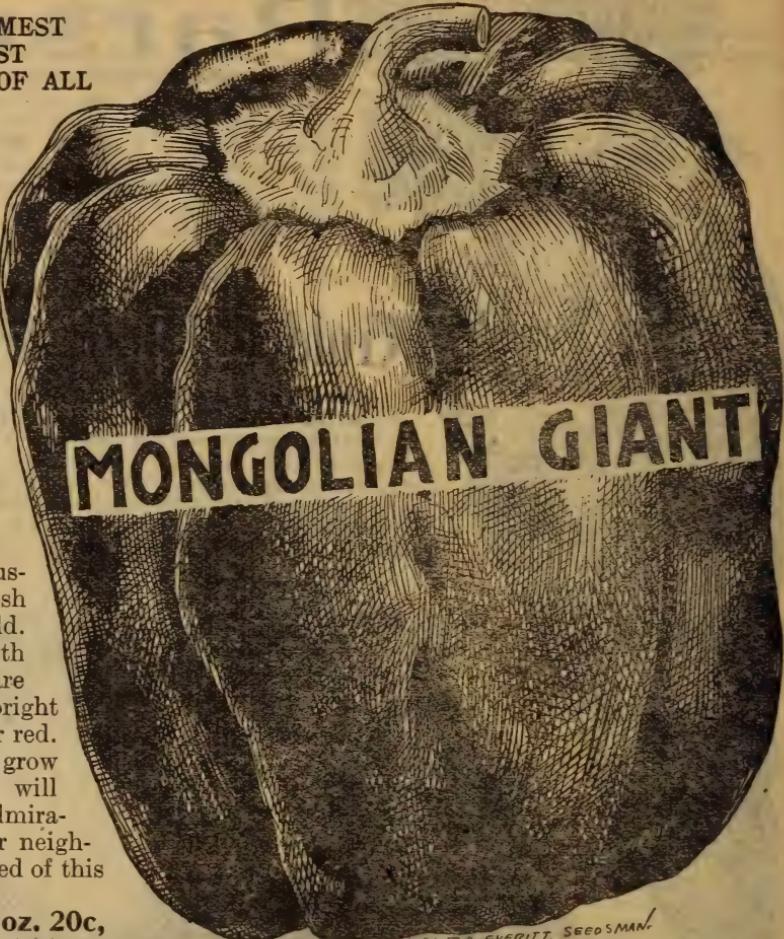

**The Real Giant  
Of Peppers.....**

# Mongolian Giant

HANSDOMEST  
FINEST  
LARGEST OF ALL

This is certainly a wonder and a giant vegetable production. The plants are very strong, grow  $1\frac{1}{2}$  to 2 feet high, with beautiful foliage. The shape of the fruit is shown in the illustration. The flesh is thick and mild. For filling with cabbage they are grand. Color bright glossy scarlet or red. If you want to grow something that will command the admiration of all your neighbors, procure seed of this Giant Pepper.

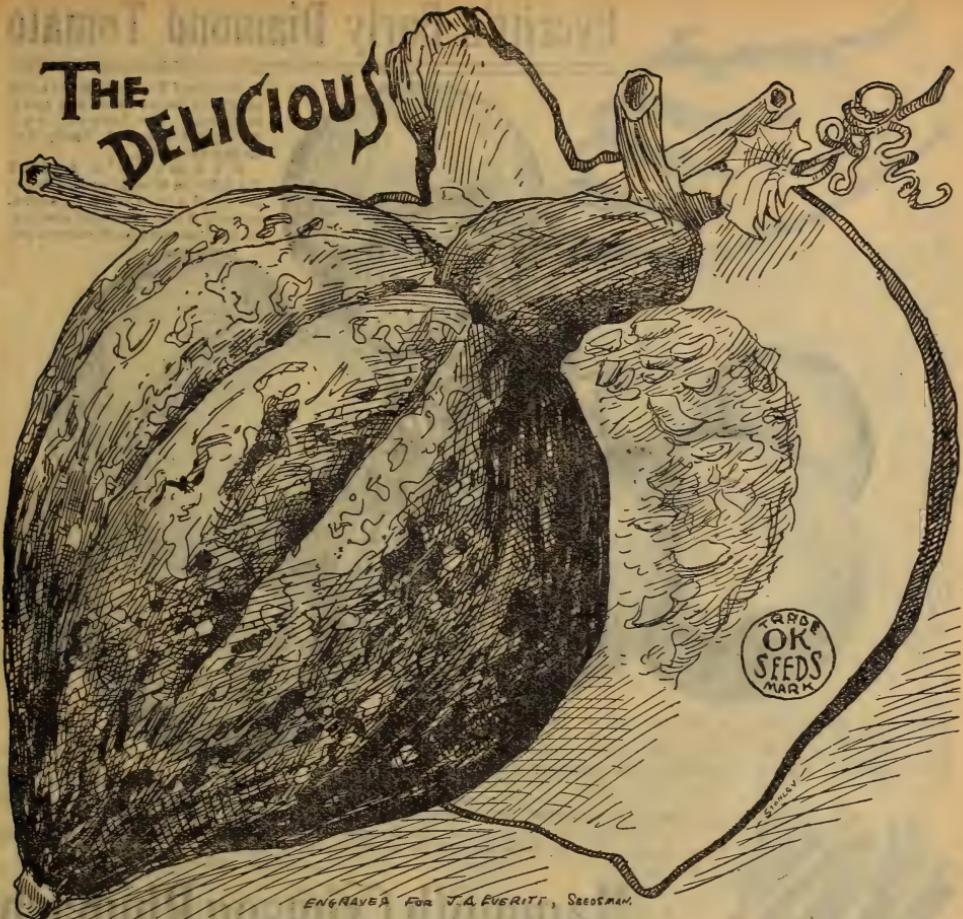

Pkt. 10c,  $\frac{1}{4}$  oz. 20c,  
oz. 60c.

## New Triumph Radish

A beautiful, delicious and profitable new radish for forcing or open air culture. The roots are globe-shaped, with stripes of bright scarlet on a white skin. The tops are so small that close planting may be practiced. The flesh is tender, mild, juicy and sweet, making it a very desirable table radish. Its peculiar beauty gives the Triumph Radish an unusual value to market gardeners, and I recommend it for universal trial. It grows easily and quickly. It is certainly a striking and valuable novelty. Pkt. 10c, oz. 15c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

ATTENTION LADIES:--See an offer that will interest you immensely on 3rd and 4th Cover Pages.

ENGRAVED FOR J. A. EVERETT, SEEDSMAN.

# Delicious Squash

**A** DISTINCT NEW VARIETY. Your planting will not be complete without it. If any one asks why this name was given to this new Squash the answer would be, "because this is the one adjective most frequently used to express opinions of its quality." The Delicious is the product of the work of years in careful selection, crossing and isolating. About every variety enters into its composition, among the least desirable of which were several kinds of yellow and the large Brazilian blue varieties. For years careful breeding has been practiced to weed these out, at the same time selecting by the test of cooking the richest among the class bearing a green color. These were crossed on the Hubbard. From the resulting cross selections have been made each season for seed stock, the thickest-meated specimens and the very best for quality. The final result is a squash that by universal agreement of those who have tested it, in quality surpasses every one of the fine varieties in cultivation, including the Hubbard, Marblehead, Butman, Chester, Warren, Victor and Golden Bronze. Not even excepting the Hubbard itself, as it was a quarter of a century ago when at its best. In form the Delicious ranges between the two examples given above. Its color is almost uniformly of a green shade, with occasionally a blue specimen, it being just about as pure in this respect as was the original Hubbard. In size it also closely follows the original Hubbard, which weighed between 5 and 10 pounds. In thickness of flesh it surpasses nearly every variety. The color of flesh is a dark orange. For table use no squash compares with it in its remarkable combination of fineness and compactness of grain, dryness, sweetness and exceeding richness of flavor. It is a fall and winter squash, excellent at all seasons, but like the old Hubbard, though at any time excellent, does not acquire its best quality until winter. When but half grown it will be found to surpass in quality most varieties when fully ripe. *The best specimens will be found fully equal to other squashes that have had the addition of sugar, eggs and milk and been made into a squash pie.*

Don't omit it from your order. Price—pkt. 10c, 3 for 25c, oz. 25c,  $\frac{1}{4}$  lb. 75c.

# Everitt's Early Diamond Tomato

They have few Seeds, bear in large clusters and are an enormous cropper. They begin to bear very early and longer than any other variety we know of. The vines grow until they

attain very large size. We had one patch last season that bore marketable tomatoes every day from July 1st to Sept. 1st. Brightest scarlet color. This tomato will please everybody by its many good qualities—earliness, size, solidity, weight, appearance, productiveness and con-

tinuous bearing. We don't know where another tomato can be found that in all these qualities near approaches Everitt's Early Diamond. The supply is limited.

**PRICE**—Pkt. 10c, 3 for 25c,  $\frac{1}{4}$  oz. 35c, oz. \$1.25.  
**NOTE**—This is one of the things that should be included in every order, and orders should be sent early.

## Mammoth Crimson Rhubarb

The market gardener who is within easy reach of a good market will find Rhubarb one of the most profitable crops to grow. It is one of the first to bring money. The most difficult problem to decide when starting to grow this crop is the variety to cultivate—the one that will prove most profitable. A peculiarity of this crop is that the seed cannot be depended upon to procure identically the same kind as the parent stock, while eyes, roots or buds will.

We have secured from an extensive grower of Rhubarb for market a stock of his choicest kind, the Mammoth Red or Crimson, which is the best for main crop. It is noted for its strong growth, large stalks and consequent great productiveness, as well as excellent quality.

**40c** We sell roots of this variety only at \$1.00 per dozen, by mail postpaid; half dozen 50c. By freight or express, 65c per dozen for large roots.

# SPARK'S EARLIANA TOMATO

The earliest large Tomato in the world. The engraving below was made from a photograph of a single vine and is as great a reproduction as it was possible for the artist to make. Very early, good size. Large tomatoes are always the most profitable for the gardener, and this variety is fully two weeks ahead of any other variety. We believe no other Tomato ever introduced has proved so valuable as will the Earliana. It is large size, smooth, handsome, beautiful red color and fine quality. Followed by Everilt's Early Diamond they make a team that can not be outstripped. Price, 35c.  $\frac{1}{2}$  oz. 20c. oz. 35c.

## TESTIMONIALS

I realized \$750 on less than two acres of Earliana. Jos. SMITH, Flemington, N. J.

I realized \$725 on about 4,000 hills of Earliana Tomatoes in 1890, the first year. I marketed them. GEO. W. SPARKS.

Earliana is the earliest, most solid and best Tomato I ever saw. I counted 72 well-formed tomatoes on one plant, and not less than 40 on any. S. E. TRISTRAM, Milford, Conn.

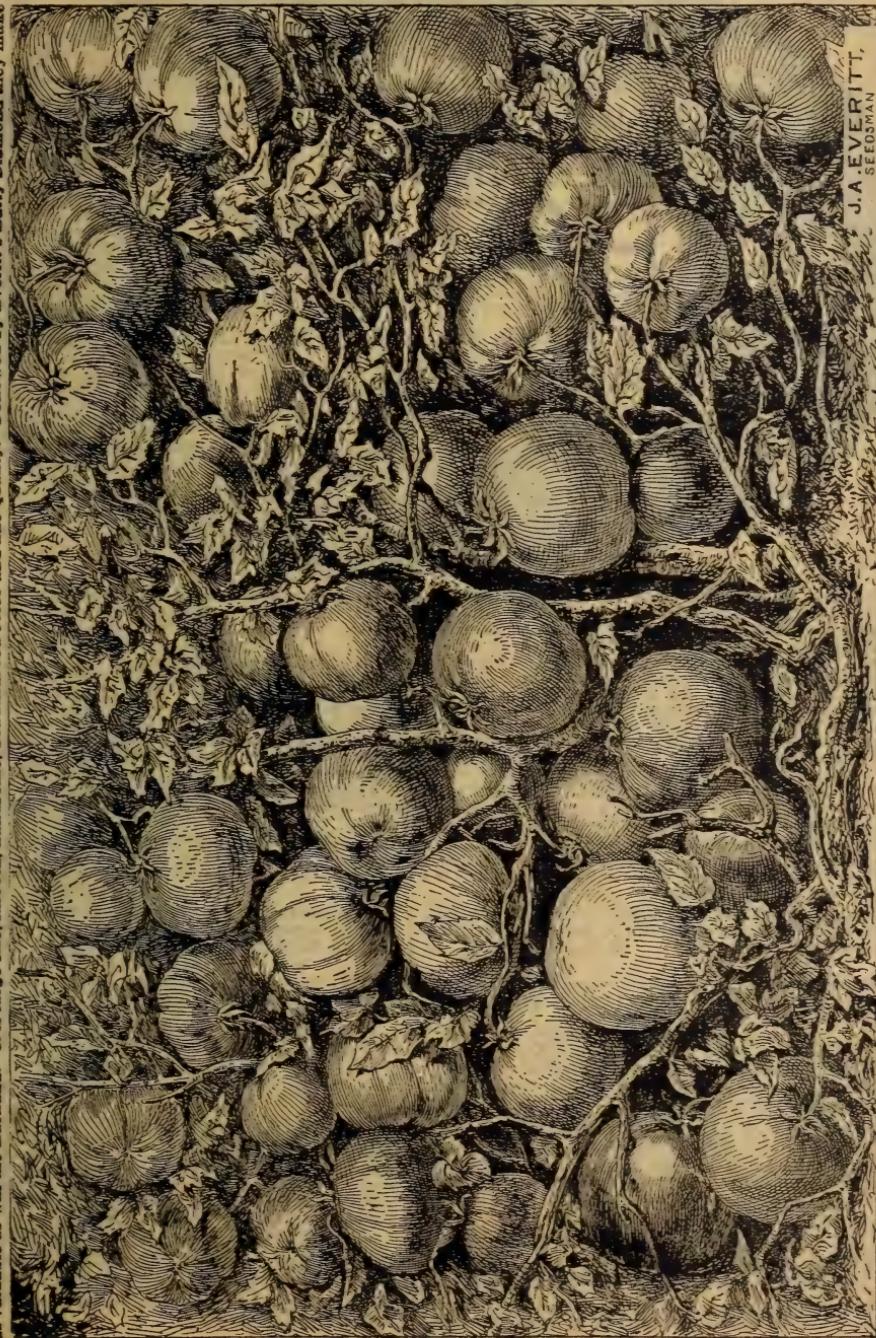

Earliana is the greatest tomato novelty of the century; earlier than any other; yields three times as much. It is superb. JOHN W. MILLER, Bismarck, N. D.

Earliana is by far the earliest, largest and smoothest. My tomatoes were on the market away ahead of others. WALTER M. SMITH, S. Meriden, Conn.

Earliana is a great success. First in market. F. SCHREIBER, Elizabeth, N. J.

Beyond all comparison in earliness, size, productiveness. R. TRIMMER, Gosden, Ind.

J. A. EVERILT,  
SEEDSMAN

THE BEST MEDIUM LATE, MAIN CROP POTATO RECENTLY INTRODUCED.

# EVERITT'S ABUNDANCE

A Potato that is the logical candidate to fill the needs of potato growers in the cycles of passing years. It will take a place with such great and valuable varieties as Peachblow, Early Rose, Peerless, Green Mountain, Rural New Yorker, Carman No. 3 and Sir Walter Raleigh. It comes at a time when the need is felt to take the place of the waning, older varieties.

A MARVEL  
IN YIELD EVERITT'S  
ABUNDANCE A MARVEL  
IN QUALITY

## POTATO

PRONOUNCED BY ALL A PERFECT  
WONDER. THE COMING POTATO.  
GET SEED NOW AND REAP THE BIG PROFITS.

A MARVEL  
IN VIGOR INTRODUCED  
1905 A MARVEL  
IN BEAUTY

Everitt's Abundance Potato was sent out last season in an introductory way under the name of Up-to-Date No. 1, with the explanation that its permanent name would be given it this year. This notice will be sufficient for the hundreds of our customers who have made inquiry about the name, and we trust all will be pleased.

The name was suggested by Phillip Masson of Mercer, Pa. As the burden of all reports received was the great yielding propensities of the variety we thought proper to name it ABUNDANCE.

The Potato is medium late or a main crop variety. The tubers have white skin and very white flesh, grow medium to very large, but always sound to the center and never misshapen. It is particularly remarkable for the great number of marketable tubers of a good size produced. See the reports below. The size and shape suit the exacting housewife who wants neither small nor mammoth tubers. The shape is round to oblong, smooth, eyes lie very even with surface. Very handsome in appearance and superior in table qualities.

Potato growers will gain nothing by waiting until others try Everitt's Abundance. They have been tried and not found lacking. Also if they wait until they come into general cultivation they will lose several years that they might be profiting by this superior yielding variety. While the price is high this year the investment will surely be very profitable. Even a start of a peck or half bushel will quickly give you plenty to plant and to sell to your neighbors for seed at extra prices.

Read the following reports carefully. Remember each person had  $\frac{1}{2}$  lb. Notice the yield in number of Potatoes, in pounds, and the size of the Potatoes reported. Do you call to mind any other variety that would have done as well? We have a great many more reports but lack of space prevents printing them.

From the two small potatoes I planted 20 hills and raised 125 large potatoes and 30 smaller ones. The largest weighed  $1\frac{1}{2}$  lbs. C. B. CRAWFORD,  
Mildred, Mo.

From two premium potatoes I raised 65 lbs. One hill yielded 9 lbs., another 7 lbs., and the average was 4 lbs. to the hill. One tuber weighed 3 lbs. B. F. NORTON, Niobrara, Neb.

The Premium Potato is dandy. The  $\frac{1}{2}$  lb. of seed yielded me  $10\frac{3}{4}$  lbs. of as fine potatoes as you would wish to look at. I want you to call them J. A. EVERITT'S ABUNDANCE. I think this will be a very good name, and if the Potatoes do as well for the farmers as Mr. Everitt is doing, won't we be happy?

PHILLIP MASSON, Mercer, Pa.

[We have acted on Mr. Masson's suggestion in naming the Potato. J. A. E., Seedman.]

From the two potatoes I grew 105 tubers on not very rich soil. I think they are up-to-date.

W. M. G. CORRY, Marysville, Mich.

PRICE—By mail, postpaid, 1 lb. 50c, 3 lbs. \$1.00; by freight or express  $\frac{1}{2}$  peck 75c, 1 peck \$1.25,  $\frac{1}{2}$  bu. \$2.00, 1 bu. \$3.50, bbl. of  $2\frac{1}{2}$  bu. \$7.50.

The head of our house started this seed business with one pound of a New Variety of Potatoes. The cost was \$1.00. EVERITT'S ABUNDANCE is a better variety.

# Everitt's United States and Canada... OATS

## THE IDEAL OATS FOR AMERICAN FARMERS.

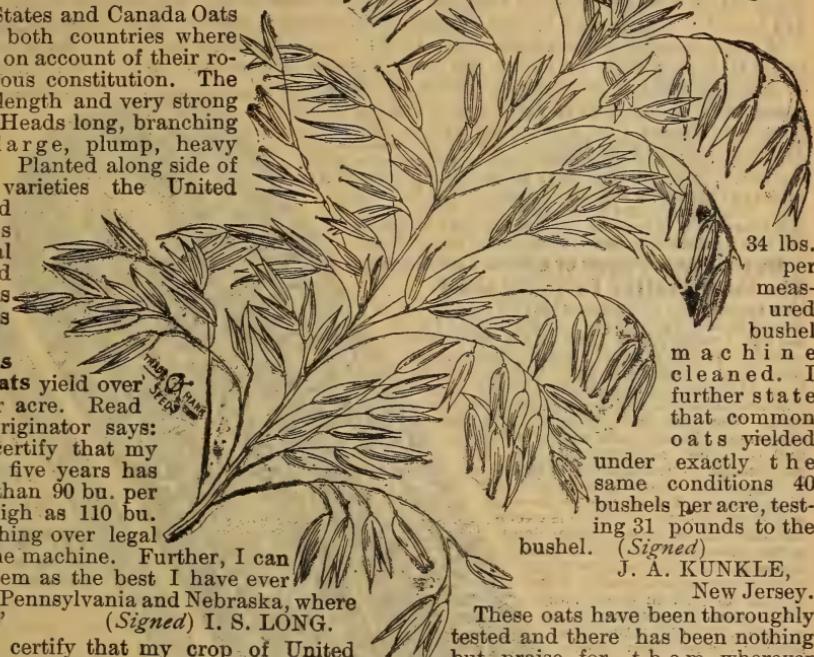

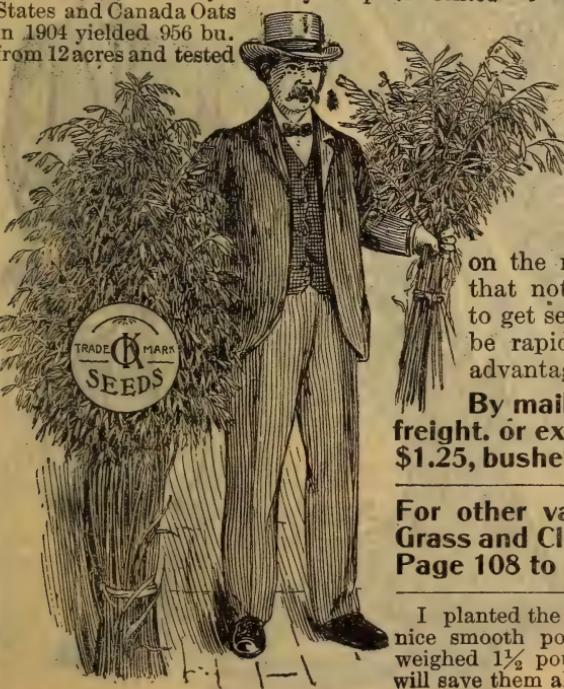

Early enough and productive enough to make oat-growing more profitable wherever they are sown.

The United States and Canada Oats are suited for both countries where oats are grown on account of their robust and vigorous constitution. The straw is good length and very strong to stand up. Heads long, branching loaded with large, plump, heavy white kernels. Planted along side of other good varieties the United States and Canada Oats matured several days earlier and yielded twice as many bushels per acre.

**United States and Canada Oats** yield over 100 bushel per acre. Read what the originator says: "This is to certify that my yield covering five years has not been less than 90 bu. per acre, and as high as 110 bu. per acre, weighing over legal weight from the machine. Further, I can recommend them as the best I have ever grown, both in Pennsylvania and Nebraska, where I have farms."

(Signed) I. S. LONG.

"This is to certify that my crop of United States and Canada Oats in 1904 yielded 956 bu. from 12 acres and tested

34 lbs. per measured bushel

machined cleaned. I further state that common oats yielded under exactly the same conditions 40 bushels per acre, testing 31 pounds to the bushel. (Signed)

J. A. KUNKLE,  
New Jersey.

These oats have been thoroughly tested and there has been nothing but praise for them wherever grown. This is the first year of their general introduction. Purchasers this year will have no trouble to sell all they raise for a couple of years at fancy prices for seed purposes.

**We want each purchaser to report yield when threshed.**

**PRICE:** The supply of these Oats is very limited. We have only 800 bushels all told to put on the market. Therefore it is evident that not many oats-growers will be able to get seed and their propagation will not be rapid. This fact, however, is to the advantage of the wise, first purchasers.

**By mail 1 lb. 30c, 4 lbs. \$1.00. By freight or express  $\frac{1}{4}$  bushel 75c,  $\frac{1}{2}$  bushel \$1.25, bushel \$2.00, bag of 3 bushel \$5.00.**

**For other varieties of Oats, Seed Corn, Grass and Clover Seed, Seed Potatoes, see Page 108 to 139 inclusive.**

I planted the half pound of potatoes and dug 95 nice smooth potatoes, weighing 46 lbs. The largest weighed  $1\frac{1}{2}$  pounds. I am pleased with results and will save them all for seed. CHAS. W. DANIELS,  
Burdett, N. Y.

# 1905 New Yellow Corn 1905

## Co-Operating Farmers' Corn

One of our greatest specialties is choice improved varieties of seed corn. We need not explain what we have done in this line except to refer to the department of seed corn on pages 119 to 127 inclusive and to our customers in **Every Country** of the **Great Corn Belt**.

We are located in the heart of the U. S. Around Indianapolis are large agricultural districts that may truly be called the garden spots of the state and of the country. Indiana is famous for her corn crops which are fine and great because more care has been given to breeding corn in Indiana than in any other state in the country. This is in evidence when Indiana varieties of corn are put in competition with any other corn in the country or in the world. Note the fact that Indiana Corn won first prizes at Chicago in 1895, at Paris in 1900, at St. Louis in 1904. The particular variety that won these prizes is our **Farmer's Interest**. Also it has won innumerable first premiums at State, District and County Fairs.

### But we now Speak of a New Candidate, The Co-Operating Farmers' Corn.

This yellow corn will unquestionably take its place among Yellow Varieties as our **Farmer's Interest** has among white. This is a thoroughbred variety. It has a large, slightly tapering ear, well filled at butts and tips. The ears range from 9 to 12 inches long,  $7\frac{1}{2}$  to 8 inches in circumference and weigh from 12 to 17 ounces each. The ears have from 16 to 20 rows of kernels. The kernels are broad, deep and thick, cob red, medium size. The percentage of grain to ear is large—80 to 90 per cent—stalks grow 9 to 12 feet high, large and stocky below the ears and small above. Fodder is excellent and will be prized for ensilage as the leaves are large size, numerous and sweet from the sugar in the leaves and stalk. This corn is very rich in protein and oil, making it unsurpassed as a feeder, in fact it is the ideal feeding corn, four bushels equaling five of corn ordinarily grown. Matures in 110 days, suited to a very wide range of latitude. We recommend a start of it, as a trial necessary to show all its fine qualities. Price

# GINSENG

The CROP that is  
Worth its Weight in  
Silver.

## \$25,000 From One-Half Acre of Ground

BECAUSE OF THE EXCEEDINGLY great profit in Ginseng Root growing, this crop is attracting great attention. True, the planter must wait quite a time for the large root if he sets plants, although it is not necessary to wait for full-grown root before marketing. The immense value of the harvest, however, is attracting many people into the business. Contrasted with growing cabbage, potatoes, or any of the usual farm or garden crops the grower can well afford to let the time pass around: It may be wise for those who have the money to spare to go into the cultivation on a large scale, as an investment. We expect, however, the best way will be to start on a comparatively small scale.

That Ginseng root can be successfully grown under cultivation has been demonstrated, and it can be grown almost anywhere in the United States by giving it the proper condition of soil, which is new ground (or supplied with leaf mold), and condition over the soil, which is shade. It will be impracticable to give full directions for the cultivation in this catalogue, but we will send a book on the industry, postpaid, for 25c.

The Pennsylvania Experiment Station has made an experiment with Ginseng that seems to demonstrate the fact that with the necessary conditions all carefully observed, Ginseng culture can be made enormously profitable.

W. A. Bates, of Cuba, N. Y., makes Ginseng growing a business. He is now harvesting a crop that will net him over \$2,000.—Buffalo (N. Y.) Times.

Two farmers, George F. Langworthy and his son, residing in Weaver, have raised a \$15,000 crop of Ginseng on one-third of an acre. The plant is raised in beds, each three feet wide and covered with lattice-work to give shade.—Rochester (N. Y.) Democrat-Chronicle.

I raised Everitt's Six Weeks Potatoes for four years, and last year I didn't plant any potatoes, so lost my seed. I think it far ahead of anything I have ever seen for table use, being dry and more mealy and fine flavored. I find it to be an excellent keeper, remaining hard and brittle until spring. One year I had new and old potatoes on the table the first of June. I find this potato so early, vigorous and strong, and is under such headway when the bugs arrive that they do but little damage to them. P. N. BLACKBURN, Oolitic, Ind.

Enclosed find another order for O.K. Seeds. Yours are the best seeds I ever used. I have used them four years and never failed to have a good garden. I think every seed comes up. I raised some Giant Climbing Tomatoes that weigh 2 lbs. each. I gave a neighbor some plants and he raised some  $2\frac{1}{4}$  lbs. The Houser Cabbage is fine. Pedigree Stowell's Evergreen Corn cannot be excelled. My neighbors have been planting cheap collection seeds, but they will send for the O.K. Seeds next season. My son Roy is a subscriber to Up-to-Date Farming.

MRS. ROBT. YOUNG, Turnersville, Ark.

Your Logan's Giant Tomato and Lupton Cabbage have proved to be far superior to any others I have ever raised. A. M. TATHAM, Egvile, Tenn.

I have been planting O.K. Seeds several years and they are all right. I could never raise good Cabbage until I got the O.K. Seeds. All Head Early and All Seasons I planted and now I raise as fine Cabbage as anybody. JOHN M. JAENYES, Shinnstown, W. Va.

a. root 1 year old, b. 2 years, c. 3 years, large root 4 years.  
Reproduced from Dept. of Agriculture Bulletin No. 16.

## PRICE DELIVERED

	PER 10	PER 100	PER 1,000
Third Size, avg.	1yr. Plants	\$1.50	\$ 9.00
Second Size, avg.	2yr. Plants	2.00	15.00
Third Size, avg.	3yr. Plants	2.50	20.00

Just received your catalogue of O.K. Seeds, I will make my selections from it, and it makes me feel that I will have a good garden this year again. I have never had a failure with O.K. Seeds. I have never had a failure with O.K. Seeds. They always give the best satisfaction of any seeds I ever tried. I can't say too much for them. R. R. JONES, Alma, Kas.

## BINDER TWINE

Do you use it? If you do, buy now and save money. We will sell you high-grade Standard Twine—as good as is made—at 10 $\frac{1}{2}$  cents a pound f. o. b. Indianapolis. Compare this with what you usually pay and what you will pay if you wait until harvest time. We guarantee it. If it is not all right and smooth and perfectly satisfactory we will take it back and refund all your money. Include your supply in your seed order. Price will be higher later. J. A. EVERITT, Seedsman, Indianapolis, Ind.

# Strawberries

**CULTURE.** Strawberries require very rich soil and good cultivation while growing. When plants are received, dip the roots in water, taking care not to wet the leaves or crown.

Set the plants out in rows 2 or 3 feet apart and 15 inches in the row, using care that the crown of plant is set above the earth; press the soil firmly about the roots so as to exclude all air. In December cover the whole bed with straw about one inch deep, and in March uncover crowns of plants.

Oom Paul.

**Oom Paul** Per. This new strawberry is the record breaker for size (six berries filling a quart measure). Origin of parentage, Jessie and Bubach No. 5; size, stupendous; flavor, delicious; color, elegant; with fine shape and the best of shipping qualities. It is very prolific, a rank grower, and the last picking never runs small. One hundred and forty quarts were picked from two hundred and eighty Oom Paul Plants at one picking. Make money by growing the Giant berry.

## SPECIAL PRICES ON 5,000 LOTS. 500 AT 1,000 RATES.

**NOTICE.**—The blossoms of those marked (Imp.) are destitute of stamens, and are termed "Imperfect," and unless a row of a perfect-flowering variety is planted every fourth row, they will produce imperfect fruit and but little of it, but when fertilized they are more prolific than those with perfect flowers.

I will try and tell you as best I can about how the seeds I got from you done. The Corn did very well, considering the dry year and ground on which I planted it. I planted it about 10 days after I planted the other Corn and it got ripe as soon as the other did. I am going to plant more this year, and give it a better chance. It makes as fine meal as I ever saw.  
 Yours truly, L. L. LEMON, Mitchell Co., I.T.

Having used your O.K. Seeds for years, I can recommend them above all others I have ever used.

H. G. HARRIS, Ambrose, Ky.

I bought and used one of your Man-Weight Machines in my onion field this season and must say that the work done with it equals the work that 10 men could do by hand. It is a great machine and I will want 5 or 6 of them next season when I intend to put out 12 acres of onions for sets.

W.M. G. TILTON, R. R. 1. Gallaudet Marion Co., Ind.

We have grown your Farmer's Interest Corn for several years. Last Fall we exhibited at the Peoria Corn Exposition and won a premium. In a shelling contest we won first prize—89 lbs., from 100 ears besides 2½ lbs. shelled off in the sack which was not counted. C. R. STEVENSON, Cuba, Ill.

Your Man-Weight Cultivator received. I find it to be the best labor saving machine I have ever seen or tried. My garden is on a hillside but I have no trouble to cultivate it perfectly. I would not try to farm without your Man-Weight Machines.

HUGH PORTER, Dudley, Idaho.

I have bought and used your O.K. Seeds for ten years with perfect satisfaction.

C. V. FOSTER, Hockingport, O.

I have bought and used your O.K. Seeds and always found them first-class. I always have confidence in what you say.

J. R. DRAWBAUGH, Entleville, Pa.

# Mammoth White French Artichoke

A Great Hog Food and Sure Preventive of Cholera. Yields 600 to 1,000 Bushels Per Acre. Grows on Waste Land.

PLANT EARLY IN SPRING. CUT SMALL LIKE POTATOES. PLANT 18 INCHES APART IN ROWS 3 FEET APART. ABOUT 6 BUSHELS TO THE ACRE.

The loss to farmers from hog cholera alone every year amounts to millions of dollars. The most certain preventive, and at the same time the least expensive, while it furnishes a wholesome and valuable food, is a crop of our **Mammoth White French Artichokes**.

## SURE PREVENTIVE OF HOG CHOLERA

*No farmer who raises hogs should let another year pass without providing a patch. They surely prevent cholera and in this way are worth many dollars. A couple of dollars invested in Artichoke Tubers may save many farmers from bankruptcy.*

E. F. BROCKWAY, of Iowa, says: Since I have been raising artichokes my hogs have been repeatedly exposed to cholera and they have kept healthy, and I feel that I can defy cholera.

J. D. WASHINGTON, of Missouri, says: Artichokes are the cheapest hog food I ever saw, and a sure preventive of cholera.

HON. JOHN D. GOODING, in *American Agriculturist*, says: For a conditioner, I would not give artichokes for all the hog medicine in the kingdom.

ROBT. RIDGEWAY, Miami Co., Ind., says: I have grown artichokes for years and would not think of discontinuing them while I raise hogs. They are a great preventive of cholera.

G. W. LUPKINS & SONS, Boone Co., Ind., say: We have not lost a hog by cholera since we raised artichokes, while it has carried many off all around us. We can not recommend the Mammoth White French Artichoke too highly as a hog food and cholera preventive.

**Every testimonial is genuine. We do not give full address, because that would sell their crops to our loss.**

Every evidence is in favor of this crop as a cholera preventive. The wonderful productiveness and ease with which Artichokes can be produced is always a surprise to those

who cultivate them for the first time. Hogs not only grow rapidly, but fatten on them. The hogs harvest them themselves, thus saving all expense, even that of feeding. Rooting is natural and healthy for hogs, but they won't root unless there is something for them to root for. Freezing and thawing does not injure them, and hogs will feed themselves till late in the spring, except when the ground is frozen solid. Ground too wet for general farm crops will produce good crops.

Price—By mail, postpaid, 1 lb. 25c, 4 lbs. 75c. Freight or express,  $\frac{1}{4}$  bu. 40c, 1 bu. \$1.25, per bbl. of 3 bu. \$3.50. **Green Globe Artichoke** The flower head is the part used. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 85c, 1 lb. \$3.00.

## ASPARAGUS

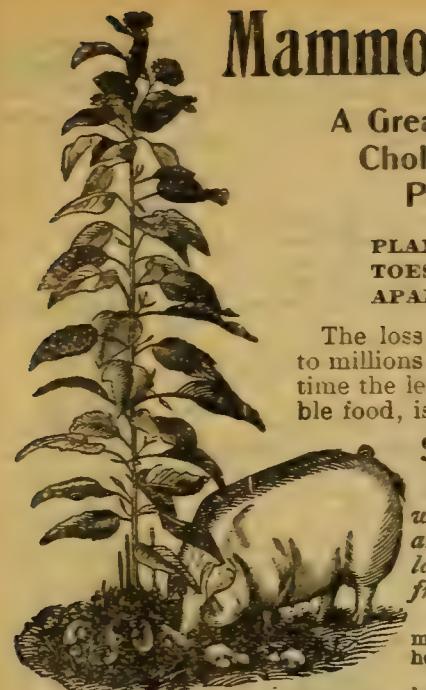

One oz. of seed sows 60 feet of drill—2 lbs. per acre. Read *Up-to-Date Farming* (50 cents a year) for full information about cultivating.

**Columbian Mammoth White** Is a sport from Conover's Colossal. The shoots are pure white, and they remain so as long as fit for use. It is among Asparagus what the self-blanching varieties are among celery. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1 lb. 70c.

**Conover's Colossal** A splendid old variety. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, 1 lb. 65c.

**Asparagus Roots** Any variety at extremely low prices. as follows: Two years old, by mail, doz. 25c; 50, 40c; 100, 75c. By freight or express, 100, 60c; 1,000, \$5.00.

FOR 50 CENTS WE WILL SEND A BOOK GIVING FULL PARTICULARS ABOUT CULTIVATING AND MARKETING ASPARAGUS.

# BEANS

## BUSH OR DWARF

### WAX PODDED

**PRICES OF WAX BEANS BY MAIL:** Pkt. 8c, pt. 25c, qt. 45c. If not by mail deduct 8c per pint, 15c per qt. Our pts. are of large size.

**Davis Kidney Wax** Has a clear white seed. It is rust proof and so productive that a field viewed from a distance shows more yellow from the pods than green from the leaves. Pods are always full of large white beans, early as Golden Wax, of exceptional value. Peck, \$1.75.

**Golden Wax (Improved Rust-Proof Strain.)** Pods long, thick and rust-proof. Much excels the old Golden Wax in yield and is of better quality. Peck, \$1.75.

**Wardwell Kidney Wax** Very early. Stalk erect. Pods long, broad, flat, brittle, stringless. Delicate waxy color. Peck, \$2.00.

**Prolific Black Wax** One of the first to produce a full crop of pods. Pods large, good color, stringless and of superior quality. Peck, \$1.75.

### GOLDEN CROWN STRINGLESS WAX

A new long white bean, with very round golden pods and perfectly stringless. This will prove one of the most popular and desirable of wax varieties. Its enormous yielding characteristics, beautiful appearance, freedom from string, and its fine quality, will place it in the front rank with every grower and dealer. The plants are not only a mass of pods in the center, but spikelets, bearing from four to six long pods each, are borne above the foliage, entitling it to the name of Golden Crown. It is *very early*, free from pod rust and blight. As a dry bean for the produce trade it will be found of great value, grading as medium sized White Kidneys, and of the finest table quality. Pkt. 10c, pt. 30c, qt. 50c, by Mail. Peck, \$2.00.

### GREEN PODDED

**Prices of Green Beans, by Mail, pkt. 8c, pt. 25c, qt. 40c.**

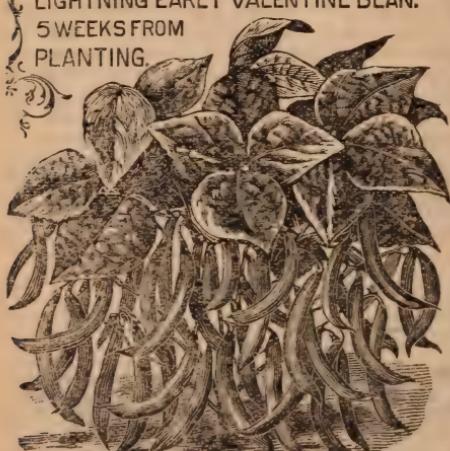

**Imp. Early Yellow Six Weeks** Well-known old sort. Must be used when young, as pods soon become tough. Peck, \$1.40. Bu. \$5.00.

**Early Mohawk** An old sort, the hardest variety. Esteemed for first planting, as it will stand a slight frost. Peck, \$1.25. Bu. \$4.50.

**Best of All** Pods long, fleshy and entirely stringless. Very productive. *Very early* and bears a long time. Peck, \$1.40. Bu. \$5.00.

**New Extra Early Refugee** A selection from the well-known Refugee and is ready for the market about the time the ordinary Refugee is in flower. An immense yielder and sure to produce a crop in either wet or dry season. Best for pickling. Peck, \$1.40. Bu. \$5.00.

LIGHTNING EARLY VALENTINE BEAN.  
5 WEEKS FROM  
PLANTING.

### Lightning Early Valentine

The earliest snap sort in the country. The most profitable variety for market. This variety is well named, as it is lightning quick in ripening in comparison with any other bush beans. The pods are large, it is very productive, and, when young, nearly stringless. It cannot be recommended too highly to the market gardener as he derives his greatest profit from the earliest crop. With the Lightning Early Valentine you beat your competitor one to two weeks, which means many dollars in profits. Sure to give satisfaction. Peck, \$1.50. Bushel, \$6.00.

**Improved Early Red Valentine** So well and so favorably known as not to need description. More extensively grown than any other tender green pod Bush Bean. Peck, \$1.50. Bu. \$5.50.

### BOUNTIFUL GREEN POD, ABSOLUTELY STRINGLESS

The Bountiful Bean has absolutely no string and produces large and shapely pods. Most delicious and tender and remains so for a long time. It is very hardy, extremely early and exceeding productive. This bean will please everybody, whether for home or market. Pkt. 10c, pt. 30c, qt. 50c, by mail. Peck, \$2.25.

# BUSH LIMAS

**Burpee's** This is the true large Lima in bush form, and comes true from seed. The plant grows 18 to 20 inches high, branching so much that each bush is circular and 2 to 3 feet in diameter. Pkt. 10c, pt. 25c, qt. 45c, peck \$1.75.

**Dreer's** We recommend them highly. Very delicious flavor, medium size, wonder-

fully productive. Pkt. 10c, pt. 25c, qt. 40c, peck \$1.75.

**Henderson's** This was the first Bush Lima Bean offered. It is a very early variety and productive. It is largely grown as a field crop for dry beans, being a reliable and heavy yielder. A light soil, inclining to sand, suits them best. Pkt. 10c, pt. 25c, qt. 40c, peck \$1.75, bu. \$6.50.

We will sell one packet of each Bush Lima Beans for 25c.

## Pole or Running Beans

If pints or quarts are not sent by mail, deduct 8c per pint and 15c per quart from prices quoted.

**Lazy Wives** They are called Lazy Wives because they hang so full and the pods are so long and broad that a mess is soon picked. Pods green, wonderfully broad, thick, fleshy and entirely stringless. The peculiar taste and agreeable flavor of this Bean are so captivating that other varieties are not desired while the Lazy Wives can be obtained. Pkt. 10c, pt. 25c, qt. 45c.

### Early Golden Cluster Wax

It grows rapidly, bearing clusters of 3 to 6 pods of rich golden color. Pods average about eight inches in length, tender and entirely stringless. They continue to bear, if the pods are picked, until frost. Pkt. 10c, pt. 25c, qt. 45c.

### White Crease

**Back** For string beans it is simply perfection. Its handsome green pods grow from 5 to 6 inches long, perfectly round, with a crease in the back. They ripen extremely early and bear continuously all summer, the vines being loaded from one end to the other. Pkt. 10c, pt. 25c, qt. 45c,  $\frac{1}{4}$  bu. \$2.00.

**Kentucky Wonder** A very prolific sort, grows vigorously. Pods grow in large clusters, green, 9 to 10 inches long, nearly round; crisp and tender; excellent to grow in corn. There is more demand for this pole bean than for any other, which of itself is sufficient recommendation. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.75.

### Horticultural, Cranberry or

**Wren's Egg** A round speckled bean, used both in pods and shelled. Especially adapted to short season and cold soils. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.75.

### Early White Dutch Casedknife

Suitable for corn or for poles. Flat pods, tender when young; well filled with fine, large white beans. Excellent shelled for winter use. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.75.

**Red Speckled Cutshort** An excellent variety and particularly valuable for planting among corn. Vines medium, pods short, round, tender, succulent. Good green or dry. A wonderful yielder. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.75.

Plant O. K. Seeds and the Crop will be O. K.

## POLE LIMAS

*Lima Beans require very rich soil. Do not neglect this or you may be disappointed in results.*

**Price of Each—Pkt. 10c, pt. 25c, qt. 45c,  $\frac{1}{4}$  bu. \$1.75.**

**Large White** This well-known and delicious Bean is everywhere esteemed. Very large.

### King of the Garden

A magnificent variety in growth of vine and number and size of pods. Specimens have been grown over 9 inches in length, and containing 7 great large beans.

**Challenger** Have been constantly improved by saving beans from strongest vines and best-filled pods. They yield an amazing quantity of shelled beans.

### Seibert's Early

This variety was developed by a market gardener who selected the largest green beans from the thinnest and most easily opened pods. It produces pods very early. The green shelled beans are of immense size, but so tender and succulent that they shrink in drying to about the size of the Large White Lima.

## FIELD BEANS

**Plant 1½ to 2 bushels per acre.**

*The cultivation of Beans as a field crop is increasing. The varieties that we offer are the very best that can be grown.*

**Great Western** (The illustration was made from a photograph of a plant suspended by the root. This accounts for the position of some of the pods, which ordinarily would hang down.) Unusually early, productive, handsome, large, ivory-white seed. When other kinds fall down and spoil in a wet season, these stand up on a strong stalk. Will stand in the field after maturity longer than any other and not waste. The pods hang in clusters all over the top. The pods contain from 7 to 9 beans each, denoting a remarkably productive sort. They are the grandest field Bean of all, and surprise and please every grower. Pkt. 8c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.50.

**White Marrowfat** A standard field white, round seed. Pkt. 8c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.00.

**White Wonder** A very early field bean that can be planted on ground where other crops have been removed. It outyields the Navy on the same ground and under the same conditions. Seed is about the size of Navy. Pkt. 8c, pt. 20c, qt. 35c, peck \$1.25, bu. \$4.00.

**White Navy** The standard field bean. Pkt. 8c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.00.

# STRINGLESS GREEN POD

## NEW BUSH BEAN

Unquestionably the best stringless Green Pod Bean in cultivation. The pods are full, fleshy, crisp, tender and remain long in same green condition, even until the beans are large in them.

### IT IS EXTREMELY EARLY

This Bean is very prolific in number of pods, besides the pods are very large,  $5\frac{1}{2}$  to  $6\frac{1}{2}$  inches long and light green in color. We cannot recommend this Bean too highly, and our customers can not grow them too largely. Pkt. 10c, pt. 25c, qt. 45c,  $\frac{1}{4}$  bu. \$1.75.

# BEETS

One pkt. will plant about 15 feet of drill; oz., 50 feet; about 6 lbs. per acre.

## Early Othello

This very desirable variety will become very popular with the market gardeners who require a variety of the darkest color for their main crop. It is the result of a very careful selection of the finest formed and very darkest roots, having been annually selected for years for seed stock, and we venture to say that there is no Beet in this country *superior* to it for its dark, rich color, perfection of form or sweetness of flavor; foliage dark crimson. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

## Crosby's Improved Egyptian

Resembles Egyptian only in extreme earliness. The result of years of careful selection by a noted Eastern market gardener. The best Beet for forcing or for first sowing outside. It assumes its turnip shape in the early stages of growth, and on this account is preferable to other varieties requiring a longer time to obtain a marketable shape and size. Is of handsome form, not so flat as the ordinary Egyptian, not as round as the Early Eclipse; of good size, fine quality, dark blood red color, with very small tap root and few small tops. Per pkt. 4c, oz. 8c,  $\frac{1}{4}$  lb. 18c, lb. 50c.

If for any reason your seeds have not been satisfactory before, try O. K. SEEDS this year and you will have no cause for complaint.

## Improved Blood Turnip

A very fine popular sort. The result of years of careful selection, which has increased its size and made it earlier. Color rich, deep red; fine grain, solid. Excellent for all purposes. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Detroit Dark Red Turnip** One of the very best sorts for the market and home garden. Its small, upright top, early maturity and splendid shape make it popular everywhere. Flesh bright red, crisp, tender and sweet. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 60c.

the same, \$1.00, postage 10c extra, but see the special offer.

If I can get the people to read this book I know the work will be done. I appeal to every farmer and friend of farmers to help me to get the book into the hands of the people so they may be educated anew.

The education they have received through farm papers, farmers' institutes and institutions was in the interests of politicians, speculators, railroads and food trusts. "The Third Power" proves this statement and I defy successful contradiction.

When they read my book they will have a new understanding of agriculture and they will see possibilities in farming that they never saw before.

I will lose money selling a 320-page book on these terms and paying the postage. I figured on making some sacrifices when starting in this work and I am prepared to make them.

I have sacrificed much in time and money in the past and will sacrifice much more, knowing that it will be returned by a thankful people if they will only read "The Third Power," and

become new men and women in their understanding of agriculture.

I WILL GUARANTEE CERTAINTY OF PRICES AND PROFITABLE PRICES FOR ALL FARM PRODUCTS IF ONE MILLION PEOPLE WILL READ "THE THIRD POWER" BOOK.

This means about 40,000 people firing 24 shots each. The gun, already loaded, is on this sheet, and more will be provided on request.

Two objects should inspire you. One is the money you make. The other is the good you will do yourself and your brother farmers.

Send one of the coupons and 25c for a book at once to show in your canvass.

Hundreds of people can make from \$2.00 to \$6.00 a day. Send for all the bonds you can use. Start at once, while your field is unworked.

Merchants, manufacturers, bankers, professional men and all honest middle men want farmers to prosper and will help them to the front if they want to come.

They should read my book, so they

will be prepared to meet the new conditions when farmers come to the front. Fire some shots at them.

Remember, "The Third Power" will do the work, but the people must read it, the people must be educated anew. I guarantee "The Third Power" is worth more to any farmer or his children than a full term at an agricultural college while the old conditions prevail.

WILL YOU HELP TO GET IT BEFORE THE PEOPLE?

J. A. EVERITT.

#### WHAT IS THE THIRD POWER?

Read What They Say About It.

"It is an earnest argument for a higher appreciation of the dignity of agriculture as a vocation. \*\*\* It aims to give agriculture its proper place among the noblest of industries and enable farmers, by cooperation, to secure rights and benefits to which they are justly entitled."—Journal, Indianapolis.

"It shows an existing need of combination among farmers and outlines a plan which will lift farming to the same level with capital and organized labor; or make them the third power in the world. \*\*\* A million farmers may dictate their own prices. \*\*\* The arguments are presented

in a convincing manner, and all needed information is given."—Mahin's Magazine, Chicago.

"It shows that the farmers should organize not for political, but for business reasons. The assertions are not made modestly but boldly, and in language simple and strong."—The Advertiser, Newark, N. J.

"It emphasizes the power which lies in the hands of the farmer to-day, outlines the opportunities for him to place himself and his business in the highest position to which he is entitled, and also aid in giving a suitable recognition to agriculture as the third power."—Detroit Tribune, Detroit, Mich.

"The ideas that farmers should organize to protect and foster their interests are set forth and elaborated with great detail, and the effort is made to show that it would be perfectly practicable for the farmers to meet organization with organization, and so to become practical masters of the situation." \*\*\* Indianapolis News.

"It is apparently published in the interest of the American Society of Equity, though not in a narrow sense. It is a general plea for justice to the producer for what is important for man's material welfare."—Brooklyn Times.

"It is a book of interest to farmers all over the country. \*\*\* Its key note is co-operation is the life of trade. It aims to arouse agriculturists to turn over a new leaf. \*\*\* It is clearly, sanely and concisely written."—Buffalo Evening News.

"It is the most ambitious effort yet made as well as the most complete to show the benefits that will flow to farmers through organization. It is written with a thorough understanding of the subject in hand. The author has evidently thoroughly studied the subject in all its phases. \*\*\* In the space allotted for a review it would be impossible to set out even briefly the line of arguments followed, but we can say, without overstepping proper limitations, that the book is one that every farmer can read with profit."—Indianapolis Sentinel.

"The present discouraging conditions (of agriculture) are forcefully discussed; the benefits of industrial co-operation are clearly and logically presented, and the opportunity is given every farmer to throw off the rusty shackles of sluggishness and indifference, and assist in promoting one of the greatest and best movements of the age. The attention of every person in the country interested in agriculture should be directed to this work."—Albany (N. Y.) Times.

"It is issued as a protest of or for the farmers against the domination of non-producing classes in pricing farm products. \*\*\* It urges upon farmers the value of combination as a solution of the serious problems that affect farming. It reveals an extensive acquaintance with agricultural conditions, and urges upon the farmers the necessity of early and united action for their own benefit."—Seattle Times.

"It will doubtless have its effect in awakening the tillers of the soil to their possibilities."—Evening Telegram, Philadelphia, Pa.

"It is written for the furtherance of the interests of the farmer, and contains a solution for all the serious problems that affect farming. \*\*\* Every American farmer should read the book."—Tribune, Oakland, Cal.

"The author is evidently a sincere man and an active champion of the best interests of farmers. The book can be read with profit by those who are seriously considering the economic questions of the day."—Cleveland Leader.

"It ought to do much toward stirring up our American farmers to a sense of their power and responsibility as citizens of a republic and conservators of our liberties."—Louisville Times.

"It is a very forcible book, brimming full of sound and comprehensive arguments as to why farmers should band together in a powerful organization, which should be able to dictate the prices for their products, instead of, as now, being under the domination of non-producing classes. The author is a strenuous worker in the interest of farmers, and this forcible book undoubtedly will awaken a great deal of interest among them on this topic."—Mail Order Journal, Chicago.

"It is an interesting volume, devoted to propaganda work in the cause of agricultural co-operation. \*\*\* The author shows how far some farmers have gone along this road of co-operation, and what they propose to do to make themselves a united and important power in the industrial life of the country."—Albany (N. Y.) Argus.

"There is nothing altruistic and very little that is visionary about the author of "The Third Power," although largely in the nature of special pleading it is so clearly written, and its logic is apparently so sound, that it is a surprisingly interesting work, even if one does not happen to be a member of the class to whom it is primarily addressed."—Philadelphia (Pa.) Record.

# FORWARD MARCH

## A Million Strong

Is there any power on earth that can stand against the united force of one million farmers asking for equity in price of what is their own and which other people absolutely must have?

It is with mingled feelings of pride, at what has been accomplished, and responsibility for what remains to be done in the farmers' movement for controlled marketing and price making, that I enter the year 1905.

I intend to continue the battle for the farmers' freedom from the bad conditions that have surrounded their business until every enemy capitulates and every serious farm problem is solved.

As the founder of the only movement that can elevate agriculture on a level with the best of other business and bring farmers to the front, I realize the magnitude of the task before me and my co-workers of the National Union.

While the entire press of the country and institutions maintained in the interest of agriculture, are looking to the government for relief through regulation of trusts and corporations and greater power to the interstate commerce commission, we realize that farmers must depend on themselves.

If farmers have depended on the government these many years and their troubles grew worse, how can they expect relief from that source now?

But we will educate and organize the farmers until they are the greatest union on earth, as they are already the most numerous and richest class.

This can be done if they will read the only work ever prepared to educate them as to what agriculture in America ought to be and can be.

I refer to "The Third Power" book.

One year ago, when I published this book I dedicated it to "THE LARGEST CLASS, THE MOST DEPENDENT CLASS, THE HARDEST WORKING CLASS, THE POOREST PAID CLASS OF PEOPLE IN THE WORLD—THE FARMERS." And now I rededicate it to them by offering it on terms that should insure an unprecedented sale.

Through "The Third Power" I am prepared to hurl such a scathing fire of facts and truths in the enemy's camp, and hold out such hope to farmers, as the world never knew before.

Soon the voice of a million farmers will be raised as one voice against robbing commission men; unfair weighers and measures; unscrupulous mixers and adulterators; speculators, manipulators and gamblers in farm products.

This war against organized exploiters of products and consumers will bring all this great and powerful machinery "dead" against us, but we will have with us the farmers who are fighting for a living, fair wages and a profit equal to any other line of business.

GRAIN GROWERS, STOCKMEN, FRUITMEN, COTTON PLANTERS, POULTRYMEN, GARDENERS, TRUCKERS, TOBACCO GROWERS, SUGAR BEET RAISERS, and all classes of farmers use the weapon I provide on this sheet, and fire twenty-four shots for education in controlled marketing and profitable prices.

All that is necessary to bring farmers to the front, elevate agriculture above every other industry and make farming the preferred profession, is a new education.

Everything is made clear in the book, 'The Third Power.' It now enters on its third edition. It has been enlarged from 275 pages to 320 pages. The appendix contains much new and valuable matter. The price remains

ONLY 25 CENTS POSTPAID. Regular price \$1.10 postpaid.

## THIRD POWER BOND

### For a Million United Farmers

THIS BOND is worth Six (6) Dollars cash in gold or its equivalent subject to the conditions printed below. Each of the Coupons attached is worth Seventy-five (75) Cents as payment on a cloth bound copy of the the third Edition of The Third Power book containing 320 pages. The person who possesses this bond is authorized to sell the Coupons at a special price of Twenty-five (25) Cents each and retain all the money. The amount will be Six Dollars (6.00) if all are sold. Or if not convenient to sell all of them, sell what you can. Or if preferred, they may be given away.

We are determined to place a copy of The Third Power book in every farmer's home in the United States and Canada. All that we ask you to do is to fire 24 shots for better conditions on the farm by placing these 24 Coupons with good people and urging them to use them.

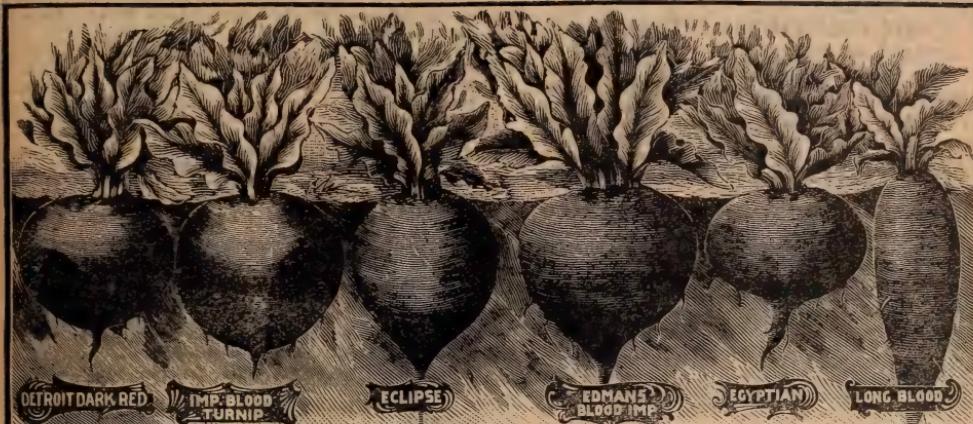

Don't lose this bond, don't transfer it, don't give it away. It is worth Six Dollars, which we are willing to pay you for services rendered. Keep it in your pocket. You can sell a coupon or several of them almost anywhere and any time.

**Extra Early Egyptian** Ten days to two weeks earlier than the Blood Turnip. Of fair-quality, medium size; fine for forcing. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Long Blood Red** One of the finest Beets for winter and spring use, also on account of its great productiveness; very valuable to grow for cattle. Sweet, crisp and tender; color rich red; withstands drought. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Edmand's Turnip** A selected strain, very uniform and even in type; flesh deep blood red, exceedingly sweet and tender; of good market size. It is very early, and for the marketman's use is justly popular and much called for wherever it has been sold. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

## SUGAR BEETS

### Kleinwanzlebener

This is the variety of Sugar Beet which analytical chemists, both of Germany and this country, have united in recommending as possessing the highest sugar-producing qualities. These scientific investi-

18 Tons  
of Sugar  
Have Been  
Made  
from  
100  
Tons of  
Roots

gations have been fully sustained by the practical results of sugar making in the factories. As much as 18 tons of sugar have been made from 100 tons of roots of this variety. It is endorsed and recommended by Department of Agriculture at Washington.

Pkt. 4c,  
oz. 8c,  $\frac{1}{4}$   
lb. 15c, lb.  
35c. By frt.  
or exp. 25c per lb.

**BUY YOUR SEEDS BY MAIL**—It is all right to buy sugar, soap, nails, etc., at your local store, but it is all wrong to expect to get living, vital seeds there. They do not and cannot live under the conditions found in the average grocery store. Such seeds frequently lose you a crop, but O. K. Seeds insure the crop.

**Eclipse** Always gives the greatest satisfaction among market gardeners. It is as early as the Egyptian and much more desirable, owing to its globe shape, great smoothness and regularity, having a small top, very sweet, flesh fine, dark red color. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Dewing's Improved Blood Turnip** Very symmetrical in shape and free from fibrous roots; flesh deep blood red. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Half-long Blood** An excellent second early. Good also for winter and spring. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Early Yellow Turnip** Similar to Blood Turnip in form, but yellow in flesh. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**For Stock and Manufacture of Sugar. Any variety by freight or express, 25 cents per pound.**

### Vilmorin's Improved

Color white; medium size. Greatly esteemed by sugar manufacturers. This is recommended as being next to the Kleinwanzlebener in the percentage of sugar it will produce, and is a fit companion for that variety.

Pkt.  
4c, oz.  
8c,  $\frac{1}{4}$

# Mangel Wurzel

FOR FEEDING STOCK

By freight or express at 25c per lb., in lots of 5 lbs. or more.

**Mammoth Golden Giant** Color yellow, broad at top and bottom, making very heavy roots. Root grows much above the ground, making them easy to harvest. They never become woody. A favorite with leading farmers. Pkt. 3c, oz. 6c,  $\frac{1}{4}$  lb. 15c, lb. 40c.

**Improved Mammoth Long Red**

Grows to an immense size, single roots weighing 30 to 50 lbs. Under high culture 2,000 bushels per acre have been grown. Quality excellent. Pkt. 3c, oz. 6c,  $\frac{1}{4}$  lb. 15c, lb. 40c.

**GO'DEN TANKARD.** The flesh is deep yellow to the center. One of the best and richest for food for sheep and cattle. Highly prized by stockmen. Pkt. 3c, oz. 6c,  $\frac{1}{4}$  lb. 15c, lb. 40c.

**CHAMPION YELLOW GLOBE.** This large, round, orange-colored root makes it particularly valuable for light soils. It is of fine quality, heavy cropper and easily harvested. Pkt. 3c, oz. 6c,  $\frac{1}{4}$  lb. 15c, lb. 40c.

# EVERITT'S WHITE DUTCH LATE

A Famous Variety for Main Crop

Large, Late, Round,  
Solid Heads.

Don't  
Fail to  
Include a  
Packet or More  
in Your Order.

will be a better, the head being as white as snow, solid, crisp and fine grained, while for market and shipping it will lead wherever offered.

We planted White Dutch on two and one-half acres and the crop will bring about \$250.00. One load of **White Dutch Cabbage** (500 heads) weighed 4,500 pounds, an average of 9 pounds per head, which is the best average we have ever seen. I would say that **White Dutch Cabbage Seed** grows the largest, hardest and most mature heads of any seed I have yet seen, some of our heads weighing 21 pounds after being trimmed for market. H. N. BLAIR, Skaneateles, N.Y.

I consider your **White Dutch Cabbage** the best and most remunerative variety to grow, as it is a sure header, of good size, firm and of excellent flavor, HENRY A. GALDE, Marlborough, N.Y.

**PRICE—Pkt. 10c, 3 for 25c, oz. 30c,  $\frac{1}{4}$  lb. \$1.00, lb. \$3.00.**

**Broccoli** Early Purple Cabbage. Produces large heads of brownish purple color. Very close and compact, and of excellent flavor. Pkt. 5c, oz. 25c,  $\frac{1}{4}$  lb. 75c.

**Brussels Sprouts** Improved Dwarf. They grow about 2 feet high and produce from the sides of the stalk numerous little sprouts 1 or 2 inches in diameter, resembling cabbage. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c.

**Chicory** Large Rooted or Coffee. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

**Collards** Georgia Southern. A variety of cabbage. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

**Corn Salad** Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Cress** or Pepper Grass. Sow early in the spring very thickly in shallow drills. The sowing should be repeated every week, as it soon runs to seed. Use as a small salad.

**EXTRA CURLLED.** Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 70c.

**WATER CRESS—True.** Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 75c.

Another year's test of this grand Cabbage verifies the correctness of our claims.

Our sales more than double each year, because old customer's continue to grow it, while new customers are constantly learning of its fine qualities. In compactness, solidity, hardness, weight, size of head, uniformity of shape and excellent keeping qualities, the Late White Dutch is unsurpassed by any sort heretofore on the market, and possesses the best qualities to give it the greatest commercial value. The average weight of heads is from 15 to 24 pounds. This is the greatest winter and spring Cabbage, not rotting like many other kinds do. For table there probably never

The best I ever had Grows quick, sure to head, large size and of very fine flavor.  
ANTHONY PERRY, Pawtucket, R.I.

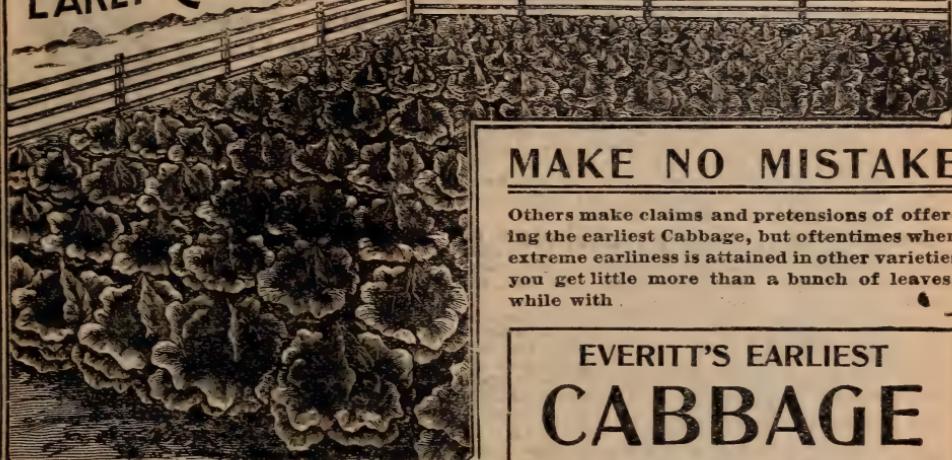

The White Dutch Cabbage proved a fine strain. As a shipping variety it is very valuable. The solidity of its round heads, whether large or small, and its snowy whiteness, make it particularly attractive as a market variety. C. L. ALLEN, Floral Park, Long Island.

White Dutch Cabbage were the best I ever raised and I have been raising cabbage for 20 years. The average weight was from 12 to 18 pounds and they often weighed 25 pounds. JACOB WRIDE, Auburn, N.Y.

# EVERITT'S EARLIEST CABBAGE, ALWAYS HEADS AND ALWAYS, SOLID HEADS.

## THE GREATEST & EARLY CABBAGE

### MOST PROFITABLE FOR MARKET GARDENERS

#### MAKE NO MISTAKE

Others make claims and pretensions of offering the earliest Cabbage, but oftentimes when extreme earliness is attained in other varieties you get little more than a bunch of leaves, while with

#### EVERITT'S EARLIEST CABBAGE

You Get a Fine Solid Head.

Everitt's Earliest is the Earliest and Best Extra Early. IT IS THE FIRST TO HEAD. It makes good sized, solid Heads, like the illustration.

Not a bunch of leaves, like some other early varieties. Seventy days after sowing the seed you have Cabbage on the table or sell it in the market and get the big price, if you plant Everitt's Earliest. The heads are very solid, while the edible part is sweet and tender. The illustration shows a half section of a head, which cannot be surpassed by any variety, early or late, in fine texture, small ribs and solidity. By reason of this cabbage coming so early, a second crop of late cabbage or some other crop can be grown on the same ground. Set the plants 15 inches apart in the rows and the rows  $2\frac{1}{2}$  feet apart.

If you are an Up-to-Date Gardener, and if you want to be ahead of your neighbors, you will certainly want some of this Early Cabbage. It is one of the best things we offer, and we express the hope that every person who receives this Catalogue will obtain a package or more of it, even though they omit something else. Pkt. 10c, 3 for 25c, oz. 25c,  $\frac{1}{4}$  lb. 75c, lb. \$2.50.

Half a Head of Everitt's Earliest Cabbage.

CWT. (Hundred Weight) CABBAGE

#### CWT. CABBAGE

Everybody knows that CWT. means hundred weight, and this is the largest and heaviest of all varieties of Cabbage. It is the grandest type of Mammoth Cabbage, and certainly whoever raises for exhibition purposes should not fail to include the CWT. Cabbage. A late fall and winter sort. Splendid keeper and of good quality. For kraut it is simply immense, a few heads filling a barrel. If you want the largest cabbage ever seen in your neighborhood, and besides one of splendid quality, plant some of CWT. Pkt. 8c, 4 for 25c, oz. 25c,  $\frac{1}{4}$  lb. 75c, lb. \$2.50.

# CABBAGE

## EARLY VARIETIES

One packet of seed will produce about 400 plants; one ounce about 3,000.

**EARLY YORK.** A well known extra early sort. Pkt. 4c, oz. 12c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.

**EARLY ETAMPES.** Quickly forms fine, solid, pointed heads. Of extra quality. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 45c, lb. \$1.50.

**EVERITT'S EARLY GIANT** No other variety grows as rapidly as this, and early in the summer you have cabbage heads equaling the fall and winter sorts. Heads very solid. If planted late, is a fine fall and winter sort. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, lb. \$2.00.

**Improved Early Winnigstadt** One of the best Extra Earlies, being a sure header and will grow a head under circumstances where many others would fail. The heads are so solid that cabbage worms can not penetrate them. Valuable for summer, fall and winter. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50.

**Selected Early Jersey Wakefield** A favorite sort. Heads very compact, solid and of conical shape. Few outside leaves. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**All Head Early** A new variety, and one of the largest earlies in cultivation. Being a very thoroughbred variety, the heads are very uniform and it is certain to head. Growth compact, admitting close planting. If planted late it is a splendid winter cabbage. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**All Seasons** If sown early it will produce large heads early, and if sown late is a superior winter sort. We sell this cabbage in large quantities to many large growers, who prefer it to all others. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**Fottler's Improved Bruns-wick** Produces a large, firm, solid head, often weighing from 20 to 30c pounds. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**Improved Early Summer** A popular sort. Our strain of this peerless cabbage is not excelled. Fine, large, solid heads will form in 90 days from sowing the seed, with proper care and cultivation.

Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**E. SUMMER**

**Early Flat Dutch** Popular wherever grown. A good second early, of excellent quality.

Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**Louisville Early Drumhead** A very choice variety, following immediately after the Early Summer. When planted late it makes an excellent winter cabbage. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

## LATE VARIETIES

**Autumn King, or World Beater** A grand autumn and winter cabbage, enormous size and very solid. This scarcely excelled by any other in weight of crop per acre. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, lb. \$2.00.

**Everitt's Superior Large Late Flat Dutch** So well known as to scarcely need description. Our "Superior" strain of the late Flat Dutch is unexcelled.

Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**Sure Head**

Takes its name from its quality of always heading up, even under unfavorable conditions. In all cases it gives great satisfaction for general crop. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**Drumhead Savoy**

A very large headed variety, partaking of the Drumhead Cabbage; flavor of the Savoys. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.75.

**Everitt's Short Stem Drumhead Cabbage** This famous cabbage is a grand variety for truckers to raise for distant markets, while it is also a magnificent and reliable sort for all purposes. Very reliable to head in the South. Grows a compact head. Withstands drought well. Seldom bursts or rots. Heads frequently weigh 30 lbs. each. Keeps until late spring. Stem very short. It is almost all head and very sure to head.

Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 60c, lb. \$2.00.

THE  
GREAT

# Lupton Cabbage

This magnificent cabbage is gaining a great reputation wherever known. It originated with Mr. J. M. Lupton, the largest individual cabbage grower on Long Island who says of it; "I originated the Lupton from a single early plant of a late variety. It is between the two in point of size and season of maturity, coming in after the second earliest and before the late. More thoroughbred and holding color better than any late sort. It combines the health and vigor of late sorts with the uniformity and sure heading qualities of the best second earlies." The originator has not overestimated this cabbage. It is one of the best varieties of recent introduction as regards merit and general desirability. **Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, lb. \$2.00.**

offer the genuine, every seed strictly true. *Don't take chances, as there is much spurious seed on the market.* **Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c, lb. \$2.00.**

The Yard Long Corn I have grown for two years and it is certainly the greatest corn in this country.  
**F. S. WELLS,**  
Erdine, Ia.

Everitt's Early Cabbage is my favorite; every plant headed. Packet of Kaffir Corn yielded 40 lbs.

of seed. The Tobacco did splendid, also the Yard Long Corn, Apple Tree and Grape Vine. *Up-to-Date* has done us much good and by following its teachings we have raised the best crops ever seen on this old worn-out place.

**REV. AUSTIN CURTIS,** Irwinton, Ga.  
The packet of Mixed Winter Radishes produced the finest radishes I ever saw grow.

**JOHN KEAMER,** Greeley, Colo.  
Your Climbing Tomatoes grew 16 feet high and are fine. They are still green and I can pick a peck of ripe tomatoes off of the vine today.

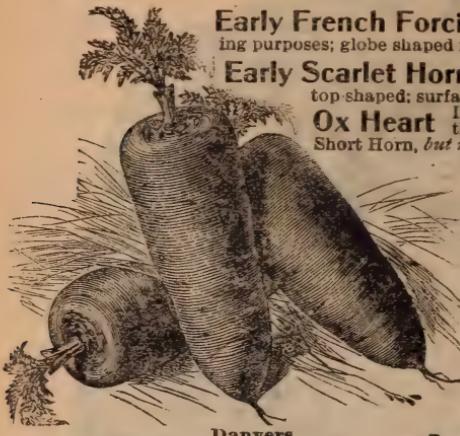

**THOS. GREEN,** Albion, Ill.  
All your seeds have been true to name and **O.K.** To say the Rattlesnake Melons were fine, don't half express it, and my Peppers were the best on the market. If I continue to farm I want one of your Man-Weight machines, as they can't be beat. My mother-in-law has one and I tell you she likes it fine.

**W. B. CARPENTER,** Cherryvale, Kan.

## DANISH BALL-HEAD or HOLLANDER

This is a variety of Cabbage that has been imported to this country from Holland, arriving late in the season, and on account of its well preserved condition, great solidity and depth of head, sells at higher prices than American sorts. **It is one of the hardest varieties in cultivation, enduring drouth and frost that would destroy other varieties.** Head of medium size, round and very solid. Matures late. We

# CARROTS

## Danver's Half-Long

**Orange** A most excellent variety for all soils. It will yield the greatest bulk with smallest length of roots of any variety. 20 to 30 tons being no unusual crop per acre.

## Improved Long Orange

Long roots, good yielder. Good for table or stock. We offer the best strain of this fine variety.

## GIANT VICTORIA

This is the **largest** and the **heaviest** cropping Yellow Carrot in cultivation. The roots are remarkably **fine**, **very symmetrical** and of **excellent quality**, possessing **high feeding** properties. It is a **heavy cropper** on all soils, but especially adapted for strong or rich land. It grows fully twice as much weight per acre as the ordinary varieties. The roots frequently measure **12 to 18 inches** in circumference and yields **20 tons per acre**. Nothing excels this carrot in quantity or quality of stock feed that can be grown on a limited area of ground.

N. P. CLARK, St. Cloud, Minn., Importer and Breeder of Clydesdale Horses, Short-Horn and Guernsey Cattle, says: "In expressing my opinion as to the value of the Carrots for stock, will say that no one who feeds stock can afford to be without them. I feed each year Mangel Wurzels and Ruta Bagas and esteem them highly, but Carrots I regard as indispensable. I increase my acreage of Carrots each year and believe I secure better results from them than anything else I feed, and no variety can be better in quality and great productiveness than the Victoria."

Pkt. 5c, oz. 10c,  
1/4 lb. 25c, lb. 75c.

By express not paid, 60c  
a lb.

*Giant Victoria*  
THE HEAVIEST CROPPING  
VARIETY IN CULTIVATION

**CAULIFLOWER** One packet of seed will produce about 200 plants; one ounce about 3000 plants.

**Early Snowball** Gilt edge Strain. Probably grown more than all other varieties together for forcing or wintering over for early crop. We spare no pains or expense to produce the best seed possible and confidently recommend it as equal to that offered by any one. Pkt. 15c, 1/2 oz. 75c, oz. \$1.50. 1/4 lb. \$5.50.

Price Of all Carrots, unless otherwise quoted: Pkt. 4c, oz. 10c, 1/4 lb. 25c, lb. 60c. By freight or express, not less than 5 lbs. of a kind, 50c per lb. Sow 1 oz. to 200 feet of Drill. 2 lbs. to acre.

**Early French Forcing** largely grown for forcing purposes; globe shaped root of an orange red color.

**Early Scarlet Horn** Best for early planting out doors. Tops small; roots top-shaped; surface dented; skin orange red.

**Ox Heart** Intermediate in length, between the half long varieties and the Short Horn, but much thicker than the latter, attaining at the top 3 or 4 inches in diameter. It is of fine quality for table use, and deserves general cultivation.

**Chantenay Long** stump-rooted Carrot is one of the most productive varieties known; has an extra large shoulder, is easily dug, and is in every way desirable. It is very smooth, fine in texture, and of beautiful rich orange color.

## Early Scarlet Horn

## Large White Belgian For Stock.

Grows one-third out of the ground; immense yielder; large size; easily gathered; very suitable for stock.

The best Seeds that can be Sown

GOLDEN SELF BLANCHING

## CELERY

One packet will  
produce about  
2000 plants; 1  
oz. about 10,000  
and plant about  
quarter acre.

NEW ROSE

GOLDEN HEART

**Golden Self-Blanching** Gilt-edge strain. A remarkable stocky and strong growing variety solid and delicious flavor, self-blanching and a good keeper. One of the very best for early market. Pkt. 5c, oz. 30c,  $\frac{1}{4}$  lb. 80c, 1 lb. \$3.00.

**White Plume** Gilt-edge strain. The heart and stock are naturally white and consequently it needs very little earthing. Eating qualities are the very best; will not keep late in the winter. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 75c.

**Red or Rose** The red or rose Celeries are better in many respects than the white. They are more solid, hence keep better, and have to a greater degree that nutty flavor so desirable in celery. Pkt. 5c, oz. 15c.

**Giant Golden Heart** A careful selection from the Dwarf Golden Heart by a gardener who made the need of a critical market his study for years. The quality is fully equal to the original stock, and in habit of growth is taller than its parent. The stalks are very thick and perfectly solid. Unexcelled as a long keeper. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c.

**Perfection Hartwell** One of the best flavored, most crisp and tender of round, very solid, crisp and tender, fine nutty flavor. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50.

**Crawford's Half Dwarf** Solid, of vigorous growth and nutty flavored; very ornamental. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50.

**Kalamazoo Broad Ribbed** Its broad ribs, thick and closely set, are solid, crisp, and of fine flavor. Grows rapidly. A grand market variety. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50.

GIANT PASCAL

ENG'D FOR  
J. EVERETT  
SEEDMAN

THIS Celery has been one of our leading specialties for years, and nothing that we have sold in that time has given greater satisfaction. The only trouble we have with it is to grow enough seed to supply the demand. One great advantage of the Eureka is that it **will keep nearly all winter**, while any other self-blanching variety will not keep much beyond Christmas. Stalks beautiful in appearance, compact in growth and solid. Dwarf habit. Color of outer leaves, cream, tinted with green; stalks and inner leaves creamy white; ribs very crisp, tender and of the most superior flavor. All who have not heretofore grown this celery should do so without further delay. **It is bound to give satisfaction.**  
 Pkt. 10c, 3 pkts. 25c, oz. 50c,  $\frac{1}{4}$  lb. \$1.50.

## GRAND SURPRISE THE BEST LATE CELERY

Grand Surprise

If you want a Celery that will keep until the following May, after all other celeries are gone, and sells at a high price, plant the **Grand Surprise**. It is certainly the grandest winter and spring Celery ever offered. Grows a very strong and vigorous plant of medium height, large, and is not excelled for **solidity, crispness and fine nutty flavor**; every particle can be eaten. Plant is beautiful in appearance, blanching to a cream white. No celery grower should fail to plant part of his crop of this and there awaits him a **Grand Surprise**, and none of his neighbors who plant other kinds will have anything that compares favorably next fall. **Pkt. 10c, oz. 25c,  $\frac{1}{4}$  lb. 75c.**

## Branch Stores

office and Freight or Express office in the country is a branch store for **O.K. SEEDS**. What could be more convenient? Hand the Postmaster a letter and in a couple of days you will receive the Best Seeds that are planted under the sun. Why risk your crops on store seeds of uncertain age and quality?

Just think!  
Every Post-

office and Freight or Express office in the country is a branch store for **O.K. SEEDS**.

# SWEET CORN

## STOWELL'S EVERGREEN Pedigree Strain

This grand variety is more largely grown for main crop than any other. If you are assured that you are getting the best seed of this variety that can be produced, you may be sure you are right and you can go ahead with confidence of satisfactory results. Our seed is the result of many years of scientific growth and selection, and is grown in a locality **adapted to grow this variety to the greatest perfection**. There are other sections where this variety is grown largely for seed for other seedsmen, where climate and soil have the effect of making a glaze or hard shell on the grain, which is reproduced in the crops grown from this seed. For table purposes and canning this is a serious defect, deplored by all lovers of tender, juicy sweet corn. The careful attention given to the growth of our corn and to the adaptability of soil and climate, preserve and improve the good qualities, until at the present time we have Stowell's Evergreen Corn superior to the original stock sent out by Mr. Stowell many years ago.

We have endeavored to portray in our illustration the appearance of this corn as we grow it. When in the green state the grains are large, plump and juicy, and of exquisite sweetness of flavor. When dried for seed they assume a much shriveled appearance. The grains are very deep, the cob small. This variety, grown in less favorable localities and with less care, will have shorter and less shriveled grains and be glazed and flinty.

**For home use and market, also for canning, our pedigree strain of Stowell's Evergreen Sweet Corn is unsurpassed.** As it comes at a time when it competes with the main crops, the grower can depend on its superior qualities, large ear and great productivity to insure him profitable returns, and he will seldom be disappointed. **Its long ear and large, plump grain** make it a profitable and very salable variety. As we furnish choice seed of this improved variety to compete in price with poorer grades on the market, there can not be any excuse for taking chances on your crop.

**Price of Everitt's Superior Pedigree Strain of Stowell's Evergreen Sweet Corn:** By mail, pkt. 8c, pt. 20c, qt. 35c. By freight or express, peck, \$1.00, bu. \$3.50.

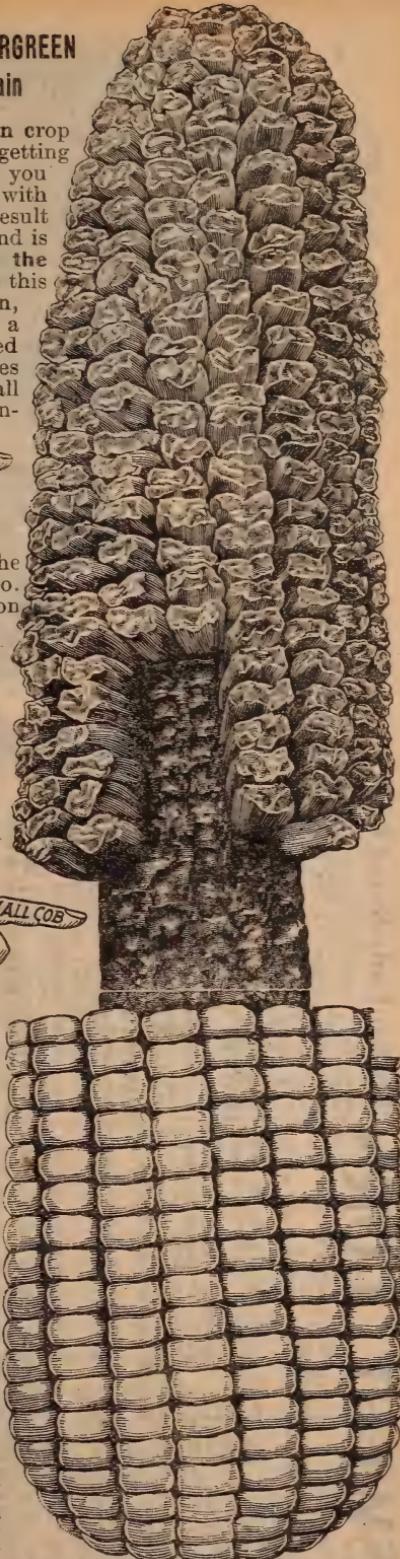

## WE PAY POSTAGE

On all seeds quoted by pkt., oz., 1-4 lb., 1 lb., 4 lbs., pt., qt. and 4 qts., unless stated to the contrary. You can get our choice, fresh seeds at your postoffice as conveniently as doubtful seeds at the grocery store. Every P. O. is a branch store for O. K. Seeds. Send your money in a letter and in a day or two get your seeds fresh from the farm and warehouse. Nothing can be more convenient. If by freight or express, on account of our central location, we can save the majority of farmers transportation compared with the cost from any other seed house.

# SWEET CORN

## Shaker Early Sweet Corn

A splendid market sort, ready about the same time as Early Minnesota, but the ears are much larger. The stalks in good soil attain a height of 6 feet, bearing usually 2 large ears, well filled out to the tips of the cob. The kernels are of nearly whiteness and most delicious sweet flavor. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

Plant Sweet Corn in hills or drills with Everitt's Man-Weight Drill.

1 bu. will plant about 6 acres; 1 qt. about 500 hills.

EXTRA EARLY ADAMS. The earliest white corn grown. Ready for use in 60 days; used extensively wherever introduced. Can be planted earlier than the sugar varieties. Also called imitation sugar. Pkt. 8c, pt. 20c, qt. 30c, peck 75c, bu. \$2.25.

EARLY ADAMS. Similar to above, but larger and not quite so early. Pkt. 8c, pt. 20c, qt. 30c, peck 75c, bu. \$2.25.

CROSBY'S SUGAR. Early and a great favorite. Ears small, but is productive and of excellent quality. Pkt. 8c, pt. 20c, peck 85c, bu. \$3.00.

PERRY HYBRID. An extra early variety, with fine ears, about the size of Minnesota. Twelve-rowed and fine quality. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

CHAMPION. The finest, large, extra early in cultivation, grows nearly as large as Stowell's Evergreen and is extremely early. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

EARLY MINNESOTA. A well known early dwarf variety; ears fine size and excellent quality. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

COUNTRY GENTLEMAN. Is the sweetest and most tender of all.

O. The finest, cob small, kernel a small, of extraordinary depth, nearly whiteness and irregularly crowded together on the cob. It is very productive, bearing 2 to 4 ears to the stalk, matures medium to late. Pkt. 8c, pt. 20c, qt. 35c, peck \$1.00, bu. \$3.50.

Egyptian. One of the best somes of all late sorts. Ears large, none more uniform, and excel all in filling out perfectly at the tip end. Cob and grain pure white. Very productive and used extensively for canning purposes. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

## Black Mexican

This is the sweetest variety and not excelled for family use. Its color prevents it from becoming a desirable market sort. Pkt. 8c, pt. 20c, qt. 30c.

**O. K. Seeds are Reliable. They are Planted Everywhere.**

Ripens early; has 12 to 18-rowed ears and deep grains. **One of the largest varieties grown, and one of the very sweetest.** For home use and choice market trade it is unsurpassed. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

**Everitt's Excelsior Mammoth Sugar**

This variety produces the largest ears of any sort, a single ear sometimes weighing 12 or 13 pounds. It is of excellent quality, sweet, tender and delicious, and its only fault (if this can be considered one) is the immense size of the ears. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

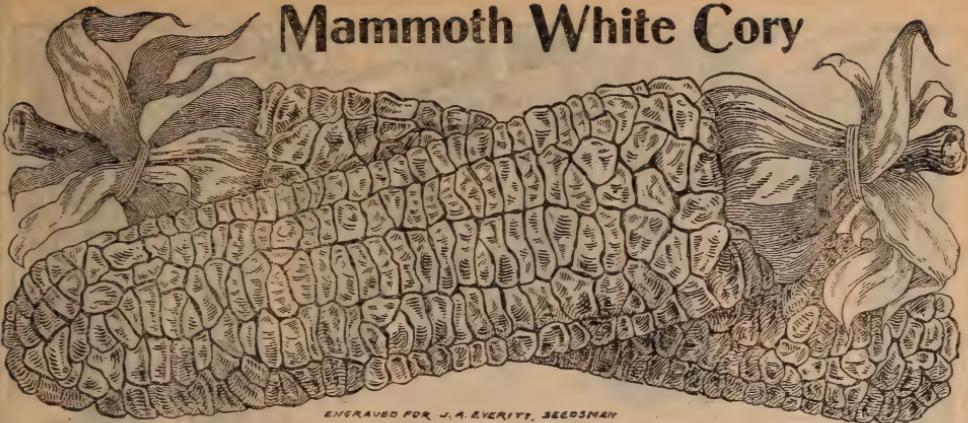

**Everitt's Mammoth Sugar**

This variety produces the largest ears of any sort, a single ear sometimes weighing 12 or 13 pounds. It is of excellent quality, sweet, tender and delicious, and its only fault (if this can be considered one) is the immense size of the ears. Pkt. 8c, pt. 20c, qt. 30c, peck 85c, bu. \$3.00.

**Or. Seeds**

19

# Mammoth White Cory

ENGRAVED FOR J. A. EVERITT, SEEDSMAN

This is the largest and best of the "Cory" type of Corn. The stalks are no longer than those of the White Cob Cory, but each stalk furnishes two or more large, fine shaped ears.

The ears are twelve rowed, very symmetrical and handsome, with no opening between the rows at the base. The grain is large, broad, very white and of remarkably good quality for such an early sort. The ears are about twice as long as the original Cory. The beauty and quality of this variety give it ready sale even when the market is overstocked. Large Pkt. 8c, pt. 25c, qt. 40c, peck \$1.00, bushel \$3.50.

## POP CORN

Prices of all varieties unless quoted otherwise as below.

Pkt. 5c,  $\frac{1}{4}$  lb. 10c, lb. 25c, 4 lbs. 60c. By Express: lb. 10c, 5 lbs. 40c, 10 lbs. 60c.

**Mapledale Prolific** A profitable variety: has borne as many as 15 ears on one stalk, but we find 4 to 6 a good average.

**Queen's Golden** Large ear, golden yellow grain. A great yielder. Unexcelled as a popper.

**White Rice** A very handsome variety. Ears short, kernels long and resemble the grains of rice. Color white; of the best quality for popping, and as it is the standard market variety, with a good reputation everywhere, we advise its growth in preference to other varieties by every person who grows Pop Corn to sell, as it is the standard variety.

**Boys' Favorite** Quite a novel sort. Bright red color. Pops very large and pure white.

## HOW THEY LIKE O. K. SEEDS

I have used your O. K. Seeds for several years and have always found them fresh and of superior quality.

REASIN GARD, Canton, Kan.

All your O. K. Seeds have been satisfactory.

W. E. GANTS, Catlin, Ill.

I have planted your O. K. Seeds for 3 years, and to say that I am delighted with them but feebly expresses my feelings. On the seed question I have been humbugged much, but I never had any trouble with O. K. Seeds. I have read *Up-to-Date Farming* and have been very materially benefitted thereby. May you have abundant crops of O. K. Seeds and the success you so richly deserve.

HALL LAURIL, Vienna, La.

I have handled your O. K. Seeds for several years and no fault has been found with any of them. I think they are the best seeds in the market.

B. F. KESSLER, Greensburg, Ky.

I believe you are the fairest man I ever bought seeds from. Your O. K. Seeds are always good. Prize-Taker Onion and C. W. T. Cabbage beat all I ever saw. I will always want O. K. Seed when planting time comes. I am also a reader of *Up-to-Date Farming*. It has done me good. When I began reading it 3 years ago, I was in debt and had hardly anything. I followed its advice, and now I am out of debt and have about \$1,000 worth of stuff. I wish you great success.

W. D. BRUMLY, Bono, Ark.

I for have years considered your O. K. Seeds as good as could be bought anywhere. In fact, I prefer buying of you. I especially praise your White

Stuttgart Radish this season. We raised the finest radishes from your seed I ever saw.

P. E. GENOWAY, Fredericktown, Mo.

From one pound of Everitt's Early Potato, I grew 1 $\frac{1}{2}$  bushel of the finest potatoes I ever raised. *Up-to-Date Farming* is the best agricultural paper published.

W. O. GORDON, Clare, Ark.

Your O. K. Seeds all done fine, especially the Alpha Pole Beans and Everitt's Earliest Cabbage. They are O. K. as you claim. I am also a reader of *Up-to-Date Farming*. ELLA DAVIS, Butter, Ky.

## HERBS

Indispensable to the cook, useful in the sick room, and many kinds are fine for perfuming clothing, etc. The varieties marked with an asterisk (\*) are perennial, and when once started in the garden may be preserved for years with but little care.

**ANISE.** Used for cordials, garnishing and flavoring. Pkt. 5c, oz. 10c.

**\*BALM.** Leaves have a fragrant odor. Pkt. 5c, oz. 15c.

**BASIL SWEET.** Leaves used for flavoring soups, stews and highly seasoned dishes. Pkt. 5c, oz. 20c.

**BORAGE.** Leaves used for flavoring. Pkt. 5c, oz. 15c.

**\*CATNIP.** Leaves and young shoots are used for seasoning. Pkt. 5c, oz. 40c.

**\*CARAWAY.** Grown for the seeds, which are extensively used for the flavoring of bread, pastry, candy, etc. Pkt. 5c, oz. 10c.

**CORIANDER.** Pkt. 5c, oz. 10c.

**DILL.** Seeds used for pickling cucumbers. Pkt. 5c, oz. 10c.

**\*FENNEL, SWEET.** Pkt. 5c, oz. 10c.

**\*HYSSOP.** Is a stimulant and used for asthma and chronic catarrh. Pkt. 5c, oz. 20c.

**\*HOREHOUND.** Leaves used for making cough medicine. Pkt. 5c, oz. 30c.

**\*LAVENDER.** Pkt. 5c, oz. 30c.

**MARJORAM, SWEET.** Pkt. 5c, oz. 20c.

**\*PENNYROYAL.** Has medicinal qualities.

Pkt. 5c.

**\*ROSEMARY.** Ornamental herb. Pkt. 5c, oz. 40c.

**\*RUE.** Good for colds and croup. Pkt. 5c, oz. 15c.

**\*SAFFRON.** Pkt. 5c, oz. 10c.

**SAGE.** Extensively used for seasoning and dressing. Pkt. 5c, oz. 15c.

**SAVORY, SUMMER.** Pkt. 5c, oz. 15c.

**SAVORY, WINTER.** Pkt. 5c, oz. 20c.

**\*TANSY.** Pkt. 5c, oz. 30c.

**\*THYME.** Pkt. 5c, oz. 30c.

**WORMWOOD.** Is beneficial to poultry. Pkt. 5c, oz. 25c.

All the  
BEST

# CUCUMBERS

**Early Russian** The earliest of all; small size, excellent quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Arlington, or Improved Early White Spine** Vines vigorous fruiting early and abundantly; fruit straight and handsome, light green with a few white spines. The young fruits are unusually crisp and tender. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Chicago Pickling** Fruit of medium length, pointed at each end, with very large and prominent spines, color deep green. Largely grown for factories. Extra early and very productive. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Green Prolific, or Boston Pickling** A very prolific variety; thriving in any locality. With good culture 200,000 can be raised on an acre. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Improved Long Green** Forms fruits for the table nearly as early as the shorter kinds. Grows 12 inches long, firm and crisp, with very few seeds. The young fruit makes the best of pickles. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Parisian Prolific Pickling** A great acquisition. Very long slender, cylindrical, densely covered with fine prickles, and deep rich green in color. The flesh is very crisp and tender. One of the best for slicing, as well as for pickles. Pkt. 10c, oz. 25c.

**Early Frame** A well-known early sort. Vigorous growth, productive and fine quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Early Green Cluster** A short, prickly variety, bearing in clusters near the root. It is a great bearer and matures early. Very desirable for pickles. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Jersey Pickling** One of the finest pickling cucumbers in the market. Early and a great bearer. Well formed, firm and crisp. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Giant Pera** A variety remarkable for its great size, often attaining a length of 18 inches, and 10 inches in circumference. Notwithstanding this immense size, their quality is excellent. Superior for slicing. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 35c, lb. \$1.25.

**Gherkins** Very small and prickly fruit, used expressly for pickling. Pkt. 10c, oz. 25c.

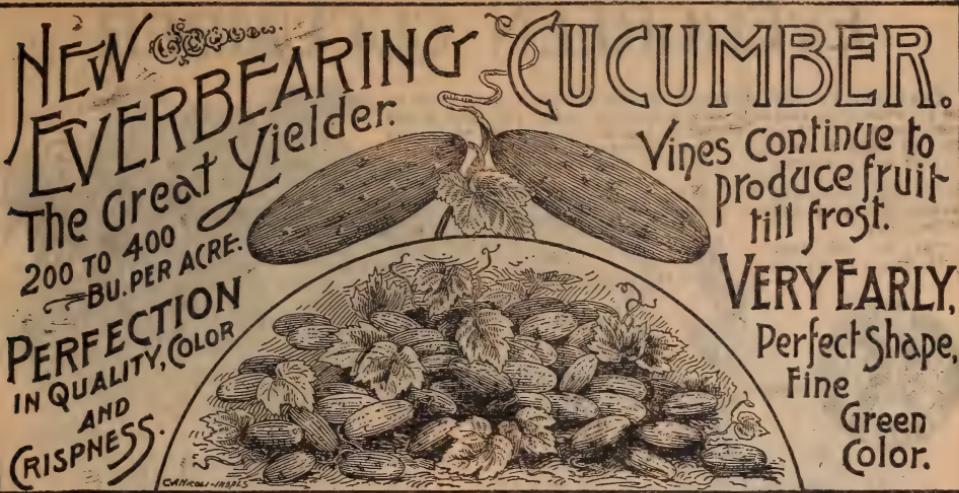

**Snake** This cucumber grows sometimes to the length of 6 feet, curled up like a snake. Pkt. 10c, oz. 25c.

**No Other Seeds so Cheap.  
No Other Seeds so Good.  
O.K. SEEDS.**

EVERBEARING

SNAKE

ENGRAVED  
FOR J. E. TROY

## New Everbearing Cucumber

state that it is one of the most valuable sorts ever introduced. It is of small size, **very early**, **enormously productive** and valuable as a green Pickler. The peculiar merit of this novelty is that the vines continue to flower and produce fruit until killed by frost, **whether the ripe Cucumbers are picked off or not**—in which respect it differs from all other sorts in cultivation. It will, however, produce more fruit if they are picked. Cucumbers in every stage of growth will be found on the same vine. Owing to its great productiveness it is one of the best to plant for small pickles. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.**

## THE EMERALD

A Dark Green Cucumber that will hold its Color

A selection from the White Spine, made after 7 years' careful, systematic work. It retains every good quality of the best White Spines, and in addition it possesses a rich dark green color, so long sought for, but never before obtained in any other variety. It is strictly evergreen, retaining its color until fully ripe. The fruit sets early and the vigorous vines abound with beautiful long, straight, handsome Cucumbers of the crispest and best quality. For forcing and long shipping unexcelled. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.**

In calling especial attention to this new and unique variety, we wish to emphatically

say that it is one of the most valuable sorts ever introduced. It is of small size, **very early**, **enormously productive** and valuable as a green Pickler. The peculiar merit of this novelty is that the vines continue to flower and produce fruit until killed by frost, **whether the ripe Cucumbers are picked off or not**—in which respect it differs from all other sorts in cultivation. It will, however, produce more fruit if they are picked. Cucumbers in every stage of growth will be found on the same vine. Owing to its great productiveness it is one of the best to plant for small pickles. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.**

## Climbing Japanese Cucumber

All cucumbers are of trailing or creeping habit, but this one is a real climber, and does best on pole or trellis. It comes into bearing quickly, and sets its fruit constantly throughout the season. The fruit is of excellent quality, of dark green color. The flesh is pure white and never bitter. **With this variety of Cucumbers the product of a piece of ground can be multiplied three fold**, making them very valuable in towns and cities where ground is scarce and on high priced land. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c.**

# Kale or Borecole

One packet will sow about 30 feet of drill, 1 oz. about 150 feet of drill, 2 lbs. per acre.

Kale Greens

**Dwarf German or German Greens.** A dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; the leaves are very beautifully curled and of bright green. Very hardy, will stand out where the temperature does not fall below zero. It is most tender after being bitten by a sharp frost. Pkt. 4c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

**Dwarf Siberian** Sometimes called "Sprouts" and "German Sprouts." In this variety the very large, green leaves are comparatively plain in the center, but coarsely cut and frilled on the edge. The plant is low, but spreading and very hardy. Pkt. 4c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

# Horse - Radish

Sets planted in May, small end down, with the top one inch below the surface, in rich, well-cultivated soil, will form roots of large size in one season's growth. Before planting, the top of the set should be cut off slantingly, so as to prevent decay from water resting on the top. The large roots will be ready to pull in October, and from these large roots a supply of sets can be cut off for the next spring's planting. It is customary to gather the crop of roots in October and keep them in trenches ready to market during the winter. Small roots 25c per doz. or 90c per 100.

# LETTUCE

One pkt. will sow a bed about 5 feet square. One oz. about 300 feet of drill, 3 lbs. an acre.

## Black Seeded Simpson *No head. Curled,*

**Forcing.** For those who want a lettuce that does not head, we recommend this variety. It has thin very tender leaves, which are formed in large loose clusters; it is valuable for forcing and sowing out of doors, for early summer. The leaves are light yellowish green and a little wilting is not noticed. This variety is very popular with market gardeners. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Improved Hanson** *Head.* The finest strain of this popular variety in the country is what we offer. Our seeds will produce mammoth heads almost as solid as cabbage, oftentimes exceeding 5 lbs. in weight, deliciously sweet, crisp and tender. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**New York** Heads almost as solid as an early summer cabbage, which in general form it somewhat resembles. It blanches itself naturally, tender and of excellent flavor, and entirely free from bitterness. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

BLACK SEED SIMPSON

IMPROVED HANSON

**CUT THIS OUT!**

and send with \$1.00 and we will send you a cloth bound book on Gardening—How to be successful

in Growing Crops and selling them at profitable prices.

### Tilton's White Star

*No head, curled, forcing.* Of the Black Seeded Simpson type, but grows larger and more rapidly, blanches perfectly and is of excellent quality. The plants remain long in condition for use before running to seed, and owing to the thick leaf keep long after cutting without wilting. For forcing and early planting outdoors it is very valuable. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

### Early Tennis Ball

*Head.* A fine early sort; very hardy. One of the best for forcing under glass. Heads are small but extremely solid. Not very valuable for outside cultivation because it runs to seed quickly. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

**Denver Market Head.** An early variety of Head Lettuce for open ground. It quickly forms large solid heads and is slow to go to seed. The leaves are crisp and tender, beautifully curled and crimped, and of excellent flavor. By the blistered leaves it distinguishes itself from any other kind of Lettuce now grown. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

**Buttercup** For beauty of foliage, extreme tenderness and delicacy of flavor it is hard to beat. Plant medium size, with numerous round, smooth leaves, which are of a beautiful yellow color, sweet and tender. Always forms good solid heads. It is **one of the best.** **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

**Big Boston Head.** (White Seeded.) A very popular variety with those gardeners who want a large heading, forcing sort, and also for outdoor winter culture. The plants are large, very hardy and vigorous, with broad, comparatively smooth, thin and very hard leaves, which are bright, light green in color. It is grown in the south as a winter lettuce. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

**California Cream Butter Head.** A distinct variety of cabbage Lettuce. It forms round solid heads, of magnificent size. The leaves are of a very cream, yellow color—**most refreshing in appearance and particularly rich and buttery to the taste.** The heads are of good size, compact, very hard and solid. The heads are **so solid that generally they have to be cut before any seed stock can make its appearance.** **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

**All Summer Lettuce** **One dozen varieties mixed.** Will give you excellent Lettuce a long time from one sowing. **Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.**

## COST AND RESULTS

**Cost** If you get **Everitt's O. K. Seeds** at your Postoffice, the cost will be less than if you buy seeds at your grocery.

**Results** The result will be in the first case, the seeds will grow and produce the choicest crops. In the second place they may not grow, and may produce unsatisfactory crops.

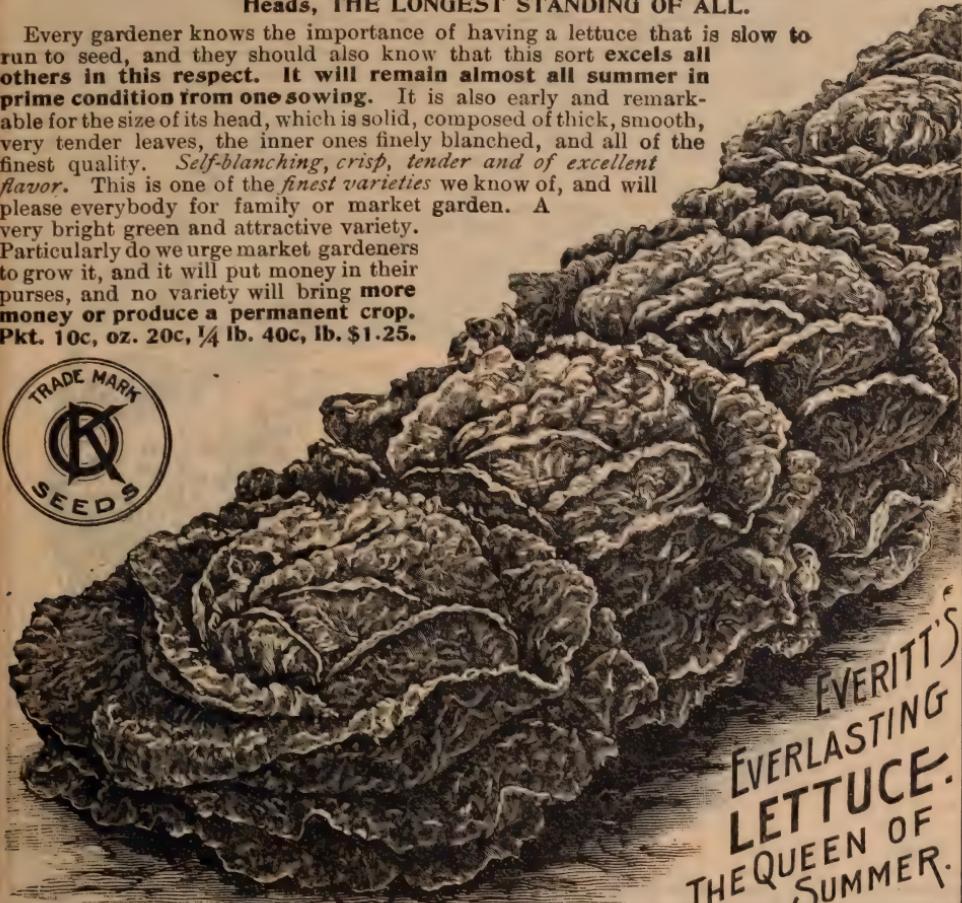

EVERITT'S  
EVERLASTING

# LETTUCE

THE QUEEN  
OF SUMMER

Beautiful Color and Forms Large, Handsome, Tender Heads, THE LONGEST STANDING OF ALL.

Every gardener knows the importance of having a lettuce that is slow to run to seed, and they should also know that this sort **exceeds all others in this respect. It will remain almost all summer in prime condition from one sowing.** It is also early and remarkable for the size of its head, which is solid, composed of thick, smooth, very tender leaves, the inner ones finely blanched, and all of the finest quality. *Self-blanching, crisp, tender and of excellent flavor.* This is one of the *finest varieties* we know of, and will please everybody for family or market garden. A very bright green and attractive variety. Particularly do we urge market gardeners to grow it, and it will put money in their purses, and no variety will bring **more money or produce a permanent crop.** Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 40c, lb. \$1.25.

## MUSHROOMS

### DIRECTIONS FOR CULTIVATION

Mushrooms can be grown in any dark room or cellar, where the temperature can be maintained at 50 to 60 degrees. From old pastures procure the soil and store it away. To one bushel of this soil add two bushels of fresh horse manure. Of this well-mixed compound prepare a bed, say four feet in width. Put down a thin layer and pound it down hard, and go on until you have a bed 8 inches thick. It will soon become pretty hot, but let the heat recede until it is only 85 or 90 degrees. Then make holes, say a foot apart, and put in the spawn, two or three pieces as large as a walnut in each hole. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition about 12

days, then cover the bed with 2 inches of fresh loam, and over this place 4 or 5 ins. of hay or straw, and the work is done. If the temperature is right, in 6 or 8 weeks you may expect Mushrooms. The bed will continue bearing from 20 to 30 days. After the first crop is gathered, spread over the bed an inch of fresh soil, moistened with warm water, and cover with hay as before. One pound of spawn is enough for a bed 3x6 feet.

**Mushroom Spawn, best English, by mail, 1 lb. 30c. By express, not prepaid, per lb. 20c, 8 lbs. \$1.00.**

Cut this out and send with \$1.00 for complete book on growing and marketing mushrooms.

## MUSTARD

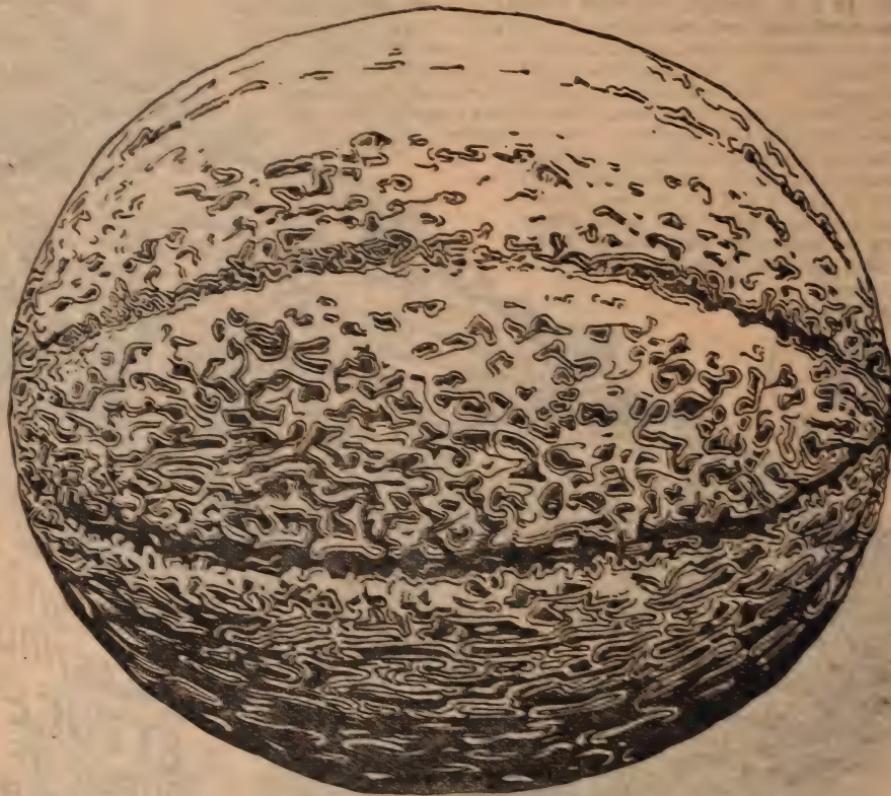

The young leaves are used for spring salad.

**White.** Best for salad or culinary purposes. Pkt. 4c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 50c.

**CHINESE, OR GIANT SOUTHERN CURLED**  
Pkt. 4c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

# Rocky Ford Musk Melons

GROWN IN COLORADO

The Famous Rocky Ford Musk Melon is one of our Specialties. Dealers wanting to be sure of Genuine Seed will make no Mistake if they Buy from Us.

**Rocky Ford Melons** Are probably more largely sold than any other kind. They have a reputation in all markets, and are great sellers. Size is just right for convenience in restaurant and hotel service, and for shipping in baskets and crates. They are very prolific bearers. Size, 4½ to 5 inches in diameter, and weigh 1 to 2 pounds each. The flesh is green, thick, and when properly grown from true seed, lusciously sweet. The rind is firm, but thin. Bear shipping long distances. Densely netted, ribbed. Extra early in ripening. We sell large quantities of this seed annually.

PRICE—Choice Colorado Grown Seed, pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 90c.

## GRAND RAPIDS

THE EARLIEST OF ALL MUSK MELONS.  
This extremely early and beautiful Melon matures one to two weeks earlier than any other variety and can be made extra profitable on this account. The melons are of remarkable size, considering their earliness, several good specimens filling a bushel basket. The skin is finely netted. The flesh is yellow almost to the rind. The quality is fair. By pinching off the vines at three feet will induce productiveness and earliness. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

## Petoskey

or

## PAUL ROSE

A successful cross of the Osage with the Netted gem, and combines the sweetness of the former with fine netting of the latter. It also possesses a firmness of rind, although thin, and "cheesy" structure of the flesh peculiarly its own, which are great advantages. It surpasses others as a crate or basket shipper and long keeper. In times of overstocked markets the PAUL ROSE has sold out clean at four or five times prevailing prices. The melons are of such uniform size that it is easy to pack them for safe carriage and attractive appearance when opened up. Color of netting, gray, underlaid by a dark green rind, the combination making a strikingly beautiful appearance.

Price, pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

Take Notice! By applying the discount provided in front of catalogue our 5c pkts. are brought down to 4 cents each.

EXTRA EARLY  
HACKENSACK

MONTREAL  
MARKET

BANANA

## Musk Melons CONTINUED.

**Hackensack** **EXTRA EARLY.** Ten days earlier than the old Hackensack, which enables growers to put them on the market when they will bring double the price obtained for the old sort. They grow large, round-shaped, flattened at both ends, skin and flesh green, of rich sugary flavor. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Baltimore OR ACME.** Very productive, oblong shape. Of large size, ribbed and heavily netted. Flesh thick, light green and of good quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Jenny Lind** Small size, but of best quality. Season extremely early and popular on that account. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Montreal Market** A magnificent musk melon. The fruit is round and flattened, as is shown in the illustration. Deeply and regularly ribbed, skin and flesh green, densely netted; extremely thick flesh of exquisite flavor. Frequently grows to weigh more than 30 lbs. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Banana** Frequently grows over 25 inches in length, and sometimes 3 feet. Flesh very thick, almost solid; salmon color and delicious when thoroughly ripe. Sure to interest and please. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. \$1.00.

**Emerald Gem** About the size of O.K. Netted Gem, but the skin is smooth and of a dark green color. Fresh salmon, very thick, quality superb. Yields heavy crops. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Cassaba or Green Persian** Very large, oblong, netted skin, excellent flavor. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Banquet** Medium size. The flesh uniformly deep and of that granulated character that always indicates a good melon. Color a dark rich salmon. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**O.K. Netted Gem** Round, small, green flesh. Delicious sweet flavor. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Grower's Pride** For beauty, productiveness and delicious flavor, this melon, is second to no other sort grown. In prolific bearing it is a perfect marvel, the ground being literally covered with the large, round deep-ribbed beauties weighing from 7 to 10 pounds each. Flesh thick, green, melting. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Osage** Extensively grown. Very popular. Medium size, egg shaped. Skin is very thin, dark green color, slightly netted, flesh salmon color, deliciously sweet and spicy. Pkt. 5c, oz. 10c  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Prolific Green Nutmeg** Large growth, fine form, skin and flesh green. Very delicious. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

# WATER MELONS

PHINEY'S EARLY

SEMINOLE

EVERITT'S  
WHITE QUEEN

PEERLESS

**McIver Sugar** Very large fruits of handsome appearance and fine quality. Oblong in form, averaging 20 inches in length; the skin is beautifully marked with broad stripings of light green on a dark ground. The flesh is of a pale pink color, very crisp, free from any stringiness, sweet and melting. The fruits have a solid heart and bear shipping well. Per pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c, Postpaid.

**Improved Kolb's Gem** A well-known and excellent shipping variety. Flesh bright red, of good quality. The melons weigh from 30 to 50 pounds. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Duke Jones** A large oval or blocky fruit, quite thick through. The fruits

grow to very large size, have dark-green skin and bright red flesh. They are of excellent flavor and good shipping qualities. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Florida Favorite** Of medium size, very productive, and unexcelled as a table variety. For home use or near at home markets it gives excellent satisfaction. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Ice Cream or Peerless** Medium size, pale scarlet and solid. Quality of the very best. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Phiney's Early** The Melons are of medium size. Flesh red, tender and brittle. Rind mottled. A sure cropper. A valuable sort for cultivating in the Northern States. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Vick's Early** Highly prized for its extra earliness. Oblong in shape, smooth, size medium, flesh bright pink, solid and sweet. A very productive variety. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

HOOSIER KING

FLORIDA FAVORITE

COLORADO PRESERVING

**Round Light Icing** Fruit medium sized, round, mottled with slightly darker green. Flesh bright, light red, very sweet and tender. By many this is considered the best of all Melons. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Round Dark Icing** Medium size, round. Flesh bright, light red, very sweet and tender. Differs from the Light Icing only in color of skin. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Black Spanish** Thick round fruits of good size. Dark-green skin, bright-red flesh of excellent quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Dixie** This superb watermelon grows strong and rapidly, with more laterals than any other melon.

Very early; thin, hard rind, keeps unusually long before showing decay. Grows to large size. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

Cole's Early

As an every day Melon for home use and nearby market unexcelled. Being somewhat brittle, will not do for shipping. Very early, and will mature in every State; a sure cropper. Sweet; flesh clear to the rind; round. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Hoosier King** A fine, large Melon that commands attention on account of its magnificent size and appearance. After the early markets it is the large melons that are sought after. In the Hoosier King you have a combination that always wins. Superior quality and famous shipper. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Citron, Colorado Preserving** Best variety makes beautiful transparent preserves. Pkt. 5c, oz. 10c.

KOLE GEM

# INDIANA SWEETHEART.

**The Great Market Melon, Uniform, Handsome, A Long Keeper, Solid, Heavy, Sweet, A Grand Melon, One of our Great Specialties.**

**Indiana Sweetheart** This famous Indiana Melon still retains its great reputation as a first-class all-round variety.. Early, large, handsome, heavy, good shipper, long keeper, brightest color, best quality. Vines vigorous and very productive. Ripens early and bears long. Fruit large, nearly round. The skin is bright green, beautifully mottled or netted, light and dark green. Rind thin, but very strong, *making it a melon unsurpassed for shipping*. Flesh red, melting and sweet, continuing to improve after ripe. The Indiana Sweetheart Melon brings a good price when others rot for want of purchasers. One of the most satisfactory

**Monte Cristo** The largest early Watermelon to mature, ripening in from 65 to 80 days. Measures about 20 inches long by 12 inches through, and frequently weighing, under ordinary cultivation, over 60 pounds; skin dark green, flesh bright scarlet close to the skin, the rind being only about half an inch thick. Seeds lie close to the rind, leaving a large, solid heart. One of the sweetest, juiciest, crispest and most solid melons ever produced. Never disappoints in superb quality. Very easy to sell from its handsome appearance. One of the finest melons ever grown for the market, and for table use is unequalled. Mr. Dodge, a veteran melon-grower, says: "The Monte Cristo is the best melon I ever raised. Not half of its good qualities have been told."

Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.  
4 Cents per packet in the cost of our 5-Cent Pkts.  
if you order \$1.00 worth. See front of Catalogue.

things we ever sold. Every melon-grower needs it; will not do without it if he knows how good it is. "Sweethearts" bring good prices when others are not wanted. A great ball of sweetness. Read the telegrams.

**Cleveland, O.** Sweethearts selling to-day 15c to 18c, others 12c to 13c. **WILLIAMS BROS.**

**Columbus, O.** Sweethearts selling 15c to 20c; striped melons 10c to 15c. **WM. M. FISHER & SONS.**

**Findlay, O.** Prefer Sweethearts. When can we have another car? **ALTSCHUL BROS. & CO.**

## NOTE FOR TRUCKERS

*This Melon for shipping purposes is very popular in Indiana melon growing districts and in some others where introduced. Its fine quality and handsome appearance make it a favorite in every market.*

**PRICE.**—Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.  
By freight or express, in 5 lb. lots, lb. 65c.

BRANCH'S  
GENUINE

# RATTLESNAKE WATERMELON

Although a very old variety, the strain we offer is so superior as to be really a novelty. We secure our seed, each year, from Mr. Branch. Read what he says:

Twenty-five years ago this section of Georgia was celebrated for its fine melons, the Rattlesnake being the only kind planted, but a great many growers seemed to think what they could get from a distance was better than what they had at home, and concluded to introduce other varieties. The result of this experiment was that they had a lot of hybrids—nothing pure of its kind. I continued to pin my faith to the Rattlesnake, and, under a careful system of cultivation and selection of seed, I unhesitatingly say I am producing seed of the finest

Watermelon in the world. I have never had a single complaint of my seed during the many years I have been selling them. On my plantation of fourteen hundred acres, I allow none but the **Genuine Rattlesnake Melon** to be grown. It has thin rind, flesh deep scarlet, very sweet and delicious. This strain has been kept pure for thirty years, and it is the only genuine Rattlesnake seed to be found in the United States.

Yours truly, M. I. BRANCH.

We pay Mr. Branch a fancy price for this seed. Considering that only two pounds of seed are required to plant an acre, and an acre of melons, if choice and perfect, represents a good many dollars, careful planters should not hesitate to buy. It is false economy to save a few cents in the seed and risk many dollars in the crop.

PRICE—Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50, 5 lbs. \$6.00, 10 lbs. \$10.00.

## GIRADEAU'S . . . TRIUMPH

6 Melons Weighed 420 lbs. in 1897  
6 Melons Weighed 550 lbs. in 1898  
8 Melons Weighed 659 $\frac{1}{2}$  lbs. in 1899

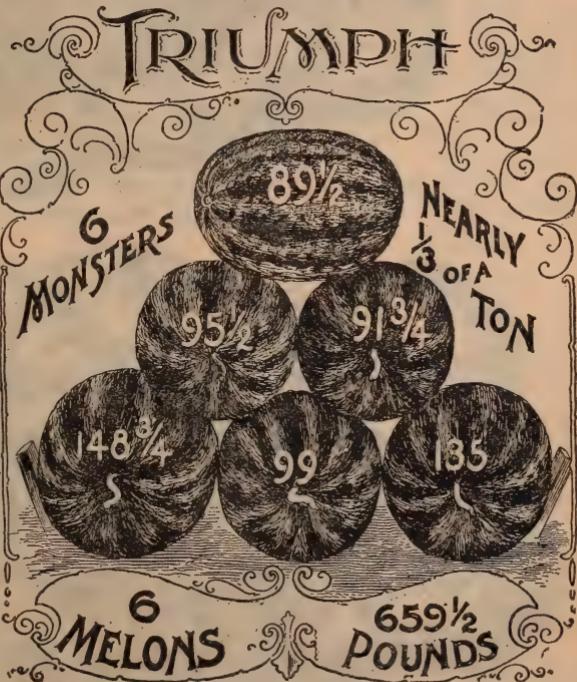

This new Melon is a market sort and for shipment is one of the best ever introduced. It is **very prolific, very early** and of extremely large size. The rind is of dark green color. As a table Melon it has fine quality and flavor. The average size of the Melon is very large. Two thousand four hundred eighteen melons gathered from  $2\frac{1}{2}$  acres, weighed over 40 pounds each. Comparatively speaking, there are no small melons on the vines at the time of harvesting.

The Triumph is early, very large, very prolific, of fine flavor; in fact, one of the finest Watermelons in the United States. The farmer who values his Melon patch and looks forward to the good times in July and August will make no mistake by planting Triumphs.

A commission house in Norfolk, Va., says: "We handled over 300 cars of melons. The Triumphs were the best, and we will advise our growers to plant nothing else. One car of Triumphs sells for as much as three cars of others."

J. L. Miller, of Chester Co., S. C., says: "I pulled four Triumphs from one vine weighing 75, 74, 66 and 58 lbs., total 273 lbs."

PRICE—Pkt. 5c, oz. 10,  $\frac{1}{4}$  lb. 25c, lb. 85c.

# ONION SEED THAT CAN BE DEPENDED ON

As this is one of the most important crops grown by gardeners and truckers, and as there is no other crop in which the quality of the seed exerts a greater influence on the crop, too great care cannot be exercised in selecting your seed. Our onion seed is all of the highest quality, grown from choice, perfect bulbs and cannot be excelled in the country. Quality is the first consideration, price second. In both we defy competition.

## YELLOW GLOBE DANVERS ONIONS

Our Improved Strain of this magnificent sort cannot be too highly recommended. The Onions always attain a good size and beautiful shape like shown in the illustration. Six hundred bus. per acre is an ordinary crop under favorable conditions, while 800 bus. per acre can be grown by a skillful cultivator from our seed sowed in the spring. We offer but one strain of Yellow Globe Danvers Onions and that is the best. For reliability in bottoming our strain is unsurpassed. Bulbs are very handsome, round, of good size,

with thin, straw-colored skin; flesh white, fine grained, firm, mild and excellent quality. It ripens early, keeps well, and sells readily at the highest price. The Yellow Globe Danvers is more largely grown than any other sort, and all you need is the O. K. Seed to insure satisfactory results. We sell seeds in large lots to growers year after year.

SEEDS

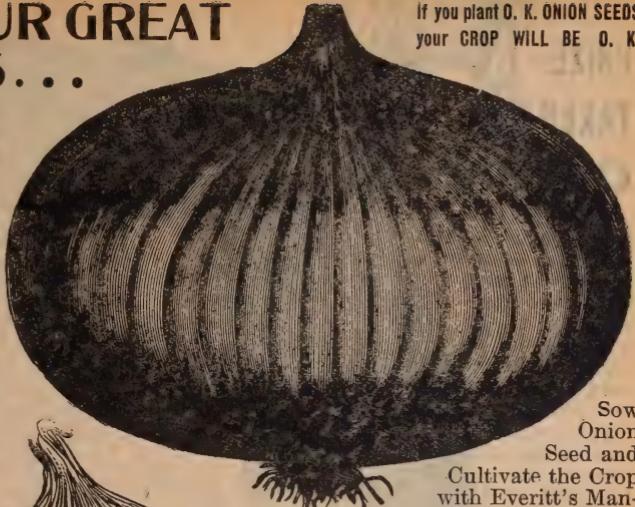

# THREE OF OUR GREAT SPECIALTIES...

EVERITT'S Superior Strain  
Large Red  
WETHERS-  
FIELD.....  
**ONION**

It is often a matter of choice of color what Onion is grown. To those growers who prefer a red variety, we recommend **OUR LARGE RED WETHERSFIELD**. This is also one of our greatest specialties. It yields enormous crops; from 600 to 800 bu. per acre, and is a most reliable cropper, even under unfavorable conditions. Large size, purplish red skin, flesh purplish white, form round, flattened, fine grained, moderately strong flavor. Splendid keeper.

**PRICE:** Pkt. 5c, oz.  
10c,  $\frac{1}{4}$  lb. 25c, lb. 85c,  
postpaid.

Cultivate the Crop  
with Everitt's Man-  
Weight Machines.

## **Southport Large Red Globe.**

With the exception, perhaps, of some of the white varieties, there is no onion that realizes such high prices as this, its beautiful globe shape and rich purplish crimson

color making it extremely desirable. It is a good keeper and of excellent quality. Largely planted for raising sets.

Pkt. 5c, oz.  
10c,  $\frac{1}{4}$  lb. 30c,  
lb. \$1.00. By  
express at 85c  
per lb.

## **Very Early; Excels in Long Keeping.**

This valuable Onion, besides being very early, excels all others as a variety to keep over, the bulbs keeping even a year or more and show very little shrinkage in size or weight. This is of inestimable value to the commercial grower, as he can keep them almost indefinitely, marketing when the price is satisfactory. They are reliable to bottom. Size is medium, of good quality, somewhat flattened in shape, brown color, handsome and remarkably hard and solid.

**Price:** Pkt. 5c,  
oz. 10c,  $\frac{1}{4}$  lb. 30c,  
lb. \$1.00, postpaid.

# PRIZE-TAKER ONION

Although several years have passed since this beautiful Onion was offered, it has not lost one iota in the deservedly popular esteem in which it is held by growers. No other onion equals this for ease of growing from the seed and certainty to produce a crop. The amateur is likely to realize more profit from a crop of Prize-Takers than from almost any other variety.

The main thing to insure success is to get our genuine seed, as much spurious seed is palmed off each season, to the great disappointment and loss of the purchaser. Read also in mortise of the illustration.

Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 35c, lb. \$1.25. By mail.

## PRIZE-TAKER ONION

Every person who visits our large cities has doubtless noticed the large, beautiful onions offered for sale on the fruit stands every fall. These onions were originally imported, but since the introduction of this famous variety there is getting to be less need of the imported stock and the demand is being filled by American-grown Prize-Takers. They are of a beautiful rich straw color and grow to enormous size, averaging 12 to 14 inches in circumference, and under favorable conditions attain a weight of 5 pounds. Of such great size, they are very firm. Of the greatest flavor, they are oftentimes eaten as an apple. They have a very small neck, perfect globe-shape. On market they always attract attention and bring two or three times the price of ordinary onions of any other color. They are wonderfully productive and can be grown by any person.

## CULTIVATING ONIONS

Much depends on the seed in an onion crop, but equally as much depends on the cultivation. Without frequent cultivation to keep the ground free from weeds the crop will suffer severely, or be a failure. The very best machine in the country is a **Man-Weight Cultivator** which we manufacture, and which is illustrated on this page and fully described in the back of this catalogue. No onion-grower can afford to be without this machine. It will save its cost over and over again in each season's crop.

A combined Man-Weight Cultivator costs \$8.00. It comprises many machines in one. One man with it can do as much as six men with hoes, or three men with other hand cultivators in an onion field. See last pages of this Catalogue for particulars.

# LEADING STANDARD VARIETIES OF ONIONS

## Southport Large Yellow Globe

A very handsome round or globe-shaped variety of large size, with thin, yellow skin, white flesh, fine-grained, mild, very firm, and the best of keepers. It ripens early and sells readily at the highest prices in our markets. It is a most reliable variety for bottoming and entirely free from scallions. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00; 5 lbs. or more by express at 80c per lb.**

**Southport White Globe** Large globe-shaped onion, firm, fine-grained, mild flavor, keeps well. This is one of the handsomest onions grown, of beautiful shape, clear white skin, and commands the highest market price. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.65. By express at \$1.40 per lb.**

**Extra Early Red** This variety matures very early. It yields abundantly and is of a mild flavor; of medium size, deep red in color, very close grained, solid and heavy. It will often form bulbs in cold, mucky soil where other varieties fail. It is highly recommended, particularly for the North and Northwest. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00; 5 lbs. or more by express at 90c per lb.**

## LEADING FOREIGN VARIETIES OF ONIONS

All of the varieties grow very rapidly from seed and are sweeter and of more delicate flavor than our American onions, while the bulbs are of the **most beautiful shape and color**. We advise growers to devote their main crop to the American varieties, yet we recommend them to vary it by planting part of the foreign. We recommend them highly for summer and autumn use in the family; if marketed they command fancy prices.

**Spanish King** The outside skin is of a rich, yellow straw color, while the flesh is white, sweet, mild and tender. They bottom well, are free from stiff necks and have produced more bushels (1,127) marketable onions to the acre than any other variety known. Very rapid growth and matures early. In market it attracts marked attention. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.**

**Giant White Italian Tripoli** Of large size and most beautiful form, with fine white skin. The first season from the black it will grow an onion from 1 to  $2\frac{1}{2}$  pounds, but to attain the full size the seed should be sown in a hotbed and transplanted. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.**

**ONION SETS** Prices liable to change. Write for price on larger quantities. We will always fill orders at market rates or quote on application. If wanted by freight or express deduct 10 cents per quart.

**Bottom Sets** These are the kind in common use. They are produced from seed sown very thickly in the spring of the year, when the small set onion is produced. Planted in the spring they quickly produce "green onions" for table use, or if let grow they will produce large onions much quicker than from seed.

**White Bottom** By mail, qt. 30c, 4 qts. \$1.00. By freight or express,  $\frac{1}{4}$  bu. \$1.00.

**Yellow Bottom** By mail, qt. 30c, 4 qts. \$1.00. By freight or express,  $\frac{1}{4}$  bu. \$1.00.

**Red Bottom** By mail, qt. 30c, 4 qts. \$1.00. By freight or express,  $\frac{1}{4}$  bu. \$1.00.

**Yellow Flat Danvers** This variety differs from the Yellow Globe Danvers in being more flat. It is grown extensively as a commercial onion, ripening earlier than the globe-shaped varieties, and is surer in moist localities. It is also the preferred variety for Yellow Onion sets. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00. By express at 85c per lb.**

**White Silverskin, or White Portuguese** Very desirable for family use; flavor mild and pleasant; skin silvery white, of handsome appearance; highly esteemed for pickling when young; also for market in early winter. Extensively planted for white onion sets. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50. By express at \$1.35 per lb.**

**Extra Early Pearl** One of the earliest of the white onions. It has a snowy, waxy skin, and is a good keeper. The flesh is snow-white, and the flavor is mild and pleasant. It sometimes grows 5 to 6 inches in diameter the first year from seed. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.**

**White Barletta, or White Queen** The earliest and smallest onion grown. The bulbs attain a size of  $1\frac{1}{4}$  to  $1\frac{1}{2}$  inches in diameter. Color a beautiful waxy white. Keep well. The favorite for pickling. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.**

**Mammoth Silver King** This is unquestionably one of the largest and most beautiful onions in the world. Single specimens have weighed as much as  $5\frac{1}{2}$  pounds. No other onion excels in mild and delicate flavor, or has a more handsome and beautiful silvery white appearance. So mild are they in taste that they can be eaten raw like an apple. They always command a high price in the market. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.**

**Giant Rocco, or Naples** One of the best-known of the Italian Onions in this country. Quite extensively grown in some sections, where it produces immense crops, single bulbs weighing  $1\frac{1}{2}$  to 2 pounds each. Flavor very mild and delicate; color light brown, flesh white. Very handsome, globular shape and a good keeper. **Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 35c, lb. \$1.25.**

# ONION CONTINUED SETS

White Multiplier Onion Sets.

in many clusters (like that shown in the illustration) what we offer. They can be planted in the fall and produce the earliest of any green garden stuff, or it can be planted in the spring. Price, qt. 25c, 4 qts. 75c, postpaid. By freight or express,  $\frac{1}{4}$  bu. 75c.

**White Multiplier Sets** Of a pure silvery white color, enormously productive, frequently producing as many as 20 bulbs in a single cluster from one bulb planted. Of excellent quality and size for bunching; very early. By mail, qt. 35c, 4 qts. \$1.10. By freight or express, peck \$1.00.

**Potato Onions** This excellent sort multiplies by division of the parent bulb. It is prized for its mild flavor. Matures early and is a good cropper. By mail, per qt. 30c, 4 qts. \$1.00. By freight or express,  $\frac{1}{4}$  bu. 85c.

**Potato Onion Sets** They are the divisions from the larger parent onions, as above, and when planted will produce the earliest green onions for use on the table or the earliest dry ripe onions. They should be in every family garden. By mail, qt. 30c, 4 qts. \$1.00. By freight or express, peck, \$1.00.

## Egyptian or Perennial Tree Onion.

This is an everlasting onion. When once set out they will continue for years without the least protection in winter. As soon as the frost is out of the ground they grow very rapidly. The bottoms divide and make several irregular shaped onions that are sweet and tender. The sets are produced

on the tops of the stalks. These are sweet and tender. The sets are produced

**Okra** A large, vigorous plant, requiring a good deal of room; large kind should be planted not less than three feet apart, and the dwarf about eighteen inches. **Egyptian Sets.** In mild climates sow the seed in open ground; have the ground clean and mellow, as for a hill of corn.

**WHITE VELVET.** (White Creole)—Pods round, smooth, much larger than other sorts; produced in great profusion. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 65c.

**Parsnips** One ounce of seed to 200 feet of drill; 5 to 6 pounds per acre. A deep, rich sandy loam is preferable. Sow in drills fifteen or eighteen inches apart and thin to six or eight inches in the row. The roots are improved by leaving them in the ground during the winter. Excellent food for cattle and also for table use.

**Improved Crown.** A selection from the Hollow Crown—finer, more symmetrical in shape and more sugary and tender. A very heavy cropper, smooth and a fine variety for the home or market garden. Pkt. 3c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Long White.** A standard variety of great merit. Pkt. 3c, oz. 7c,  $\frac{1}{4}$  lb. 15c, lb. 50c.

**Parsley** One oz. to 150 feet of drill.

**Fine Curled or Double.** Used principally as a garnish for the table. Pkt. 4c, oz. 8c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**New Fern-leaved.** New variety. Very ornamental in form and coloring. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 35c, lb. \$1.00.

# A Page of Excellent Peas

One Pkt. of Each 25c. Packets, Pints and Quarts are Delivered at the Price.

## MOST MAGNIFICENT PEA OF ALL

Magnificent Pea.

**Magnificent** *Wrinkled.* A green wrinkled main crop variety, growing about  $2\frac{1}{2}$  feet in height. The pods are very large, produced mostly in pairs and all over the vines from top to bottom. The peas are large, beautiful green and of delicious flavor when cooked. The vines are very sturdy. Pkt. 10c, pt. 25c, qt. 45c, peck \$1.75.

### Bliss' Everbearing

as an excellent sort for a 18 inches to 2 feet. Its habit of growth is forming as many as root stalk. 100 pods single vine. If the peas proper size, the vines ered with blossoms and buds. ing habit a pint of seed will a quart of most other kinds. der and of a superior flavor. Greatly esteemed where- ever known. Pkt. 10c, pt. 25c, qt. 45c, peck \$1.25, bu. \$4.50.

*Wrinkled.* In this remarkable variety we have a pea which will everywhere be recognized summer and autumn crop. Height of vine ten stalks from a single have been counted on a are taken off as they reach will continue to be cov-

### Allen's Gradus or Prosperity

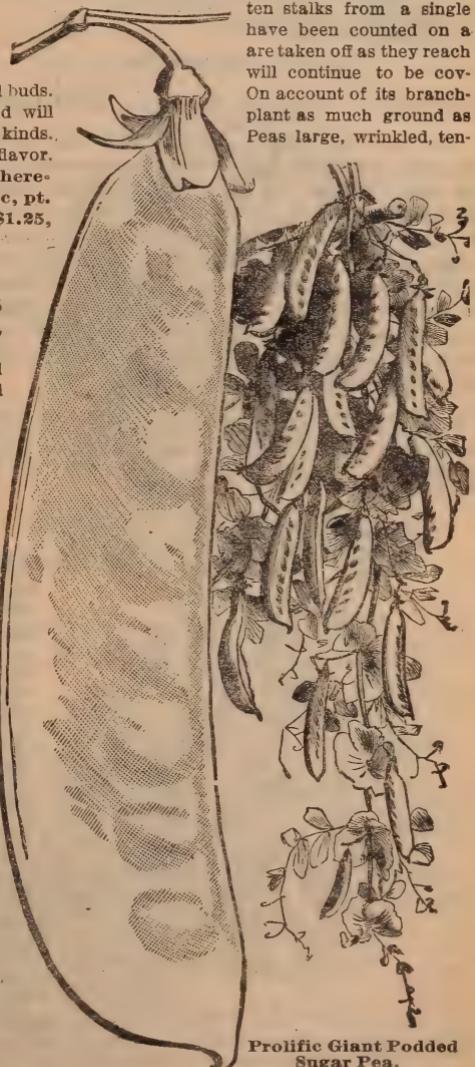

*Wrinkled.* An ideal extra early variety and one that will occupy

a foremost place for both the amateur and market gardener. The vine has heavy stems, with long, dark green leaves and grows from  $2\frac{1}{2}$  to 3 feet in height, producing large, tender, sweet, delicious peas early in June. The pea remains tender and sweet for a long time. We highly recommend this splendid wrinkled pea. Its abundant bearing and large, well-filled pods will make it extremely profitable. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.50, bu. \$9.50.

... Prolific Giant Podded ...

## SUGAR PEA

**(Edible Pods.)** Those who have not tried them can not imagine the fine table qualities of Sugar Peas. This variety is ahead of all others, not only in size of pod, and prolific bearing, but also for its delicious quality. It grows to the height of five or six feet and bears a profusion of large, broad pods, which are generally found in pairs and are so brittle that they snap without any string. The pods when cooked are very sweet and tender. It should be used similar to wax beans. Pkt. 10c, pt. 25c, qt. 45c, peck \$2.00.

Prolific Giant Podded Sugar Pea.

# EVERITT'S CELEBRATED NORTHERN CROWN PEAS

## Extra Early and Early

### Everitt's Extra Early Reliance.

The best extra early. A moneymaker for the trucker and gardener. in all the essentials of an early market or home-garden Pea this is perfection. It has made friends wherever planted and is acknowledged by all acquainted with its merits as being unexcelled as an extra early and in productiveness. They are largely grown by the best gardeners in the country. Height about 18 in. to 2 feet; vines loaded with well-filled pods. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.25, bu. \$4.00, 5 or more bu. \$3.75.

\***Extra Early Premium Gem** A dwarf, prolific green, wrinkled marrow, having all the flavor of late wrinkled peas. Height 1 foot, requires no support. Pkt. 8c, pt. 25c, qt. 45c, peck \$1.50, bu. \$6.00.

Nott's Excelsior.

Varieties marked \* are wrinkled. One quart will plant 100 feet of rows, 2 bushels per acre.

Stalk of Everitt's Extra Early Reliance Pea

\***American Wonder** So well and favorably known that it scarcely needs description. Extra early; requires no bushing; exquisite flavor. Pkt. 8c, pt. 25c, qt. 45c, peck \$1.75, bu. \$6.75.

**Alaska** This beautiful Pea has become a standard variety and the earliest of all blue peas. Vines are  $\frac{1}{2}$  dwarf, growing only 20 inches high; matures the crop for one picking, of excellent quality. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.00, bu. \$3.75.

**First and Best** Vines dwarf, about 18 inches, bearing straight handsome pods, each containing six to 8 medium-sized round peas. Pkt. 8c, pt. 25c, qt. 35c, peck \$1.25, bu. \$4.00, 5 bu. or more at \$3.75.

\***Horsford's Market Garden** A most excellent second early Pea, particularly prized by market gardeners on account of its great productiveness, as well as fine quality. It grows about two feet high, very stocky and requires no sticks. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.25, bu. \$4.50.

**Nott's Excelsior** One of the most valuable of Dwarf Extra Early Wrinkled Peas. Surpassing in earliness, yield and quality. This is an extra early dwarf pea, usually ready for the table in 40 to 45 days from planting. It grows about 14 inches high. Of vigorous constitution and wonderfully productive. Pkt. 10c, pt. 30c, qt. 50c, peck \$2.00, bu. \$7.25.

**Remember:** We pay postage on pints and quarts at above prices. This adds materially to the cost, but what you get in quality justifies the expense.

# PEAS

LATE  
SORTS

**Black-Eyed Marrowfat** A favorite variety grows about 5 ft. high. Pkt. 8c, pt. 20c, qt. 35c, peck 85c, bu. \$3.00, 5 bu. or more at \$2.75.

**Large White Marrowfat** A favorite sort; grows about 6 ft. high. Pkt. 8c, pt. 20c, qt. 35c, peck 85c, bu. \$3.00, 5 bu. or more at \$2.75.

**Champion of England** A standard sort; popular in all markets. Productive, high flavor, seeds wrinkled; 5 feet high. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.25, bu. \$4.25, 5 bu. or more at \$4.00.

# PEPPERS

1 oz. will produce  
1,200 Plants, 1  
Pkt. 200.

Golden Dawn.

**Golden Dawn** A most beautiful golden yellow, making it very beautiful in appearance either in growth or for the table. In productiveness they stand at the head of the list. The flavor particularly sweet and mild, and entirely free from any fiery flavor. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 60c.

**Procopp's Giant** The real giant among all Peppers, frequently growing 8 to 9 in. long, by 3 inches in diameter. Besides being wonderfully large, they are also beauties; color, a glossy scarlet; flesh nearly a half an inch thick; sweet and mild. Every exhibitor should grow them to add to his collection. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

**Ruby King** This magnificent Pepper grows 4½ inches long by 3½ inches broad. When ripe, they are bright ruby red color, remarkably mild and pleasant in flavor, having no fiery taste whatever. Single plants ripen 8 to 15 fruits. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

**Large Bell or Bull Nose** Early. Very large, square form, pleasant to taste, very suitable for filling with cabbage. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

Ruby King.

**Pride of the Market** A remarkable robust growing, free-branching sort, 18 to 20 inches high. Stiff stalks and very productive. The stalks are covered with the immense pods and peas from bottom to top. Requires no sticks. Pkt. 8c, pt. 25c, qt. 45c,  $\frac{1}{4}$  bu. \$1.50, bu. \$5.50.

**\*Telephone** A tall wrinkled marrow, very productive and of the best quality, with long pods containing from 7 to 10 very fine flavored peas. Height about 4 feet. Pkt. 8c, pt. 25c, qt. 40c, peck \$1.50, bu. \$6.00.

**\*Improved Stratagem** All the good qualities of the old Stratagem are highly developed. Vine medium height, but very stocky, and bearing an abundance of large, handsome pods. One of the best peas now on the market for those who want large showy pods and peas without any sacrifice in quality. Pkt. 8c, pt. 30c, qt. 50c, peck \$2.00, bu. \$8.00.

**Long Red Cayenne** Bright red color, very hot. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

**Montrous, or Mammoth** Mammoth size, Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

**Large Sweet Mountain** Very large and excellent for mangoes. Pkt. 4c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

**Chinese Celestial** It is not only a most useful Pepper, but one of the most beautiful plants in existence. Pkt. 5c.

Procopp's Giant.

**Sweet Spanish** Early. It is somewhat hot in flavor, though by no means a hot pepper. Pleasant to the taste. It is red in color at maturity. Pkt. 5c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

**Coral Gem Bouquet** A beautiful little Pepper, the fruit being borne in greatest profusion. Pods an inch in length, bright red in color, ornamental. They are hot and suited to seasoning. Makes a fine pot plant. Pkt. 10c.

**Red Etna** A valuable new variety and very ornamental. The fruits are always borne erect and the rich dark scarlet of the fruit contrasting with the bright green foliage makes a combination of rare beauty. The peppers are conical in shape, of sweet and mild flavor. Pkt. 10c.

# A PAGE OF GOOD PUMPKINS.

What is a Fair Without Pumpkins or a Thanksgiving Dinner Without Pumpkin Pie?

(Figures Refer to Illustrations)

One oz. will plant 40 hills; 5 lbs. per acre. If planted with corn, 1 to 2 lbs. per acre.

We will sell one package of each of the 13 varieties for 50 cents.

**1. Genuine Mammoth** OR POT-IRON. Grows to more in diameter and 100 to 200 lbs. or more in weight. Salmon colored skin, fine grained and of excellent quality. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c.

**2. Mammoth Tours** Grows to an immense size, often weighing 200 pounds. Seeds saved from selected specimens. These seeds have frequently sold at fairs at 10 to 25 cents each. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 35c.

**3. Mammoth Etampes** Skin is very bright, glossy red, and presents a most handsome appearance, whether for exhibition or on market. Thick-meated, flesh very rich in color and of excellent quality. In only ordinary soil it grows about 2 feet in diameter. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 35c.

**4. Connecticut Field** Large, color yellow. Largely raised for feeding stock. Pkt. 4c, oz. 6c,  $\frac{1}{4}$  lb. 15c, 1b. 35c. 5 lbs. or more by express at 20c per lb.

**5. Tennessee Sweet Potato** Medium size, pear-shaped, a white sometimes lightly striped with green. Flesh thick, white, fine-grained, dry and brittle and of most excellent flavor. Keeps sound until late in the Spring. When cooked it has the appearance of sweet potatoes. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, 1b. \$1.00.

**6. Large Cheese** A valuable field sort. Very hardy and productive. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 15c, 1b. 50c. By freight or express, 5 lbs. at 30c per lb.

**7. Kentucky OR INDIANA FIELD** Best variety for raising with corn. Grows to a large size, solid and is relished by stock; also valuable for pies and canning. Pkt. 4c, oz. 7c,  $\frac{1}{4}$  lb. 15c, 1b. 50c. By freight or express. 5 lbs. or more by express at 20c per lb.

**8. Golden Oblong** Grows 15 to 20 inches in length, golden orange color; flesh light yellow, making the very best of pumpkin pies. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1b. 75c.

**9. Japanese Pie Pumpkin** This odd variety comes from Japan and is a choice pie and cooking pumpkin. They ripen early, keep well. Flesh is very thick, being nearly solid, fine-grained, dry and sweet, having the flavor of sweet potatoes. The seeds are peculiarly marked with Japanese characters. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1b. 75c.

**10. Golden Marrow** Shaped round oblong, slightly ribbed. Golden orange color. Cooks soft and tender; the best of keepers. Immensely productive. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1b. 75c.

**12. Quaker Pie Pumpkin** A distinct variety, grown for many years by a family of Quakers. Color creamy white, both inside and out. Flesh sweet, rich; an excellent keeper. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1b. 75c.

**13. Small Sweet Sugar Cashaw** Excellent table qualities. Light cream shell; flesh salmon color; very productive. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, 1b. 75c.

*Win it. You will Prize it.*

The Great  
Prize  
Pumpkin

# King of the Mammoths

Largest Pumpkin  
on Earth.  
A Sure Prize  
Winner.

Truly a colossal variety. No other Pumpkin ever reached such enormous weights, and any person can grow them of mammoth size by planting on rich ground. If planted on any good land they are wonderfully productive as a field crop. Grow King of the Mammoths and you will be sure of the prize at your fair, besides having one of the best table or pie Pumpkins ever grown and a grand keeper. Read the following:

Mr. J. A. Everitt: I had a vine of King of the Mammoths Pumpkin that surpassed anything I ever heard of. There were 21 matured pumpkins on one vine. The largest weighed 82 pounds next 79, 78, 75. I did not weigh more. I exhibited them at our county institute and thousands of people were surprised. I enclose a clipping from our newspaper.

MRS. JAMES A. SEED, Lawrenceville, Ill."

The newspaper clipping was as follows:

"Perhaps the greatest exhibit shown at the Institute was 21 pumpkins grown on a single vine. They were grown by James A. Seed, and their average weight was 50 lbs. and total weight more than 1,000 lbs.

Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 50c.

## LAKE SHORE PUMPKIN

VIEW OF A FORTY-ACRE FIELD. From Photograph.

This variety of Pumpkins we obtain from a large canner in Ohio, who prefers them to all others. He has for years been improving the strain by careful, systematic selection, until he says, they have reached a degree of perfection for large size, thick meat and heavy weight unequaled by any others. He also says "More tons of pumpkins can be grown per acre of the Lake Shore, whether with corn or by themselves, than of any other variety." PRICE—Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c, 5 lbs. or more by express or freight at 50c per lb.

I must say, Mr. Everitt, that I never grew so many pumpkins on so little ground with so few seeds as from your O.K. Seeds. They are the finest and best for pies I ever saw.

S. J. GALEBREATH, Valley, Ohio.

# A PAGE OF SUMMER RADISHES

Sow 1 oz. to 100 Feet of Drill.

Price, unless otherwise quoted: Pkt. 5c, oz. 8c,  $\frac{1}{4}$  lb. 20c, lb. 65c,  
by mail.

Numbers Before the Names Refer to Illustrations.

**Shepard** Still at the head of the list as the best and earliest long scarlet Radish in existence. Excels all others in rapid growth, attaining a size of 12 in. in length and 1 $\frac{1}{2}$  in. in thickness in 30 days from sowing the seed, and will grow 20 in. in length and 3 to 4 in. thick before becoming hard and woody, beautiful scarlet color with white tip.

**Wood's Early Frame** A long red Radish, small top, excellent for forcing.

**Early Long Scarlet** **TOP** Of quick growth; color bright scarlet, long, straight and smooth, crisp and tender.

**Long White Vienna** The finest and most beautiful long white Radish. Tender, mild flavor; grows quickly.

**1. Giant White Stuttgart** Very early; pure snowy white. It grows to an immense size. The quality is always the very finest, firm, brittle.

**2. Newcom** One of the earliest and largest white Radishes grown. Beautiful half-long shape and fine appearance. Quality very fine.

**3. New White Strasburg** One of the most popular summer Radishes grown. Of handsome oblong shape, tapering beautifully to a point; pure white and almost transparent; very tender and delightful pungent taste.

**5. Early Scarlet Turnip** Extra early. **Brilliant color.** Especially recommended to market gardeners.

**6. Early White Turnip** Quick growth, crisp, tender. Very fine.

**8. Early Scarlet Turnip** **WHITE** Beautiful scarlet variety, **TIPPED** in a white tipped tail, or root. Very fine.

**9. White Box** Its short top and rapid growth fit it for growing under glass, in frames or boxes, as well as for early sowing in the open ground.

**10. Early Yellow Summer Turnip** Russet-colored sort. Grows much larger than the white or red turnip sorts. Best kind for resisting the extreme heat and drought of the Southern States. Very fine.

**11. Twenty-Day Forcing** A new and very distinct type of the well known olive-shaped Radish. Of perfect form, smooth skin, fine color and very short leaves; **extremely quick growth, takes only 3 weeks to mature.** Valuable for forcing, while it does equally well in the open ground.

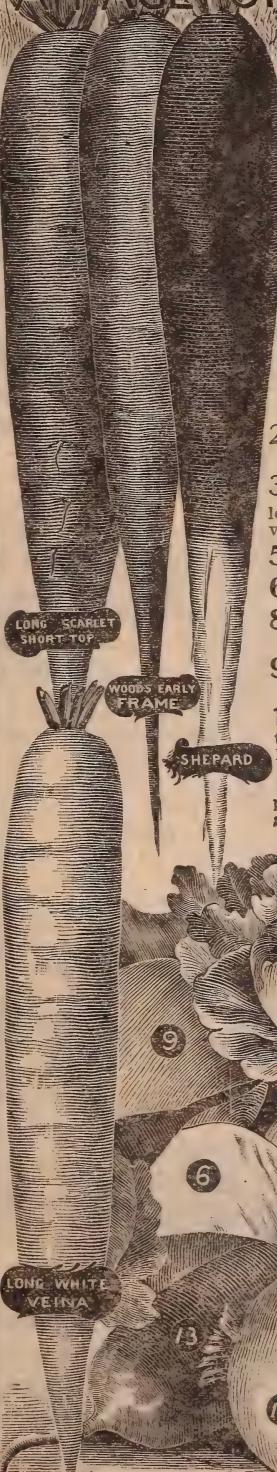

**12. Scarlet, Olive-Shaped** Well adapted for forcing or early sowing in open ground.

**13. Early French Breakfast** Extremely early and very tender; beautiful, scarlet tipped with white.

**14. Early White Globe** Very large, round. Of beautiful form, pure white, crisp and brittle. It grows quickly to a large size.

**15. Early White Olive Shaped**

Is very early. Summer varieties mixed. Includes all summer varieties in list.

ENGRAVED FOR  
J. E. BEVITT

# RADISHES

Continued.

Brightest Long Scarlet.

**Brightest Long Scarlet** **White Tipped.** An extremely handsome long radish of great merit. Resembles the Early Long Scarlet in shape and size, being fit for use in **25 days after sowing.** The most remarkable quality, however, is its color, which is the brightest scarlet, except the tails, which are tipped white. An extra fine sort for the home or market garden, the quality being very good. **Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.**

**Vick's Early Scarlet Globe** **Forcing.** A most excellent extra early radish for garden culture and for hotbed forcing. Flavor mild; crisp, juicy, tender and very beautiful. It is the market gardener's favorite as a forcing radish. It forms a small top and will stand a great amount of heat without becoming pithy. Its fine shape makes it sell for a higher price and more rapidly than other globe-shaped sorts. **Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.**

**Non Plus Ultra** An improvement on the Deep Scarlet Turnip. Remarkably fine in quality and of very quick growth; ready to pull within three weeks after sowing. Perfectly globular, little roots, of very bright color and excellent shape. It is one of the best for forcing. **Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.**

## WINTER RADISHES

Prices of all varieties:

**Pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.**

The following varieties should be sown in August or September for use during the winter:

**California Mammoth White** It grows to a large size. Flesh solid and of a good flavor.

**Long Black Spanish** One of the largest of radishes. Roots oblong, black, of a very large size and firm texture.

**Salsify or Vegetable Oyster.** One ounce will sow 50 feet of drill. **MAMMOTH SANDWICH ISLAND.** Mammoth indeed, as compared with the common kind. It is pure white in color and has all the good qualities of the others, which, with its great size, will recommend it to all gardeners. **Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. \$1.00.**

**LONG WHITE.** **Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. \$1.00.**

**White Chinese** Roots nearly cylindrical, 6 to 7 inches long and nearly 3 inches in diameter. Piquant and very appetizing.

**Round Black Spanish** Black skin, white flesh and roots globè-shaped. The flavor is piquant.

**Chinese Rose** This variety has become very popular with market gardeners. It is of a half long shape, pink color, and flesh as solid as an apple.

**Winter Varieties Mixed.** Includes all winter varieties in our list. **Large pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.**

## RHUBARB

**Victoria** Very large stalk, from 2 to 3 inches broad and from 2 to 3 feet high. Excellent for pies. **Pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. \$1.00.**

**Victoria Rhubarb Roots.** By mail, \$1 per dozen. By freight or express, 50c per dozen. For 50 cents we will send "The New Rhubarb Culture." It is a book that tells all about growing and marketing the crop successfully.

## SPINACH

Sow 1 oz. to 50 feet of drill; 12 lbs. per acre.

Will send any variety of Spinach by freight or express at 18c per lb. in 5 lb. lots.

**Thick Leaved Round** Generally preferred for early sowing, and is a popular sort with market gardeners. Leaves large, thick and fleshy. **Pkt. 3c, oz. 5c, 1/4 lb. 15c, lb. 35c.**

**Bloomdale** The leaves are numerous and partially rolled. It is much liked by gardeners wherever introduced. **Pkt. 3c, oz. 5c, 1/4 lb. 15c, lb. 35c.**

**New Long Standing** A sort of the finest quality the weight of crop as other sorts, and is also the hardest of all Spinachs. The leaves are numerous, succulent, curled and wrinkled like Savoy Cabbage. **Pkt. 3c, oz. 5c, 1/4 lb. 15c, lb. 35c.**

# Squashes

Plant about 4 pounds per acre.

**Mammoth Chili** The largest of the squash family, being simply immense. The largest squash on record—292 pounds—was of this variety. If you want to secure the premium at your fair, plant some of this seed. Color orange yellow, smooth skin; flesh very thick and fine grained, good and nutritious. Keeps well through the winter. Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 40c, lb. \$1.50.

## Mammoth White Bush Scalloped

They are fit to use very early, are a beautiful white color; grow very large size—12 to 15 inches across—and wonderfully prolific. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 20c, lb. 75c.

**Giant Summer Crookneck** This new strain is even earlier than the common variety. The Squashes grow to an extra large size, measuring 18 inches to 2 feet long, of finest quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

**Prolific Orange Marrow** The skin is rich, deep orange, making the Squash of a very handsome appearance. As large as the Hubbard; the flesh is very thick, fine-

large crop. Will keep till May. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

**Early Yellow Bush Scalloped.** Grows to medium size and of unsurpassed quality. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

**Essex Hybrid** A very productive Squash of finest quality and an excellent keeper, specimens have been kept until June, and as sound and good as when gathered. Early quick growth, and can be raised very successfully as a second crop, following early potatoes, peas, etc. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

## Winter Crook Neck

The best keepers. Color pale green; excellent for table use. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 85c.

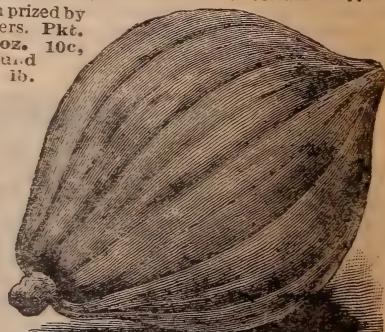

**Boston Marrow** Of large size, oval form, skin thin. When ripe bright orange, with a netting of bright cream color. Flesh rich salmon yellow, fine grained, and for sweetness and excellence unsurpassed. Not quite so dry as the Hubbard, but a much more certain cropper.

Much prized by canners. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  pound 25c, lb. 58c.

grained and of choice quality. In prime condition from September to January. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

**Hubbard** Generally considered the best winter Squash grown. Flesh dark yellow, fine grained, dry and sweet, whether stewed, boiled or baked. Very hard shell; productive; color green when ripe. Must have very rich soil for a

Prolific Orange Marrow,

# TOMATOES

Our Tomato Seed is grown from stocks selected strictly for seed and grown for seed purposes only. We use no canning house Tomato Seed.

On page 74 we offer a real giant in tomatoes—the largest of all. While size, combined with earliness, productiveness and high quality, to a great extent fills the bill, yet if we do not attain extreme earliness it lacks in being a complete all-round tomato. As is usual when we attain great size in a vegetable, we sacrifice to a certain extent earliness, hence we must make this up in another variety, which we have done in

## Everitt's Earliest of All

Extreme earliness is where this variety excels. Outside of this we have equally as good tomatoes as regards color, form and table qualities, but none of them excel **Everitt's Earliest of All**, in season of ripening. This is a very important consideration, as it allows the market gardener to get the high price early in the season, which oftentimes is the only part of his crop that it pays to market. **Everitt's Earliest of All** is a bright scarlet color, very smooth, solid and fine; medium size. The plant grows thrifty and spreading, thus allowing the sun to ripen the fruit evenly and quickly. A small investment in seed will be many fold returned in satisfaction or profit in the crop if used at home or marketed. **Pkt. 10c, 3 for 25c, 10 for 50c, oz. 25c. 1/4 lb. 75c, lb. \$2.50.**

## MAGNUS NEW TOMATO

The originator of the Magnus is the greatest tomato expert of the world and his claims are entitled to every consideration. We know our readers who have not grown the Magnus Tomato will be pleased with it if they plant it this season. The originators description is as follows:

"This very distinct and most promising new variety is of the color of Beauty and Acme. It is thicker, heavier and more solid than either Acme or Beauty, making it easily the most handsome sort in cultivation. It is unsurpassed in quality and in the production of fine, large fruits. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market. The form is perfect, uniform, large and attractive. Flesh is very firm. It is a robust grower, with short joints, setting its fruit clusters closer together than most varieties, and is therefore a heavy cropper. The fruits are very deep from stem to blossom end, many of them being almost globe-shaped. It ripens evenly, does not crack about the stem and the flavor is most desirable. We have tested it for several years for staking up in the open field, as well as for forcing in greenhouses, and we believe it to be entirely unequalled for such purposes." **Pkt. 5c, oz. 20c, 1/4 lb. 60c, lb. \$2.00.**

**WE PAY postage on all seeds quoted in pkts., ozs. 1/4 lb., lb., 4 lbs., pints and quarts, at prices named. Keep this in mind when comparing prices with other catalogues.**

# LOGAN'S GIANT SEEDLING THE LARGEST TOMATO

OTHERS claim wonderful properties and offer prizes to induce big reports, but our **Logan** Giant Seeding comes out victorious every time. If you think you have tried the largest tomato, try this one now and you will see that you did not have the largest and best heretofore. It is not only the largest variety, but we claim for it in productiveness, size of fruit, exquisite quality and flavor, as well as for early ripening, the greatest novelty extant. They grow to weight over 3 pounds each and attain the enormous circumference of 2 feet. This Tomato is not like many others on one-third seeds and water. They are a great solid ball of tender, delicious meat, with very few seeds. They have frequently sold at 15 cents each in competition with other kinds at 35 cents a bushel. If the vines are trained on a support, they will grow 10 feet high and be loaded with fine fruit that is remarkably smooth.

Read the following reports. Hundreds more of the same class have been received:

We never saw their equal for prolific bearing and size. It is a marvelous sight. **PENNSYLVANIA FARMER.**

Two Giants weighed 36 ozs. each. They are truly wonderful. The **Giant Tomato** grew very tall and fruited very large and prolific, hence imagine my surprise to find them so solid, sweet and delicious. The finest I ever ate. **Mrs. J. C. HARRIS, Pa.**

I picked 16 pounds of **Giant Tomatoes** at one picking from one vine. **SAMUEL JOHNSON, Pa.**

I have bought the **Logan Giant Tomato** at \$3.00 per bushel for sale in my store before other varieties were ripe. **H. J. LIBERMAN, Pa.**

I bought 10 new varieties last spring, and gave them a fair comparative test. **Logan Giant** stands first for size and quality. I never raised nor saw such fine tomatoes before in my life. **J. H. CURTIS, N. Y.**

Price, pkts. 10¢, 3 pkts. 25¢, 8 pkts. 50¢, 20 pkts. \$1.00.

# GIANT CLIMBING TOMATO

The  
GIANT  
CLIMBING  
TOMATO

WE offer in the Giant Climbing Tomato the greatest novelty in tomatoes, and whoever raises it will have an attraction that will draw all eyes toward his garden.

This is not a *tree* tomato. The term "tree," frequently applied to tomatoes, is generally intended to mislead. We do not call grapes "tree grapes" because they will climb up a trellis. The Giant Climbing Tomato needs a support to climb upon, when it will grow from 7 to 15 feet high, bearing fruit all along the vine from the ground up. (See illustration below.) The tomatoes grow to weigh from 2 to 4 pounds and from 10 to 16 in. in circumference; quite smooth and regular in shape; color, glossy red; heavy, with very few seeds. They are ever-bearing, only cut off by frost. These tomatoes can be grown on the garden fence, on the sunny side of a house or outbuildings, or in any position where a support is provided. The more public the situation the more will they be admired.

Your Giant Climbing Tomatoes are immense. I have them weighing  $2\frac{1}{4}$  pounds, and the people see that they are wonderful. GEO. R. BOOTH, Ludlow, Mass.

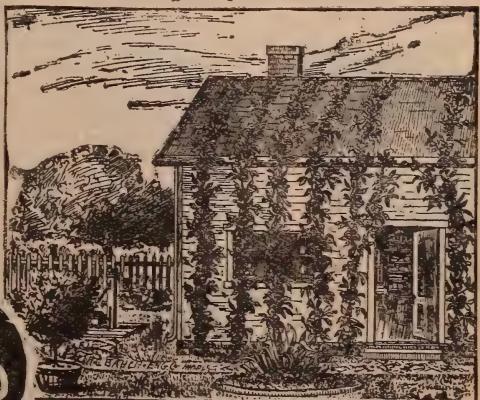

One plant of Giant Tomatoes grew over 8 feet high. The best cluster was 7 tomatoes weighing 6 pounds, all ripe at one time. WM. YATES, Titusville, Pa.

The Giant Climbing Tomatoes are wonderful in size and fine in quality. One fruit weighed 3 pounds and 1 ounce. C. H. COX, Bascobel, Pa.

The Giant Tomatoes average a yield of nearly a bushel to each plant. One vine grew 14 feet high. - H. D. MUSSER, Rohrestown, Pa.

It is a pleasure to see your Giant Climbing Tomatoes grow, and any person can well be proud of them. I have some specimens measuring 16 inches in circumference and over 6 inches in diameter. Fine flavor and better than I thought it could be. You cannot recommend it too highly. MRS. WM. CRABBE, West Branch, Cal.

**PRICE.** As this Tomato is a very shy bearer of seed, the price will always be high, yet when we consider that each plant, with proper care will produce a bushel of ripe tomatoes and probably a bushel of green ones for pickling when frost cuts them off, the price should not be considered.

Giant Climbing Tomatoes on Cottage.  
One liberal package 10c, 3 for 25, 8 for 50c.  
Families Should Club Together and get them at the Quantity Rates.

# KUTTAWA DWARF TREE

Kuttawa Dwarf Tree Tomato.

Prices of the following, unless otherwise quoted: Pkt. 5c, oz. 15c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50.

**Mikado** Also called Turner's Hybrid, is one of the finest, largest, most solid and most productive Tomatoes grown. The heaviest Tomato ever grown of this mammoth variety was grown from O. K. Seeds—weight 4 lbs. 2 oz. Rapid grower, thick stalk, beautiful shape and color; weight varies from 1 lb. to over 4 lbs.

## Early Essex Hybrid

**Essex Hybrid.** This is one of the most profitable Tomatoes for the market in cultivation. Pink skin, very early and always ripening all over alike. The flesh being very hard and solid makes it one of the best Tomatoes for shipping and marketing. We recommend it highly.

**Improved Trophy** Fruit large, smooth, solid, fine color, very productive, well known and popular market sort.

Selected Acme.

## Selected Acme

**One of the earliest in cultivation.** Fruit of medium size, perfect form, round, slightly depressed at the poles; pink purplish color. Ripens evenly and has no green core. Bears continuously until frost comes.

**Perfection** Shaped like the Acme, but somewhat larger, fully as early, perfectly smooth, blood red in color, with more solid flesh and fewer seeds, and produces more and larger fruit at the end of season.

**Peach Tomato** This a very useful and beautiful oddity. For preserving, the Peach tomato is hard to beat.

The great tomato that stands up like a bush. Plant deeply and draw earth up around the stem and you will have no dirty tomatoes to pick off the ground. Almost proof against cut worms on account of the woody nature of the stems. Very productive. Fruit bright red, very solid. Best keeper and shipper. Its upright, self-supporting habit and compact growth allows it to be planted 16 inches apart in rows  $\frac{1}{2}$  feet apart.

The effect is a solid row or hedge of green from end to end of the rows, allowing 8,000 to 10,000 plants on an acre without crowding. The plants grow 20 to 30 inches high and support the fruit off the ground.

The plant when growing resembles Irish potatoes—so much so that it is usual for people to ask, "What kind of potatoes are these?" In season is early, ripening equal with any of the other large size tomatoes, and is superceded only by the small fruited sorts. Adapted for cultivation on a large or small scale for the cannery, for the market, for the home. Besides all its good qualities, it is a great novelty. Every person who plants a garden should plant a package or more. Pkt. 10c, 3 for 25c, 8 for 50.

**Stone** This new main crop Tomato is very large, bright scarlet red color, smooth shape. A distinguishing feature, and from this it takes its name, is its great solidity. The flesh is very firm. One of the best shippers. A grand variety, unsurpassed for keeping.

## Golden Queen

There are many varieties of the red Tomato, but every gardener will hail with delight this fine yellow sort. In size, solidity, and productiveness equals any of the red.

Stone.

## Longkeeper

This new Tomato of recent introduction was originated by E. S. Carman, editor of *The Rural New Yorker*. It is claimed by the originator to combine long-keeping qualities, uniform shape, earliness in ripening as well as productiveness to a remarkable degree.

**TOMATOES FOR PRESERVING.** Red Cherry, Yellow Cherry, Red Pear-shaped and Yellow Plum.

**Livingston's Beauty** A fine variety from originator of Acme, Paragon, Perfection and Favorite. Very distinct from all former introductions. The color is a glossy crimson with a purple tinge. It grows in clusters of four and five, retaining its large size late in the season; very solid, with a tough skin, making it very desirable for market and shipping.

Favorite.

**Livingston's Favorite** Ripens evenly and early, holds its size to the end of the season. It is very prolific, few seeds, solid flesh, bears shipping long distance. This is one of the finest Tomatoes in our list.

**CUT THIS OUT**

And send with 50 Cents and we will send THE NEW ONION CULTURE. It will tell you all about growing and marketing the Crop.

# TURNIPS

One oz. will plant 250 feet of drill. Sow about 1 lb. broadcast per acre.

We sell any of the following varieties, unless noted, at—Pkt. 4c, oz. 8c,  $\frac{1}{4}$  lb. 15c, lb. 50c by mail; by freight or express, per lb. 40c.

## Carter's Cardinal

This variety is distinct from others, having a deep cardinal skin, which not only appears on the top, but also covers the whole root. Of course we do not recommend it entirely on account of its novel color, but as a good, all-round variety. The Cardinal is of medium size, flat, with very short top, and a fine table quality. It is one of the best varieties to grow on hot, dry land, and not running to seed like some early kinds and being quite sweet and solid. The Cardinal has a strong tap root, this doubtless protecting it from drought, and having thick, spreading foliage, the root is shaded. A great acquisition. One of the very earliest, being ready for use a short time after sowing. Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 30c, lb. \$1.00.

**Six Weeks** or **Early Snowball**. This new Turnip is very early, growing and maturing rapidly. Bulbs beautiful white; medium size, solid. Flavor mild.

**Munich Purple Top**. One of the earliest in cultivation making an excellent spring garden turnip.

**Red or Purple Top** **Strap Leaved**. One of the most popular varieties, both for table and stock. Grows to large size, solid, crisp, and mild flavor. We have the best strain of this popular variety that can be found anywhere. None better.

**Extra Early Milan** The earliest flat Turnip in cultivation. Of medium size with a bright purple top; of choicest quality, hard, solid, and fine grained; an excellent keeper. Pkt. 5c, oz. 10c,  $\frac{1}{4}$  lb. 25c, lb. 75c.

**Flat Dutch** **Early White**. Size medium; flat, white, sweet, tender, rich for table, fall and winter.

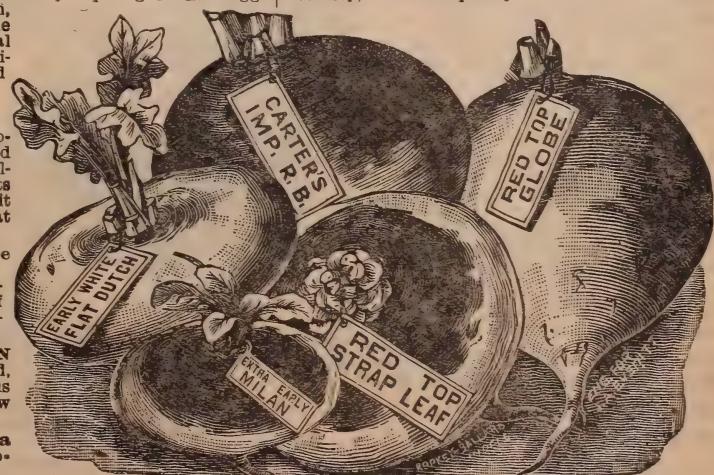

**White Egg** A variety of very rapid growth. Egg-shaped, thin, white skin; solid, firm, fine grained flesh; of exceptional value to the hot southern climate, and is not appreciated at its full value in the North.

**Red or Purple Top** **Globe** This is the most productive variety and one of the handsomest. Quality very fine. Owing to its great yielding properties, it can be grown with great profit for stock.

**Golden Ball** or **Orange Jelly**. Very beautiful and bright yellow turnip, yellow flesh, of medium size, sweet and delicious flavor.

**LONGWHITE COW HORN** Flesh white, fine grained, sweet, keeps well. Enormous cropper. Valuable to grow for stock feeding.

In July we publish a **SPECIAL TURNIP** Price-list. Send for it.

**Large White Globe** Sometimes attains a weight of 12 lbs.; extra good fall and winter; skin white.

**SWEET GERMAN**. Must be sown much earlier than the flat turnips. In the autumn and early winter it is apt to be hard, but softens in time.

**SEVEN-TOP OR FORESTER**. Grown exclusively in the South for its abundant leaves, which are boiled with meats.

## Swedes or Ruta-Bagas

Same price as Turnips.

Grown for stock food and could be profitably cultivated on a much larger scale.

**CARTERS' IMPERIAL**. A hardy sort, excellent for table use or stock feeding. Does not run to long necks. Should be sown a month earlier than other varieties.

**LAING'S IMPROVED RUTA-BAGAS**. One of the earliest and best for table. Handsome variety, first-class quality.

Plants are generally known as Annuals, Biennials and Perennials.

**Annuals** Are those plants that flower and mature their seeds within a year after they are sown and then perish.

**Biennials** Are those plants that flower the second and sometimes the third year after the seed is sown and then perish.

**Perennials** Are those plants that generally do not bloom until the second year, and then live and bloom for several years in succession.

*In the list a. stands for annual, b. for biennial, p. for perennial, etc.*

## SEEDS FOR SPECIAL PURPOSES

The following list will be found convenient to many in making their selections:

**Plants of Tall Growth suited for large Beds, Backgrounds or Centers, around which smaller kinds may be grouped.** Antirrhinum, Aquilegia, Aster, Balsam, Calacalia, Calendula, Delphinium, Gallardia, Hollyhocks, Marigold, Mirabilis, Salpiglossis, Scabiosa, Stocks, Sweet William, Zinnia, etc.

**Climbing plants for Trellises, Verandas, Pillars, etc.** Canary Flower, Cinnamon Vine, Cobaea, Cypress Vine, Ornamental Gourds, Ipomæa, Nasturtium Tall, Sweet Peas, Wild Cucumber, etc.

**Spreading or Trailing Plants adapted to Vases, Hanging Baskets, Rockeries, etc.** Abronia, Alyssum, Gilia, Lobelia, Maurandia, Myosotis, Nemophila, Nolana, San-vitalia, Verbena, etc.

**Low-growing Plants of Spreading Massing or Edging.** Abronia, Ageratum, Alyssum, Caliopsis, Campanula, Candytuft, Catchfly, Centranthus, Clarkia, Convolvulus, Daisy, Lobelia, Mignonette, Myosotis, Nasturtium Dwarf, Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, Pyrethrum.

**Selection of Colors.** If it is desired to fill separate beds with flowers of a single color, and of such kinds as will have a fine appearance and bloom the whole season, select from the Phlox Drummondii, Pansy, Verbena, Petunia, Salpiglossis, Stocks, Balsams, Zinnias, etc.

**Fragrant Flowers.** The Mignonette, Sweet Pea, Alyssum, Stocks, Carnation, are all fragrant and fine for cut flowers.

**Habit, adapted to small Beds, Ribbons,**

### A LOAD OF FLOWERS

This girl's parents buy flower seeds of J. A. EVERITT, Seedsman. A small sum invested in O. K. FLOWER SEEDS will afford loads of Flowers for the whole sea-son.

## A SELECT LIST OF O. K.

# Flower Seeds

Every person, whether in country or city, should raise some flowers. I believe the most novel flower garden, and at the same time one of the prettiest I ever saw, was cultivated in Indianapolis on a narrow strip of ground between the pavement and the busy street.

In the following list "a" stands for annual, "b" biennial, "p" for perennial, "h. a." hardy annual, "h. h. a." half hardy annual, "t. p." tender perennial.

O. K.

**Bartonia** Aurea, h. a. Large yellow flowers,  $2\frac{1}{2}$  in. across, with downy, thistle-like foliage; exceedingly brilliant; one of the most showy: 18 in. to 2 ft.; blooms early, 4c.

# ASTERS

DWARF WHITE QUEEN

CROWN OR COCARDEA

## ASTERS (FALL ROSES)

This is one of the most popular, beautiful and effective garden plants; grows from 10 to 24 inches high. For profusion of flowers and richness of display the Asters are unrivaled and constitute the principal adornment of our gardens during the autumn. Sow early in the spring, under glass or in pots in the house, and transplant into rich soil about one foot apart, according to height of plants. Splendid for bedding, border and pot culture. a.

**Crown or Cocardea.** A very showy variety, the centers being white and the outsides of the blossoms bright colors; 18 inches. All colors mixed. Pkt. 10c.

**DWARF WHITE QUEEN.** The bushy plants are about a foot high, and when well grown the flowers are large (3 to 3½ inches in diameter) and very beautiful. Excellent for pot culture and borders.

Choice Colors Mixed 10c.

### Paeony Flowered

**Aster** Grows 18 to 24 inches high; neat, compact habit, blooming profusely. Flowers large and perfectly double. Colors peculiarly rich and brilliant. Strongly recommended for planting either in beds or masses. Nearly 30 colors. Pkt. 10c.

**Dwarf Bouquet** A most charming class, of compact habit, only six to eight inches high. Each plant is covered with handsome flowers and looks like a bouquet set in the ground. Mixed 10c.

**Dwarf Chrysanthemum Flowered** Fine, double flowers, resembling Chrysanthemums, and valuable on account of profuse flowering when others are done; plant 12 inches high. Many colors mixed. Pkt. 5c.

**Begonias, Tuberous Rooted** Among the handsomest of our summer flowers. Easily grown from seed, if care is taken to sow carefully and not destroyed by watering while very young. They are covered the whole summer with bright flowers. The seed will produce bulbs, which store in fall same as dahlias.

Double Mixed 20c. Single Mixed 10c.

**Begonia Rex** Not tuberous rooted, but fibrous. Large ornamental leaves. Pkt. 20c.

Full size pkts. fresh seed, only 3c per pkt. up.

A Beautiful and Valuable Premium. See last Cover Page. Win it. You'll Prize it.

Bouquet  
DWARF

TUBEROUS BEGONIAS-DOUBLE

**Browallia** (Rozelia) *a.* Valuable for blooming during winter in the house, as well as bedding out during summer. 4c.

**Cacalla** (Tassel flower) *a.* Small, pretty plants; tassel-like flowers; fine for cutting. 4c.

**Calceolaria** *t. p.* Gorgeous plants for window or greenhouse. The immense flowers are borne in the greatest profusion; colors yellow, maroon, crimson, white, etc.; many spotted and blotched in the most curious fashion. **Grandiflora**, large-flowering, mixed, 20c.

**Calendula** *a.* Dwarf bushy plants, blooming profusely till frost; easy culture, indispensable in every garden, and fine for pot culture in winter. Choice mixed, 4c.

**Calliopsis** For a mass of bright colors scarcely surpassed. Large, bright flowers in great abundance from early summer until frost. Succeeds everywhere. **Golden Wave**, 4c; finest mixed, 4c.

**Campanula** *h. p.* Great favorite, bearing large bell and saucer-shaped flowers in great profusion. Finest mixed, 4c.

**Canary Bird Flower** *a.* A rapid grower, 10 to 15 feet. Covers trellises in a graceful way, and bears hundreds of bright, pretty yellow flowers which resemble canary birds with wings extended. **Pkt. 5c.**

**Candytuft** *a.* Dwarf, flowers profusely throughout the summer. Great favorite for beds, pots, edging and borders. Of the easiest culture. The best effect is obtained by raising in masses. **White Rocket**, 4c; **Crimson**, 4c; **Finest Mixed**, 4c.

**Cannas** Generally these flowers are raised from roots, but our seed can be sown from January to April and produce plants for bedding much cheaper than the roots can be obtained.

Mixed, old varieties, 5c; **Mixed, Crozy Dwarf**, 5c, oz. 20c.

**Centuarea Candidissima**, *a.* (Dusty Miller). Fine ornamental plant of great beauty. **Pkt. 10c.**

**Castor Bean** See Ricinus.

**Clarkia** *a.* Charming flowers, very pretty and of many colors. Mixed, 5c.

SEE THE BEAUTIFUL PREMIUM OFFERED ON  
LAST  
COVER  
PAGE.

**Celosia** (Cockscomb) *t. a.* Highly ornamental plants, producing crested heads of flowers, resembling a cock's comb. Flowers are of many colors and shapes, but the scarlet and crimson are the most brilliant and rich. Showy plants may be raised from seed planted in open ground in May or earlier in hot-beds. The oftener they are transplanted, or shifted, the larger and more beautiful they grow. Plant 3 feet apart.

**Feathered or Ostrich Plumed** 10c, **Golden Beauty** 5c, **Glasgow Prize** 5c, **Mixed** 5c.

**Coleus** Beautiful ornamental foliaged plants both for hot-houses, and bedding out during the summer in sheltered places not exposed too much to the sun. The broad, oblong, slightly denticulated leaves are of deep crimson brown color, edged with green and yellow, or salmon or mottled in a picturesque manner, (*f.*) **Fine Hybrids, mixed.** 10c, **New Large Leaved, Fringed,** 15c.

**Collinsia** (*a.*) Free-flowering plants of great beauty, for mixing flower gardens; great variety of color—White, Purple and Crimson predominating. One or two ft. **Mixed,** 5c.

#### **Convolvulus Minor**

(*a.*) **DWARF MORNING GLORIES.** Beautiful and showy plants, producing an abundance of richly colored flowers and in fine weather the flowers remain open all day. They bloom from July until autumn. **Mixed,** 5c.

**Convolvulus Major** (*a.*) **TALL MORNING GLORIES.** Climbing plants unequalled for rapid growth attaining a length of 30 to 50 feet. **Mixed,** 4c. **Japanese Morning Glories,** new mammoth flowering, 5c.

**Double Daisy** (*Bellis.*) *ø.* A favorite plant for beds or pot culture, or for edging in shady situations. In bloom from April till June. Almost hardy. This is the famous little double daisy often carried through the winter in frames for early spring blooming. A charming plant. It blooms best in cool weather. Six inches high. **Double Mixed,** all colors, 5c.

These beautiful, fragrant Marguerite Carnations will be in full bloom in about four months after sowing the seed. The plants succeed alike in open garden or in pots, and are of such vigorous, dwarf, erect growth that no supports are required. The flowers are of high type, exquisitely sweet, fully 80 per cent. perfectly double, the calyx of which does not split. The range of color, marking, variegations and shading is quite remarkable. All colors mixed. Pkt. 10c, 3 for 25c.

**Fine Double Mixed German** 10c.

# CLEMATIS

OUR PRICES  
ARE LOW.  
OUR  
SEEDS  
ARE  
POPULAR

We Also Offer Clematis  
Plant.

(See Dept. of Plants.)

A well-known and much  
admired rapid-growing,  
free-flowering,  
ornamental climber.

No flower has  
more rapidly ad-  
vanced in popu-  
lar favor than

the Clematis.  
Within a few  
years it has

become the  
popular  
favorite  
climber of  
the world.  
For pillars,  
trellises or  
planting a  
about  
rock work,  
Clematis  
cannot be  
excelled.

Seeds  
should be  
soaked 24  
hours in  
warm  
water be-  
fore plant-  
ing. Sow  
early in  
shallow  
boxes in  
usual way.

They will  
generally lie dormant,  
even in the  
green-  
house, but  
germinate  
on the ap-  
proach of  
spring.

When an  
inch or two  
high trans-

plant into boxes or small pots  
preparatory to planting in open ground in May.

**Paniculata.** One of the finest, of robust habit,  
covered from the ground to the tip  
with pure white, fragrant flowers, which are followed  
with ornamental seed pods not much less beautiful. **10c.**

**Flamula.** Also called Virginia's Bower. Fragrant,  
white feathery flowers cover the vine. **5c.**

**Jackman's Large Flowering.** Flowers 3  
to 4 inches  
across; colors are blue, white, purple, etc. **10c.**

**Chrysanthemums FROM SEED.** Our seed will  
produce grand blooming plants  
the first season. It is selected from the choicest Chinese and  
Japanese varieties. All the new varieties are grown from  
the seed like we offer, and who knows, you may produce a  
prize sort! *a.* **Japanese Hybrids.** Pkts. **15c.** **Chinese**  
**Hybrids.** Pkts. **15c.** **Large Flowering.** Choicest  
**Mixed 20c.**

**Cineraria Hybrida** Magnificent flower-  
ing plants for spring  
decoration for the conservatory or window gar-  
den, and can be planted out during the summer.  
The flowers measure 2 to 3 inches across, are of  
white, blue, violet and crimson shades; usually 2  
or more colors are shown in one flower, covering  
the plant with a sheet of bloom. **Pkt. 15c, 2**  
**for 25c.**

### Maritima (Dusty Miller)

Fine silvery white foliage and stems. Suitable for ribbon planting, hanging baskets, vases and pot plant. *a.* 5c.

**Cypress Vine** *Ipomoea Quamoclit.* A most beautiful climber, with delicate, dark green, feathered foliage, and an abundance of bright star-shaped scarlet, rose and white blossoms, which in the bright sunlight present a mass of beauty. Planted by the side of a veranda, tree or stakes, and trained properly, nothing is prettier. The seed will sprout more readily if warm water is poured on the ground after sowing. **White 5c, Rose 5c,**

**Scarlet 5c, Mixed 5c.**

**Cobaea** *p.* A rapid climber, attaining the height of 30 feet in a season; of very easy culture, particularly suited for covering walls, arbors, etc. Large purple bell-shaped flowers. 5c.

**Eschscholtzia** (*California Poppies*). Beautiful and popular garden plant of easy culture, forming nice bushy plants 1 foot high. The large saucer-shaped flowers are produced numerously from spring to fall. **Double White 5c, Double Yellow 5c, Mixed 4c.**

**Euphorbia Variegata** (*Snow on the Mountain*). A showy border plant, large robust growth, with foliage veined and margined with white; very attractive. 5c.

**Forget-Me-Not** (*Mysotis*). The Forget-Me-Not is an old favorite plant, bearing clusters of star-shaped delicate blue flowers with white and yellow eyes. It flourishes best in a moist, shady situation, and is in constant bloom nearly the whole season. Blooms the first year from seed if sown early. Seed sown in autumn succeeds best, flowering in early spring. **Alpestris. Bright blue 5c, White 5c, Mixed 5c.**

**Four O'Clock** (*Marvel of Peru*). Beautiful summer blooming, of bushy habit, 2 feet high, each plant bearing throughout the summer hundreds of funnel-shaped large flowers of white, yellow, crimson, striped; very fragrant. **Mixed 4c, variegated foliage, brilliant flowers, 5c.**

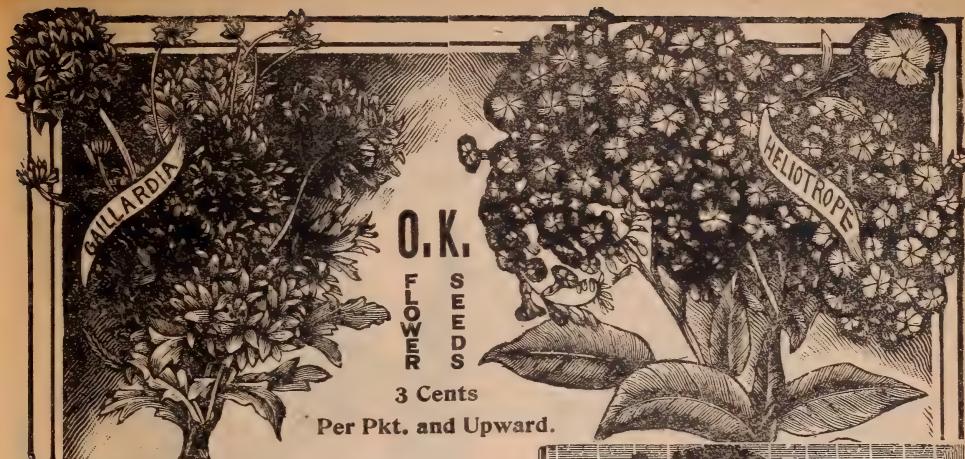

**Fox Glove** *Digitalis.* Especially useful among shrubby and in half shady places. Long racemes of beautiful flowers. Colors, purple, Some are beautifully spotted. Height three or four feet. Much admired. **Spotted Gloxina, Flowered, Mixed, 10c. Monstrous, Mixed, all kinds, 5c.**

**Gilia** Profuse blooming, dwarf, hardy plant for massing in beds. Six to twelve inches in height. **Mixed colors, 5c.**

**Gladiolus** A summer flowering bulbous plant, two to three feet high. Colors very bright, ranging through many shades of pink, scarlet, yellow, white, etc. Can be grown to bloom the first season from our seeds, producing bulbs of great value for the second year's blooming. (See also Bulb department) **Choice Hybrids. Mixed varieties, 10c.**

**Globe Amaranth** (*Bachelors' Buttons*). Bushy plant bearing large globular flowers which if cut when well matured will retain their beauty for years **Everlasting. Mixed 4c.**

Our Flower Seeds are popular because cheap and good. 3c.  
4c, 5c and up per 1/2 pt.

**Gaillardia** Exceedingly beautiful plants, growing 1 to 2 feet high. The flowers are daisy-like in shape, and are useful for cutting. Sow early in spring in shallow drills, and thin out to stand 10 inches apart. Grown in masses they are especially effective. Flowers 2 to 3 inches across, produced from early summer until frost. *h. h. a.* **Aurora**, gold, crimson and white, 4c; **Grandiflora**, mixed, 4c; **Lorenziana**, double mixed, 4c; **Single, mixed, 4c.**

**Geraniums** From Seed. If to bloom the same summer, sow in the house quite early. Transplant as soon as large enough, and set out in the garden as soon as warm enough. It is very interesting to grow Geraniums from seed, as you get a great variety and sometimes real novelties. Our seed is the finest hybrid strains. *h. a.* **Mixed Zonale**, 10c; **Variegated Leaves**, 15c; **Finest Double Mixed**, 15c; **Apple Scented**, 10c.

**Gloxinia** A grand pot plant of unrivaled beauty, as easily grown and cared for as many common flowers. Plants of large size, shapely, bloom abundantly. The color of flowers ranges from pure white to dark red. Flowers last a long time when cut and placed in water. **Grand Large Flower, mixed, 20c.**

**Godetia** Showy garden plants of compact growth, about 1 foot high, bearing freely flowers 3 to 4 inches across, of exquisite color and shades that glisten in the sunlight like satin. *a.*

**Whitneya Compacta**, handsome flowers of bright blood red. **Pkt. 10c, Finest Mixed Varieties, 5c.**

**Gourds** Ornamental (*Cucurbita*) *t. a.* A tribe of climbers with curiously shaped fruit. Being of rapid growth, they are fine to cover old fences, trellises, etc. **Mock Oranges**, **Nest Egg**, **Apple-shaped**, **Pear-shaped**, **Bottle**, **Siphon or Dipper**, **Hercules Club**. Each, **pkt. 5c, 1 pkt. each of 7 varieties 30c. All varieties mixed 10c.**

**Gypsophila** *Elegans.* *a.* Delicate, free-flowering little plants, well adapted for hanging baskets and edging and valuable for bouquets. *5c.*

**Heliotrope** Delicately fragrant flower. Everybody loves it. It is easily grown from seed sown in open ground, flowering in August, or it can be had earlier by sowing in the house. *a.* **Finest Mixed, Sweet-Scented, 4c.**

LANTANA

**Ice Plant** Pretty summer trailer for vases and rock work; leaves covered with ice-like drops. *a.*  $\frac{1}{2}$  foot 5c.

**Lantana** Popular free-blooming and very rapid growing plants with large flower heads of various colors which emit a powerful aromatic perfume, and are continually changing their color.

During the summer, plants are completely loaded with orange, white, pink, etc., blossoms, succeeded by berries, which, when ripe, turn deep blue. Start plants in the house or hot-bed; protect from frost. *t. f.* Finest Mixed 5c.

**Linum** (Scarlet Flax) One of the most showy annuals for flower beds and masses, brilliant crimson, scarlet flowers, 1 inch across, borne in wonderful profusion. *a.* 1 foot, 5c.

**Lobelia** Tall-growing, hardy perennials with long spikes of brilliant flowers; for permanent beds and borders they are unrivaled; they are one of the few flowering plants that thrive in shady situations, 2 to 4 feet. The most brilliant plants in cultivation. **Mixed Colors**, 5c. **Erinus Speciosa**. Snow white, 4c. **Erinus Compacta**. Golden, 4c. **Crystal Palace**. Dark blue, 5c.

## Maurandia

**Large, Flowering.** Beautiful climber for garden or greenhouse, gemmed with Gloriosa-shaped flowers. Plants from seed sown in spring begin flowering by July and continue until frost. *a.* 6 feet. **Mixed colors**, 5c.

60 NASTURTUMS - MIXED

**MIXED ANNUAL VARIETIES** of Ornamental Grasses. All of our customers should have a supply of this mixture. It contains seed of all the varieties named above, thus furnishing ample material for home decoration in winter. Oz. 25c, large pkt. 10c.

**Nigella** ("Love in a Mist"). **Damascena Double Mixed.** Pretty garden annuals with feathery green foliage, in which large, double, charming blue or white flowers are set. 1 to 2 feet high. a.

**Oxalis** Pretty half-trailing annuals for hanging baskets, vases, rock-work and edging, flowering in profusion 6 to 9 inches.

**Rosea Mixed.** a. Pkt. 10c.

**Mimulus** Admirable pot plants, and equally adapted for the garden. The color and markings of the large Gloxinia-shaped flowers are rich in the extreme, ranging through crimson, maroon, yellow, white and pink, beautifully spotted and blotched. a. Mixed, 5c. **Moschatus** (Musk Plant). Emits a strong musky perfume. Flowers yellow. 5c.

**Mina** Labata. Very useful, rapid-growing summer climber. Flowers in long racemes, rosy crimson, changing to orange and pale yellow, 15 feet high. t. a. 10c.

**Momordica** (Balsam Apple) A curious climber with yellow blossoms, followed by large fruits of yellow color which burst and expose a red interior. The fruit is the chief curiosity, which also has medicinal properties for the cure of cuts, bruises, rheumatism, etc. Fine for trellises, fences, stumps, etc. a. 5c.

**Nasturtiums** No flower is more popular than this magnificent class, which presents all the richest and most varied shades found in the floral world. The tall-growing sorts are unequalled for trellises or covering unsightly posts and fences, while the Dwarf varieties are found in nearly every window box or hanging basket, as well as in garden beds. They succeed the best in light, well drained soil or slightly raised beds affording good drainage. They bloom from early summer to frost. a.

(Double Japan Pink.)

Beautiful double flowers.

Mixed, 5c. **DOUBLE**

**DIADEM.** Fine double

flowers of many colors.

Mixed, 5c. **HEDGE-**

**WIGI.** (Single Japan

Pinks,) Mixed, 5c.

### SALMON QUEEN.

Large brilliant flowers.

Single, 5c.

### CRIMSON BELL, 5c.

**Pyrethrum Roseum.**

**Primula CHINESE PRIMROSE.** The Chinese Primrose is the brightest and most free flowering of all pot plants in the house, and may be removed to the porch or sheltered in shady position for Summer. Scarlet 15c, Rose 15c, White 15c, Single, large fringed, mixed 15c, Double, large fringed 20c.

**Pyrethrum Roseum** *h. p.* From the dried and powdered flowers of this is made the famous insecticide, "Persian Insect Powder." Powder the flowers after pollen forms. Sprinkle where roaches or other insects or bugs are. It kills them without danger to human life. Keep in closed pkts. from air. Pkt. 5c.

# PANSIES

in a situation where they are somewhat shaded from the midsummer sun. If sown in June or July will bloom in fall. If sown in October will flower in early spring.

**Giant Yellow.** Yellow with splotches, 5c.

**Giant Spotted White.** 5c.

**Giant Striped.** White, blue, violet and chocolate, 5c.

**Giant King of the Blacks.** Lustrous jet black, 5c.

**Giant Fairy Queen.** New: one of the most beautiful of large-flowering Pansies. Loveliest sky-blue, with fine silver border. 5c.

## PETUNIAS

Succeed well everywhere. Particularly showy in beds or masses. Are universal favorites on account of their richness of color, fragrance and long blooming.

**Dwarf Inimitable.** Little bushy plant 5 to 8 in. high. Striped flowers. 10c.

**Hybrida.** Striped mixed. 5c.

**White.** Pure White. 5c.

**Large Flowering.** All colors. Mixed, 10c.

These charming and popular favorites, as improved, are scarcely surpassed in attractiveness and beauty in the floral kingdom. The seed we offer is the best obtainable from noted growers in this and foreign countries. Our list is not as large as some others, but we aim to omit the very expensive kinds, which, outside of the fancy grower, will not give more satisfaction than our varieties. Sow early for the best results and transplant, although may be sown in open ground in fall. If sown in October will flower in early spring.

**Giant Auricula.** Beautiful shadings of copper and mahogany colors. 5c.

**Giant Red.** Red and scarlet flowers. 5c.

**Giant Trimardean.** Distinct and beautiful new race. Flowers enormous size. Mixed, 5c.

**Giant Peacock.** Garnet cream, garnet and blue. 5c.

**Giant Fire King.** Crimson, purple and golden yellow. 5c.

**Giant Butterfly.** An exceedingly beautiful class of mammoth size and striking markings, colorings, veinings, etc. Mixed, 5c.

**Giant Lord Beaconsfield.** Lavender, heliotrope and purple. 5c.

**BARGAIN COLLECTION OF GIANT PANSIES.** One packet each of 12 Giant Pansies for 50c, 6 for 25c.

**Imperial German.** A noted strain of large flowering, beautiful pansies. Mixed, 5c.

**SECURE the GRAND PREMIUM on LAST COVER PAGE.**

**New Giant Petunias.** Gigantic Flowers, often 5 inches in diameter; of every conceivable shade of crimson, pink, white, etc.

**POPPIES** Poppies are becoming more popular each season. This is due in some measure, no doubt, to the introduction of many new varieties superior to the old varieties, having a profusion of brilliant and delicate shadings of color. They are also veined, streaked and flaked in charming profusion. This is true in all the single, semi-double and double sorts. Of easiest culture; simply prepare the ground and scatter the seeds. a.

**Fairy Poppies** Flowers perfectly double and measure 6 to 12 inches in circumference. Colors range in pure white, scarlet, lilac, rose, maroon and mixed colors. Choice Mixed, 5c.

**Snowdrift** The large white flowers are perfectly white and double. A grand variety. 5c.

**SHIRLEY POPPIES.** A new strain of marvelous beauty; colors delicate pink, carmine and crimson. Some flowers edged with white. Single Mixed, 5c; Double Mixed, 5c.

**CARNATION-FLOWERED POPPIES.** The flowers are very showy. The colors are in dazzling richness and variety. Many Colors Mixed, 5c.

## Phlox Drummondii

The Phlox Drummondii, for splendid mass of colors and a constant display, is not excelled by any other annual or perennial. It has every desirable quality for this purpose. The colors range from purest white to deepest crimson. During the summer and autumn they make a display of flowers of the most varied forms and brilliant colors. 1½ feet high. a.

Alba White, 5c; Scarlet, 5c; Rosea, pink with white eye, 5c; Splendens, bright red with white eye, 5c. Star of Quedlinburg. Flowers of star-like form, 12 inches high, bearing large numbers of beautiful flowers. Colors, white rose, scarlet, salmon, etc. Mixed 5c.

**FRINGED PHLOX.** The petals are bordered with white, while the centers are of more than 20 shades of bright colors. Very beautiful. 5c.

**PHLOX DRUMMONDII.** Many choice varieties mixed. Pkt. 4c, ¼ oz. 15c, oz. 40c.

SCABIOSA

**Ricinus** (Castor Oil Bean). A very large ornamental plant, growing 6 to 15 feet high. Very effectual as a center for beds which may taper off with cannae, caladiums, coleus, etc. a.

**ZANZIBARENSIS** (Giant Castor Plant). Grows to a height of about 14 feet; leaves sometimes 2 feet across. Mixed, pkt. 5c, oz. 20c.

**CAMBODG. ENSIS.**

Grows 6 to 8 feet. Palm-like leaves of a brilliant bronze-red maroon, stalks and stems nearly black. Foliage shows different shades. Pkt. 5c, oz. 15c.

**SANGUINEA.** Grows 6 feet. Beautiful brownish red foliage. Pkt. 5c, oz. 15c. Many kinds mixed, pkt. 5c, oz. 15c.

**Stocks** **TEN WEEKS.** These popular flowers

are easily grown and they are great favorites on account of their great beauty and sweet fragrance. They deserve a place in every

garden. Adapted to massing, edging or pot culture. a. Blood Red 10c, Crimson 10c, Sky Blue 10c, Canary Yellow 10c, Pure White 10c, Violet 10c, Dwarf German Ten Weeks 5c, Double Mixed 10c.

**Salpiglossis** A beautiful garden plant about 18 inches high, bearing flowers 3 inches across, of many beautiful colors; exquisitely veined and laced. a. Mixed large flowering 4c.

**Sensitive Plant** (Mimosa Pudica). Very curious plant. Leaves drop when touched. Pink flowers. a. 5c.

**Scabiosa** **Mourning Bride.** One of the most desirable border plants. Flowers fragrant. Colors white, lilac, carmine, etc. a. Mixed 5c.

**Sunflower** (Helianthus). **Miniature Sunflowers.** Covered with hundreds of bright orange flowers, with bright, neat foliage. a. Pkt. 4c, oz. 10c.

**MANY FLOWERED DOUBLE.** The handsome double flowers are produced at the base of each leaf, which makes the whole plant very ornamental. It grows 4 feet high and doesn't sucker or branch. Pkt. 5c, oz. 10c.

**MAMMOTH RUSSIAN SUNFLOWER.** (See Farm Seeds.)

# Sweet Peas

Everybody's  
Flower.....

Can be grown as easily as any vegetable, and the secret of greatest success is to enjoy them by cutting them as fast as they bloom. A few ounces of seed sown will give an abundance to share with the neighbors and nothing will make better friends than an occasional bouquet of charming, fragrant Sweet Peas. a.

The following list contains the cream of the varieties. Customers selecting from this list will not make a mistake and will not obtain duplicates under different names. All large flowering.

**Admiration.** Pinkish heliotrope.

## GARDEN TREASURES

as they comprise annuals, biennials and perennials. In no other manner can so many seeds be obtained for such a **SMALL COST**. This mixture is very useful for sowing alongside the garden fence and on untidy, bare spots of ground, which can be converted into beauty places. **Pkt. 10c, oz. 30c.**

A mixture of many varieties of beautiful, easy-growing flowers, producing a constant and varied bloom for several seasons,

# DEPARTMENT OF PLANTS

## CLEMATIS

THERE IS NO MORE ornamental class of plants than Clematis, and the rich show of bloom produced by the best varieties is far too magnificent to be fairly portrayed by mere words. The flowers are of large size, measuring four to six and sometimes eight inches in diameter. The colors run from intense velvety purple through blue, lavender and white, and a new crimson variety (Madame Edouard André) has lately been added to the list.

Madame Veillard

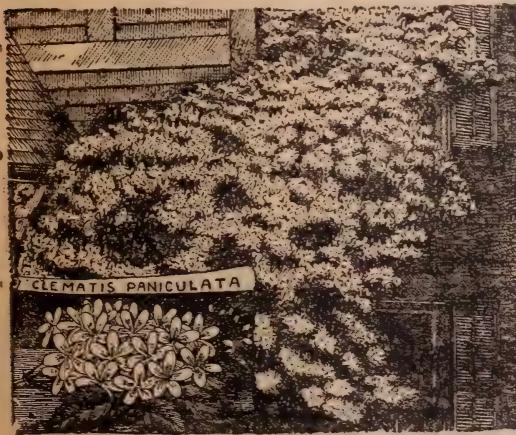

Jackmanni

Henryi

Madame Edouard André

**Dutchess of Edinburg** One of the best double whites, of vigorous habit, very free of bloom and deliciously fragrant. Each 15c, 3 for 25c.

**Henryi** A vigorous grower and a free bloomer, producing its large, pure white flowers constantly during summer and early Autumn. The best large-flowered variety, producing pure white flowers. Each 15c, 3 for 25c.

**Wistarias** The Wistaria is particularly valuable for training over buildings, second floor verandas and wherever tall growing climbers are wanted; it is a vigorous, rapid grower, and entirely hardy. The flowers are borne in long, pendulous clusters, deliciously sweet, and exceed-

**Jackmanni** The flowers are large, intense rich velvety violet purple, and are produced in such masses as to form a cloud of bloom. Well known and very popular. Each 15c, 3 for 35c.

**Madame Edouard André** Also of the Jackmanni type and is the nearest approach to a bright red that has yet appeared. The flowers are very large, usually six-petaled, of a distinct, pleasing shade of crimson, and are produced in bewildering profusion. Each 15c, 3 for 35c.

**Paniculata** One of the most valuable of all hardy flowering vines, of exceedingly rapid growth, soon reaching a height of fifteen or twenty feet and spreading out in all directions. Small, pure white flowers, borne in great masses of panicles or clusters on long stems, so profuse as to fairly cover the plant with a sheet of fleecy white. Its blooming period is in August and September, when most other vines have ceased, and it is then a sight to behold. Not its least charm is its Magnolia-like fragrance, which fills the air everywhere, even from a single vine, for a long distance. It is as hardy as an oak. Each 15c, 3 for 25c.

### SPECIAL OFFER

Any three CLEMATIS (one of each) for 40 cents, or the five for 60 cents, all postpaid.

ingly handsome; one of the best climbing vines for verandas, balconies, etc.

**Chinese Purple** Rich violet purple, 15c each.

**Chinese White** Pure white flower, 15c each.

**One plant of each for 25c, postpaid.**

# Ampelopsis Veitchi

(Boston Ivy)

A beautiful climbing plant. This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingled with green leaves. The color is a fresh deep green in summer, changing to the brightest shade of crimson and yellow in autumn. It is quite hardy and becomes more popular every year. Each 15c, 2 for 25c, 5 for 50c, 12 for \$1.00, postpaid.

AMPELOPSIS VEITCHI.

they make. Iron or wire fences are best, but almost every kind will soon be covered with a mantle of living green. They are both very fragrant and beautiful. The varieties described below are the very best.

**HALL'S JAPAN.** A strong growing, almost evergreen sort with pure white flowers changing to yellow. Very fragrant; covered with flowers from July to November.

**MONTHLY FRAGRANT.** Red and yellow; very fragrant. Blooms all summer; leaves tinged with reddish color.

**SCARLET TRUMPET.** Bright, red trumpet-shaped flowers; bloom very freely the entire season, vigorous and rapid growth.

Price of each variety of Honeysuckles, 15c; 2 for 25c, 5 for 50c, 12 for \$1.00, postpaid.

ORDERS for Honeysuckle, Ampelopsis, Wistaria and Clematis should be received not later than April 15. See other Climbers in flower seeds. Orders for all Plants will not be filled until weather permits in the Spring.

Hardy Shrubs and Plants once Planted will last years. Orders should be received by April 15, although some seasons we can fill them until May 1.

New  
Double...

Golden  
Rudbeckia

(Golden Glow.)

This is one of the grandest hardy yellow flowering plants ever introduced, particularly valuable for garden, lawn and park planting; grows six to eight feet high; graceful branching habit and pretty foliage; once planted lasts for years. Blooms during July and August the first season, and bears immense masses of large, round, golden yellow flowers, perfectly double like roses and two or three inches across, covering the whole plant with a sheet of splendid golden yellow flowers for weeks. It is easy to grow and sure to bloom, and can not be too highly recommended as one of the most showy and handsome ornamental plants ever introduced. The flowers are borne by hundreds, on long, graceful, nodding stems, just right for cutting. Do not forget to include it in your order; it is a plant that will please you.

Each 15c, 2 for 25c, 5 for 50c, postpaid.

RUDBECKIA  
GOLDEN GLOW

# Bleeding Heart *Dicentra Spectabilis*

One of the finest plants known for borders, pots or for planting in any sunny situation. If potted in November and left outside until it has formed new roots and then brought into gentle heat, it will flower early in March. The beautiful rose colored flowers are produced in great abundance and are heart-shaped. When planted in the open ground it flowers in April and May. Absolutely hardy. Strong, imported roots. Each 15c, three for 40c, one dozen for \$1.50:

Bleeding Heart

Lily of the Valley

## Lily of the Valley

The exquisite white flowers and pale green foliage render this one of the most admired of plants. Succeeds in open ground in almost any situation, but prefers shade with plenty of moisture; once planted and established the crowns increase each year. The larger ones flower each season without any attention. Strong flowering crowns. Each 5c, twelve for 50c.

## Japanese Iris, *Iris Kaempferi*

These magnificent Iris are among the most beautiful of our summer flowering plants and are destined to become more popular every season. They commence blooming about the middle of June and continue in bloom for five or six weeks. Many of these flowers measure from 10 to 12 inches in diameter and rival Orchids in their rich colorings and markings. Each 12c, 6 for 60c.

## German Iris, The True Fleur de Lis

These produce large, fragrant, Orchid-like flowers, embracing many shades of color. They are extremely desirable for decorating

the edges of ponds and moist ground—although a wet situation is not essential. They thrive in ordinary garden soil. Each 10c, 6 for 50c.

Yucca Filamentosa.

Japanese Iris

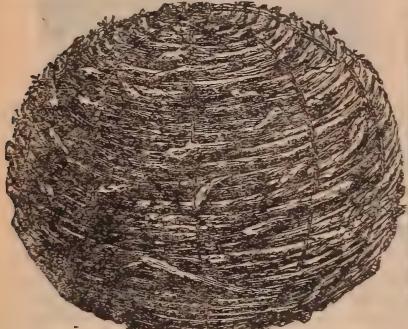

## Yucca Filamentosa

Adam's Needle

A stately tropical-looking plant, very handsome for the lawn or garden. It is a hardy evergreen, the stem rising three or four feet high from the tuft of narrow, bayonet-like leaves, bearing a profusion of creamy white bell-shaped flowers. It will thrive almost anywhere, even in sandy or shady places. Each 15c, 3 for 40c.

# JAPANESE FERN BALL

This novelty from Japan is the finest addition to house plants. The demand for them is enormous, as they please everybody, and sell themselves to others. For window, drawing-room or suspension over dining-table or in fern dishes.

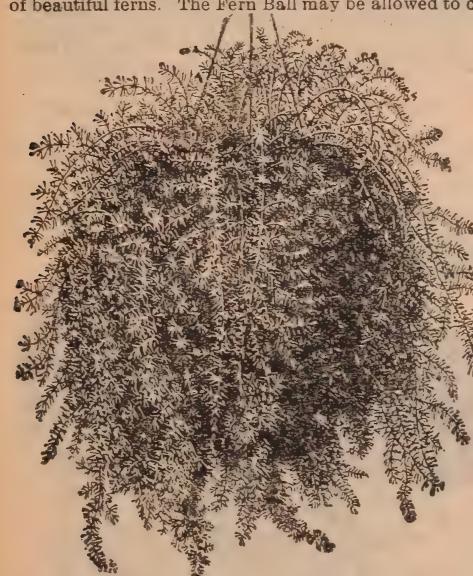

It looks like a Hornet's Nest.

**DIRECTIONS.**—The simple directions must be followed to meet with success. Place the ball in water for several hours and then suspend in any desired position in a warm room in winter and outdoors in summer. Repeat every two days until growth has started after which water occasionally as required, being careful that it does not become dry. The greater the growth the more water will be required to keep the ferns in a flourishing condition. To use in a fern dish, cut the ball in halves, placing the flat side down, thus getting two dishes of beautiful ferns. The Fern Ball may be allowed to dry up at any time and be set away and started again by

watering as before. This is very convenient, should the lady of the house wish to go on a summer vacation. Diameter when dry, five to ten inches. The Fern Ball will be from one to four weeks in starting, according to degree of heat and moisture. Do not expose to direct rays of the sun.

Price, each, very large, 75c, medium, 50c, by mail, postpaid. Not prepaid, medium, 40c, 2 for 75c, 4 for \$1.40. They are usually sold for 75c each, or \$1.00 by mail.

Presto Change—It is a Beautiful Bunch of Ferns!

## ASPARAGUS SPRENGERII

Emerald Feather Asparagus.

This is undoubtedly one of the handsomest and most valuable evergreen trailing plants for the house and conservatory ever introduced. It is especially valuable for pots, vases, baskets, etc., covering all with its beautiful sprays of lovely green feathery foliage, which can be cut freely and are very useful for bouquets, wreaths and all kinds of floral decoration. It makes a charming ornamental plant for the window or conservatory in the winter, and is equally valuable for vases, baskets and porch boxes in summer. It is a strong, vigorous plant very easily grown, requires but little care and keeps on growing, fresh and green year after year. **Each 20c, 3 for 50c, postpaid.**

## Hydrangea Paniculata Grandiflora (The Hardy Hydrangea).

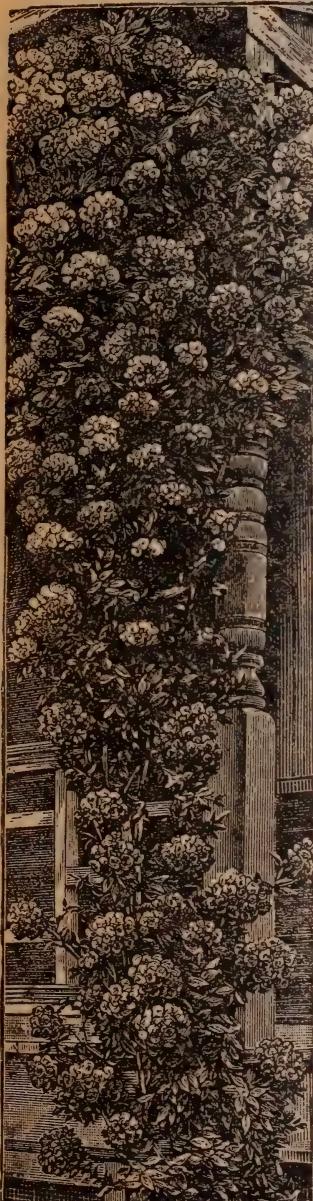

One of the finest hardy shrubs ever introduced, and in size and magnificence of bloom not excelled by any shrub in cultivation. The bush, in time, attains a large size, growing in beauty year by year. It is in the full glory of bloom from August until the middle or last of October, when every branch is crowned with a pinnacle of fleecy, pure white flowers, changing later to a pinkish hue, sometimes a foot long and nearly as broad at the base, presenting an aspect of majestic grandeur that absolutely defies description. Entirely hardy, **very free** growing, a **profuse bloomer** and **thrives** in all soils. It should have a prominent place in every garden, not only because it is such a glorious shrub, but for its flowers appearing at a time when few others are to be found. **Each 20c, 3 for 50c.**

# Roses

offer on last Cover Page. ☺

## RAMBLER ROSES

Rose growers who have reveled in the incomparable beauty of the Crimson Rambler will hail with delight our announcement of its four equally beautiful companions. They are all hardy and the five comprising the colors, Crimson, Yellow, White and Rose, make a collection that will be the pride of every possessor.

**Crimson Rambler** The number of plants of this variety sold in the last three or four years is almost incredible, and as the people become more familiar with it the demand becomes still greater. It is an exceedingly vigorous and rapid grower, making shoots 10 to 20 feet in height in one season. When grown as a bush it is equally desirable. Color a rich glowing crimson. Perfectly hardy. No yard or garden should be without it.

**Yellow Rambler** Successfully withstands, without protection, a continued temperature of from zero to 2 degrees below, and by laying the plants down in the winter it can be successfully grown in nearly all the northern parts of the U. S. The flowers are borne in immense clusters after the same manner as the Crimson Rambler.

**Philadelphia Rambler** It blooms in grand clusters. Flowers 2 to  $2\frac{1}{2}$  inches across, perfectly double to the center. Color pure deep rich crimson, far brighter and more intense than any other rose of its class; holds its bright dazzling color to the last, making it especially valuable for forcing and florists' use. Perfectly hardy, needs no protection.

**White Rambler (THALIA).** This charming new rose of the Rambler variety is a wonder. It climbs rapidly, is entirely hardy, produces immense clusters of pure white roses, nearly double, of delightful fragrance, and of immaculate whiteness.

**Helene Rambler (ROSE).** Makes a growth of 10 to 15 feet in a season. Its flowers are borne in large clusters and are produced in amazing profusion. The flower is larger than Crimson Rambler, almost double. Color, soft violet rose, almost blush.

## CLIMBING ROSES

**Empress of China** New and valuable perpetual blooming climber. Commences flowering the last of May and blooms repeatedly till very late in the fall.

**Mary Washington** Its flowers are of medium size, pure white; perfectly double to the center, and borne in endless numbers of large clusters all summer. Vigorous and rapid grower. One plant of Mary Washington will produce more flowers and buds than a dozen ordinary roses. Its fragrance is tinged with old-fashioned musky odor, so much liked in olden times.

**Queen of the Prairies** Clear, bright pink, sometimes with a white stripe. Large, compact and globular, very double and full; blooms in clusters; one of the finest.

### Special Offers on Climbing Roses

For 50 cents we will send one each of the five Rambler Roses, or for 30 cents we will send one each of the other three Climbing Roses; or for 80 cents we will send one each of all Roses on this page and include one DOROTHY PERKINS, on next page. All delivered by mail or express. Please give express office as well as postoffice, when ordering plants.

# Dorothy Perkins

A Splendid New Pink Climbing Rose. The Most Valuable Rose Novelty Since Crimson Rambler. ☺ ☺ ☺

In its foliage, growth and habit of blooming in large clusters, it is remarkably like Crimson Rambler, but the flowers are more double and of a beautiful shell-pink color. It is of remarkable vigor, making growth of 10 to 15 feet often in a single season. In the important point of hardiness nothing more could be desired. The flowers are very double, are of large size, usually two inches across. They are borne in loose clusters of from 30 to 40, and often there are even 50 or 60 in a truss. The petals are very prettily rolled back and crinkled. The buds are remarkably handsome, being pointed in shape and of just the right size for the button-hole. The flowers are very sweetly scented, a characteristic not possessed by most other roses of the Rambler family. In vigor and habit of growth the "Dorothy Perkins" is identical with the Crimson Rambler. Each 25c, 3 for 60c, postage or express paid.

## Everblooming Bedding Roses

10 cts. Each for all Roses offered in this class, except where noted; any 6 for 50c; \$1 per doz., postpaid. Large two-year-old plants 30c each; 4 for \$1; \$3 per doz., by express at purchaser's expense

The roses given under this class are mostly the result of crosses between the Teas and Hybrid Perpetuals. There are many varieties famous for their vigor, profuseness, brilliancy and exquisite fragrance of flowers. They combine the valuable characteristics of both the Teas and

Dorothy Perkins

Hybrid Perpetuals, inasmuch as they bloom freely the first year like ordinary Everblooming Tea Roses, and from the Hybrids they inherit the large, finely formed flowers and pungent fragrance, together with vigor and hardiness. South of Indianapolis they are hardy; in the North they will be benefited if given slight protection. Varieties marked \* are of exceptional hardiness.

### Bon Silene

This remarkable Rose was introduced in 1839, and up to this time no new variety has superseded it, a fact that bears ample testimony to its valuable qualities. The color is deep rose, sometimes bright rosy crimson, occasionally pale light rose.

### Bride

The favorite white Tea Rose, for forcing. A most beautiful and appropriately named variety.

\*Burbank was raised by Mr. Luther Burbank, of California, known the world over as the "Wizard of Horticulture," and is the only variety out of seventy-five thousand cross-bred seedlings which he raised, that he was willing should bear his name. It is the very deepest and brightest pink Rose incultivation. Adapted for both outdoor planting or for blooming in pots in the house during the winter. Each 15c, 3 for 40c.

\*Clothilde Soupert Color white, deepening to a rosy blush in the center, exceeding in distinctness of shadings the well-known Malmaison. Its greatest value lies in its wonderful profusion of bloom, even the smallest plant being literally covered with flowers. Too much can not be said in praise of this Rose for bedding purposes, and it is even more valuable for pot culture, and ranks first for blooming in the house. It is entirely exempt from the diseases usually effecting roses in the house.

Yellow Soupert (Mosella). This is everybody's Rose. Fully as hardy and equally bushy grower. Flowers are very double. Produces immense clusters of flowers. The color is white on beautiful light yellow ground.

\*Pink Soupert Identical with Clothilde Soupert, except in color of flower. Color rich, dark, shining pink, sometimes nearly red. Young plants commence to bloom in May and continue to give crop after crop of flowers until late in October.

For 27c we will send one each of the three Soupert Roses, postage or express paid.

# Everblooming Bedding ROSES

CONTINUED

10 Cents Each

For all Roses offered on this page, except where noted, any 6 for 50 Cents: \$1.00 per dozen, Postpaid.

**Kaiserin Augusta Victoria** This Rose combines many good qualities, is a continuous bloomer, producing successive crops of buds and flowers in great profusion. Buds are very beautifully formed; color pure snowy white.

**\*La France** The old favorite. The queen of all the Roses. Of superb form, and double as a Rose can be. Silvery-rose shaded with pink. It is hardy beyond question. It blooms continuously. Fragrant in the highest degree.

**Marie Guillot** One of the most reliable White Tea Roses in cultivation, especially for outdoor culture. Color snow white, sometimes faintly tinged pale yellow. The flowers are magnificent, extra large, full and double; fragrance very sweet.

**Papa Gontier** A grand Red Tea, or fine crimson shade and silken texture. The bud is of fine size and graceful form.

**Meteor** Color is rich velvety crimson, exceedingly bright and striking, and both buds and flowers are large and elegantly formed, fully double and borne on nice long stems.

**Nipheta** One of the most elegant white Roses. The buds are three inches long.

**Perle des Jardins** Clear golden yellow, an indescribably rich and beautiful shade. Flowers are extra large, full globular form, richly perfumed and exquisitely beautiful in every way.

**\*Safrano** A splendid old-time Rose. The color is a bright apricot yellow, sometimes tinted with rose. Very fragrant.

**Souv. de President Carnot** Large, full, double, exquisitely shaped flowers. The buds are long and pointed—perfection in every line. Color blush white.

## Collections Of Ever-Blooming Bedding Roses

IN ORDERING GIVE ONLY THE NAME OF COLLECTION WANTED

### The Ever-Blooming Yellow Collection

Three Hardiest Yellow Ever-Blooming Roses for 27c, postpaid. *Etoile de Lyon*, *Yellow Souperte* (*Mosella*) and *Safrano*. These varieties are all hardy as far north as Indianapolis, and with a slight covering of leaves or straw, will succeed perfectly even much farther north.

**The Purity Collection** The four best White Ever-Blooming Roses for 35c, postpaid. *Kaiserin Augusta Victoria*, *Marie Guillot*, *Souvenir de President Carnot*. Four gems among white Roses. Especially adapted for cemetery planting.

### The Ever-Blooming Red Collection

Four best Dark Red and Ever-Blooming Roses for 35c, postpaid. *Hermosa*, *Meteor*, *Papa Gontier* and *Bon Silene*. These are the cream of the dark varieties and should be in every garden.

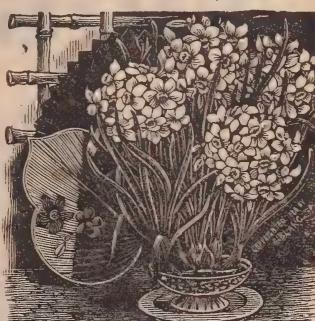

### The Door-Yard Ever-Blooming

**Collection** Consists of four Crimson, four Pink, two rose colored, four Yellow and three white—17 hardiest and best varieties for only \$1.50. Post or express paid.

## Chinese Sacred Lily

Joss Flower  
or Flower  
of the Gods

This a magnificent variety of *Narcissus*, bearing in profusion beautiful flowers of silvery white, with golden yellow cups. They are of the greatest beauty and exquisite perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of the new year and as a symbol of good luck. Our bulbs are grown in China, by a method known only to the Chinese, where they attain great size, vitality and blooming qualities, blooming earlier and much larger spikes than bulbs not grown under same conditions. The luxuriance of growth and bloom of this plant may almost be said to be one of the wonders of nature. They succeed almost anywhere and with almost everybody. They are usually grown in shallow bowls of water with pebbles about the roots to keep them in position. Procure one-half or one dozen bulbs and start one each week, and you will have a most delightful succession of flowers throughout the winter.

Prices of our extra fine Chinese Grown Bulbs delivered to any postoffice, 25c each, or 5 for \$1.00. If purchaser pays charges, 5c each less.

Hybrid  
Perpetual

# Roses

**Roses** Of this class produce the largest and most beautiful flowers and the varieties offered below are all thoroughly hardy. Some sorts do not bloom until the second year, but when thoroughly established they bloom very freely in June and July and at intervals throughout the balance of the summer and fall. They should invariably be planted in the open ground. They will stand a considerable amount of hardship and neglect, but improve greatly with good cultivation and rich soil. The quantity and size of bloom will be greatly increased by severe pruning each spring. All rough and scraggly wood should be cut away entirely and the other shoots should be cut back enough so as to leave only two or three eyes to grow.

**10 Cents Each** For all Roses offered on this page, except where noted; any 6 for 50c; \$1.00 per dozen, postpaid.

### \*American Beauty The Largest, Sweetest, and Best of all

**Hardy Roses.** This is perhaps the grandest and most beautiful Rose now known. It is a genuine Hardy Ever-blooming Rose. For immensity in size, rich color, exquisite form and delicious fragrance it stands without an equal. It is a quick and bushy grower and a continuous bloomer, makes magnificent buds and large, deep, double flowers and is valuable both for house and garden culture. Color is a rich, rosy crimson, shaded and veined in the most charming fashion; fragrance is wonderfully sweet, not surpassed by any Rose we know. Truly the *American Flower*. Each 20c, 3 for 50c, 7 for \$1.00, postpaid. By express, 2-year plants 35c each, 3 for \$1.00, \$3.50 per dozen.

**Anne de Diesbach** Brilliant shell-pink, very large and showy and sweetly scented. Very double and of fine form.

**Caprice** A striped rose, the ground color being a clear satiny pink, distinctly striped and dashed with white and bright carmine. The flowers are large, slightly cup-shaped, but full and deep. The buds are especially handsome, being of fine shape and showing the stripe and markings to great advantage. Each 20c, 3 for 50c, 7 for \$1.00 postpaid. By express, 2-year plants 35c each, 3 for \$1.00, \$3.50 per dozen.

**Clio** (NEW.) Flesh color. This is one of the finest roses we have yet seen. A beautiful globular form and in size is something truly striking, growing 6 inches in diameter.

**Gen. Jacqueminot** A grand old rose which every one knows, at least by name and reputation. Rich crimson scarlet in color and especially handsome in the bud.

**Gen. Washington** Soft, glossy scarlet flowers large, broad and open in shape, but very double.

**John Keynes** Fine, deep reddish maroon, of strong, vigorous habit of growth. Flowers are of fine shape.

**Mme. Gabriel Luizet** One of the most beautiful of all roses. Extra large, elegantly formed, very double and full, and fragrant. Color and exquisite shade of clear coral rose.

**Mme. Plantier** This grand variety, when once planted, is permanent as an oak, and for outdoor planting is the best white Hybrid Perpetual. We recommend it for cemetery planting because of its permanency. Never needs pruning.

**Magna Charta** A splendid rose. Extra large, full flowers, very double; of fine form and sweet; color clear rosy red.

**Marchioness of Lorne** Buds long and handsome; rich, shining rose color; remarkable for its perpetual flowering. Price same as American Beauty.

**Margaret Dickson** (NEW.) The flower is of magnificent form and very large. In color it is the most beautiful waxy white — a lovely shining white, with almost the luster of a pearl. The petals are very large, well shaped and of great substance, but most delicate in texture. Price same as American Beauty.

# Moss Roses

**PRICE OF MOSS ROSES:** Each 15c, 4 (or one of each) for 50c; 9 for \$1.00, postpaid. By express, large plants, 30c each, 4 for \$1.00, \$2.00 per dozen.

The Moss Rose is a strong, vigorous, grower, perfectly hardy and therefore justly esteemed as very desirable for outdoor culture in open ground. Most varieties bloom but once in the season and usually not the first year, but the flowers and buds are very large and handsome. Moss Roses like rich ground.

**Blanche Moreau** This fine variety is highly recommended. Flowers are produced in clusters and are large, full and sweet; color is pure white. Both flowers and buds have an abundance of lovely deep green moss.

**Crimson Globe** A fine deep crimson, flowers having the handsome globular shape characteristic of the H. P. varieties. Buds well mossed, very free flowering, vigorous and hardy.

**Princess Adelaide** One of the best extra large flowers, very double and fragrant. Buds beautifully mossed; color bright rosy pink.

# Carnations

The popularity of the Carnation is on the increase very rapidly. Next to roses the Carnation is most sought after. The flower lovers have learned to appreciate the many charms which the Carnation possesses. We offer a choice selection of the very best varieties.

Four Color Collection of Carnations for 25c, delivered. One Plant each of Pink, Scarlet, White and Yellow, our selection of varieties. Price, each 10c, 6 for 45c, delivered.

CARNATIONS.

# Chrysanthemums

for yard, garden or pot culture. We offer the best kinds known. They are the people's flower.

**Maude Dean** An immense pink variety, finely incurved; petals broad, shell-shaped. One of the largest.

**Golden Wedding** The grandest golden yellow Chrysanthemum ever offered. In color it is a deep bright golden or shining texture, is very large in size, the petals are both long and broad and channelled lengthwise. A perfect Japanese incurved of most beautiful form, free in growth.

Four Color Collection of Chrysanthemums. One plant each of Pink, Red, White and Yellow, our selection of varieties, 25c delivered.

**Daybreak** Delicate salmon pink, vigorous grower. A very popular variety in all localities. Does well on nearly all soils.

**Eldorado** Light, clear yellow, stems of good length, supporting large, finely formed flowers.

**Genesee** Flowers pure white, borne on long stiff stems, often nearly 2 feet in length, thus making it a splendid variety for cutting. Of very free blooming habit.

**Mrs. Francis Joost** Another grand Carnation, with enormous size flowers, often measuring 3½ inches in diameter, at the same time being one of the freest blooming Carnations we have ever seen. Pale salmon pink.

**Flora Hill** The largest white variety, to date, wonderfully free in bloom, clean and healthy.

**Jubilee** Color intense scarlet; very large flower, on long, slender, but stiff stems. Seems to do best when grown inside all summer.

**Mrs. Thomas Lawson**

Said to have been sold for thirty thousand dollars. The size is enormous, stems stiff. It is free in growth, very free in bloom. Of strong, healthy constitution, and of a true pink color.

**Gold Nugget** Clear, deep yellow, slightly marked with red. A remarkable variety, strong grower, free, early and continual bloomer.

Of the easiest growth, they quickly make large bushes, either in open ground or in pots, and the magnificent flowers, which they give until severe frost, make them ideal plants for the low prices at which we

**Ivory** Unexcelled for pot culture or cutting; pure white flower of exquisite form and finish.

**Major Bonnanfon** Soft, clear yellow, full in the center, eight inches in diameter and nearly as deep.

**Mme. F. Bergmann** Finest of all the early whites, very large and full, and of the purest white.

Price, each 10c, 6 for 45c delivered.

# SUMMER FLOWERING BULBS

## TUBEROSE

NEW EXCELSIOR PEARL

This is the best variety and is a general favorite, and the most popular of all flowers for buttonhole bouquets. Can be grown in pots or plant in open ground in May. The flowers of this variety are double the size of the common Tuberose and borne in great profusion. Of dwarf habit, perfectly double and most delicious fragrance. No flower garden is complete without a few stalks. If planted in pots in early winter, will bloom before spring flowers come.

Extra size flowering bulb 5c each, 3 for 10c, 35c per dozen, 25 for 70c, 100 for \$1.40, postpaid. By express or freight at expense of purchaser, 100 for \$1.15, 500 for \$5.50.

**Madeira Vine** (*Mignonette, Vine or Mexican Vine.*) A beautiful tuberous-rooted climber, with glossy green leaves and handsome racemes of fragrant white flowers. The vine makes a rapid growth, and a few plants will cover a trellis or cottage wall in a single season. It is a very pretty thing to use for shading a porch or veranda. The tubers must not be allowed to become dry, and should be either kept in damp moss or put at once in the ground. **5c each, 6 for 25c, 40c per dozen, postpaid.**

## Caladiums

**Esculentum** (*Elephant's Ears.*) The leaves of this giant plant often attain a length of 3 feet. Very suitable for single plant or lawn, beds or margins of water. Attains greatest size in a moist situation. Keep bulbs in dry sand over winter.

Each 15c, 3 for 40c, dozen \$1.50, half dozen same rate, postpaid. By express, \$1.00 per dozen.

**Fancy Leaved** foliage plants, especially valuable for window boxes, vases or out-of-door decorative work. Easily grown, thriving in pots or boxes, or in shady situations on lawn or garden. Plant in fairly rich sandy loam. There is a wide range of colors and markings, being most beautiful and interesting. We offer the choicest strains. Single bulbs 15c, 3 for 40c.

Caladium, Fancy Leaved.

## GLADIOLUS

The Gladiolus is the most attractive and fashionable of all summer flowering bulbs or plants. There are few plants that can be used in so many ways, and few that display such variety and brilliancy of colors. It rivals the rose and carnation and is of much easier culture. It has no insect enemies. The planting is as simple as sticking a potato in the ground, while the results are more certain than getting a crop of potatoes. They may be planted year after year.

**MIXED GLADIOLUS.** (*Of Separate Colors.*) Dozens Postpaid, Hundreds not Postpaid.

	Per doz.	Per 100.

# 12 CHOICE GLADIOLI FOR 50c

This Collection cannot be excelled for easy cultivation and certainty of Blooms

**AURORE.** Bright salmon rose, striped with orange and lilac; a distinct color.

**BRENCHLEYENSIS.** Intense brilliant scarlet; one of the most showy and brilliant in cultivation.

**CERES.** Pure white, with purple rose spots and marks. A very fine white.

**FATIMA.** A rich ivory white, splashed and striped heavily with rose salmon.

**FEU FOLLETTE.** Ivory white, suffused and striped with salmon.

**HESPERIDE.** Grand white, richly suffused and striped bright, rosy salmon; beautiful.

5c EACH, 50c A DOZEN, THE SET FOR 50c POSTPAID

**JOHN BULL.** White, slightly tinged, deep creamy color, delicately suffused rose.

**LA MARCK.** Cherry red, with pure white throat.

**MAD. MONERET.** A very popular sort; a very pretty delicate rose color; flowers large and showy.

**MR. BAINS.** A beautiful clear orange red; a pleasing showy color.

**MAY.** A grand new variety of a rich, tender rosy pink, splashed and striped carmine; should be in every collection.

**NAPOLEON III.** Rich, bright, dark red, pure white throat.

## Giant Flowering French Cannas

GRANDEST BEDDING PLANTS. GROW AS READILY AS FIELD CORN

If you wish a bed that will be something really magnificent, prepare the ground well; make the soil light, deep and very rich. In dry weather soak thoroughly to the depth of a foot or more, once or twice a week. If possible, give it a full exposure to the hot sun. Cannas will do well and make a great display without much attention, but you will be astonished at the wealth of bloom produced by a bed prepared and watered as above.

7 of the Very Best Sorts in Cultivation. Every One of Exceptional Merit

The following 7 sorts we consider the very best sorts, entirely satisfactory, that will yield gorgeous results:

**Egandise** An excellent variety with bronze green foliage, large spikes of rich cherry red flowers, freely produced. One of the best of its type.

**Florence Vaughan**—

Undoubtedly the best yellow spotted variety. Bright golden yellow, spotted red, large heads, profusely produced.

**M. Crozy** No doubt the most popular canna; bright scarlet color, bordered golden yellow.

**M. Berat** A distinct shade of pink. It is the nearest approach to a pure pink. A rosy carmine, which is pleasing and effective.

**Queen Charlotte** A grand gilt-edged sort of a dwarf habit, rich scarlet crimson, broadly bordered with a bright canary yellow. Grand for massing or in beds.

A Bed of Cannas

**Sec'y Chabanne** A superior salmon of a rich pleasing cast; a decided advance in this color of exceptional merit, producing immense heads of large flowers, especially fine for masses or with brilliant shades.

**Souvenir De Antonie Crozy** Absolutely the gilt-edge type; a rich dazzling crimson, with bright golden yellow band. With us the showiest canna, early and free bloomer.

EACH 15c, 6 for 50c, 15 for \$1.00, 50 for \$3.00, DELIVERED FREE.

## Five Suberb Orchid Flowered Cannas

**ALLEMANIA.** Giant flowers fully 6 to 7 inches across the upper petals, salmon red with broad border of golden yellow. Lower petal is dark salmon with yellow in center. 15c, doz. \$1.25.

**AUSTRIA.** Rich canary yellow, slightly tinted with reddish dots; a massive tall grower. When well grown it is grand. 10c, doz. \$1.00.

**BURBANK.** Canary yellow, grand form and attractive, quite free flowering. 15c, doz. \$1.00.

## Five Latest Novelties in American Cannas. Exceptionally Promising

**Abraham Lincoln** Tall growing, very promising, exceptionally large flowers and large trusses of a solid fiery crimson; early and profuse. 20c, doz. \$2.00.

**Black Prince** A grand canna in every way. The darkest crimson ever sent out. Grand large flowers, large, bold trusses. 20c, doz. \$2.00.

THE SET OF FIVE NOVELTIES FOR \$1.00, POSTPAID.

**ITALIA.** Grand as a specimen plant or in beds; its musa-like foliage complemented with bright orange-scarlet, with broad golden-yellow bordered blooms of immense size. 15c, doz. \$1.25.

**WILHELM BECK.** Broad, greenleaves, immense trusses of sulphur yellow flowers with red pencilings. A remarkable variety. 20c, doz. \$1.50.

THE SET OF ORCHID CANNAS FOR 60c, TWO SETS FOR \$1.00, ALL POSTPAID.

**Geo. Washington** The richest shade of large size; unusually fine in every way. 25c, doz. \$2.25.

**Luray** Large beautiful trusses of bright shining rose, deepening to cherry red. 20c, doz. \$2.

**Mt. Aetna** Foliage dark purple, flowers of a beautiful brilliant crimson; promises to be the best of its class. 20c, doz. \$2.00.

# It Pays to Make Home Beautiful

For a very small investment for ornamental climbing plants the beauty of any home can be much enhanced, besides the value of the place increased many fold over the investment. Following we list some of the Best Climbing Vines and Hardy Shrubs.

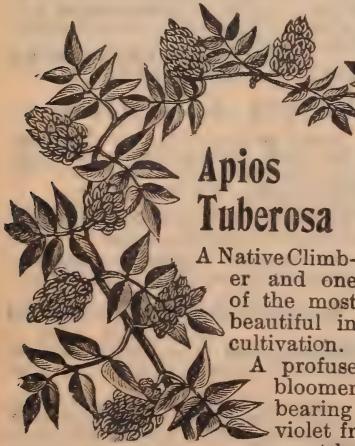

Wild Cucumber

## TESTIMONIALS FOR CINNAMON VINES

MRS. C. HENSLY, Putnam Co., Ind., writes: "The Cinnamon vines grew 30 feet last year and were the talk and wonder of the neighborhood."

W. WEEKS, Worcester Co., Mass., writes: "I enclose an order for 100 more roots. I sold the last lot in fifteen minutes."

MRS. ALLEN, Mystic, Conn., says: "The vine is beautiful and so fragrant it perfumes the whole house."

Apios  
Tuberosa

A Native Climber and one of the most beautiful in cultivation.

A profuse bloomer

bearing lovely clusters of rich, deep purple flowers with a delicious violet fragrance. It is a wonderfully robust grower, attaining a great height, its vines and dense foliage resembling the common Wistaria. The bulbs are perfectly hardy, needing no protection and last forever when once started.

Apios Tuberosa

## Wild Cucumber

Annual. For quickly covering porches, trellises or anything where a climber can be used this is certainly one of the best plants we know of. It grows to a height of 20 to 30 feet in a remarkably short space of time, and is covered with a profusion of sweet scented white flowers, followed by prickly seed pods. Pkt. 5c, 6 for 25c.

CHINESE CINNAMON VINES  
Pride of the Flowering Kingdom

Most Desirable, Easily Grown, Rapid Climber In the World.

Once Planted Will Grow a Lifetime.

桂皮葡萄樹

Beautiful Leaves. Dainty Flowers. Exquisite Perfume.

This Oriental Gem of the far East, comes to us a marvel of beauty and fragrance. Its rapid growth, abundant foliage and modest, sweet-scented flowers, give it supremacy over all Foreign and Domestic climbers. The handsome, glossy, heart-shaped leaves and clusters of fragrant white flowers make a window, arbor or veranda a perfect - *Paradise of Beauty.*

They stand the severest winter, and burst forth in all their beauty and splendor very early in the spring.

No one should miss planting this charming vine.

# SOME REMARKABLE NEW FRUITS

**BISMARCK APPLE** This is perhaps the most wonderful of all apples. It was introduced from New Zealand a few years ago. It has already been fully tested, and wherever grown it has proved a most astonishing revelation, not only in high quality, but also in hardness, and especially in earliness of fruiting. The color of the fruit is a beautiful golden yellow, and its size is the largest. The trees bear most profusely, and the showy fruits are eagerly sought after, always bringing the highest market price. Bismarck trees bear at an earlier age than any other apple, bearing abundantly the first year after grafting, and the fruit keeps well into March. It is not advised for orchards on a large scale, but for garden culture it is a decided success. As a dessert apple it has no equal, owing to its distinct and most delicious flavor. It is also found especially suitable for cooking purposes. Has also been grown in large quantities as a pot plant. Our trees are grafted when sent.

Relying to yours, I would say that the "Bismarck" Apple is grown principally on account of its early bearing habit. It is adapted for small lots of ground, as it is dwarf in habits. G. B. BRACKET, Pomologist.

U. S. Dept. of Agr., Washington, D. C.  
We have fruited the Bismarck Apple for several seasons, both in nursery rows and as standard trees. It is a good cropper and very attractive in appearance. We had more fruit of it than of any other kind this season. We think highly of it.

JOHN CHARLTON & SONS,

Rochester, N. Y.

Mailing size, postpaid, each, 25c, 5 for \$1.00. Larger size, by express, not paid, each 35c, 3 for \$1.00, \$3.00 per doz.

Be sure to give  
shipping direc-  
tions.

Bismarck Apple Tree, 2 year old, in fruit

## NEW WHITE BLACKBERRY

**Iceberg** Something entirely new in fruit. This White Blackberry is as large as the well-known Lawton black, and is the most beautiful berry grown, as may be imagined. Clusters are larger than the Lawton, while it bears so heavily that the canes bend in various directions with their load of delicious snowy berries. They are unsurpassed in sweetness and flavor. Hardy, and sure cropper. Price, each, 20c, 3 for 50c, 6 for 75c, delivered. By express, not paid, 100 for \$7.50.

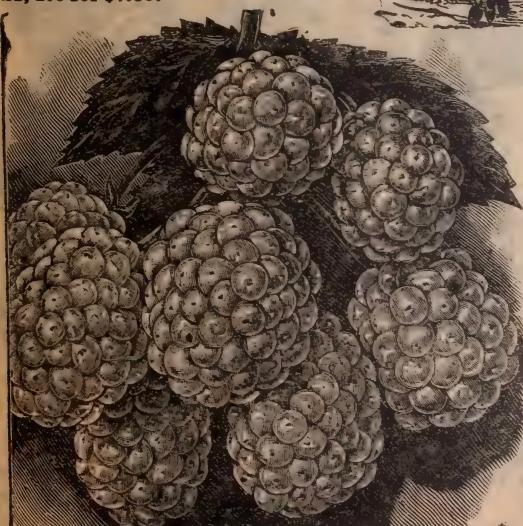

The Logan Hybrid Berry.

## The Logan Hybrid Raspberry-Blackberry

A thornless Raspberry-Blackberry. The fruit is as large as the largest blackberry, and produced in immense clusters. Color clear, dark, rich red; flavor of the blackberry and raspberry, combined. Excellent for all purposes. Growth strong, 10 feet and more in season; enormous bearer. Fruit ripens early, just after strawberries and before raspberries become plentiful. Bears first year from planting.

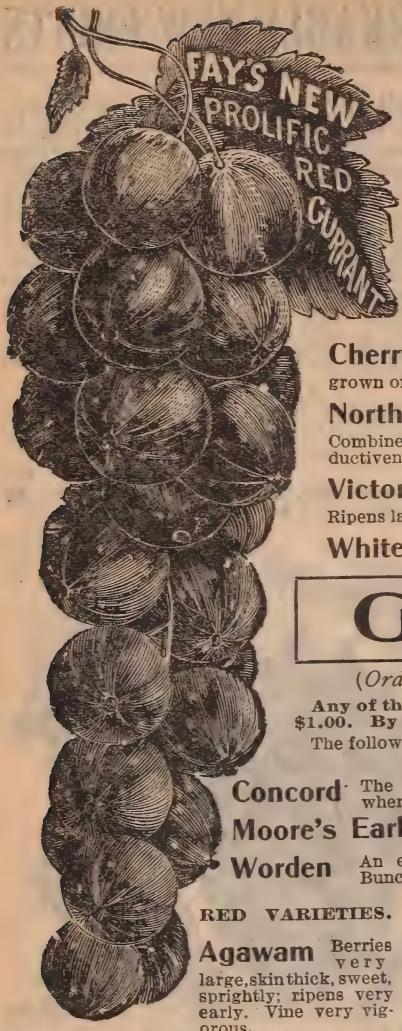

Plants 20c each, 3 for 50c, 6 for 75c, delivered, postpaid. By express, not paid, 100 for \$7.50.

Iceberg Blackberry.

50  
Cents

Will buy one of each of these new plants, or 3 sets for \$1.25, all delivered to you. The three sets may go to one or more addresses, a full set to each.

# CURRANTS

(Orders for Currants must all reach us by April 15.)

Price of each variety, delivered to purchaser, 15c each, 2 for 25c, 5 for 60c. By express, not prepaid, 75c per dozen, \$4.00 per 100.

**Fay's Prolific** The leading market variety. Extra large stems and berries; uniform in size, easily picked; exceedingly productive. No variety ever made as quick a jump into popular favor.

**Black Champion** Very productive; large bunch and berry; excellent quality; strong grower. The leading black sort.

**Cherry** Berries sometimes more than half an inch in diameter; bunches short; plant very vigorous and productive when grown on good soil and well cultivated.

**North Star** The strongest grower among the red varieties. Should be given plenty of room and ground kept well enriched. Combines extra hardness, vigorous growth, extra quality and great productiveness.

**Victoria** Large, bright red; bunches extremely long; berries medium size and of excellent quality. Very productive. Ripens late, making it one of the most valuable sorts.

**White Grape** Very large; yellowish white. Excellent quality and valuable for the table.

# GRAPES

(Orders for Grapes should all be received by April 1.)

Any of the following varieties, delivered: Each 20c, 3 for 50c, 7 for \$1.00. By express, not prepaid, \$1.00 per doz., \$7.50 per 100.

The following varieties are the very best:

## BLACK VARIETIES.

**Concord** The old well-known and deservedly popular variety. Succeeds wherever grapes can be grown.

**Moore's Early** Bunch and berry large. Vine is very hardy and productive. Ripens early. Like the Concord, succeeds in nearly all sections.

**Worden** An exceptionally fine variety of the Concord type, but earlier. Bunch and berry larger.

## RED VARIETIES.

**Agawam** Berries very large, skin thick, sweet, sprightly; ripens very early. Vine very vigorous.

**Lindley** Fruit medium to large; tender and sweet. Ripens early.

**Brighton** Berries above medium to large, of excellent flavor and quality. Bunch large and well formed. One of the earliest to ripen.

## WHITE VARIETIES.

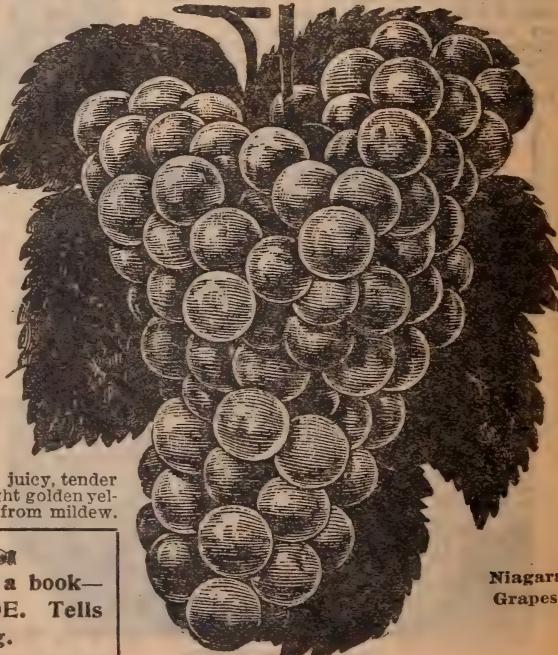

**Niagara** This variety has come to occupy about the same position among the white varieties as the Concord among the black. A leading market sort; bunch and berries large; greenish white. When fully ripe pale yellow. Of good quality.

**Moore's Diamond** Berries above medium size. Excellent quality, few seeds. Hardy and productive. Excellent variety for home use or market.

**Pocklington** Bunch and berries large; juicy, tender and sweet. When ripe, light golden yellow. Vines very hardy and vigorous and free from mildew.

**THE GRAPE GROWERS' GUIDE.** Tells  
all about growing and marketing.

Niagara  
Grapes.

# BLACKBERRIES

(Orders should reach us by April 15th at the latest.)

PRICES—Each 10c, 75c per doz., postpaid. \$2.00 per 100 by express.

**Early Harvest** The earliest Blackberry, consequently one of the most valuable. Ripening in July it is eminently profitable for market, while its earliness and good quality make it a special favorite.

**Erie** One of the best, and its hardness all that was ever claimed for it. It is one of the strongest growers and will produce large crops on what would be called poor soil. Its fruit is of the largest type, being very uniform in size and perfect.

**Snyder** Very popular for the North and Northwest on account of its extreme hardness. Wonderfully strong and thrifty. More largely planted than any other of the iron-clad varieties.

**New Rathbun** The Rathbun is decidedly superior in size, hardness and quality. A quart box of New Rathbun filled the former, 45 berries of the Rathbun completely filled the quart. The berries have very small seeds and no hard core; in fact, no core is perceived in eating them—all is sweet, luscious and of a high flavor. The plant is a strong, erect grower, makes plenty of fruiting wood, and although a true blackberry in all other respects, it propagates very freely from the tips of the shoots, like a dewberry or black raspberry. We cannot too strongly recommend this valuable new variety. Each 15c, 6 for 75c, delivered. Doz. \$1.00, 100 for \$6.00, by express, not delivered.

## RASPBERRIES

(Orders should all reach us by April 15th at the latest.)

PRICES, except as noted, 10c each, 50c per doz., postpaid. \$2.00 per 100 by express.

**The Cumberland** The largest black Raspberry known. The berry for profit. It is perfectly hardy, having undergone a temperature of 20 degrees below zero, unprotected, without injury, in weather which badly crippled other varieties. For productiveness nothing exceeds it, and few, if any, equal it. In size it is simply enormous; in quality unsurpassed. Ripening after the Palmer and Tyler and preceding the Gregg, it may be termed a middle season variety. It is a vigorous grower, throwing up stocky canes well adapted to support its loads of fruit. Each 10c, 6 for 50c, 12 for \$1.00, delivered. Doz. 75c, 100 for \$5.00, not delivered.

**Cuthbert, Red** Leading late market variety all over the country. A remarkably strong and hardy variety. Berries very large.

**Columbian, Purple** This great berry is superior to and larger than Shaffer's Colossal, which it resembles in type and color.

**Golden Queen** Best yellow Raspberry yet introduced. Briefly stated, it is a yellow Cuthbert of large size, great beauty, high quality, hardy and productive.

**Gregg, Black** Best of late Black Caps; very large. Wants good soil to produce the best results.

**London, Red** This Raspberry ripens moderately early and holds out very late. It is highly productive, a good shipper, large, of superior quality, and has an attractive crimson color.

## GOOSEBERRIES

(Orders should be received by April 15th.)

**Downing** An old well-known variety. Fruit large and handsome; pale green and of fine quality. A strong, vigorous grower, seldom affected by mildew. One of the best, both for market and home use. Each 15c, 6 for 75c, 12 for \$1.50, delivered. Doz. 60c, \$3.50 per 100 by express, not delivered.

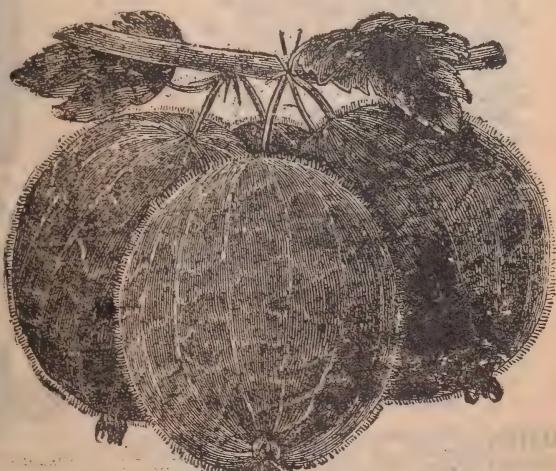

**Houghton** Fruit small to medium, pale red, of fine flavor. Plants of slender, spreading growth and very productive. Each 15c, 6 for 75c, 12 for \$1.50, delivered. Doz. 60c, \$3.50 per 100, not delivered.

**Smith's Improved** Fruit large, pale greenish yellow. Unsurpassed in quality, both for table use and cooking. Bush of moderate growth and exceedingly productive. Each 15c, 6 for 75c, 12 for \$1.50, delivered. Doz. 60c, \$3.50 per 100, not delivered.

**Columbus** Fruit of the largest size; oval, handsome greenish yellow; finest quality. Plant a strong, robust grower, so far free from mildew. Foliage large and glossy. One of the best for general cultivation. Each 20c, 6 for \$1.00, delivered. Doz. \$1.75, not delivered.

**Industry** A variety of foreign origin, which has created a sensation everywhere. Productive of exceedingly large fruit of dark red color and delicious quality. Highly recommended, both in this country and Europe. Each 20c, 6 for \$1.00, 12 for \$1.75, delivered. Doz. \$1.80, not delivered.

**Red Jackets** An American seedling or large size, smooth, prolific and hardy; of best quality. A heavy cropper, with bright, clean, healthy foliage. Each 20c, 6 for \$1.00, delivered. Doz. \$1.80, not delivered.

# Grass is KING, Clover is QUEEN

All prices of Grass and Clover Seed are subject to changes of the market. The prices onward herewith are ruling on day of closing this Catalogue. We issue new price-lists frequently, and advise prospective customers to send for them when they are ready to buy.

## CLOVER SEED

25c, extra for each  $2\frac{1}{2}$  bushels or less, 18c each.

I to 4 pounds prepaid by mail. Larger quantities by freight or express. Half bushel at bushel rates.

**COMMON OR MEDIUM RED CLOVER.**—This is the variety in general cultivation, and is so well known that description is not necessary. By mail, pkt. 10c, lb. 35c, 4 lbs. \$1.25. By freight or express,  $\frac{1}{4}$  bu. \$2.25, bu. \$8.00.

**Mammoth Clover** (*Sapling or English*)—Like common or medium clover, but of larger growth. Largely grown. Of great value to sow on exhausted land. For hay, we recommend sowing a mixture of this and common clover. Much used for green manuring. By mail, pkt. 10c, lb. 35c, 4 lbs. \$1.25. By freight or express,  $\frac{1}{4}$  bu. \$2.25, bu. \$8.00.

Alsike or Swedish Clover.

### Alsike or Swedish Clover.

**Alsike** (*Trifolium hybridum*). This clover is deservedly in repute as one of the best perennial clovers. Should be more generally grown. Sow in spring same as common clover. It will stand for years. Seed weighs 60 lbs. per bushel and is very

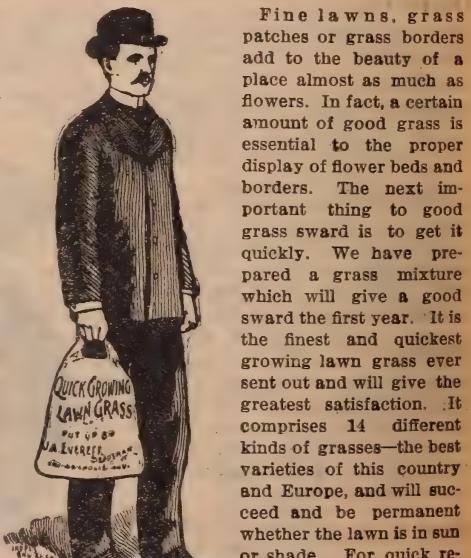

small. On this account a bushel will sow from 12 to 15 acres, making it one of the cheapest varieties to seed with. By mail, pkt. 10c, lb. 35c, 4 lbs. \$1.25. By freight or express,  $\frac{1}{4}$  bu. \$2.50, bu. \$9.00.

**Lucerne or Alfalfa Clover** See page 110.

**Scarlet Clover** (*Trifolium Incarnatum*) An annual and should be sown in July, August or September for the best results. In sections where it succeeds it makes abundant pasture in the fall, winter and spring. It can be cut for hay in this latitude about May 1st, or will mature seed May 15th. It is the most rapid grower of all the varieties of clover and unequalled as a soil-enricher. If sown in the spring it will afford good pasture, but will not produce seed. It is successful in States bordering on the Atlantic Ocean, but has not been uniformly successful in interior States. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express,  $\frac{1}{4}$  bu. \$1.50, per bu. \$5.50. Weight, 60 lbs. per bu. Sow 10 lbs. per acre.

**White Dutch Clover** The best to sow with lawn grass and valuable in permanent pastures; very permanent. Pkt. 10c, lb. 45c, 4 lbs. \$1.50. By freight or express 25c per lb., 10 lbs. \$2.00.

## Quick Growing Lawn Grass

absolutely unexcelled. Sown early in the fall or spring. Lb. 80c, peck \$1.30, postpaid. By express, peck \$1.00, bu. \$3.00.

# GRASS SEED

Bags, extra for each  $2\frac{1}{2}$  bushels or less, 18 cents each.

One to 4 pounds prepaid by mail. Larger quantities by freight or express. Prices subject to change. Send for prices when ready to buy.

TIMOTHY.

permanent grass, standing our climate as well as any other, and consequently well suited to our pastures, in which it should be fed close, for if allowed to grow up to seed the cattle refuse it. On moist, rich soil it will grow 2 feet, and on poor, gravelly soil about half that height. 14 lbs. to bushel. Sow 2 bushels to acre, fall or spring. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. Very fancy seed, bu. \$1.50, fancy seed, per bu. \$1.25. Extra cleaned, 65c per bu.

## Red Top (Agrostis Vulgaris.)

A valuable grass for moist soils and low lands. It is a good,

grass for moist soils and low lands. It is a good, and consequently well suited to our pastures, in which it should be fed close, for if allowed to grow up to seed the cattle refuse it. On moist, rich soil it will grow 2 feet, and on poor, gravelly soil about half that height. 14 lbs. to bushel. Sow 2 bushels to acre, fall or spring. By mail, pkt. 10c, lb. 30c, 4 lbs. \$1.00. Very fancy seed, bu. \$1.50, fancy seed, per bu. \$1.25. Extra cleaned, 65c per bu.

## Kentucky Blue Grass (Poa Pratensis.)

This is known in some sections as "June Grass." It is the best pasture for our climate and soil, succeeding finely on hill lands and producing the most nourishing food for cattle; retains its qualities to a late period in winter, and further south affording abundant food throughout the winter. Sow early in the spring or fall, 1 to 2 bushels per acre. Weight, 14 lbs. per bushel. We offer the pure unmixed Kentucky Blue Grass Seed. We venture to say that half the blue grass sold is mixed with the cheaper Canadian Blue Grass, which grows a stiff, harsh, wiry stalk, not nearly so valuable.

Fancy cleaned, pkt. 10c, lb. 30c, 4 lbs. \$1.00, bu. \$1.50. Extra cleaned, 60c per bu.

If ordered in 8-bushel bags deduct 10 cents per bushel, and we will furnish bags free.

English Blue Grass, per bu. \$1.50; small lots same as Kentucky.

Canadian Blue Grass, per bu. \$1.25; small lots same as Kentucky Blue Grass.

Orchard Grass (*Dactylis Glomerata*) This is one of the most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining later in the autumn than any other. It grows about  $2\frac{1}{2}$  feet high, producing an immense quantity of leaves and foliage. Blooms with red clover and making with it an admirable hay. It

ORCHARD GRASS.

leg, and is largely grown in the New England States. It is recommended for the following qualities: It grows 6 to 8 feet in height and yields 15 to 25 tons of green feed per acre. It may be made into ensilage, fed green or cured as hay, and its feeding value is greater than corn fodder. It can be sown from the middle of May to the first of August. If broadcast, 12 $\frac{1}{2}$  lbs. per acre; in drills, 12 lbs. Pkt. 10c, lb. 30c, 4 lbs. 75c,  $\frac{1}{4}$  bu. 65c, bu. \$2.25. Siberian Millet See page 112.

Hog Millet Also called by some "Manitoba Millet," "Russian Millet," "Broom Corn Millet," etc. The name Hog Millet, however, is very appropriate, on account of its large yield of seed, and great value for stock feed, especially for hogs. In sections where corn will not succeed, this millet largely solves the problem as a substitute. It is very early, and it yields from 30 to 60 bushels per acre. Pkt. 10c, lb. 30c, 4 lbs. 75c,  $\frac{1}{4}$  bu. 50c, bu. \$1.50.

Common Millet Smaller growth than German. Makes fine hay. It will succeed on poorer ground than the German. Price same as German.

Hungarian Grass Early; height, 2 to 3 feet; abundant foliage and slender head; withstands drouths and yields well. Price, same as German Millet.

German or Golden Millet.

Remember we charge 18c for bags extra for each  $2\frac{1}{2}$  bu. or less on Grass and Clover Seed, except  $\frac{1}{4}$  bu. bags are worth 10c.

is well adapted for sowing under trees in orchards and very valuable either for grazing or for hay. 14 lbs. per bushel. Sow 1 $\frac{1}{2}$  to 2 bushels to the acre, either fall or spring. By mail, ptk. 10c, lb. 35c, 4 lbs. \$1.00. Choice seed, bu. \$2.00, prime seed, per bu. \$1.85.

## MILLET

Prices subject to change.

GERMAN OR GOLDEN. The true, large headed variety. This has been considered the best variety and is largely grown wherever its value is known. It helps out wonderfully when a short crop of hay is threatened and produces two or three times as much per acre as timothy or clover; 3 to 5 feet high. Sow broadcast, 1 bu. to the acre for hay;  $\frac{1}{2}$  bu. if for seed, from May 1 to August 1. Ground must be rich and well drained. 50 lbs. per bu. Pkt. 5c, lb. 25c, 4 lbs. 75c. By freight or express, bu. \$1.25, 5 bu. or more \$1.00 per bu.

Japanese Barnyard Millet A variety of millet first introduced through the Massachusetts Agricultural Col-

KENTUCKY BLUE GRASS.

Canadian Blue Grass, per bu. \$1.25; small lots same as Kentucky Blue Grass.

Orchard Grass (*Dactylis Glomerata*) This is one of the most valuable and widely known of all pasture grasses, coming earlier in the spring and remaining later in the autumn than any other. It grows about  $2\frac{1}{2}$  feet high, producing an immense quantity of leaves and foliage. Blooms with red clover and making with it an admirable hay. It

# ALFALFA CLOVER

## The Agricultural Wonder

There is no other Clover—or other crop—capable of withstanding so much dry weather and that will flourish and keep green during long-protracted droughts, and yield such enormous crops, as Alfalfa. The roots go down very deep—from 6 to 15 feet, and more—in mellow, sandy soil. It is adapted to, and will succeed in almost every part of the United States, but the ground must be properly prepared, and the seed sown under right conditions. We cannot give full instructions in the scope of this catalogue, therefore advise all who desire to grow this valuable crop to order the book mentioned below. Price 65c, and don't fail to inoculate your seed or soil. (See below also.) It is best adapted to sandy and loamy soils, with a mellow, deep or porous subsoil.

It is adapted for hay and pasture, and especially for soil-ing uses, as it furnishes three and more cuttings during the year. When used for pasture it should not be so very closely cropped. It should be tried by every farmer in this country where the soil is at all suitable. Once established, every acre of Alfalfa will be worth two or three times as much as any other farm crop as usually grown.

Lucerne, or Alfalfa, is sown in the spring, either by itself or with grain, at the rate of 10 to 12 pounds per acre. It will make a fair growth the first year, and many of our customers have cut it for hay in the fall, after seeding in the spring. The year following it will be ready to cut early, and two or four times during the season, and every year thereafter for many years.

HERBERT ACUFF, Washburn, Tenn., writes: "From one pound of Alfalfa got last season I cut it four times this season and got a wagon load each time. It did exceedingly well."

H. M. STOUT, Trafalgar, Ind., says: "My Alfalfa is the wonder of this country. There will be much call on you for seed next season. Alfalfa pasture and corn make the best combination in the world for hogs. Cattle pastured on Alfalfa were pronounced the finest bunch marketed in our county this year."

Alfalfa is so valuable that it is worthy of a good and well-directed effort on the part of every farmer to succeed with it.

Price by mail, 1 lb. 40c, 4 lbs. \$1.25. By freight or express,  $\frac{1}{4}$  bu. \$2.75, per bu. \$10.50. Crop short; price liable to change. Will always fill orders at lowest market rates.

Field of Alfalfa Clover Cutting Four Tons of Hay per Acre.

## ALFALFA BACTERIA

**INOCULATE YOUR SOIL.** Recently a valuable discovery was made that removes the last obstacle to the almost universal growing of this valuable crop. The reason of failures, so frequently experienced in the past was on account of the absence in the soil of a bacteria that is essential to the growth and permanency of the crop. This we can now supply. For 50 CENTS we will send inoculating material sufficient for one acre, with directions for use so plain and simple that any person can use it. Don't sow Alfalfa Clover Seed without inoculation, or it is almost certain to be a failure. With inoculation it is certain to be a success. Price 50c for sufficient for one acre.

Book on Culture of Alfalfa, 164 Pages, 65c. postpaid.

# GOOD SEEDS, GOOD CROPS, GOOD PRICES

INSURE FARMERS' PROSPERITY

## WE HELP YOU TO ALL OF THEM

TWO YEARS ago Mr. J. A. Everitt organized the American Society of Equity and gave to the farmers of America a plan of marketing to make it possible to get profitable prices always on all crops.

**UP TO DATE FARMING** is a farm paper owned by Mr. Everitt, and through it the plan was taught to hundreds of thousands of farmers who did as they were advised with the most astonishing results.

To show the results we print two tables.

The first table shows what six leading crops brought farmers when they were in the habit of dumping them soon after harvest. They then went into elevators and great warehouses and other people made your prices. The figures are those of the U. S. Department of Agriculture.

Crop	Year	* Crops Dumped—The Old System.		
		Bushels	Farm Value	Value
Corn.....	1896	\$ 2,283,875,165	\$ 461,006,967	
Wheat.....	1899	547,303,846	319,545,295	
Oats.....	1899	796,177,713	198,167,975	
Potatoes.....	1896	252,234,540	72,182,350	
Cotton.....	1898	11,189,205 lbs.	805,467,041	
Tobacco.....	1899	868,163,275 lbs.	52,089,196	
Total farm value.....			\$1,408,458,824	

This table shows what crops of the same kind and size sold for when farmers controlled their marketing, and kept the supply on the farm. This is the only correct way to market crops, because the consumption—legitimate demand—comes over a whole year. The demand that calls for crops to go into storehouses is not legitimate but speculative. Prices are made on such supplies by gamblers on boards of trade. Farmers will all agree to this.

Crop Controlled, the New System.	In Favor of Controlled Marketing.			
	Year	Bushels	Farm Value	Increase
Corn.....	1903	2,244,176,925	\$952,868,801	491,861,834
Wheat.....	1904	550,000,000	550,000,000	230,454,705
Oats.....	1903	784,004,199	267,661,665	69,493,690
Potatoes.....	1903	247,127,880	185,346,000	113,163,650
Cotton.....	1904	11,200,000 lbs.	560,000,000	254,532,959
Tobacco.....	1904	868,163,275 lbs.	86,816,275	34,727,079
Total farm value.....			\$2,604,692,741	
Total increase in six crops.....			\$1,194,233,917	

In the first table are shown crops of equal size with the last table, so the illustration will be fair. The figures in last column are obtained by subtracting the two "Farm Values," and show the increase on each crop and total increase. Farmers, do you now see that the new system has nearly doubled the value of your crops? That it has made you One Billion, One Hundred Ninety-Four Million, Two Hundred Thirty-Three Thousand Nine Hundred Seventeen Dollars (\$1,194,233,917) more than equal size crops ever brought you before? Hundreds of thousands of farmers have made from a few dollars to over a thousand dollars a day by it. Every farmer can as well as he will join The American Society of Equity and learn how and follow every move of the co-operating farmers of America, as directed by the official paper, Up-to-Date Farming. Every farmer will make far more money if he belongs to the A. S. of E. No farmer can make as much money if he is out of the A. S. of E. All the A. S. of E. needs is every farmer to join it. All every farmer needs is the A. S. of E., and all his problems will be solved. The membership fee is \$1.00, which includes the official paper. We will return your money with 20 per cent interest in 6 months if you write that you have not received great benefit.

THE AMERICAN SOCIETY OF EQUITY  
J. A. Everitt, Pres.

Dept. A 1, Indianapolis, Indiana.  
Mention Dept. A 1 when you write.

# SIERIAN MILLET

## A VALUABLE MILLET

The Siberian Millet grows strong and tall, yet it is not coarse. The stalks are close jointed and covered with leaves from bottom to top. No other Millet equals this for profusion of leaves. The whole stalk cures into nice, soft, green colored hay, which is greedily eaten by all kinds of stock. The heads are similar to Hungarian grass; seed orange color. In season it is as early as Hungarian and earlier than German Millet, withstands drought best of all Millets, yields ordinarily 30 to 40 bushels of seed per acre, while 50 to 60 bushels have been obtained in some cases. Sow  $\frac{1}{2}$  bushel to 1 bushel per acre, according to soil.

### The Illustration Represents 50 Plants, Height 4 Feet.

To farmers who have been in the habit of growing Millet we recommend this new variety as an improvement, and to others who could not grow Millet advantageously this variety may be what they have waited for. The seed is not expensive, and considering its advantages in yield, is one of the seed bargains of the year.

**PRICE**—By mail, lb. 25c, 4 lbs. 75c. By freight or express,  $\frac{1}{4}$  bu. 40c, 1 bu. \$1.50, 5 bu. or more at \$1.25.

## YELLOW MILLO MAIZE

A tall plant, growing 9 to 12 feet, stooling from the ground. It sends out shoots also from the joints. It has all the vigor and vitality of other sorghums. It is non-saccharine; useful for the large amount of forage, green feed or cured fodder that it furnishes, and for its grain. Earlier than the White Branching variety. Sow 10 lbs. per acre. By mail, pkt. 10c, lb. 30c, 4 lbs. 75c. By freight or express, 5c per lb.

Yellow Millo Maize

## TEOSINTE

The most prolific forage plant yet introduced. The stalk, containing much saccharine matter, is very nutritious. Where it succeeds it can be cut several times during the season, yielding enormously. One seed will sometimes produce 20 to 60 stalks or shoots, and the warmer the climate the better the yield. Should not be planted until soil is perfectly warm in the spring. Requires about four pounds of seed per acre. Plant in drills three feet apart and two or three seeds every twelve inches in drill. Will only produce seed in southern latitude. It is recommended more as a novelty than as a valuable plant for the average farmer.

Pkt. 10c, oz. 20c,  $\frac{1}{4}$  lb. 50c, lb. \$1.50.

A Single Plant of Teosinte.

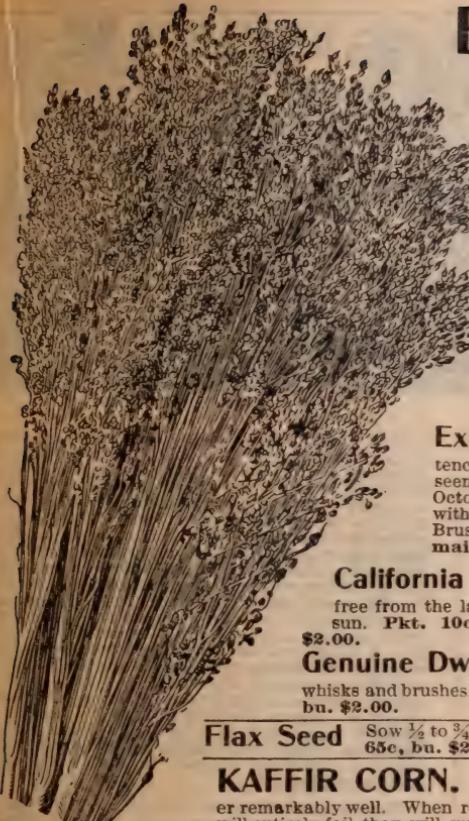

ENGRAVED FOR A. EVERITT

# BROOM CORN

(Specially Grown for Seed.)

For several years this has been a very profitable crop, worth \$80 to \$160 a ton. An acre gives 800 to 1,000 lbs. of brush and about 40 bushels of seed, worth nearly as much as oats for feed.

For 50 Cents we will send a book giving Full Instructions for growing Broom Corn and Making Brooms.

**Improved Evergreen** Grows about 8 or 10 feet high, stands up well and is entirely free from crooked brush. The fibre is long and fine. Its great value to growers is in the fact that it will not get red in the field before it is cut, but is strictly a green variety of brush, commanding highest price. Pkt. 10c, lb. 30c, 4 lbs. 75c, by mail. Peck 65c, bu. \$2.00.

**Extra Early Japanese** This is the earliest broom corn in existence, matures in about 75 days when planted late. Have seen some that was planted July 17th and ready to cut October 1st. It is just the kind for an early market. It has withstood dry weather better than any other variety. Brush is fine and long. Pkt. 10c, lb. 30c, 4 lbs. 75c, by mail. Peck 75c, bu. \$2.25.

**California Golden** An excellent standard variety, grows a very fine brush of good length, and is free from the large center stem. Bleaches very evenly even in the sun. Pkt. 10c, lb. 30c, 4 lbs. 75c, by mail.  $\frac{1}{4}$  bu. 60c, bu. \$2.00.

**Genuine Dwarf** Grows from 3 to 4 feet high, with straight, smooth brush. Principally used for making whisks and brushes. Pkt. 10c, lb. 30c, 4 lbs. 75c, by mail.  $\frac{1}{4}$  bu. 60c, bu. \$2.00.

**Flax Seed** Sow  $\frac{1}{2}$  to  $\frac{3}{4}$  bu. per acre. Pkt. 10c, 1 lb. 30c, by mail.  $\frac{1}{4}$  bu. 65c, bu. \$2.25.

**KAFFIR CORN.** They bear dry weather remarkably well. When regular corn will entirely fail they will wait for rain without injury. They make a yield of 30 to 50 bushels of seed, which is good for stock when ground and very fine for poultry. For fodder they make a large yield and are not as difficult to handle as corn fodder. Of particular value in the western states. To thresh, run the entire stalk through a threshing machine with one concave. The grain will come out clean and fodder shredded. For grain, sow in rows 3 feet apart, 3 to 5 pounds of seed per acre. For fodder sow  $\frac{1}{2}$  to 1 bushel per acre, like Millet.

**White** It grows from 4 to 5 feet high, making a straight, upright growth. It has a stalky stem, with wide leaves. The stalks keep green and are brittle and juicy, not hardening like other varieties of sorghum, making excellent fodder, either green or dried, which is highly relished by cattle, horses and mules. The seed heads form at the top of each stalk and as soon as these show the grain well, the joints next below the top send up shoots which yield the second seed heads.

**Red** This grows taller than the white, the stalks are slenderer, but more juicy and very leafy. The heads are long, slender and compact and grow erect. The seed is red, smaller than that of the white and rather hard and brittle. It does well on poor land and yields well. It ripens a little earlier than the white variety. It is highly recommended by the Kansas Agricultural College.

Spanish Peanuts.

Price of each, pkt. 10c, lb. 30c, 4 lbs. 75c, by mail postpaid,  $\frac{1}{4}$  bu. 40c, bu. \$1.50.

**Spanish Peanuts** An early variety, growing perfectly erect; can be cultivated with the plow exclusively. The pea is small, but remarkably solid, no blanks, and the yield per acre very large. Because of their early habit and easy cultivation, the most profitable variety to grow for fattening hogs. Price, large pkt. 10c, lb. 30c, 4 lbs. 75c by mail, postpaid. By freight or express,  $\frac{1}{4}$  bu. \$1.25, bu. \$2.00.

Kaffir Corn.

Kaffir corn is recommended where regular corn will not succeed on account of dry weather. Both varieties are almost proof against droughts. For grain sow 3 to 5 lbs. per acre in drills. For hay sow  $\frac{1}{2}$  bu. to 1 bu. like Millet.

Kaffir corn is recommended where regular corn will not succeed on account of dry weather. Both varieties are almost proof against droughts. For grain sow 3 to 5 lbs. per acre in drills. For hay sow  $\frac{1}{2}$  bu. to 1 bu. like Millet.

# RAPE

## TRUE DWARF ESSEX

There are millions of acres of good land that lie idle part or all of the year to run to weeds that can be sown to this Rape at slight expense, and produce the finest feed imaginable and at the same time improve the soil.

Where once introduced the trade increases rapidly on account of its merits. A few years ago we sold a few hundred pounds while now we sell tons, with a still increasing demand.

We can not improve on the recommendations of the Department of Agriculture, therefore quote from their Circular No. 12 as follows:

"Under ordinary field conditions Rape reaches to a height of from  $1\frac{1}{2}$  to 4 feet, and the strong growing roots penetrate the soil to a considerable depth.

"For its best development Rape requires a rich, moist, loamy soil, and will usually do well on any but light sandy soil and stiff clays. In general, a soil that will produce good crops of turnip, cabbage, wheat or corn will be suitable for Rape.

"Throughout the Northern States generally, seeding may take place from the first of June or possibly earlier, to the middle or last of July, according to the season and locality. In the South the seed may be sown in September or early in October. Under favorable conditions 2 to 3 pounds of seed per acre will be sufficient, and it will never be necessary to use more than 5 pounds per acre. The seed should be planted in drills far enough apart to allow cultivation. Often fine Rape may be grown on land that has already produced a crop of some of the early maturing cereals, such as rye, oats or barley. As soon as the crop of grain is removed, the land is plowed or 'disked' and at once seeded to Rape. Field peas and other early maturing forage crops, or rye or winter oats that have been pastured off in spring may also be followed by Rape with profitable results. Another practice which is coming into favor in some sections of the country, is to sow Rape in the spring with some grain crop, such as wheat, allowing the former to take possession of the field when the latter has been removed. This method is

especially satisfactory when succulent forage is desired for fall feeding. Rape may also be sown in the cornfield just before the last plowing, as is often done with turnips, rye and winter wheat. The Rape is usually ready for use in about 8 or 10 weeks from the date of seeding. Sheep and swine may be turned into the field and allowed to remain until the Rape is pastured off. Rape has a high feeding value. It makes an excellent feed for fattening sheep and swine and for producing an abundant flow of milk in milch cows. Rape can be used to good advantage as a part of the rations for animals that are being fed in pens for market or for the show ring. It is also a valuable food for young lambs at weaning time. By beginning as early as practicable in the spring and seeding at intervals of two or three weeks, a continuous succession of Rape can be produced throughout the period when the permanent pastures are most likely to be short. Rape will endure quite severe cold weather and thus will last a long time after the ordinary pasture grasses succumb to the frost."

*There is much adulterated and not true seed on the market. There is only one variety of Rape valuable for this country, and it is the Dwarf Essex. Therefore prospective purchasers should use caution in buying. We offer the genuine, carefully grown for us in England, at prices as low as can be afforded, quality considered.*

**PRICE**—By mail, pkt. 5c, 1 lb. 30c, 4 lbs. 80c. By freight or express, per lb. 12c, 5 lbs. 40c, 10 lbs. 75c, 100 lbs. \$6.00.

## BUCKWHEAT

**Japanese** This variety of Buckwheat is a great improvement over the old kind in the following respects: The new Japanese grows with astonishing vigor and begins to mature its grains in about fifty days, its extreme earliness insuring safety from frosts, where the other kinds often get caught. 2d. A most valuable quality is its ability to withstand wind-storms and not lodge. 3d. It holds its grain in harvesting. It has been known to stand uncut a month after its proper time for ripening, and without apparent loss from lodging or of grain separating. 4th. In yield it excels. We have reports of one peck yielding 36 bus.; another peck 40 bus.; another 52 bus. Its flour is the whitest and finest of all Buckwheat. 5th. It will do well on soil too rich or too poor to support the old varieties. 6th. It will withstand sun blight almost perfectly. Fields of the old Buckwheat average less than four bushels per acre, while the sun had no effect on Japanese. For this reason valuable in the South. Very valuable for bee pasture.

**PRICE**—Pkt. 10c, 1 lb. 25c, 4 lbs. 75c, by mail postpaid,  $\frac{1}{4}$  bu. 50c, per bu. \$1.50.

**Silver Hull** Earlier than the common Buckwheat, thinner husks and more prolific. Remaining in bloom a long time. Pkt. 10c, lb. 25c, 4 lbs. 75c, peck 50c, bu. \$1.50.

## SUNFLOWER

**Mammoth Russian** It is grown for its seeds, which are val-

uable food for stock, particularly poultry; also for parrots. Is considered the best egg-producing food known. Poultry eat it greedily, fatten on it, obtain a bright lustrous plumage, and strong healthy condition that fully illustrates the wonderful benefits from its use. Can be raised as cheaply as corn, having yielded at the rate of 120 bu.

per acre. Single heads measure from 12 to 22 inches across, and contain an immense quantity of seed. Can be sown at any time up to middle of July. Pkt. 5c, lb. 30c, 4 lbs. 75c. By freight or express, 5 lbs. 40c, 10 lbs. 75c; 100 lbs. or more, 5c per lb.

# SOY or SOJA BEAN

Also called Soya Bean, Coffee Bean, Coffee Berry, German Coffee Berry, Japanese Jaavaa Coffee, American Coffee Berry, Etc., Etc.

The Soy Beans have demonstrated a great farm value in the past few years, and could be profitably grown to a much greater extent.

We have the following from the U. S. Department of Agriculture:

"The stems alone are too coarse to make good hay, but are covered with such a dense growth of leaves and are so prolific in fruit that the hay is prized highly, especially for milch cows and for fattening animals. The yield of green foliage is very heavy when grown on good soil, and the yield of beans is from 20 to 30 bushels per acre. It is one of the best legumes for the silo, as it can be more easily handled for the cutter than can plants like clover or cowpeas."

We have the following from the Indiana Agricultural Experiment Station:

"A comparatively new and promising leguminous crop for Indiana farmers is the Soy Bean. This plant has been successfully grown in different parts of the State and at several points farther north in the United States. It thrives in good corn soil, and will grow wherever corn can be successfully produced.

"Being a quick-maturing annual, it will prove especially helpful for those who cannot grow clover. A crop of Soy Beans can be produced between spring and autumn frosts anywhere in the State."

A crop of Soja Beans grown on land that will make 40 bushels of corn per acre will, if plowed under, put \$16 worth of fertilizing matter per acre into the soil.

Land that will make 1½ tons of timothy or clover, will make 3 tons of Soja Beau hay, worth more per ton than timothy.

James Belwood, of Virginia, writes: "I have threshed over 100 bushels of Soja Beans grown on one acre of rich river bottom land."

L. D. Whittaker, of Richland county, Ill., threshed seven bushels of seed from 16 square rods of Soja Beans, at the rate of 70 bushels per acre.

**CULTURE** The soil may be prepared as for corn. If impoverished by previous cropping, the soil should be well supplied with lime, potash and phosphoric acid. Nitrogenous manures have also proven beneficial.

The seed may be sown broadcast with the wheat

drill, in rows 16 to 24 inches apart, or with the corn drill, to be cultivated as corn, one-half bushel per acre. Soy beans may follow a crop of rye or barley or be sown in the standing corn at the time of the last cultivation, if weather is seasonable. If sown in corn put in two rows of Soy Beans between each two rows of corn. Sow about two pecks to the acre in rows, like corn, and cultivate, if seed is desired. For pasture, soiling, or hay, sow four or five pecks to the acre. To harvest for seed, cut off or pull up the plant when the first pods begin to open and thresh them as soon as dry. In threshing remove concaves and run cylinder slowly or the seed will split.

**PRICE.** Pkt. 10c, lb. 30c, 4 lbs. 75c. By freight or express, ¼ bu. 60c, per bu. \$2.00.

## SPELTZ OR EMMER

A Valuable Substitute for Oats and Barley

A few of the reasons why Speltz is recommended are as follows: It outyields oats, barley, wheat, etc., in bushels per acre and is superior to oats and barley for feed. It is a sure cropper. It does not crinkle down and lodge and shell or waste. No rust. No smut; dry weather affects it but little. The crop is always sound. The grain is also of value for milling and used as wheat flour, but until the present it has been used mainly for feed. The heads resemble wheat very much.

We advise farmers to grow some Speltz instead of the usual acreage of oats, which often times is not a very profitable crop. Weight, 40 lbs. per bu. Sow 2 bushels per acre.

I sowed a small piece of Emmer last spring, putting in about 12 quarts of seed, and at harvest time I threshed 18 bu. of good, clean grain.

E. J. SMITH, Ingham County, Mich.

**Price:** Pkt. 10c, lb. 30c, 4 lbs. 75c, ¼ bu. 50c, bu. \$1.50.

**Vetch SAND, or HAIRY.** (*Vicia Vilosa*). The Sand Vetch prospers in the most barren soils. Six tons per acre of green foliage have been harvested in one cut in poor soil, with a second cut for seed or plowing in green. Sow alone or together with rye or wheat, because this Vetch, reaching a length of 3½ to 5 feet, must have a support, otherwise it would lie down and deteriorate in quality and yield. Sow 65 to 85 pounds. Can stand any frost. Sow in fall or spring from middle of April to middle of May, or about the middle of August to middle of September. 60 pounds to bushel. Pkt. 10c. 1 lb. 30c, 4 lbs. \$1.00. b.v. mail. By freight or express, lb. 12c, 10 lbs. \$1.00, 20 lbs. \$1.50, 60 lbs. \$4.50.

# COW OR FIELD PEAS

Prices liable to Change. Write for Prices when ready to buy, and on larger quantities.

## THE GREAT SOIL IMPROVERS The Great Economy Crop for Farmers

**Cow Peas** Are not a new crop. They have been grown in the Southern States of our country for many years; but even there their worth was not generally recognized until very recently, and now they are almost universally grown, and the most remarkable benefits have resulted in improvements of soil and increased capacity of farms to turn off stock and grain crops. The experience of the past few years has shown that they are valuable in all portions of our country.

**Largely Dispenses With Clover and Commercial Fertilizer.**  
**Makes good Land more Productive. Makes Poor Land Good.**  
**For Pasture and Hay of Inestimable Value. More Nutritious than Clover. More Fattening than Corn.**

Roots penetrate deep in the soil. Grow on poor soil and rapidly enrich it. Positively the more of these Peas you grow the richer your ground becomes, even when you remove the crops.

**For Fertilizer** Where Cow Peas are generally grown, the use of commercial fertilizer almost ceases. This is of most vital importance to tens of thousands of farmers who now find the fertilizer bill a burdensome one. All the varieties of Cow Peas are, like clover, air plants, but they differ from clover in having much larger leaf development, and extract much more fertilizing elements from the air, while the roots extend deeper into

the soil and bring up the fertilizer. For fertilizer they may be sown at any time, after the frost is past, till August first, and turn the entire crop under when in bloom or any time after. Of course benefits as a fertilizer result in every way the crop is used.

## COW PEAS

**For Hay** Sow early in the spring on ground as prepared for oats or corn, 1 to  $\frac{1}{2}$  bushels per acre broadcast and harrow in, or drill with grain drill. Cut when Peas are forming and cure as clover. If the ground is not wanted for a different crop don't disturb it. Then the roots will throw up another crop, which may be pastured or turned under in the fall for fertilizer. Follow with wheat and notice the grand results. The yield of hay is 2 to 5 tons per acre and the ground is benefited.

**Cow Peas and Millet** Maybe mixed. Sow one-half bushel of Peas broadcast, then follow with half bushel of Millet per acre; they will grow together. Cut for hay when Millet seed is in the dough. Cure thoroughly as other hay.

**Cows Peas and Sorghum** Treat same as above, except use six quarts of Sorghum (Cane seed) instead of Millet.

**Corn Peas and Kaffir Corn** Sow one bushel of Cow Peas and follow with  $\frac{1}{2}$  bushel of Kaffir Corn to the acre; follow same instructions as above. One advantage of sowing Cow Peas with other crops is in the fact that they are supported off the ground, make a larger growth and can be harvested better and cleaner.

**For Pasture** Sow any time from early spring until July. Turn stock on after they are well developed, but preferably after Peas are nearly matured, when the stock, particularly hogs, will derive full benefit from the crop, and fatten quicker and yield a better quality of pork than if fed on corn.

**Cow Peas and Corn** A popular, economical and profitable way to use Cow Peas is to sow them in your cornfield. First plant your corn about four feet apart, in rows (the plants may stand closer in the row and have the usual number of plants per acre), when the time comes to lay the corn by, drill the Peas between the rows of corn (Whip-Poor-Will and Black we recommend). Drill them in the center of the space  $\frac{1}{2}$  bushel per acre. The Peas will mature early in the fall. When nearly matured turn any of your stock in the field, particularly the hogs; cattle may damage the corn by breaking it down. They will not touch the corn until the Peas are consumed, vines and all. The hogs will come out of the field rolling in fat, will not need a bushel of corn. Any corn farmer can in this way fatten his hogs and save all his corn, or double his capacity for fattening hogs by turning off one crop early from the peas, the second lot from the corn. Surely this makes one acre equal to two.

**For Ensilage** Cow Peas surpass green corn for this purpose. Mixed with Sorghum or Kaffir Corn, to hold them up, they make the perfect ensilage crop. All the Cow or Stock Peas are good for table use.

**Farmers who want information about planting, growing, harvesting, threshing and uses of Cow Peas, should subscribe for UP-TO-DATE FARMING, 50 cents a year.**

**Wild Rice** Very valuable as an attraction for wild fowls. Where its value is known it is now being sown in large quantities along the edges of the ponds, lakes and streams. It can be successfully sown in winter, spring or in the fall, about the middle of September. It grows very rapidly and ripens in August and September. Sow it broadcast from a boat in 1 to 3 feet of water. Where there is a mud bottom the seed will sink and take root. It furnishes small fish protection from large ones. Cattle and hogs are fond of it, and particularly it attracts wild fowls from September on, much to the delight of the sportsmen. **Pkt. 10c, lb. 30c, 4 lbs. \$1.00, postpaid. Not paid, 10 lbs. \$1.75, 100 lbs. \$16.00.**

## Varieties

Prices are liable to change. We will send latest price-list and prices on larger quantities on application. Bags are free. We will always sell at the lowest prices.

**Whip-Poor-Will** A favorite early bunch-spckled seed, which are more easily gathered than from the vine-growing sorts. This variety is a prime favorite in the north and west on account of its early maturity and habit of growth. Will mature seed in Indiana and equal latitudes. **PRICE. Pkt. 8c, qt. 30c, postpaid. Peck 50c, per bu. \$1.75.**

**Early Black** This variety is a favorite in northern latitudes. It matures early and is suited for late planting. One of the best for improving land and most valuable as a forage crop, making an enormous yield of rich, nutritious feed. It yields more largely of shelled peas per acre than most others and a very strong top growth. **PRICE. Per Pkt. 8c, qt. 30c, postpaid. Peck 50c, bu. \$1.75.**

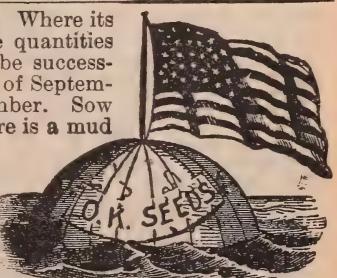

**Clay** A favorite variety in many sections. Makes a growth of vine similar to the Black Pea, but is later in maturing. Suitable for hay, pasture and fertilizer in the North, but will not mature seed. **Pkt. 8c, qt. 30c. postpaid. Peck 50c, per bu. \$1.75.**

**Large Black-Eye** They make a profitable crop to grow for picking the dry peas for sale in market during the winter, at the same time make an excellent soil improver, being similar in growth of vine and action of roots upon the soil as the Black and Wonderful. **Pkt. 8c, qt. 30c, postpaid. Peck 50c, per bu. \$1.75.**

**Wonderful or Unknown** This makes an enormous and remarkable growth of vines, but requires the full season to make its crop. In yield and growth of vines it surpasses any of the varieties of Cow Peas, and it yields very largely of the shelled peas. This variety should be planted early to get full benefit. Will not mature in the North. **Pkt. 8c, qt. 30c, postpaid. Peck 50c, per bu. \$1.75.**

**Mixed** When sowing for pasture or fertilizer we recommend a mixture of varieties. They are usually cheaper, besides if the season does not suit some varieties, others will do well, thus insuring a good growth. **Pkt. 8c, qt. 30c, postpaid. Peck 40c, per bu. \$1.50.**

**Canada Field** Quite distinct from the Cow Peas, yet similar in all valuable properties as fertilizer, food, etc. Valuable for northern latitudes, where full benefit cannot be obtained from later-maturing southern sorts. They can be grown anywhere and succeed on very thin soils, which they quickly improve. Sown with oats, 1 bushel of Peas to  $1\frac{1}{2}$  bushel of oats per acre, they are unexcelled as an early pasture, and hogs may be fattened on them in advance of the maturing corn crop, thus getting the high price for hogs that usually prevails early in the season. **Pkt. 8c, qt. 40c, postpaid. Peck 60c, per bu. \$1.60.**

## O. K. SEEDS are the National Seeds

They are planted all over the country. Our ambition is to have the Good, Reliable O. K. Seeds planted in every garden and on every farm in America. No other seeds are so good. No other good Seeds are so cheap.

# BROME GRASS

(BROMUS INERMIS)

This grass is valuable in some sections, but has not met expectations as a grass for general cultivation. It is particularly recommended for the Northwest. It is a vigorous, hardy perennial, with strong, creeping root-stalks, smooth, upright, leafy stems, 1 to 4 feet high and loose, open panicles, or seed heads, 4 to 8 inches long. In a few years it forms a very tough sod, soon crowding out other grasses, clover and weeds. Its remarkable drought resisting qualities have proved it to be the most valuable grass for dry regions where other grasses could hardly exist. Sow early in spring and up to August or September, if rainfall is sufficient to start it. Sow 18 to 20 pounds per acre broadcast and harrow in. Pkt. 10c, lb. 30c, 4 lbs. \$1.00. By freight or express, 5 lbs. 75c, 14 lbs. (1 bu.) \$2.00, 5 bus. or more at \$1.75.

Bromus  
Inermis

Showing habit of growth. These stalks are all from one seed. It multiplies this way indefinitely.

## BARLEY

Bags Extra at 18c.  
Each.

**Success Beardless Barley** The earliest barley known. The straw is about the height of the common barley, but better and will stand up on any land. With good land and season it has produced 80 bushels per acre. Sow as early as you can; frost does not hurt it on account of the long harsh beards, which are so disagreeable in threshing, although it is a profitable crop. This is beardless and as easy to grow and handle as oats. It has hulls like the Manshury or any other old variety and the quality is excellent, both for malting and for feeding hogs and other stock. Pkt. 10c, lb. 30c, 4 lbs. 75c, 1/4 bu. 50c, bu. \$1.25, 5 bushel or more at \$1.15.

**Manshury** This is an old well-known six-rowed variety introduced by Professor Henry, of the Wisconsin Agriculture Experiment Station, several years ago. Since then it has been the standard and most popular barley ever introduced. It has been worth millions of dollars to the farmers of the barley growing States. Bearded; productive. Pkt. 10c, lb. 30c, 4 lbs. 75c, by mail. By frt. or ex., 1/4 bu. 50c, bu. \$1.25, 5 bus. or more at \$1.10.

## Sugar Cane Bags Free

**Early Amber** Most valuable variety for general cultivation, ripening as far north as Minnesota. Yields heavy crops of seed and fodder, which are excellent for feeding poultry, swine or cattle. Pkt. 10c, lb. 30c, 4 lbs. 75c, by mail. By frt. or ex., pecks 75c, bu. \$2.25. For fodder \$1.25 bu. subject to change.

**Early Orange** A large variety, suitable for the South or Lower Middle or Western States. Requires a longer season to ripen; much larger and ranker in growth. Price the same as the Early Amber.

## Pedigree Tobacco Seed

Mr. J. A. Everitt, in connection with the American Society of Equity, has done more than all other men combined to lift the tobacco producing industry out of the rut of low prices. For this reason and the fact that no better seed can be obtained anywhere, we hope to have your orders. Our seed is grown on the largest tobacco seed farms in the world.

**CONQUEROR.** Popular in Va., Tenn. and N.C., for bright yellow. Pkt. 10c, oz. 50c, 2 1/2 oz. \$1.00, lb. \$1.00.

**WARNE.** A new variety for yellow wrappers. It is rapidly taking the place of Conqueror and is at the head of the list in its class. Pkt. 10c, oz. 50c, 2 1/2 oz. \$1.00, lb. \$4.00.

**WHITE BURLEY.** The best filler tobacco. Particularly adapted to limestone soil. Pkt. 10c, oz. 50c, 2 1/2 oz. \$1.00, lb. \$4.00.

**IMP. YELLOW PRYOR.** The leaf is soft and tough, like French kid, commands top prices. Pkt. 10c, oz. 50c, 2 1/2 oz. \$1.00, lb. \$4.00.

**SUMATRA.** A americanized stock grown from imported seed. Pkt. 15c, oz. 75c, 4 oz. \$2.00, lb. \$7.50.

**CONNECTICUT SEED LEAF.** We offer the finest, largest and best of this valuable kind. Pkt. 10c, oz. 40c, 3 oz. \$1.00, lb. \$3.00.

**YELLOW ORONOKO.** A reliable old yellow variety grown for more than 50 years. Pkt. 10c, oz. 40c, 3 oz. \$1.00, lb. \$3.00.

**BLUE PRYOR.** The genuine James River favorite, rich shipper. Pkt. 10c, oz. 40c, 3 ozs. \$1.00, lb. \$3.00.

**SWEET ORONOKO.** For first-class plug filler, makes the best sun-cured natural chewing leaf. Pkt. 10c, oz. 40c, 3 ozs. \$1.00, lb. \$3.00.

**ZIMMER'S SPANISH.** Popular in Ohio, Wis. and Conn. Pkt. 15c, oz. 50c, 2 1/2 ozs. \$1.00, lb. \$5.00.

**CHOICE HAVANA.** Grown from imported seed and Americanized. Extra fine. Pkt. 15c, oz. 50c, 2 1/2 ozs. \$1.00, lb. \$6.00.

**PENNSYLVANIA SEED LEAF.** Famous in Penna. Districts. Pkt. 10c, oz. 40c, 3 ozs. \$1.00, lb. \$3.00.

**GLESSNER.** Another popular Penna. variety. Pkt. 10c, oz. 40c, 3 oz. \$1.00, lb. \$3.00.

## Important Hints for Planters

Below we mention best varieties adapted for different sections of the country:

Ky. (Dark district—west), Yellow and Blue Pryor. (Burley district—east), White Burley.

Va., Sweet Oronoko, Warne, Conqueror.

Tenn., Yellow Pryor and Warne.

N.C., Warne, Yellow Oronoko.

Wis., Havana, Sumatra, and Zimmer's Spanish.

Ohio, Havana, Zimmer's Spanish and White Burley.

Conn., Conn. Seed Leaf and Zimmer's Spanish.

Penna., Penna. Seed Leaf and Glessner.

10 OF THE 20 EARS OF  
**FARMERS' INTEREST CORN**  
THAT WERE AWARDED THE SILVER MEDAL  
AT THE PARIS WORLDS FAIR 1900

The Farmers' Interest Corn is listed on the next two pages. Please read all about it very carefully. Farmers who have planted it in the past were very wise, but there are yet many townships and counties where it has not been introduced. Our Corn Exhibit attracted attention at Paris. Read the following:

CARIGNAN-ARDENNES, FRANCE, Nov. 28, 1900.

Mr. J. A. Everitt, Indianapolis, Ind., U. S. A.

DEAR SIR:—We have seen your beautiful show of corn at the Paris Exhibition, and we suppose you are a corn grower. If so, as we are great sellers of it and want yearly large quantities, could you make us offers, with cheapest prices and big samples in grain and ears of corn which you grow?

Yours very truly,  
DENATIFFE & FILS. Seedmen

**FIGURES  
AND  
ACTS...**

Prove that the expense of planting our improved varieties of Corn is about 25 cents per acre, including freight, and your own seed is saved. The gain per acre will be many times as much.

A Wealth Producer

The Standby  
With....  
Thousands of  
Farmers. Many  
Thought they had the  
Best CORN before, but  
FARMERS' INTEREST  
Almost Invariably proves that they  
Were in Error.

We have sold this grand Corn 8 years, our customers residing in all parts of the country, from Michigan to Georgia, from New Jersey to Colorado, and no variety of Corn could more completely fill the requirements for a profitable sort. It is early enough to mature in the latitude of Southern Michigan and large enough to be profitable to grow in the South, where it comes weeks ahead of their late sorts and outyields them, making it an ideal Corn for Kentucky, Tennessee, Georgia, Virginia, Missouri, Arkansas, etc. Tens of thousands of corn growers would plant largely of this Corn this year if they just realized the true merit and would increase their crop from 10 to 50 bushels per acre.

## Farmers' Interest Grows in Popularity Every Year.

EVERY FARMER knows that it pays to plant good seed. Every Farmer should know that there is a great difference in seed. If by changing seed to a better variety you can increase the yield 10 bushels per acre, it means the payment of the rental of the land over and above your regular crop. An increase of 15 to 25 bushels per acre is not at all impossible. The cost to get the maximum crops in corn is very trifling, indeed. A bushel of seed will plant about 8 acres. The plowing, pulverizing, fertilizing, planting and cultivating are exactly the same, whether you raise 30 bushels or over 100 bushels per acre. The only extra labor is in harvesting, a task that should be willingly performed.

### Farmers' Interest White Dent

Is one of the most valuable varieties of corn in the country. It rarely fails to increase the corn yield on any farm by a large per cent. where introduced. A strong growing variety, sending its roots out in all directions in search of food. Withstands drought well; stalks are strong, close-jointed and leafy. A fine grower. Produces mammoth ears, of which the illustration on this and opposite page is a fair representation. This ear is an ordinary one; frequently they grow even longer. Grains are very deep, ranging  $\frac{1}{2}$  to  $\frac{3}{4}$  of an inch in length in middle of the ear. Color pure white; firm and good texture; cob medium size. The ears frequently shell one pound of corn to the ear, and cobs from one bushel of ears weigh from eight to ten pounds. Ears 18 to 20 rows. Rows straight, and ears of this variety are well filled out at the ends. Mature in about 100 days.

Minimum prices for the 1804 crop  
Corn set by the A. S. of E. are as follows:

Until Jan. 1st.....50c a bushel  
" April 1st.....55c a " "  
" Next Crop.....60c a "

At Chicago. Farmers keep your minds  
on these prices and ask them.

As the introducers of this fine Corn we desire to make a demand for it by reasonably extolling its merits. We will, however, appeal more directly to the good, sound sense of corn growers, than to attempt to fill the pages with claims for the Corn. The Corn will speak for itself from the time you receive the seed we will ship you until it is finally stored in the bursting Cribs. We want the better class of intelligent, up-to-date farmers and those who are seeking for improvements in their crops, as our customers, and count on an order from every pushing son of the soil who wants to plant wisely and reap abundantly. Thousands of testimonials have been sent to us for this Great Corn, lack of space only prevents us from printing them.

The average weight of corn ears is not more than eight ounces. If an increase of two ounces to the ear can be secured, there would be added to the yield per acre one-fourth. And if there be four ounces added to the weight of ears, then the yield will be increased one-half. Also an illustration like the following is interesting: Illinois plants each year about 8,000,000 acres of corn. If an increase of 10 bushels per acre can be obtained by planting better seed, the total increase will be 80,000,000 bushels. These are features corn growers should keep in mind, and no effort nor expense should be spared to obtain the very best seed possible, and that is the

### FARMERS' INTEREST

When grown in the South, new seed should be obtained from us after two or three years, as it gets later and loses some of its good qualities.

# FARMERS

If You Grow Corn We Urge You to Plant a Field or More of Farmers' Interest. There is a Great Difference in Varieties of Corn. This Variety Will Show the Difference and Surprise You.

## FROM ALL OVER THE COUNTRY

We do not Give Full Address, as thus we would Direct Trade to Our Customers of Former Years, to Our Loss. The Original Letters are in Our Office

**KENTUCKY**—I planted a field of your Farmers' Interest Corn last spring and the result was a revelation to me and my neighbors, when we found we could send to Indiana and get seed corn that excelled our native varieties. We thought we grew good Corn, but your Farmers' Interest is yielding 110 to 120 bus. per acre, and surpasses the best of other Corn by 25 to 30 bushels per acre.

C. W. W., Breckenridge Co., Ky.

**INDIANA**—Farmers' Interest Corn is yielding 95 to 100 bus. per acre. Four of my neighbors, who are also growing it, are all getting over 100 bus. per acre. These are not exaggerated reports, but actual facts.

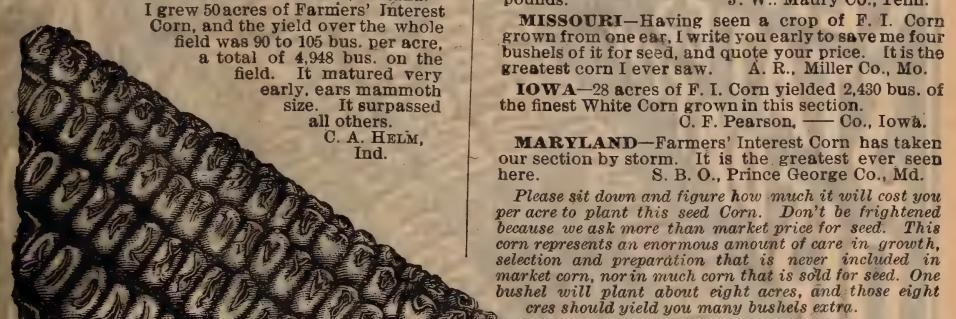

C. A. B., Indiana.

I started this morning for your place with two of the finest loads of Corn that ever were put on wagons, but it began raining and we turned back. Will wait for finer weather. The Farmers' Interest Corn is yielding 100 to 120 bus. per acre all over my fields. Nothing like it ever seen in this section before.

L. B. C., Indiana.

I grew 50 acres of Farmers' Interest Corn, and the yield over the whole field was 90 to 105 bus. per acre, a total of 4,948 bus. on the field. It matured very early, ears mammoth size. It surpassed all others.

C. A. HELM,  
Ind.

**CAUTION.**—This Corn has been renamed by some other dealers, and other corn is offered under its name. We are the introducers and headquarters for genuine seed. You will make no mistake if you send your order to us. You may make a mistake if you send elsewhere. You will make a mistake if you don't get the genuine Farmers' Interest.

**Price** By mail, pkt. 10c, large sample ear 30c, 1 qt. 40c, 3 qts. \$1.00. By freight or express,  $\frac{1}{4}$  bu. 60c, 1 bu. \$2.00,  $2\frac{1}{2}$  bus. in 1 Bag \$4.00, 5 bus. or more \$1.50 per bu.

**OHIO**—A heavy cropper on medium soil. Best I ever raised. WM. LANCEY, Preble Co., O.

**ILLINOIS**—I planted a field of your Farmers' Interest Corn last spring and it has astonished us farmers all through the season in rapid, strong growth. I topped it when ripe and such a field of mammoth corn ears I never saw before. It is good for over 100 bus. per acre. I don't think there can be a better. W. P. R., St. Clair Co., Ill.

**KANSAS**—In a visit to my brother in Kansas, he showed me a field of your Farmers' Interest Corn. I must say I never saw its equal in Indiana, nor the way to Kansas and return. The ears were arms of giants. He wrote me the yield was 114 bus. per acre. I would have guessed it at more, if it was possible for more corn to grow on an acre.

A. M. T., Knox Co., Ind.

**TENNESSEE**—Farmers' Interest Corn is the largest, heaviest and best White Corn I ever grew. On a test 50 ears made a bushel. The cobs weighed 12 pounds.

J. W., Maury Co., Tenn.

**MISSOURI**—Having seen a crop of F. I. Corn grown from one ear, I write you early to save me four bushels of it for seed, and quote your price. It is the greatest corn I ever saw. A. R., Miller Co., Mo.

**IOWA**—28 acres of F. I. Corn yielded 2,430 bus. of the finest White Corn grown in this section.

C. F. Pearson, — Co., Iowa.

**MARYLAND**—Farmers' Interest Corn has taken our section by storm. It is the greatest ever seen here.

S. B. O., Prince George Co., Md.

Please sit down and figure how much it will cost you per acre to plant this seed Corn. Don't be frightened because we ask more than market price for seed. This corn represents an enormous amount of care in growth, selection and preparation that is never included in market corn, nor in much corn that is sold for seed. One bushel will plant about eight acres, and those eight acres should yield you many bushels extra.

25c per acre will get the seed,  
\$5.00 to \$10.00 per acre will  
be the increase in crop.

# THINK ABOUT IT!

Mr. Corn Grower:

DEAR SIR—Please study the following table, showing acreage, seed required, average yield and the result if the yield was increased 10 bushels per acre:

State.	Acreage.	Seed to plant.	Average Bushels.	Yield, 1902.	Increase, 10 bu. per acre.
Illinois....	7,140,000	1,020,000	38 bus.	71,140,000	
Indiana...	4,032,000	576,000	38 "	40,032,000	
Iowa.....	8,049,000	1,149,855	32 "	80,490,000	
Kansas...	8,625,000	1,232,143	29 "	86,250,000	
Missouri	6,454,000	922,000	39 "	64,454,000	
Nebraska	8,094,000	1,156,286	32 "	80,940,000	

It is discouraging to note the low average yields in 1902 the largest crop the country ever raised. The yield can be increased 10 bushels per acre by using better seed and more than 10 bushels additional can be added by better cultivation. You can get the Best Seed Corn in the country of us. We challenge comparison and tests.

CENTRAL  
STATES  
DISPATCH

## Two Good Crops

The two crops represented on this page it will pay all good farmers to grow. They are Good Corn and Good Children.

O. K. Seeds Produce Good Crops

ENGRAVED FOR  
J. A. EVERITT,  
SEEDSMAN

# Central States DISPATCH Yellow Dent Corn

(See Illustration on Preceding Page.)

We again send a dispatch and greetings to every Corn Grower and invite all who have not procured this valuable variety of us to enjoy the benefits of it in the future. The benefits will come through increased yield and superior quality. The corn crop is the farmer's stand-by, therefore he should give even more attention to selecting seed for it than for any other crop. Also there is not another crop that represents such a small outlay for the best seed to plant a crop. Twenty to thirty cents an acre is all that is represented, and your own seed is saved.

## GET NEW SEED, NEW BLOOD, BETTER CROPS

**The Central States Dispatch Corn** is the largest yielding Yellow Dent Corn we ever sold, closely following our great Farmer's Interest White Dent in this respect. We have introduced several varieties of Yellow Corn that have been of immense value to the farmers of the country, but according to our well-known policy, we are always seeking for better and more valuable varieties. If corn growers will trust to us to supply them with the best varieties, they can take this catalogue for a guide and **Central States Dispatch** is a variety we recommend.

**The Central States Dispatch Corn** is a strong grower and delights in a rich soil, where it can feed to its heart's content. Under these conditions it may stand three stalks in a hill, each stalk bearing one or two large ears. On soil of moderate fertility, if planted two stalks in a hill, the fodder is not so large, but the ears are nearly as good. The stalk is well supported by brace roots, a sign of great vigor and ability to withstand drought and not blown down easily by storms. This corn is recommended for strong ground and suited to grow in latitudes south of the Michigan line and as far east and west as corn grows, except in high altitudes, where the seasons are shortened.

**Ears 8 to 12 inches long**, very shapely, with extremely deep grain and moderate cob. In season early, maturing in 110 days; grain yellow, shading to a beautiful light yellow on the top of the grain. A splendid feeding corn. Rows straight; about twenty rows to the ear.

Every corn grower should obtain enough seed of this corn to plant a field or more. All who plant it will find it a valuable *Yellow Dent Corn*, of strong growth, great yielder and high in feeding qualities. If any person wants to see a sample before buying more, they may send us 10 cents and the sample will be sent at once.

We offered five prizes for the largest yields on one acre of ground. We give the names of the successful competitors below, with extracts from their reports:

### FIRST PRIZE, \$25—179½ bu. per acre.

Last spring I bought two new kinds of corn of you at your O. K. seedstore, viz: The Central States Dispatch and the Farmer's Interest. I have just completed harvesting both kinds today, with the following results: I planted the Central States Dispatch May 10th, on a plot of low, rich bottom ground of sandy loam nature, and gave it three good cultivations. I cut the corn about the first of September. As soon as it would do, I husked and weighed the corn, which amounted to **one hundred and seventy-nine and one-half (179½) bushels per acre**. If any man can beat this, I would like to know his method. The Farmer's Interest Corn was planted the same day, and it yielded **156 bushels per acre** of as nice corn as I ever saw. Every farmer will do well to plant largely of these two kinds.

W. E. JEFFERS, M. D., Ohio.

### SECOND PRIZE, \$10—110 bu. per acre.

I will give my report of the one acre of Central States Dispatch Corn. It yielded 110 bushels on one acre. It was the finest corn I ever raised. Some of the ears were 10 to 13 inches long.

CHAS. FEIG, Ohio.

### THIRD PRIZE, \$5—103½ bu. per acre.

I purchased a bag of your Central States Dispatch Corn last spring, and am a competitor for prize, yet if I succeed in winning one it will be a small thing compared to the increased yield of corn I got by planting your seed. I raised from one measured acre, planted in check rows 3 feet 8 inches apart, 103½ bushels of as fine corn as I ever saw.

LEWIS FINDLING, Ohio.

The other successful competitors were:

### FOURTH PRIZE, \$5—A. C. BOTTS, Indiana.

### FIFTH PRIZE, \$5—W. W. MAYNARD, Kan.

The Central States Dispatch Corn received of you was beautiful seed. Apparently every grain grew. I

had almost a perfect stand, and harvested this fall (1903), on four acres, 640 large baskets full, good for 400 bushels of shelled corn at least. It is the best corn I ever grew, and the finest crop in this part of the State. It has made fully double the average yield of this section.

EMMETT WINSLOW, Linn Co., Iowa.

I am not only satisfied with the results from the Central States Dispatch Corn, but delighted. The one bushel planted seven acres, and, as near as we can estimate it from part of the field now shucked, the yield will average over 90 bushels of shelled corn per acre, and may go over 100 bushels, as there appears to be more grain in proportion to cobs in this variety than with any corn we ever raised before. The corn is early, sound and heavy. When you get a better yellow corn, let me know and I will take your word for it.

**O. K. Seeds** make success for the farmers.

T. B. Macoupin County, Illinois.

I have planted O. K. Seeds for eight years, and to judge by my success it is well that all farmers don't plant them, or we would raise more stuff than the people could consume. I have planted many of your seeds, but particularly want to tell you about the Central States Dispatch Corn. I had forty acres in this year, and such corn was never grown in this county before. It is estimated all the way from 100 to 150 bushels per acre. Ears are mammoth on medium stalks. The seed grew perfectly and the stand was largely responsible for the splendid crop.

T. H. B., Rush County, Indiana.

Central States Dispatch Corn is all that you claim. It is a money-maker.

E. C. B., Ross County, Ohio.

Notwithstanding the drought, the Central States Dispatch Corn has made a wonderful crop. It seemed to get moisture from the ground when other varieties were wilted and burning. The yield will be about 70 bushels per acre. I am grateful to you for such a fine corn.

ROBERT A. M., Harrison County, Kentucky.

We could print many more testimonials for all our success in Corn if space would permit.

**PRICE**—By mail, pkt. 10c, 1 large sample ear 30c, 1 qt. shelled 40c, 3 qts. \$1.00. By freight or express, ¼ bu. 75c, 1 bu. \$2.00, 2½ bu. (1 bag) \$4.00, 5 bu. or more at \$1.50 per bushel.

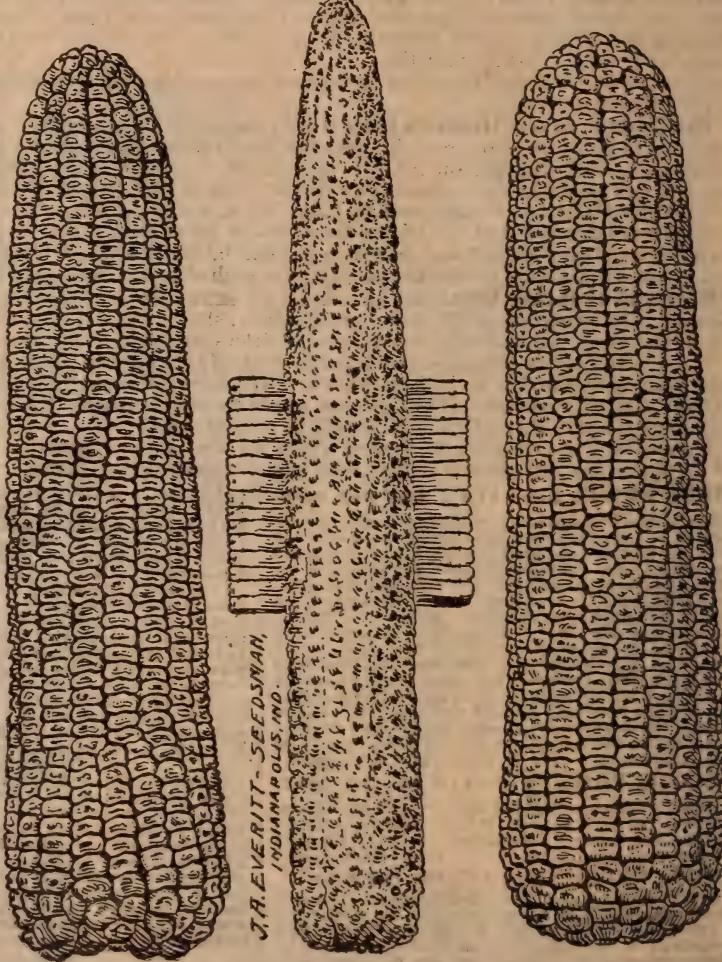

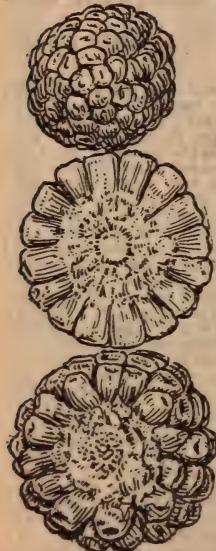

THE MOST  
VALUABLE

# FEEDING CORN

Unsurpassed in Productiveness.

We have introduced some of the most valuable varieties of field Corn in the country, and which are now in large and general cultivation. On account of our wide acquaintance with the various varieties as growers, dealers in and sellers of seed, we are in a position to judge of the relative merits of the many varieties. Our rule is to not introduce a new variety unless it has distinct and superior qualities over what are already on the market. For this reason we do not introduce nearly as many varieties as some other seedsmen, but our varieties are always eagerly sought after and bought by those farmers who have learned from past experience that they mean improvements in their crop.

Pride  
of Indiana

PRIDE OF  
INDIANA

# WHITE DENT. CORN

INTRODUCED BY US IN 1903.

We claim for this the highest feeding qualities of any variety of corn, whether white or yellow, except some very small varieties of flint corn, which would not be grown except in the extreme northern latitudes.

In addition to the extremely high percentage of protein that this corn analyzes it is noted for extraordinary yielding propensities, and other recommending qualities.

(SEE NEXT PAGE.)

# PRIDE OF INDIANA WHITE DENT

**DESCRIPTION**—The stalk is vigorous, of only medium size and firmly rooted to the ground. In this latter respect, fields of Pride of Indiana stand up against storms that badly prostrate all other varieties. This is a fact worth mentioning, and our friends should take it as a fact worth considering, as a good root development in a variety of corn exerts an enormous influence on the crop. The ears are set at a convenient height on the stalk (not above your head). They are large, 16 to 20-rowed, hold their thickness well to the tip. Grains in straight rows, deep, with small cob. The corn is dent, and color white. The yielding propensities are great, and such as to please all up-to-date corn growers. Matures in 110 days.

**The Pride of Indiana Corn** was originated by a corn breeder of more than local repute. This gentleman has for years given the most careful, systematic and scientific care to the variety. His object was to develop a variety of white corn with as high feeding value as the best yellow corn, and at the same time retain the yielding propensities of the best white corn. That he has succeeded in doing. The following illustrations will prove the claim to the satisfaction of all.

Both the Indiana and Illinois Agricultural Experiment Stations have used Pride of Indiana Corn in their experiments and breeding plans. The analyses figures given below are the results obtained at the Indiana Station. The reports show:

Average Protein in Seed Planted in 1901		— 11.38 Per Cent.
“	“	1902 — 11.66
“	“	1903 — 11.81
Highest	“	1903 — 12.06
Lowest	“	1903 — 11.69      1904 — 11.75

Observe the increase in average protein—.43 per cent.—in two years, and the increase of 1904 over 1903. The ears analyzing the highest were planted for feed stock in 1903.

The Agriculturist of the Ohio Experiment Station writes: "I want to congratulate you upon your fine type of corn. I do not think anything has come into the Station quite equal to it."

Our seed fields are inspected and culled 10 to 14 times each season. Not a barren stalk or a smutty ear is allowed to remain.

## IT IS BRED FREE FROM BARREN STALKS

In 1902 eight half-acre plats were planted. The object was to make a test of the variety and to determine the relative merits of thick and thin seeding. The following sworn report was furnished us:

1st Plat,	1 Stalk to Hill, 3-6x3-8.	Yield	28 bu.	40 lbs. =	57 bu.,	10 lbs. Per A
2d	2 Stalks	46	50	“ =	93	80
3d	3	52	60	“ =	105	50
4th	3	49	30	“ =	98	60
5th	Large Cob,	57	20	“ =	114	40
5th	Small Cob,	47	34	“ =	95	“
7th	Suckered,	48	46	“ =	96	24
8th	Not Suckered,	Not gathered at this writing.				

NOTE—Plats Nos. 1 and 4 were in corn-stalk ground, No. 5 was in clover sod, Nos. 6, 7 and 8 were in oak stubble. 3-6x3-8 means 3 ft. 6 in. x 3 ft. 8 in., etc.

The table speaks for itself, and shows the possibility for yield of the Pride of Indiana Corn.

We take much pride in offering this Pride of Indiana Corn the third year, and it will be the pride of every farmer who grows it. The careful work that has been done on this variety will be of enormous benefit to the corn growers of the country. Any farmer who is wise in his day will here see an opportunity to secure, at a comparatively nominal cost, what would represent years of painstaking labor and study, if he would undertake to accomplish the results for himself. In fact it would be impracticable for the average farmer to undertake and accomplish what the originator has done, therefore it is evident that the opportunity here offered is a rare one. The growers and disseminators of such thoroughbred corn are entitled to a fair reward and the seed will be cheap to any careful farmer almost regardless of price.

**PRICE**—Large ears which are beauties and characteristic of this fine variety, 30c each, by mail postpaid; 1 qt. shelled 40c, 3 qts. \$1.00. By freight or express,  $\frac{1}{4}$  bu. 75c, 1 bu. \$2.50,  $2\frac{1}{2}$  bu. 1 bag, \$5.00. 5 bu. or more at \$2.00 a bushel.

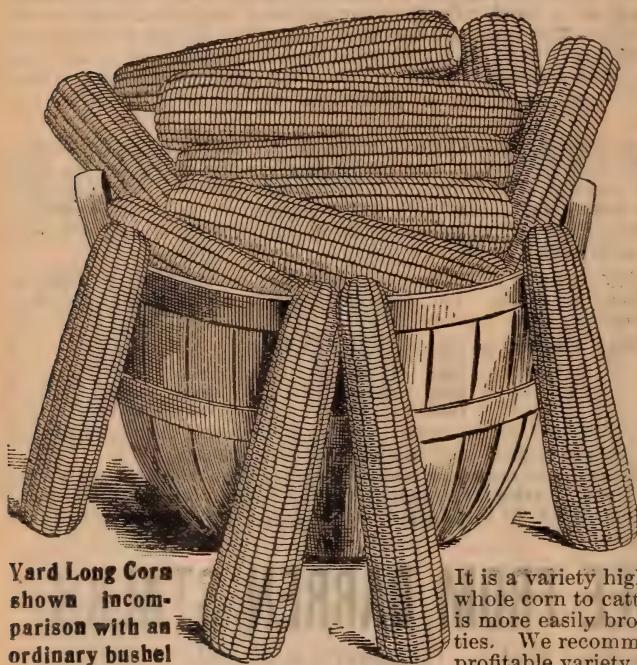

## A NEW CORN

See specialties on first pages of this Catalogue for a new variety now first offered. Those farmers who get our new varieties the

first year of introduction usually sell their crops for seed at fancy prices.

THE LONGEST-EARED CORN IN THE MARKET

# YARD LONG YELLOW DENT CORN

**Yard Long Corn  
shown incom-  
parison with an  
ordinary bushel  
basket**

exhibition corn, always attracting attention, much favorable comment and influencing orders for seed at good prices. Also wins prizes. **Our Sales Double Yearly.**

MR. J. A. EVERITT:

Dear Sir—With this I hand you a clipping from our local paper in regard to the new Yard Long Corn. I have the best corn that was ever seen in this climate and all who have seen it agree. What the clipping says is true, actual measure and weight. I wish you could have seen it growing in the field; grew one ear that measured 25 inches long.

J. L. PERKINS, IOWA.

Extracts from the clipping are as follows:

“ 165 Bushels Corn to Acre—Test Made of J. L. Perkins’ New Variety of Corn Shows Up a Big Yield. The Editor sent a special reporter by request with J. L. Perkins to see his big corn. There were two besides the reporter. They went and measured off by tape measure a square rod in the field and gathered and then weighed the corn. It tipped the beam at 72½ pounds, making 72½x160 equals 165 5-7 bushels per acre. This may look large, but the test was fair and by reliable men. Anyone who doubts this in the least can go and see the field and examine the corn any time by calling on J. L. Perkins, joining the town. Talk about the value of land in the Missouri Valley—165x50 per bushel equals \$82.50 per acre. Is not this equal to your prune orchards of California, or orange groves of Florida, or your boreal regions of the north? A good tall and stout man should gather 200 bushels in a day easy from such a field.”

J. A. EVERITT:

Dear Sir—The Yard Long Corn I planted last spring has astonished the farmers all through this section. It was planted May 10th and cut Sept. 20th. Yield 256 bushels from one peck of seed. Such a field of mammoth corn I never saw before. I will plant about 10 acres next spring. It has taken the first prize in our city show for its mammoth ears. I recommend it to any one.

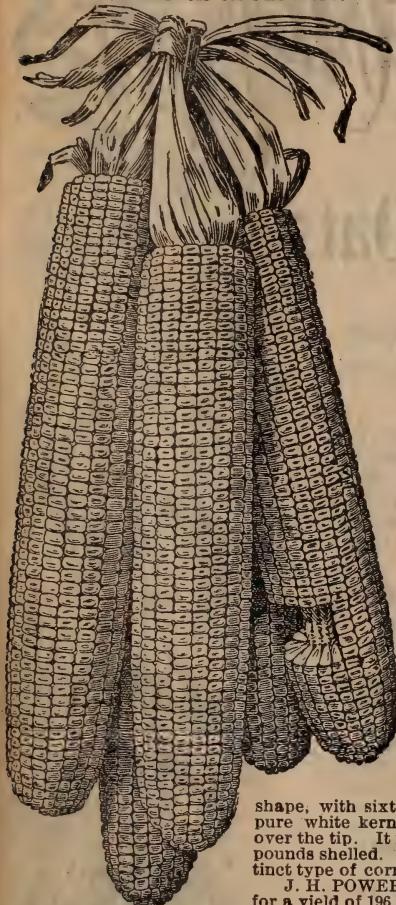

CHAS. B. ——, Saginaw, Mich.

**PRICE—By mail, 1 extra long ear 35c; 1 qt. shelled 40c, 4 qts. \$1.00. By freight or express, ¼ bu. 60c, bu. \$2.00, 5 bu. or more at \$1.75 per bu.** (Four quarts will plant an acre.)

**DON’T** Complain about the price of our Seed Corn. It is worth all we ask for it. We are paying our growers more than ever before to produce better seed. You may get cheaper seed corn elsewhere, but if you go out to hunt cheap seed corn and get it the chances are you will grow a cheap crop. We make our price as low as possible to the farmers, yet we are advocates of good profitable prices for all the farmers have to sell and we help them to get profitable prices.

# IOWA SILVER MINE WHITE DENT CORN

196 Bushels on One Acre.  
176 Bushels on One Acre.

Section of Ear of Iowa Silver Mine.

THIS VARIETY is very popular in Illinois, Iowa, Missouri, and other western states. The originator's description follows:

The stalk grows to a height of about seven or eight feet and sets the ears about three and one-half to four feet from the ground, just the right height for easy picking. Many stalks have two good ears, and this has been characteristic every year it has been grown. It has not a large growth of fodder, having been bred essentially for grain; though it has plenty of blades to support the growth and is well rooted as any corn grown. The type is very even, so unusually so that in selecting exhibition ears for the fair, in the field, one can take the ears as he comes to them, with very few exceptions. Ears measuring from ten to twelve inches in length and weighing one and one-half pounds are not uncommon. The ears are very uniform in size and shape, with sixteen to twenty straight rows (usually eighteen rows) of deep, pure white kernels set on a small white cob, and the ears are well filled out over the tip. It is early. Seventy pounds of corn in the ear will make sixty-two pounds shelled. It is adapted to a wide range of soil and climate. It is a distinct type of corn.

J. H. POWERS was awarded First Premium at the Illinois State Fair in 1899 for a yield of 196 bushels of Iowa Silver Mine Corn grown on one acre.

L. D. YOUNG was awarded Second Premium at the Illinois State Fair in 1899 for a yield of 176 bushels and 39 pounds of Iowa Silver Mine Corn on one acre.

PRICE—By mail, 1 large ear 30c, 1 qt. 30c, 3 qts. 75c. By freight or express,  $\frac{1}{4}$  bu. 50c, 1 bu. \$1.75,  $2\frac{1}{2}$  bu. (1 bag) \$3.75, 5 bu. or more at \$1.25 per bu.

## OTHER VARIETIES OF SEED CORN

We can supply the following well-known and meritorious varieties:

**BOONE COUNTY WHITE**—Pkt. 10c, qt. 30c, 3 qt. 75c, peck 50c, bu. \$1.50.

**RILEY'S FAVORITE, YELLOW DENT**—Pkt. 10c, qt. 30c, 3 qt. 75c, peck 50c, bu. \$1.50.

**REID'S YELLOW DENT**—Pkt. 10c, qt. 30c, 3 qt. 75c, peck 75c, bu. \$2.00.

**IMPROVED LEAMING, YELLOW**. (Gold Standard Leaming)—Pkt. 10c, qt. 35c, 3 qt. \$1.00, peck 75c, bu. \$2.00.

**Fire Dry Seed Corn** We have not got it. Our Seed Corn is carefully grown from selected seed. It is then carefully selected at time of harvesting, stored securely and selected again before shelling. The butts and tips are rejected, so as to make the grains as uniform in size as possible. We do not fire dry seed corn. We do not approve of the method and believe more harm results to the germ than good is done. In handling all our seeds we aim to keep them as much away from artificial heat as possible. If a crop of corn or any other seed is well matured they will not need artificial heat to preserve them. We guarantee all our seed corn to germinate satisfactorily under proper conditions, and any purchaser may test the corn on receipt and return it at our expense if he does not find it to grow a high and satisfactory percentage. Artificial heat dries the oil in the grain or seed, which is essential to the preservation of the germ, and the production of a vigorous, healthy sprout. Every farmer knows that an oily germ is O. K., and a dry one is not O. K. We say fire-dried seed corn may be all right, but if the seed is properly saved from a well matured, ripe crop, there is no necessity for fire drying, and we predict that as soon as artificial heat is applied to such seed corn it injures the germ.

72 PER CENT. OF MEAT  
100 BUSHELS PER ACRE

# GREAT AMERICAN OATS

SOW THE BEST

## The = Great American Oats

Are the Kind of Oats to Grow for Sure Cropping

**HEAVY, PLUMP GRAINS WITH LARGE PER CENT. OF MEAT AND SMALL PER CENT. OF HULL; STIFF STRAW THAT WILL SAVE THE CROP UNTIL HARVESTED; HEAD LONG, HEAVY, FULL.**

The Great American Oats are noted for vigorous growth and droughts do not affect them as much as less vigorous varieties. The grain is large, white, plump, with thin hull, running much over weight with ordinary thresher cleaning. On account of large per cent. of meat in the kernel, they are well suited for oatmeal and other oat products.

### **WE UNRESERVEDLY RECOMMEND THE GREAT AMERICAN OATS**

They have yielded from 65 to over 100 bushels per acre in ordinary farm cultivation, and more under very favorable conditions. We don't ask you to build your hopes on 200 to 1,000 bushels per acre, as you will see claims in some other catalogues. We believe we are dealing with intelligent people, and they realize that such yields are impossible. We aim to *gain* and *hold* the confidence of farmers everywhere; then will we realize the height of our ambition, when **our celebrated O. K. Seeds are planted on every farm in the country.**

**Have you decided to devote part of the farm to the GREAT AMERICAN OATS? It is one of the ways to make farming pay:**

Who would not rather grow a pure, true, heavy oats in preference to the mixed, light, chaffy kinds grown on many farms? Farmers are doing a good business now, and now is the time to look to quality and quantity of their crops, so that prosperity may not diminish, but increase. Farmers who sow Great American Oats take out an insurance policy on their crop.

**We have a very fine crop of these Oats this year and want to sell some to every farmer who sends us an order. Include a small or large quantity in your order. We will guarantee satisfaction or refund your money if you are not pleased and benefitted by growing the Great American Oats. We ask as a special favor that each grower report his yield after threshing.**

**PRICE**—By mail, large pkt. 10c, 1 qt. 25c, 4 qts. 75c. By frt. or ex.  $\frac{1}{4}$  bu. 40c, 1 bu. \$1.25, 3 bu. (1 bag) \$3.00, 6 bu. (2 bags) \$5.50, 9 bu. or more at 85c per bu., bags free.

**GOOD THINGS FOR FARMERS** Will be found in our department of farm seeds and seed potatoes. These are the money crops on the farms and should receive very special attention. Crops can be bred as readily as stock and new seed introduced occasionally is very beneficial.

# PROSPERITY OATS

**The Earliest Oats of all. Extremely Prolific, Strong straw, Heavy grain, Ripen in 60 Days. Yield Over 100 bu. Per acre. Introduced By us in 1901.**

They are so early that they can be threshed and in the granary before the usual kinds are ready to harvest. They have a very stiff straw and stand up well on strong land. Color, bright white if not discolored by rain. They grow vigorously and come so early that they are not liable to be injured by drought as much as later kinds.

The Prosperity Oats have made some of the largest yields on record. Read the following:

**"144 bushels and 21 pounds on one acre."**

I sowed the 96 lbs. of Prosperity Oats received from you, and I harvested same early in August. The actual yield was 4,149 lbs. I left it to stand in the field 5 weeks before hauling;

during that time the thousands of black birds stripped the outside bundles, causing a loss to me of 15 bushels at least. It is the best oats I have ever raised. JNO. MATTHEWS,  
— Co., Utah.

**"110 bushels per acre."**

The Prosperity Oats did well, having threshed 110 bushels from 96 lbs. on one acre.

JOHN MORGAN,  
— Co., Ill.

**"Two weeks earlier than other varieties."**

I sowed the Prosperity Oats on a little more than an acre of land. They came up good; are a strong grower; about two weeks earlier than our native oats. Threshed 80 bushels, machine measure. They would weigh about 100 bushels.

A. J. TROYER,  
— Co., O.

**"Ripe 60 days after sowing."**

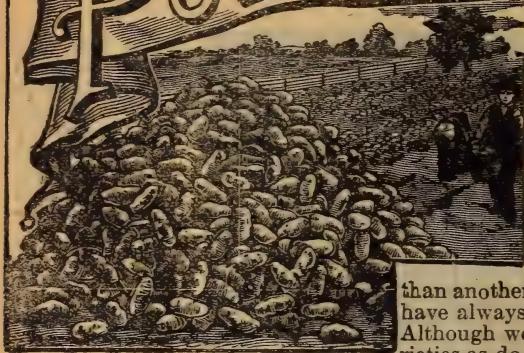

The Prosperity Oats could have been cut 60 days after sowing. Stood up well. Straw nearly as stiff as wheat straw. Am well satisfied with Prosperity Oats.

B. S. GORDON,  
— Co., Ohio.

See Additional Oats, Corn, and Potatoes in Specialties.

**PRICE** Large pkts. 10c, 1 qt. 25c, 4 qts. 75c, by mail. By freight or express, peck 40c,  $\frac{1}{2}$  bu. 75c, bu. \$1.25, 3 bu. in bags \$3.50, 9 bu. or more at \$1.00 per bu. Bags free.

# POTATO Department.

Comprising the very best sorts in the country. No potato grower need look outside of our list for the best early, medium and late varieties.

## EVERITT'S CHOICE Seed Potatoes

Are Famous Wherever Known  
They are the Leaders.

If there is one department of our business in which we excel more particularly than another, it is the **Seed Potato Department**. We have always made great specialties of **Seed Potatoes**. Although we do not introduce one-fourth as many varieties as do some other seedmen, yet when we send out

a new variety it goes out to find a welcome and a home with every grower. Our conservative course has gained for our house the confidence of potato raisers, and as a consequence our trade is not excelled in this line by any house in the country. And in our success we have been instrumental in wonderfully increasing the value of the Potato crop for thousands of farmers all over the country.

Whatever careful selection and good cultivation have done in the way of improving the Potato, they have never been able to overcome the inclination to revert to its natural condition or "run out," and we find those old varieties that a few years ago were our best potatoes placed at the foot of the list and in a few more years will be entirely out of cultivation. There is no exception

to this rule. All varieties obey the law. If it were not in our power to *create new varieties* the Potato would soon be an extinct vegetable and any farmer who continues cultivating a variety after it has begun to deteriorate does so at his loss. There are new varieties being introduced every few years, which keeps the standard to its present high position, and occasionally a variety is brought out that is decidedly in advance of its predecessors. Every potato grower should test *all* the promising new kinds, and thus keep always in the front

rank. The *variety* itself has more to do with the success of the crop than the manner of cutting the seed, planting or cultivation. This is a reliable statement that should be kept in mind by all cultivators.

WHY send to the far North for your **SEED POTATOES?** We pay the freight to Indianapolis, the center of the country, and can cheaply deliver to you from this point. We ship to the South every month in the year.

### Hybridized Potato Seed

We have the pleasure of offering a very choice strain of Potato Seed

— the product of numerous hybridizations between many of the best new and old varieties in cultivation. Growing new sorts from the seed ball is very interesting employment for old or young. There is the widest range of difference in color, shape and general characteristics between the different seedlings; everyone is more or less unlike every other. Great success has already attended the attempts to improve this valuable esculent and the end is not yet.

Many varieties will yet be found that will bring a golden harvest to the fortunate growers and prove of inestimable value to the world. We are always in the market to purchase valuable new varieties and will pay \$50 cash for one bushel of a variety that we consider good enough to introduce. Directions for planting, cultivating, etc., on each pkt. Price pkt. 10c. 3 for 25c.

# POTATO

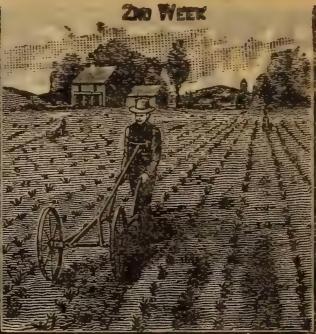

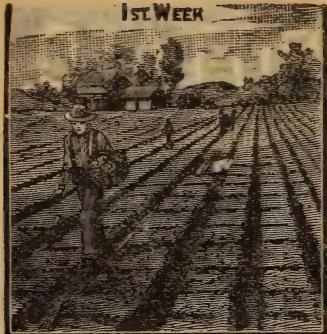

IS  
FAMOUS  
WHEREVER  
KNOWN

## IT IS STILL THE LEADER

The Wonderful Six-Weeks Market Potato. Most valuable for Market Gardeners, Truckers and all early market purposes. A perfect Table Potato and a wonderful yielder.

 This year we offer stock grown from Pedigree seed from the originator who has grown and improved this remarkable variety ever since our first introduction. Old Customers who know the sterling merits of this potato should get new seed.

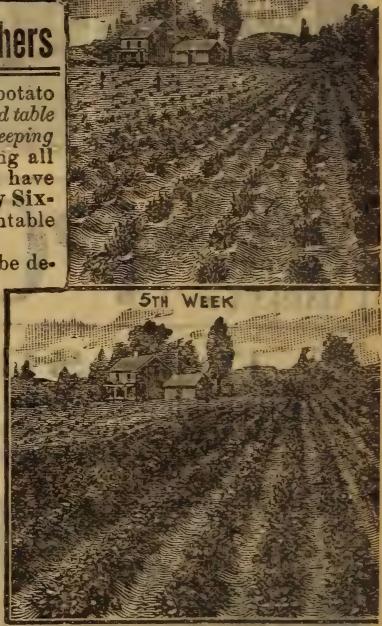

4TH WEEK

## Market Gardeners, Truckers and All Others

Who grow potatoes for home or market will prize this potato ahead of all others on account of its extreme earliness, good table qualities, fine size and shape, great productiveness and splendid keeping properties. Just think of one variety of Potatoes combining all of these qualities in high degrees. We positively assert and have abundant and undoubted proofs that **Everitt's Early Six-Weeks Market Potatoes** do make good sized merchantable tubers *in six weeks from planting*.

We don't refer to a solitary instance. This potato can be depended upon for such results every time *if planted when the growing season has arrived, and the weather is favorable*. With unfavorable weather they will, of course, require longer. (Read the reports on the following pages.) The potatoes cook fine and dry from the time they are large enough until late spring. Size is medium, skin light flesh color, shape like in illustration. They are perfect beauties, sure and heavy yielders.

We have had much experience with this potato and are prepared to state that owing to their quick growth, escaping the drought, bugs, blight, etc., and extra yielding propensities, they make larger average yields for the ordinary potato grower than late varieties that oftentimes are left to take their chances against unfavorable influences. This potato, *strange to relate*, keeps sound, solid and fresh late into the spring, equal to late potatoes.

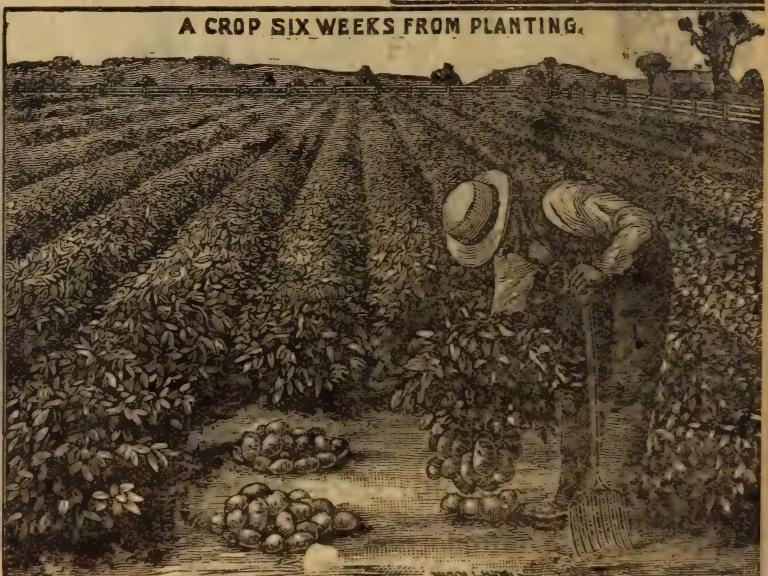

5TH WEEK

## Wonderful

**Size for use in six weeks. Ripen in ten weeks. Yield 420 bus. per acre next year 380 bus. per acre; 2 years later 600 bus. per acre.**

**A  
Record  
Unparalleled**

**T**AKING all the good qualities of the Early Six Weeks Market potato into consideration, is it not a money variety for the market and a variety that will be prized by all lovers of early vegetables at home? There is not a more valuable variety in existence, in our estimation. It is worth its weight in gold for a start of seed.

The potatoes begin to form when the stalk is only 4 or 5 inches high. The tops and

tubers grow rapidly. They grow so rapidly and mature so early that the potato bugs have little chance with them, making the crop, if planted early, before the young bugs become numerous. They yielded on the farm of the originator in Ohio 420 bushels per acre; next year 380 bushels per acre, two years later over 600 bushels per acre. He raises them for early, medium and late crop, claiming they "fill the bill" better than any others.

# READ

## HOW THIS POTATO IS LIKED BY ALL WHO GROW IT. ☺ ☺

### "THE LIKE WAS NEVER SEEN BEFORE."

We have such a very large number of splendid testimonials for the Six-Weeks Potato, that we cannot possibly publish them all, but will set some in small type to get more in a limited space. Let one of the boys or girls read them to father and mother, if your eyes are not strong. If we would print all the good reports received for this potato a catalogue of this size would not hold them.

We received a letter from our customer, John L. Saum, of Paulding County, Ohio, to the effect that he dug some Six-Weeks Market Potatoes forty-three days from planting. It occurred to us that it would be a good idea to have a disinterested party dig and send us some potatoes from which to make a photo-engraving for our catalogue. We wrote to him at once, and on August 25th we received the following letter:

Mr. J. A. Everitt:  
Dear Sir—I send you to-day by freight some Six-Weeks Potatoes. They were dug last night and this morn forty-three days from one-eye seed. They were grown in land, and am noting a crop of early were covered with ordinary treatment. I have just begun to push potatoes. They are a breaking plow and given very ordinary treatment. Think I can beat it next season. Several people who saw them were astonished. I expect to exhibit at our county fair. (See engraving on page 130.)

JOHN L. SAUM.

We, the undersigned, do personally know the originator of **EVERITT'S EARLY SIX-WEEKS MARKET POTATO**, and of our own knowledge know that this variety will produce potatoes fit for the table in six weeks from planting, and that they are solid and mealy when boiled, and that they will mature in 72 days from planting. We consider them the earliest potato in the world, and if justice is done them they will be placed at the head of **finest table variety**, and any early variety. J. W. SHANKS, E. B. WASHBURN, ELIZA BETH WASHBURN, all of Athens County.

Our County Fair has just closed, and I must tell you what they did with the Six-Weeks Potato. I took all the premiums (two) in competition with many of the leading new kinds, and all fine at that. They were popular at our fair.

J. W. BAKER, Bureau County, Ill.

You cannot praise the Early Six-Weeks Market Potato too much. Gardeners should not think of doing without them. I dug 50 bushels off  $\frac{1}{4}$  acre, beginning six weeks from planting, which averaged me 50c. a peck. They are wonderful.

G. R. HIXON, Madison County, Ill.

The Early Six-Weeks Market Potato is splendid. I have Peachblow ran out.

GEO. G. COLTON,

One pound Early Potato yielded 147 pounds of fine sound, smooth tubers. Ripened in 75 days, and produced marketable potatoes in six weeks as you claimed. This is the most valuable variety of potatoes ever introduced.

R. TAYLOR, Ashland Co., Wis.

The Everitt's Early Six-Weeks Market Potato is the most wonderful variety in the world, and combines more good qualities than any other variety in cultivation. This will surely be the gardeners' favorite on account of its earliness and other valuable qualities. The potatoes begin to set on almost as soon as the plants are large as other when tubers are ready for weeks from plant them fit for the soil and mealy as ripe tubers. They are not troubled with the potato beetle.

JOHN WISE, Athens Co., Ohio.

The Six-Weeks Market Potatoes take the cake. The seeds I buy of the world.

J. A. EVERITT beat

MRS. W. H. POWERS, Bradford Co., Pa.

I like the Six-weeks Potato very much. I divided with my neighbors. One of them says they are the best are excellent keepers. They are first-class in every respect.

E. HARTMAN, Sutton Co., W. Va.

The Early Six-Weeks Potatoes did well with me. I could sell a carload for seed here if I had them.

JOHN B. COCHRAN,

Jefferson Co., Ohio.

You have got the best early and the existence. We had Weeks Market Pota the table in six weeks from planting. They out-yielded all our other varieties. AUGUST BROENKNER (Gardener), Allegan County, Mich.

Ten dollars per bushel would not buy my Early Six-Weeks Market Potatoes if I could not replace them for less. They are the earliest of all, and a heavy yield will be universally grown by market and those gardeners foreearly, ers who get them some profits.

Onondaga County,

this time—I mean earliest potato in the Early Six-

to large enough for weeks from planting all our other varieties. AUGUST BROENKNER (Gardener), Allegan County, Mich.

My Early Six-Weeks Potatoes have proved to be as early as you represented them, and a fine yielder, sound, smooth and best quality. They are very valuable.

C. E. WARD, Sullivan County, Ind.

The Early Six-Weeks Market Potato was the best earliest I had this one or two weeks Early Ohio.

N. NYEDAN,

Planted the Early Six-Weeks Market Potato May 3d. They grew fine, and we had new potatoes cooked June 20th. They are the earliest we ever saw.

Marion Co., Ind.

Six-Weeks Market

DANIEL DONOVAN, Carroll County, Tenn.

Our Early Six-Weeks Market Potatoes produced over one hundred fine potatoes, that made over a bushel, measured. They are the earliest to make market potatoes and earliest to mature of any I ever saw. My crop is not for sale at any price.

JOHN GILBERT, Meete Co., Va.

I planted a few of the Six-Weeks Market Potatoes last season on black, sandy loam, without manure and raised at the rate of 395 bushels per acre of the finest potatoes I ever saw. They will produce potatoes for market in six weeks and mature in 72 days. The potato bugs have no chance whatever with them. They are the largest croppers of all early kinds.

ELIZABETH WASHBURN, Athens Co., Ohio.

I would give him dreds of dollars to control the grow Six-Weeks Market ket, as they can be two weeks ahead which means hun profit to a large

W. H. MORRIS, Cuyahoga Co., Ohio.

'Tis now six weeks and five days since I planted the Six-Weeks Market Potatoes. They did not sprout very quick, but they have nice large tubers on them. Are the earliest potato for this climate I ever saw. Thank you a thousand times.

C. L. RICEL, Armstrong Co., Pa.

Out of 17 kinds of potatoes planted, your Early Six-Weeks Market was superior to all, both in quality, size and earliness. I think they are the best potato on earth. C. CARROLL, Pipestone Co., Minn.

It is the best potato I ever saw, yields well, of good size, cooks up like balls of flour, and is delicious. I thank you for introducing so good a potato.

THOS. SINNOCK,

Six-Weeks Potatoes Last season, when up, they gave me a good crop of fine, large potatoes, nearly a full yield and tubers large, with very few small ones; quality excellent, very early; also they were awarded first prize at our fair, where many kinds competed.

J. W. BAKER, Bureau Co., Ill.

The Early Six-Weeks have done well for us. The only trouble is they come on first to eat, and we generally use them all up before others come.

C. C. SHAW, Licking County, Ohio.

The Early Six-Weeks are grand. We had fine potatoes in 6 weeks from planting; dry and mealy as old potatoes. Early Ohio came three weeks later.

L. S. JOHNSON, Clearfield Co., Pa.

The Early Six-Weeks Market Potato did exceedingly well; raised at the rate of 400 bushels per acre; some weighed 1½ pounds. We think qualities better than the they are earlier and

S. HOFFMAN,

Am well pleased with the Early Six-Weeks Market Potato. It is the very finest quality for table, a good cropper, free from rot and bugs.

A. E. STUALEY, Knox Co., Me.

The Early Six-Weeks Potatoes are all you claim for them. They are very early and good yielders. Planted them the 19th of April and the last of June (6 weeks) they were ready to dig, and good size, too; no marbles.

A. FENTON, Monroe Co., N. Y.

The Early Six-Weeks Market is the best table potato in flavor I ever handled, and yields in abundance.

BENJ. GEMBERLING, Licking Co., Ohio.

## CAUTION

Since we introduced our renowned Early

Six-Weeks Market Potatoes some other parties have offered Potatoes under various names, "Early Market," "Five-Weeks Potatoes," "45-Day Potato," etc., or attached their name to it. Some of them use our description of Early Six-Weeks, others claim their potato is as good as our Six-Weeks. We wish it distinctly understood that we named and introduced this unequalled variety, and are headquarters for the genuine seed.

The Early Six-Weeks Market Potato did very well in every respect. They are extra early, cook mealy, good yielders, of nice size, average  $\frac{1}{2}$  pound. The 8 pounds bought of you yielded over five heaping bushel baskets. G. W. RICHARDSON, Morrison Co., Minn.

The Early Six-Weeks Market Potato excels all. The tubers are larger, mature earlier, and in all respects are superior to others I have tried.

B. P. JANNEY,

Those Six-Weeks Potatoes are true meat. In just 6 planting dug toes. E. W. AN Houghton

They are the best early potatoes, taking yield, size and quality into account, of any potato I have ever tested, and have tried nearly every kind I could hear of.

W. H. MILLER, Winnebago Co., Ill.

The Six-Weeks Market Potato made 50 bushels more per acre than the Ohio, our standard potato; am well pleased

J. M. G. WATT,

I am well pleased Potato. If I were surely buy seeds of

P. E.

One peck of Six-Weeks Potatoes yielded 16½ bushels of fine potatoes as I ever saw. There is nothing in this section to come up to them, and they are ready sale at \$3.00 per bushel. I dug them the 16th of June.

JOHN F. GREENVILLE, Niagara Co., N. Y.

From 19 pounds Six-Weeks Potatoes I raised 12 bushels of fine potatoes at the rate of 165 bushels per acre; planted 3x3½ feet, 2 eyes in a hill, as an early market

J. C. ZIMMERMAN,

Six-Weeks Potato All the seeds from

C. L. FOSTER, Knox County, Mo.

Six-Weeks Market Potatoes are very early and good yielders. I took them to Portage County Fair and received first premium for the best early potatoes.

CHRIS. HECKER, Columbia Co., Wis.

I think the Early Six-Weeks Market Potato is the finest early potato

C. C. WEBER,

The Early Six-Weeks are all you claim them in just seven days. They were egg at that time.

GEO. HAMILTON, Bureau County, Ill.

I know the originator of Everitt's Early Six-Weeks Market Potato, and helped to dig his crop this season, and I think they are the earliest potato in cultivation to-day. When the vines were about six inches high I examined them and found potatoes as large as par six weeks from large as hen eggs. days and never rot. bushels per acre,

I. E. SHANKS,

Twenty hills of Market potatoes yielded a heaped bushel. They bear out your claims for earliness, quality and productiveness. Thanks for calling my attention to them.

EMIL LAURANCE, Worcester Co., Mass.

I consider the Early Six-Weeks Market Potato the earliest and best potato I have ever raised.

G. SAMUEL MCKAY, Tipton Co., Indiana.

## PRICE

Everybody knows the very early Potatoes bring high prices on the regular market. There is no other variety that brings as high prices as Six-Weeks Market. Thus we must pay a good price to have seed stock grown, and must charge corresponding rates. You better pay a good big price for Genuine Six-Weeks Market, however, than plant other kinds. Postpaid, 1 lb. 25c; 4 lbs. 75c. By freight or express,  $\frac{1}{4}$  bu. 50c; 1 bu. \$1.75; 1 bbl. \$4.50; 5 bbls. at \$4.25; 10 bbls. or more at \$4.00 each. Price subject to change.

Write for price on large lots.

# EARLY EVERITT

A GREAT EARLY CROPPER.  
A GREAT MONEY-MAKING  
POTATO.

Some of our customers conuse this with our Early Six-Weeks Market. They are very delicate and we advise you in ordering to state plainly which you want.

The Early Everitt is of the Early Rose type and is one of our specialties. From our acquaintance with all the varieties now in cultivation and for the guidance of our customers we do not hesitate to state that our **EARLY EVERITT** is one of the **finest early potatoes now in cultivation**, coming **3 weeks after our Early Six-Weeks Market**, and is **so productive** that it is planted by **some large growers for both early and late crop**. Its fine form is shown by the accompanying engraving. All the tubers are not as regular as this, but it is a handsome variety; eyes even with the surface; color of skin, light pink. A most beautiful potato in shape and color. Flesh is fine, solid, white, and of surpassing quality for the table. Growth strong and rapid, setting tubers **very early**, which attain a large size in a very short time, and ripen with the Early Rose. Tubers grow **very large**, frequently weighing over **2 lbs.** apiece. Yield astonishes old potato growers, who acknowledge that they never had so productive an early potato. No grower who is ambitious old potato growers, who acknowledge that they never had so productive an early potato. No grower who is ambitious to make the most money out of potatoes should fail to grow the **Early Everitt Potato**.

Below we print a few testimonials, which are only a few taken from hundreds that we have received praising this fine potato, but which lack of room prevents us from publishing:

The peck of Early Everitt Potatoes yielded 15 bu. My Green Mountain took first premium at our county fair over 10 varieties. R. E. CHAMBERS, Owen Co., Ind.

The peck of Early Everitt Potatoes yielded fine potato, yielding with me as high as 1 bu. from 15 eyes of seed or a bu. to the rod of row, or 300 bu. to the acre. I dug specimens today that weighed 2 lbs. each. S. R. MUTH, Jeneau Co., Wis.

One lb. Early Everitt Potatoes yielded 2 bu. of nice potatoes as I ever saw. Mrs. Raines thinks the quality better than Early Rose. H. RAINES, Hendricks Co., Ind.

I planted the  $\frac{1}{2}$  lb. Early Everitt Potato on the 6th of July and dug them on the 1st of October. The weather was very dry through June, July and part of August. The ground had no manure for 6 years, and I had 48 lbs.; one measured 20 inches around lengthwise and weighed  $\frac{3}{4}$  lbs. I shall keep them all to plant next year. F. R. COLLINS, Elkhart Co., Ind.

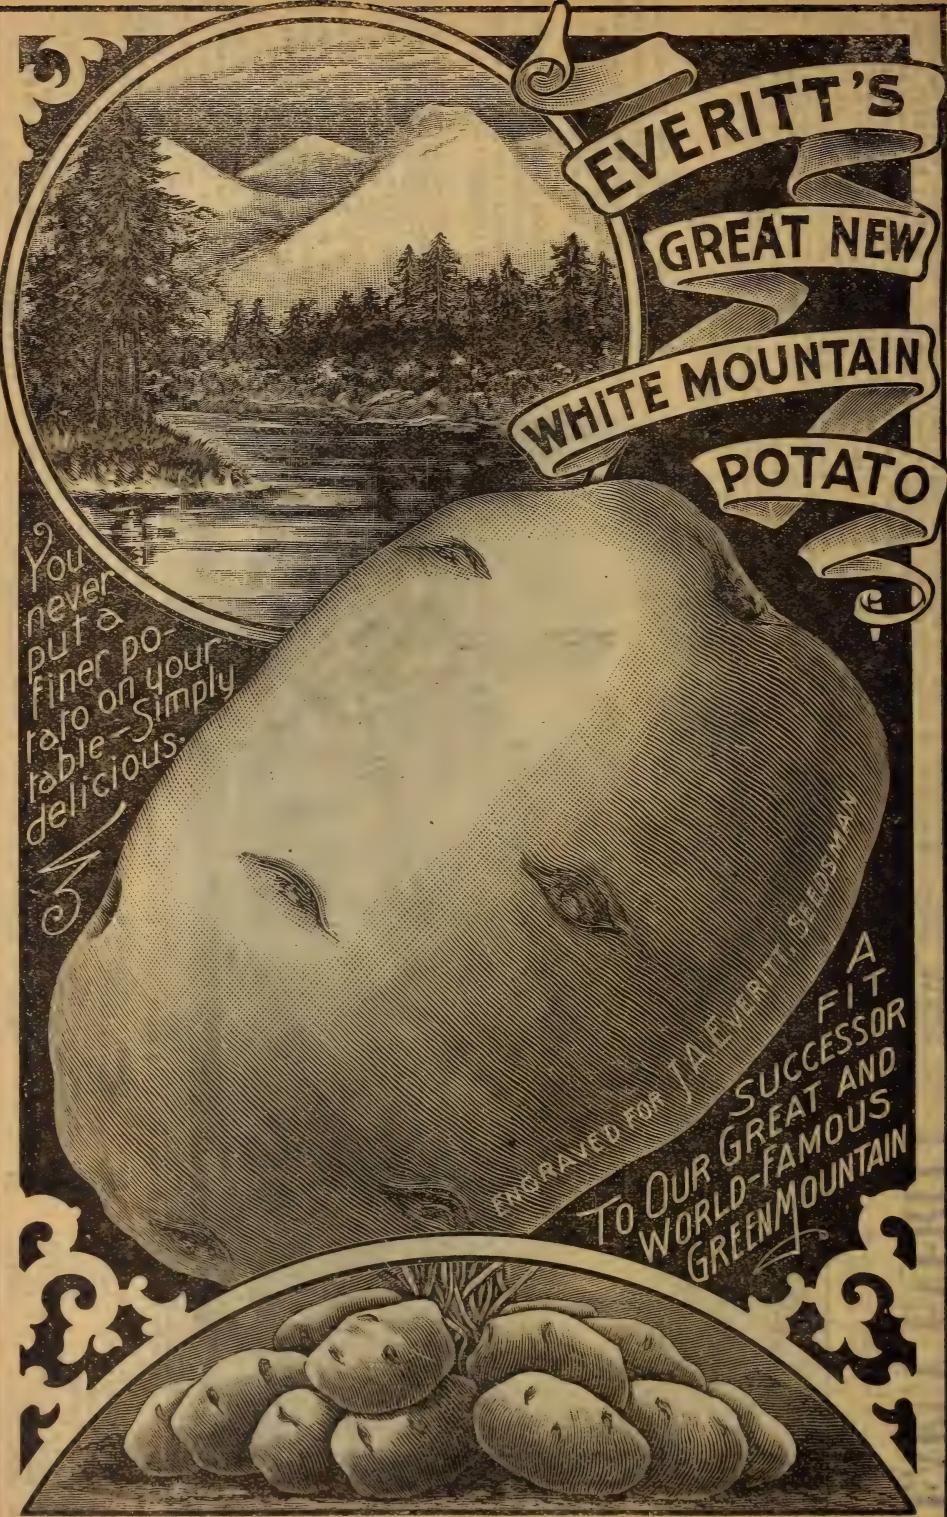

From 2 bushels of Event Potatoes 3 eyes in a hill, I dug 20 lbs., not one small one in the lot. Early Rose would not have grown at all in this ground. We are highly pleased with them.

Price, by mail, postpaid, 1 lb., 25c, 4 lbs., 75c. By freight or express,  $\frac{1}{4}$  bu., 50c, 1 bu., \$1.75, 1 bush., \$4.50, 5 bush., at \$4.25, 10 bush., or more at \$4.00.

Correspondence about your supply of seed potatoes solicited.

In the following table is found the results of a test I made with 13 early varieties. All were planted on April 22.

Variety	Time of Ripening.	Bu. per A.	Variety	Time of Ripening.	Bu. per A.

# SEVENTH YEAR OF OUR FAMOUS White Mountain Potato

## Fit Successor to our Great Green Mountain.

**E**IGHTEEN years ago we introduced the great **Green Mountain Potato**, which has been famous ever since. Famous for beauty, great productiveness and the superb cooking qualities loved by all users of this popular food. Probably no other potato had warmer friends in its best days than the Green Mountain, and although it has served the public these many years, it still retains much of its original vigor and will be a profitable variety in many localities for many years to come.

We want to call the attention of all friends of the Green Mountain and others who are seeking for the best results in their potato crop to

**The White Mountain**, a variety that is not excelled for handsome proof of our assertions well-known people, The **WHITE MOUNTAIN** for main crop. Practically no with the surface, bulged above, which of itself is a good indication of a strong grower. Skin white, with rich yellowish creamy cast, and considerably ruffled or netted. Experienced growers know that a potato with a skin like this possesses superior cooking qualities. The flesh is as white as snow and cooks dry and mealy. The plant is a vigorous grower, and if protected from bugs will carry the tubers through to a perfect and bountiful harvest. The tubers set close about the base of the plant and turn out clean at first effort.

You can not afford to let this year pass without obtaining seed of the New White Mountain.

We are not able to give a very favorable report of our test of potatoes for this year, owing to the very unfavorable weather. The **White Mountain** you will find in the list below. We will say, that as far as our test goes, your variety is promising. The tubers are uniform in size, regular in shape and do not show a tendency to become prongy. On the whole, I think that it is a promising variety. The tests follow. The yields are per acre:

Sir Walter Raleigh.....	126 bu.
Sir William.....	145 "
Early Michigan.....	79 "
Rural New Yorker.....	96 "
Enormous.....	124 "
Early Rose.....	115 "
Maulie's Early Thoroughbred.....	105 "
Carman No. 3.....	149 "
Bovée.....	122 "
<b>White Mountain</b> .....	<b>153 "</b>

W. J. GREEN,  
Horticulturalist of Ohio Agr. Experiment Station.

The **White Mountain Potato** proved to be a very vigorous grower, produced smooth tubers of uniform size, while in yield and appearance compare very favorably with Rurals and Carmans.

DENNIS D. R., Huron Co., O.

Mr. B., who had in charge the test of **White Mountain Potato**, is in New York. The writer, however, saw the crop harvested. It was fine and of good quality. This variety was one of the largest yielders out of several varieties tested.

G. B. & Co., per Lawson, Rochester, N. Y.

**PRICE—Lb. 25c, 4 lbs. 75c, by mail. By freight or express, 1/4 bu. 50c, bu. \$1.75, per bbl. \$4.50, 5 bbls. at \$4.25, 10 bbls. or more at \$4.00 per bbl. Price subject to change. Correspond about your wants in Seed Potatoes.**

You can raise 300 bags of White Mountain Potatoes per acre.

W. H. Hall's yield was 243 bus per acre. Next best variety was 167 bus. Almost 50 per cent gained by planting White Mountain. See below.

I find, after testing the **White Mountain Potato**, both for yield and quality, that it has great merit. They are the talk of this country around, who have seen them. It's a distinct new variety. It's the strongest grower I ever saw, growing away from blight and bugs and makes a crop when others fail.

C. S. C., Huron Co., O.

I send you the following results of tests of four varieties of potatoes, all planted May 28, and all harvested September 27. The yield is given at rate per acre. All had exactly the same treatment: Carman No. 3, 132½ bus.; Mayflower, 127½ bus.; Seneca Beauty, 167 bus.; **White Mountain**, 243 bus.

W. B. HALL, Huron, O.

The **White Mountain Potato** was planted May 3 and dug September 10. It made a very large, vigorous growth, with thick stalk and stocky vines. The tubers were very compact in the hills and all large—no small ones at all. There were no records kept of the yields. I am very much pleased with the potato. There were 31 other varieties, mostly new, planted in the field, and none made a better showing or pleased me better than the **White Mountain**. This was one of the 52 varieties I showed at the Wisconsin and Illinois State Fairs and it attracted much attention.

L. L. O., Rock Co., Wis.

My trial of the **White Mountain Potato** was very satisfactory. The six tubers yielded me four bushels, with very common care and planted in the ordinary way. The quality is very fine. They have merit and are a great acquisition for potato growers.

S. J. A., Lorain Co., O.

# SIR WALTER RALEIGH

## A GRAND POTATO FOR MAIN CROP

This is the Best of Mr. Carman's Productions, and is a  
Seedling of Rural New Yorker  
No. 2

Mr. Carman, for many years Editor of that grand paper, the *Rural New Yorker*, has originated some of the best Potatoes now in cultivation, including Rural N.Y. No. 2, Carman No. 1 and No. 2. The Sir Walter Raleigh closely resembles its parent, but is more uniform in size, yielding practically no unmerchantable tubers. In season it is late or for main crop. Skin white, smooth, with very white flesh. It is noted for its very white and fine grained flesh, equaling the old Snowflake, which was par excellence in this respect. It is a very heavy yielder and will occupy a high position as a market sort wherever its merits are known.

A WONDERFUL POTATO.  
MAIN CROP IN THE U.S.  
EVERY GROWER  
EVERY HAVING  
MUST HAVE IT  
AT ONCE.

# SIR WALTER RALEIGH

THIS  
POTATO  
RECOMMENDS  
ITSELF  
TO ALL

Price, by mail, 1b. 25c. 4 lbs. 75c. By  
freight or express,  $\frac{1}{4}$  bu. 50c. bu. \$1.50. bu.  
\$4.00. 5 bbls. at \$3.75. 10 bbls. or more at \$3.50.  
Correspondence is solicited. Write for special  
prices on large lots when ready to buy.

# MISCELLANEOUS VARIETIES OF POTATOES

CARMAN No. 3

## A Seedling from Seedlings and a Distinct Variety and New Type of Potatoes

One of the best of Mr. Carman's productions. They are remarkable for thrifty growth and enormous yields of handsome, perfect tubers. The skin is white, flesh white and fine-grained. They cook fine. They never grow prongy, but produce beautiful, shapely, bulky potatoes, the pride of every grower, dealer, shipper or cook who handles them. They grow to a large size, but are never hollow-hearted and produce scarcely any small, unmarketable tubers at all. The vines grow to a wonderful size, the stalks being as large around as a man's finger, with long spreading branches. The vines form a dense mat over the ground and serve as a mulch as well as a thick covering of straw. If planted early and the spring is showery, they will soon produce so many vines as to defy later summer droughts. An investment in seed of this potato will pay a bountiful dividend.

Price, by mail, postpaid, lb. 25c, 4 lbs. 75c. By freight or express,  $\frac{1}{4}$  bu. 50c, bu. \$1.50, bbl. \$4.00; in lots of 5 bbls. \$3.75, 10 bbls. or more at \$3.50.

## EARLY OHIO

One of the most popular extra early sorts. Very valuable for market gardeners on account of its earliness; also for fall and early winter use. It does not keep well in the spring. Growth good, size and quality excellent. Very productive, for so early a potato. We sell large quantities of this variety.

Price, lb. 25c, 4 lbs. 75c,  $\frac{1}{4}$  bu. 50c, bu. \$1.50, bbl. \$4.00, 5 bbls. at \$3.75, 10 bbls. or more at \$3.50.

I planted last spring of the O. K. Seeds the following: Eureka Celery, Cauliflower, Tomatoes, Radishes, Cucumbers and some others, and can say that I never planted seeds that germinated better or gave finer crops. They were first class in all respects.

JAMES A. MAYBERRY,  
Saco, Me.

Your O. K. Seeds and Up-to-Date farm paper all seem to make us friends. You are surely a friend in need to us farm folk and I sincerely hope you will be successful in your undertakings for the benefit of the farmers.

MRS. JOHN L. COOK, Cook's Station, Mo.

I have used O. K. Seeds and they are all right. I know when I plant your seeds that they will come

THE FAMOUS

## GREEN MOUNTAIN

Although introduced several years ago this Potato still holds a high place in the esteem of potato growers in many sections. Its handsome form, white skin and large size recommend it everywhere. The flesh is white and fine-grained, cooks dry and mealy and is of superior flavor. For the table it truly has no superior. This is the case when first dug, and it retains its good cooking qualities and keeps sound and perfect until the new crop comes again. Vines grow vigorously, foliage deep green, the tubers grow compactly in the hill, which is completely crowded with fine large potatoes. They ripen in August if planted in April. Productiveness combined as it is, with fine appearance and good table qualities, makes the Green Mountain one of the most valuable late varieties in the country.

This Potato made the largest yield ever grown, at the rate of 1,391 $\frac{1}{2}$  bushels per acre.

Price, lb. 25c, 4 lbs. 75c,  $\frac{1}{4}$  bu. 50c, bu. \$1.50, bbl. \$4.00, 5 bbls. at \$3.75, 10 bbls. at \$3.50 each.

## EARLY ROSE

This was originally the grandest potato ever introduced, but it has lost much of its original vigor and vitality, until now it is grown to a very limited extent.

Price, lb. 25c, 4 lbs. 75c,  $\frac{1}{4}$  bu. 40c, bu. \$1.25, bbl. \$3.25, lots of 5 bbls. or more at \$3.00 per bbl.

## BEAUTY of HEBRON

A popular early variety, largely grown and found on all markets. Excellent table qualities. Slightly earlier than the Early Rose. Beauty of Hebron Potato has been cultivated for many years and has lost some of its original vigor. We advise a change to some of our new sorts.

Same price as Early Rose

I planted last spring of the O. K. Seeds the following: Eureka Celery, Cauliflower, Tomatoes, Radishes, Cucumbers and some others, and can say that I never planted seeds that germinated better or gave finer crops. They were first class in all respects.

JAMES A. MAYBERRY,  
Saco, Me.

up and I can say "this will be a stand," and then go on with some other work. I wish you success with your seeds and your Up-to-Date paper.

O. H. TATE, Springville, La.

I have used O. K. Seeds several years, and also have used others, but yours are the best. Your Late Flat Dutch Cabbage is my favorite. I have read Up-to-Date Farming and it is fine. I wish you success.

P. H. SHEELY, Peaks, S. C.

I have been planting your O. K. Seeds about 16 years and always found them "O. K." in all respects. I obtained Green Mountain Potatoes of you four years ago and they are the best I ever grew. I like Up-to-Date Farming very much. All who want to be up-to-date should read it.

WILLIS M. GUICE, Hendersonville, N.C.

My Farmers' Interest Corn is yielding 90 bushels per acre, after being through the great cyclone of June 25th.

REV. J. LEWIS WAMPLEY,

Wilkinson, Ind.

I have been a customer of your house 12 years and have not got one article that was not satisfactory in all respects. We bought all of our garden seeds of you last spring and they were all O. K. Hoping you will have success.

J. E. THOMPSON,

Clark Center, Ill.

I think Logan's Giant Seedling Tomato is the finest in the world.

MRS. H. T. CLAGGETT,

Central City, Ky.

# Department of Manufactures

## EVERITT'S MAN-WEIGHT FARM AND GARDEN TOOLS

PATENTED IN THE UNITED STATES, GREAT BRITAIN, FRANCE, GERMANY, AUSTRIA  
AND BELGIUM

Thoroughly Reconstructed and Improved in 1902

An earnest desire to better the condition of the many cultivators of the soil and to make slow, laborious, disagreeable labor rapid, easy and pleasant, coupled with many hours of thought, labor and experiments, has resulted in the production of the MAN-WEIGHT MACHINES. I ask the careful consideration of every person who cultivates the ground to the contents of the next five pages.

J. A. EVERITT, Inventor.

**These New Machines** *Abolish much of the Drudgery of Cultivating the Soil, and make heretofore Slow, Hard, Disagreeable Labor Rapid, Easy and Pleasant.*

They comprise far more combinations than any other line of hand tools made, embracing Plows, Hoes, Cultivators, Harrows, Drills, etc., single and double wheel. The owner of a Man-Weight Combination has tools for almost every possible work that comes up in planting seeds and cultivating crops.

**As Improved They are the Best Hand Tools of the World**

These great machines were invented by J. A. Everitt in 1891, and greatly improved since. The great advantage of this invention can be partly understood by studying the accompanying illustrations, but no person can fully realize their grand advantages until he uses the machines. They are a great boon to all cultivators of the soil and must be classed with the great inventions of the age, yet they are so simple that the natural question with every one is, "Why did I not think of that?" And so nicely do they fill a want existing with thousands of

gardeners, nurserymen, seedsman, florists and farmers, that after the first trial they invariably conclude to "never do without them." The Man-Weight Cultivators are worth their weight in silver, if not in gold, to any one who cultivates the soil. All who have used the machines unanimous y endorse them in the strongest language they know how to use. We have heard sensible, shrewd gardeners remark, "I would not sell mine for \$25;" "\$100 would not tempt me to do without it one season," etc.

They are the only machines we know of that suggest sufficient merit and practical utility at first sight to sell without a trial. Gardeners at once acknowledge that it is just what they want

This illustration is of an old style rigid machine. Notice the strip of uncultivated ground. The work is only half done; the balance must be done with the hoe. See the view opposite. The work is complete. No hoeing after the Man-Weight machines.

Showing the Man-Weight Cultivator passing an obstruction. This obstruction may be a stone, stump, or a plant that you want to save. This easy trick is quite in contrast with lifting the whole machine, as is necessary in the old style hand-push machines. This feature also allows extra pressure to be put on the individual tools independent of each other.

and many remarked that "if all gardeners knew of these machines they could not be made fast enough to supply the demand." A trial by any person will demonstrate the wonderful utility of these machines and the person possessing them will make it impossible for his neighbors to compete with him in raising crops.

There are several features of the Man-Weight Tools which are novel and make a tool vastly superior to any other hand power or horse machine. We mention the push bar. In operation the body is inclined forward, thus taking part of the weight of the body off the ground and directing it against the machine. In this way the machine is propelled by the weight of the body without any muscular exertion whatever, until you pass a certain point, when muscular effort begins. To push this machine across the field, in ordinary work, is no harder than to walk across empty handed. Your weight does the work. Without this machine all your weight is wasted on the ground. By means of the push bar we propel and guide the machine, hence the drag bars can be hinged and are adjustable in all directions. The tools attached to the drag bars perform the work just as a weeder would in your hands, working all around the plants. It is the only cultivator made that does complete work at one operation. No after-hoeing is required. (See illustrations on this page). As is evident, the power obtained, the amount of work that can be done and the quality of the work, are far in excess of any other hand tool, nearly equaling horse power in quantity, while the quality of the work is far superior to horse power work.

## Good Points of Everitt's Man-Weight Machines Not Possessed by any Other

1. Man power is applied from the breast or other parts of the body. No inconvenience is suffered.
2. The power is applied by a natural inclination or lean of the body, as for rest against any object.
3. Hand-cultivating work is done almost without work.
4. Big work is done with ease and comfort to the operator.
5. At the same time he can do more work in a garden or nursery, etc., without a horse, than with one.
6. It does better work than a horse cultivator or any other hand cultivator.
7. Both hands are free to guide the tools around the plants.
8. Compared with others, man-power is multiplied many times.
9. Oftentimes double the amount can be raised on a given piece of ground with this machine than with a horse machine.
10. The expense of keeping a horse can often be saved.
11. Plants can be cultivated oftener and hence matured earlier, with a greater yield, with this machine than with any other. In this way the machine can be made to pay for itself several times each year.
12. A man-weight combined machine affords more separate tools and will do a greater variety of work than any other machine on the market.
13. You can better afford to pay \$25.00 for an Up-to-Date Man-Weight Combination than use any of the old style machines, if you could get them for nothing. Remember this in making a selection.
14. If time is money and ease of doing work an object, you had better buy an improved Man-Weight Combination at double our price than take an old style hand-push machine as a gift.

HORACE, IND., April 22, 1903.

J. A. Everitt (Seedsman), Indianapolis, Ind.

Dear Sir—Enclosed find \$12.00 for one Man-Weight Combined Machine. We have used these Cultivators and Drills for some time, and this year sold one to Griffith Gartin, of Hartford City, Ind. Our principal use for them is in growing stock beets, and this is what Mr. Gartin wishes to do.

Yours truly,

J. G. ROBBINS.

NEW YORK, May 1, 1903.

J. A. Everitt (Seedsman), Indianapolis, Ind.:

Your Man-Weight Cultivator received and put to good use. Find that it is the biggest little machine we have ever used or seen. Now send us, with all possible dispatch, 200 lbs. Fertó-Insecto, check enclosed; or, better still, tell us where we can get it here. Mark goods: A. A. Sanders, 507 East Seventh St., Brooklyn, N. Y., via L. I. R. R., Parkville Station." Yours truly,

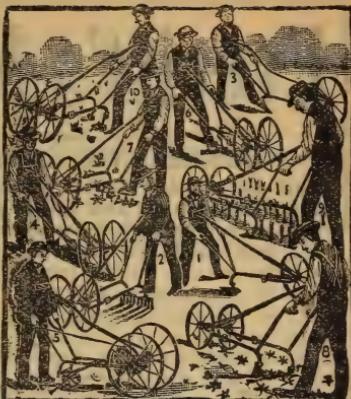

A. A. SANDERS.

SMITHTON, PA., } April 16, 1903.

J. A. Everitt (Seedsman), Indianapolis, Ind.:

Dear Sir—Enclosed find 40 cents for list of plants herewith. I like the Man-Weight Garden Tool purchased of you last season, also the Broadcast Seeder. They are O. K. I am sure there is none better made.

Yours truly, J. FULMER.

Showing only a part of the many styles of machines that can be made from one Man-Weight. You buy one Man-Weight Combination and you have all the cultivators, plows and drills you need.

OAKWOOD, ILL., January, 1903.

Mr. J. A. Everitt (Seedsman), Indianapolis, Ind.:  
Dear Sir—Your Man-Weight is a great improvement. I find that it largely increases one's capacity. It is as great a help as the improved horse cultivators are over the double shovel. A 120-lb. man can do more work with a Man-Weight than six big men with hoes, and do it better.

S. LEE COX.

CHERRYVALE, KAN., } January 20, 1903.

Mr. J. A. Everitt, Indianapolis, Ind.:

Dear Sir—I want one of your Man-Weight Cultivators, as they can't be beat. My mother-in-law (Mrs. Blus) got one last spring, and I tell you that she likes it. She was about to place her order for another kind, but I got her to send to you for one, and she told me she was glad of it. W. B. CARPENTER.

HARRISVILLE, Mo., }

June 14, 1903.

Mr. J. A. Everitt, Indianapolis, Ind.:

Dear Sir—The Man-Weight Cultivator came today. We tried it long with a \_\_\_\_\_. All present thought that the Man-Weight was the best. The soil was very heavy, but the machine did excellent work. We tried it in the cabbage, tomatoes, beets, onions and corn. There is one thing that the boys like about the Man-Weight: they say that when they are using it they are strictly up-to-date. Respectfully yours,

WILL G. SPEEDLOVE.

## UP-TO-DATE FARMERS AND GARDENERS

Are increasing the production of their lands and decreasing their expenses by using Everitt's Man-Weight farm and garden tools. These machines do work very rapidly and it is no task at all to take the cultivator into the field and quickly pass between or astride of the rows, loosening up the ground and killing all young weeds. The possessor of a Man-Weight Machine will do this because the work is rapid, easy and pleasant, while if he was to depend on a hand-push machine or hoes it would oftentimes be neglected.

# Everitt's Man-Weight

Combined Single and  
Double Wheel Plow,  
Hoe, Cultivator, Rake,  
Etc. ☺ ☺ ☺ ☺ ☺

**WHO NEEDS THIS COMBINATION?**—Farmers, Gardeners, Nurserymen, Small Fruit Growers, Tobacco Growers, Onion Growers, Small Farmers and Everybody who Plants Seeds and Cultivates Plants. : : : : : : : :

This machine is intended for all kinds of work on the farm where for any reason a horse machine cannot be used, or where ground is limited and intensive cultivation is practiced. It will work astride of the row and cultivate, hoe or plow both sides of the row at once. For this purpose it is a wonderful improvement over all other machines constructed for this purpose. All other man power tools heretofore constructed did not admit of adjustability as required as the work progressed, but if the rows were crooked or the plants scattering it would destroy them. Also with them you could do only partial work, requiring after-hoeing to cut out the weeds between the hills in the row. Our machine admits of perfect adjustability; every inch of surface can be stirred between the rows and between the plants in the rows. Every cultivator of the soil will appreciate this. It can also be used with one wheel and one tool for marking out. It is capable of doing almost every variety of work imaginable, and will save more time and hard work on the farm than almost any other tool. Two machines can be shipped by freight for the same cost as one. With each machine we send five sets of tools, and others can be obtained as extras. See page 144.

**Price, \$8.00.** We always advise this machine.

**Single Wheel Machine, which does not admit of the many combinations, \$6.00.**

## Preventing Evaporation

In nearly every year there is enough rainfall to produce good crops if we can prevent evaporation of the moisture from the soil. The best way to do this is to maintain a dust mulch by going over the ground with a Man-Weight Cultivator after each rain. Don't wait for the ground to get dry, but as

soon as the dirt cleans from the cultivator tools start the machine and prevent the formation of any crust. As soon as the crust forms the ground throws off moisture very rapidly. This is the underlying principle of the Campbell system of soil culture for the arid regions, and where, by the system, good crops are raised on what formerly was considered a desert.

**The Man-Weight Machines** are the only ones available for the gardener, trucker and others where a horse machine is not available.

**A Combined Man-Weight Drill, Hoe, Cultivator, Harrow, Plow, etc., single and double wheel, with all combinations, is the most valuable machine any farmer or gardener can own and will be almost his constant companion from spring until fall. It combines many machines in one.** : : : : : : : :

The Man-Weight has come and I think it a grand garden tool. It beats anything I ever saw.

March 11, 1901. O. W. HOWELL, New Haven, O.

Please send me your catalogue of Man-Weight garden tools. I bought one some time ago and want another.

Aug. 3, 1900. B. F. FEIT, Jr. Spencer, Iowa.

I am highly pleased with the Man-Weight Cultivator. Please send me price of a seed attachment.

Jan. 15, 1901. O. E. SNIDER, Lexington, Va.

**The person who buys a Man-Weight Combination gets many machines in one, and more capacity than can be obtained in several distinct machines of other makes. It is multum in parvo.**

I took the Man-Weight in my garden and cultivated two acres of peas with it. It did all that you claimed. I am much pleased with it.

E. W. HILDEBRAND, Southport, Ind.

July 19, 1900.

I received Man-Weight. Have tried it and think it is the whole thing. I think I have induced J. S. Palmer to send for one.

J. F. KENDALL, Hillsdale, Ill.

May 5, 1900.

The Man-Weight is indeed a very excellent and practical machine, saves much labor, doing the work of planting and cultivating with ease and rapidity.

J. B. LEEDOM, Albion, Neb.

June 19, 1900.

Some nine years ago I obtained of you two Man-Weight Cultivators. They gave entire satisfaction, but are now worn out. Therefore send us one new one with drill.

SKIOLD SIMESON, Salta, Argentine Republic.

**This is a very great invention. It uses the combined weight and strength of the body and relieves the hand, which can guide the tools like a hoe.**

# Everitt's Man-Weight Drill

A Drill that will plant seeds just as desired is a most important machine for every farmer, gardener and trucker. Our Drill is capable of the greatest variety of work, from sowing in a continuous row to planting in hills of 3, 6, 12, 24 and 48 inches apart. Our drill for 1903 has been greatly improved over the former patterns; in fact entirely reconstructed. As now constructed, with reasonable care, it will last many years and be a constant source of profit and satisfaction to the user. With the Man-Weight drill a great saving of seed is effected over hand planting, besides putting the seed in straight rows so the plants may be the most economically cultivated. Where the plants are wanted to stand at regular intervals apart, the Man-Weight Drill puts the seed at exact spot. Small farmers can plant their corn with the machine, thus saving them the expense of buying a corn drill. To change from drilling to hillings any distance apart requires but a moment. The machine is thrown out of gear and the flow of seed stopped by simply pulling a wire. The seed is covered, the soil firmed over it and the next row marked all at one operation. The wheels on all our Drills and Cultivators are 18 inches high, placed 12 inches apart, insuring a steady movement, even over ground moderately smooth. The rims of the wheels are broad and can be moved easily over very sandy ground. The Man-Weight Drill is the best and when the propelling features are considered it is easily far ahead of all competing machines.

**Price of Drill, no cultivating attachments, \$10.00. Combined Cultivator and Drill, \$12.00. A grand combination.**

The person who does not want to buy the entire combination can buy any part and get the balance in the future. To illustrate: \$6.00 buys a single wheel machine; for \$2.00 more he can make it a combined single and double. For \$4.00 more he can procure the Drill attachment. If you have a drill complete, for \$2.00 you can get the cultivating tools to make a Combined Cultivator and Drill. The single wheel machine is not advised alone, as it is suited for only a few things and costs nearly as much as a combined machine.

I have been using your Man-Weight machine with great success and could not do without it. I send you names of parties interested in it. H. M. SANER, Schaumburg, Ill.

Man-Weight Drill.

May 28, 1900.

Man-Weight is a daisy.  
July 20, 1900.

M. S. McCURDY,  
Stansberry, Mo.

I am pleased with the seeds and most particularly with the Man-Weight. I think it is best of the kind that I ever saw.

J. Z. SMITH, Hadley, Ky.

May 14, 1900.  
Last season I bought a Man-Weight and it is a daisy. I want the agency for it here.

A. O. HECK, Montana Mines, W. Va.

I received seeds and cultivator. I am very much pleased with the Man-Weight. It beats all the hand push machines and I would not trade it for a dozen of them.

FRANK L. BROWN, Perryville, Mo.

March 31, 1900.

J. A. EVERITT. Dear Sir: I have been trying to locate you for two years, so I could get one of your Man-Weight machines. I was fortunate enough to get your address a few days ago from a party who is using one. I saw one of your machines over 3 years ago and at once recognized its superior merit over anything else I ever saw. I almost despaired of getting your address and would soon have bought a——, but now I am glad I don't need to, as I would never have been satisfied with it after seeing your invention. Please send catalogue.

DR. HAMILTON, Ocheydam, Ia.

*The power to operate the Man-Weight machine up to a certain point is the weight of the body, which is lost on the ground if not used through the machine. It is applied without muscular effort.*

Am much pleased with the Man-Weight. I can do more with it in an hour than a good man can in a day and I am 76 years old.

J. W. HAMMOND, Ottumwa, Iowa.

I never in my life had my hands on any tool that did better work than the Man-weight. Several men were present and first said "no good," but when it worked, all said: "good."

C. F. MASON, Ingham, Ky.

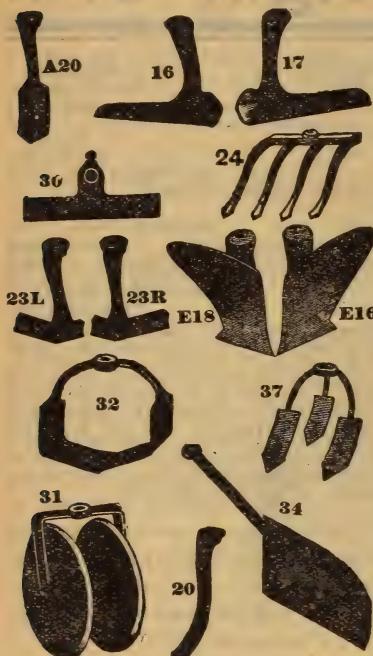

*Other extra attachments can be made and used on the Man-Weight machines. In this respect its possibilities are almost unlimited, and this feature should interest people engaged in the production of special crops.*

With the Man-Weight Cultivator, cultivating and hoeing can be done with one operation much better and quicker than with the horse cultivation and hand hoe. Gardeners and others who have been using the old style hand tools, which at best only do partial work, will not be slow to appreciate the advantages of this machine, as its perfect adjustability allows it to do complete work at at one operation.—*Prairie Farmer.*

**If time is money or ease of doing your work an object, you had better buy a MAN-WEIGHT Combination at double our price rather than to use the old style Combinations as a gift. The former means less work, less hand hire, larger crops, larger profits. The latter means hard work, more work, more hand hire, less profit. A hint to the wise is sufficient.**

## ATTACHMENTS FOR EVERITT'S

# MAN-WEIGHT FARM and GARDEN TOOLS

We furnish with each combined machine two each Nos. A20 and 24, one each Nos. 16, 17, E16, E18, 23L and 23R. With single wheel machine one each Nos. A20, 17, E18, 23L and 24. Besides the attachments regularly furnished with the machines, we can furnish a number of extra attachments, as illustrated. The value of some of these attachments every farmer or gardener who has used them on large horse cultivators will understand. Some of our customers have had special attachments made by their blacksmiths for special work.

All machines are boxed for shipment and any one or combination weighs less than 100 pounds. In fact, two weigh about 150 pounds, and it will make a saving of freight if two are shipped at a time.

### PRICE LIST OF ATTACHMENTS.

**Dealers and Agents Wanted to Sell the Man-Weight Machines in Every Locality.**

## YOU HAVE WANTED IT A THOUSAND TIMES THE EUREKA

### Kitchen Garden and Hot Bed Seed Drill

For those planters who have only a small garden and for large gardeners who have hot beds or plant seeds in small quantities.

It will sow and cover Beets, Cabbage, Carrots, Celery, Lettuce, Onions, Radishes, Spinach, Turnips and all such seeds with the greatest regularity. The quality of work equals that done with the costly machines, and is infinitely better and faster than hand work. It opens the furrow, drops the seed and covers.

#### HAVE YOU A KITCHEN GARDEN

Don't try to do without this little planter another season. Your garden will smile approbation all through the season if you sow seed with the Eureka Drill.

#### HAVE YOU A HOT BED

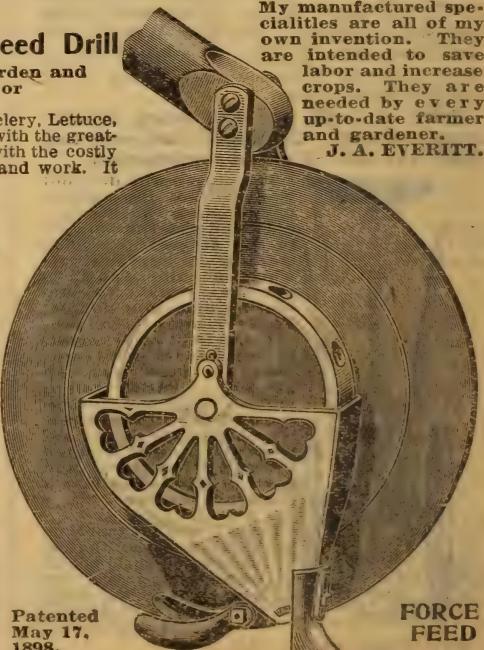

This drill you must have. It is the **only** machine suited to sow in a hot bed. Sows up close to the fence in straight rows. Sows the smallest packet of seeds as well as a larger bulk. This drill is not a toy, but a strong, practical machine that will last many years. Don't buy a similar machine that has the opening plow in front of the machine. You cannot get near the sides of a hot bed nor close up to the fence. Neither does it cover the seed. It will be an aggravation rather than a labor-saving machine, as we offer.

By using this Drill you save seed, you save time, you stand in an upright position, the work is easy, you get a better stand, you get better plants.

PRICE is only \$1.00. Delivered by Express, 50 cents extra. AGENTS WANTED.

My manufactured specialties are all of my own invention. They are intended to save labor and increase crops. They are needed by every up-to-date farmer and gardener.

J. A. EVERITT.

PHILADELPHIA, PA., Dec. 13, 1902.

J. A. EVERITT, Indianapolis, Ind.

Dear Sir—We received the "Eureka" Garden Seeder and feel sure that it is the only thing of its kind on the market to give satisfaction.

Yours very truly,

(Signed) HENRY A. DREER, Seedsman.

# POULTRY SUPPLIES

All Prices in this Department are by Express or Freight Unless Otherwise Specified

## FEEDS

### HEALTH FOOD FOR LITTLE CHICKS

Specially prepared for little chicks. This should be the only food used for first 10 or 12 days. 1 lb. 10c., by mail, 25c; 5 lb. package 40c, 15 lb. package \$1.10, 50 lbs., bulk, \$3.50.

### CHAMBERLAIN'S PERFECT HEN AND CHICK FEED

At the price offered is the cheapest feed in the world, and will give your chicks quick growth, and make them feather out to stand the cold weather. Will furnish your little chicks at all seasons of the year with just the same kind of feed they would pick up on a large farm during the spring and summer.

Prices, 100 lb. sack chick feed \$2.75, 50 lb. sack chick feed \$1.50, 35 lb. sack chick feed \$1.15.

### SCRATCHING FEED

**Best No. 1.** containing field seeds, millet, wheat, oats, barley, buckwheat and other grains. Just the thing for scattering in litter to make your hens earn "their daily bread" and hustle for a living. 5 lbs. 10c., 100 lbs. \$1.50.

**SCRATCHING No. 2.** Not quite as clean as No. 1, but far above the average of their class. 5 lbs. 10c., 100 lbs. \$1.25.

### MILLET

**Best Imported African Seed** Large size bright colored grain; scattered in fine litter it "provides" more exercise than any other grain food, making the "wee wee babies" get right down to hard work to get their "daily bread." Per lb. 5c, 6 lbs. 25c, 50 lbs. \$1.25, 100 lbs. \$2.00.

**Imported Golden Millet** Per lb. 5c, 6 lbs. 25c, 50 lbs. \$1.50, 100 lbs. \$2.50.

### BUCKWHEAT

Per lb. 5c, 3 lbs. 10c., 100 lbs. \$2.00.

### SUNFLOWER SEED

**Mammoth Russian** Everyone who keeps poultry should feed Sunflower seed. Fed to moulting fowls it produces a clear smooth, glossy plumage, materially improving show specimens. Per lb. 5c, 6 lbs. 25c, 50 lbs. \$2.00, 100 lbs. \$4.00.

### RAPE

An excellent seed for use in litter; little chicks relish it. Feed a little at a time, about 5 or 6 times a day, so as to keep them busy and out of mischief. Per lb. 10c., 3 lbs. 25c, 7 lbs. 50c.

### POULTRY MEAL

### GROUND BONE (Granulated)

Makes bone and muscle. Good for young and old chicks; should be kept constantly before them. 5 lbs. 25c, 25 lbs. 75c, 50 lbs. \$1.25, 100 lbs. \$2.50.

### BONE MEAL

Good for small chicks and laying hens, to be mixed with soft feed once a day. 5 lbs. 25c, 25 lbs. 75c, 50 lbs. \$1.25, 100 lbs. \$2.50.

### CHOICE GROUND BEEF SCRAPS

Our ground beef scraps are specially prepared for us from perfectly healthy meat. Feed three times a week, at the rate of about a handful to every three birds, in the morning meal of hot food. On the days when the scraps are used reduce grain feed. During warm weather scraps should be fed but once a week. 5 lbs. 25c, 10 lbs. 40c, 50 lbs. \$1.50, 100 lbs. \$2.50. Special price by the ton.

### LINSEED MEAL

Ground especially for the poultry trade, and particularly useful when fattening stock or preparing birds for showroom, and while moulting. 1 lb. Oil Cake Meal 5c, 6 lbs. 25c, 50 lbs. 90c, 100 lbs. \$1.75.

### MEAT MEAL

The grade we offer to the trade is the very best of the kind sold. Per lb. 5c, 6 lbs. 25c, 50 lbs. bag \$1.25 100 lbs. bag \$2.25.

### CLOVER MEAL

Is well dried and sweet cured clover hay ground very fine. Is one of the most important winter feeds for eggs, and besides furnishing the necessary green food when steamed or mixed with their mash, it contains twenty times as much lime for shell-making purposes as corn. Pour boiling water over it, season with a little salt and pepper, and it becomes fit for any and all kinds of fowls, especially during the winter when the birds are unable to obtain a substitute for the green grass and vegetables obtainable in summer on the open range. Per lb. 5c, 6 lbs. 25c, 50 lbs. sacks \$1.25.

### GROUND CHARCOAL

Excellent for young and old chicks; should be kept constantly in reach of small chicks. Prevents diarrhea, if fed once or twice a week. Per lb. 10c., 5 lbs. 35c, 10 lbs. 60c, 25 lbs. \$1.25, 100 lbs. \$4.00.

See description of New Outdoor Brooder. Include one in your order. The chicks you will save in one year will more than pay for it.

### HULLED OATS

Hulled Oats are excellent for feeding young poultry, especially ducks and young turkeys. They are far superior to wheat, corn, rye and other grains, being easily assimilated and contain more bone and muscle-making properties than any other grains. There is no one small whole grain that is equal for young chicks from ten days to six weeks old, and for growing broilers it is the best feed known. It is also excellent for laying hens and really pays to buy it for that purpose. Price, per lb. 5c, 10 lbs. 45c, 25 lbs. \$1.00, 100 lbs. \$3.75.

We give Fifteen Eggs with each setting. See page 149.

# POULTRY SUPPLIES—Continued

## Harding's Baby Chick Food

A healthy chick makes a healthy and profitable fowl. Start the babies right and they will pay you for your care. In using Harding's Unexcelled Baby Chick Food be sure and not over-feed the little ones.

It is better to give the first feeding in a trough or dish. Just enough to satisfy the chicks. Then scatter in the litter of the feeding pen a sufficient amount to keep the chicks exercising for their feed. Use fresh, pure water. Keep the little ones warm, and if fed Harding's Baby Chick Food the yield will be large.

Put up in 5 lb. cartons, 40 cents.  
Put up in 10 lb. bags, 60 cents.  
Put up in 50 lb. bags, \$1.75.  
Put up in 100 lb. bags, \$3.00.

## CONDITION FEEDS

**PRATT'S.** A guaranteed egg producer. Purely vegetable. Highly concentrated. Absolutely pure. Directions for feeding in every package. 25 oz. pkg. 25c, 5 lb. pkg. 60c, 12 lb. pkg. \$1.25, 25 lb. pkg. \$2.50.

## RUST'S EGG PRODUCER

The one perfect egg food on the market, containing all the elements in just the right proportions. It imparts vitality so that the eggs hatch and produce strong, lively chicks. It makes a hen healthy and keeps her at work. Two cents a month is all it

costs. Full directions on each box. 1 lb. box 25c, 2½ lb. box 50c, 6 lb. box \$1.00, 10 lb. box \$1.50, 25 lb. box \$3.50.

## PRUSSIAN POULTRY FOOD

The cheapest food on the market. A 25-cent package makes 750 feeds. It is compounded from the formula of a distinguished German scientist, contains nothing injurious, and has stood the test of years. It is a cleanser and renovator, and has valuable tonic properties. Give it a trial. Sold in 25c and 50c packages, 12½ lb. pails \$1.50, 25 lb. pails \$2.50.

## SHELLS AND GRITS

### Prepared Oyster Shell

Manufactured from shells in a pure condition. The lime contained in the shells assists in the formation of the egg, and contributes to the general health of the fowls. A handful to five fowls daily will be found valuable at all seasons of the year. Coarse or fine. 5 lbs. 10c., 25 lbs. 30c., 50 lbs. 40c., 100 lbs. 65c., 500 lbs. \$2.50. Special price by the ton.

### MICA CRYSTAL

To aid digestion it is necessary to feed some gritty material. Mica Crystal supplies this want better than any other article known. We supply this in two grades, fine for small chicks and birds, coarse for large fowls. 5 lbs. 10c., 10 lbs. 15c., 25 lbs. 25c., 50 lbs. 45c., 100 lbs. 75c. Special price by the ton.

## GRANULATED MILK

### ADVANTAGES OF GRANULATED MILK

It has the greatest nutritive value, 59 per cent., beside 23 per cent. lime and other mineral matter, excellent for bone-building, especially in chicks.

It is pure and unadulterated.

It will keep sweet and wholesome any length of time in any climate, in a dry place.

It will easily make a perfectly balanced ration, the goal of the skillful feeder.

It will prevent egg eating and feather pulling, two vicious evils.

It will make solid, firm whites, not thin and watery, and will save oyster shell.

It will increase the fertility of the eggs and grow strong chicks.

It will not taint the eggs.

It will hasten the molt.

It will promote the growth of broilers and young stock.

It will grow feathers quickly and, especially when fed dry, lessen the tendency to bowel trouble in chicks, being slightly constipating.

It will make healthy, contented, vigorous stock.

IT WILL MAKE WINTER EGGS.

It will make better layers than any other animal food.

### DIRECTIONS FOR FEEDING.

To make the day's feed a balanced ration for the highest egg production, let the whole grain, with as much variety as possible, be fed in a deep litter of straw or chaff in the morning and form one-third of the day's feed, exclusive of the green stuff. The mash mixture, when dry, should form the other two-thirds, composed as follows: Mix together 100 lbs. 45 lbs. whole oats.  
20 lbs. corn meal.  
15 lbs. wheat bran, middlings or clover meal.  
20 lbs. Granulated Milk.  
Wet it with hot water and feed at night.

#### Price:

10 lb.-bag.....	\$0.60
25 lb.-bag.....	1.25
50 lb.-bag.....	2.00
100 lb.-bag .....	3.50

Success depends largely on pure, fresh water. Save your chicks and increase your profits.

## The “Sanitary” Poultry Drinking Fountain

### Is the Only Perfect One Made

Excels in nine principal points:

1. Can be thoroughly and easily cleaned.
2. Can be cleaned and filled in a minute.
3. Will go into any brooder.
4. No danger from drowning.
5. Does not originate or spread disease.
6. Is not injured by freezing solid.
7. Can remove ice in two minutes.
8. Hangs upon a nail out of the dirt.
9. Cheapest, neatest and most durable.

Made of heavy galvanized iron, perfect in workmanship, it is the best and most convenient Fountain on the market.

A one-gallon Fountain will supply twenty fowls.

PRICE—1 gallon 50c. 1 gallon Fountain by mail, 40c extra.

### DO YOU NEED A BONE CUTTER ?

Try the Humphrey. Ready when you are. Cuts bone and vegetables equally well. Think it over and see offer elsewhere.

# POULTRY SUPPLIES—Continued

## ROUP CURES

### Harding's Successful Roup Cure

Is the thing to use for that dire disease. There are other cures of course, but as its name implies, it is "successful" in every instance. A small dose of the medicine placed in a gallon of water immediately dissolves, and as the fowl must drink, it takes its own medicine. A guaranteed cure. A 50 cent box makes 35 gallons of medicine, and a \$1.00 box makes fully 100 gallons of the cure. **Price 50c, large size \$1.00.**

**Conkey's Roup Cure** An absolute cure for roup. Easily administered; just place it in the water which the fowls drink. Sent by mail prepaid. **Small 50c, large \$1.00.**

**Rust's Havens' Roup Pills** For roup, catarrh, colds, pigeon diseases, etc. They do cure. Mailed on receipt of price. **Box of 48 pills 25c, box of 250 pills \$1.00.**

## LICE POWDER

### Lambert's Death to Lice

Standard Universal Remedy for Lice on setting hens, laying or exhibition stock. It works quickly, without injury to anything but vermin. It is also valuable for lice on horses, cattle or plants, ticks on sheep, fleas on dogs, moths in carpets or furs, etc. **Price 5-oz. box 10c, 15-oz. box 25c, 48-oz. pkg. 50c, 100-oz. pkg. \$1.00.**

**Prussian Lice Killer** For those who prefer a powder to a liquid in treating their stock for lice, fleas and other parasites, we recommend the Prussian Lice Powder. It is a perfect insecticide, and is dangerous only to insects and parasites and harmless to animals. It is very easily applied by means of the perforated lid of the can. **Price 25c and 50c per can.**

**Lice Killer Liquid** Leak's Lice Exterminator is a wholesale parasite, saves labor. No dipping, no dusting, no greasing. Does not injure the fowls or mar the plumage. Quickly applied and absolutely certain to kill every species of parasite that prey upon poultry. Full directions with each package.

1 qt. 35c, 1/2 gal. 60c, 1 gal. \$1.00, 5 gal. \$4.00.

## SPECIALTIES

### Philadelphia Poultry Marker

**Do you keep a record of Chickens?** There is no better or quicker way than by this marker, as over 200 different marks can be made; by punching web between the toes hundreds of private marks can be made; not only to keep records, but by your private marks you can secure yourself from the chicken thief. They are well made, with steel spring and cutter, nicely nickel plated. **Sent postpaid on receipt of price, 25c each.**

**Reliable Poultry Punch** The best poultry punch on the market. Self-opening, absolutely accurate, well finished and extremely cheap. No poultry man can afford to be without one. **Price, postpaid, 25c.**

**Thermometers** There is no point in the handling of an incubator or brooder outfit that is more important than the maintenance of the correct degree of heat. This can only be done when an accurate thermometer is used. Those handled by us are thoroughly seasoned and tested and can be relied upon.

**Harding's Antiseptic Lice Ointment** For head-lice on children, chickens or turkeys. Recommended for scaly legs, frosted combs, etc.

**For Chickens**—Anoint each one with a very small amount on top of its head, rubbing it in well. This is best done at night by removing the brood into a pail or peck measure covered with a bag or cloth. Treat each one separately and return them to the hen or their brooder. Its good effects will be noticed the next day.

**For Scaly Shanks on Fowls**—Warm the mixture, if necessary, and anoint so as to cover the entire surface where affected.

**For Children**—Use as you would oil, yet sparingly. A very little will suffice. **1-oz. box 10c, 3-oz. box 25c. Postpaid.**

# SPECIALTIES

## PILLING CAPONIZING INSTRUMENTS

Price, complete, with full instructions, in paper box, \$2.50. In velvet lined case, as per engraving, \$2.75. We will send with each set of Pilling Caponizing Instruments a booklet, entitled: "Complete Guide for Caponizing," fully illustrated. Either set will be sent postpaid at the price named.

## EGG TESTER

Prairie State.

Fits any ordinary house lamp and will show you just how the eggs are progressing. For the ordinary use for the beginner, this tester meets all the requirements. By Mail 35c.

## SELF FEED BOX

These boxes are a necessity to all who keep poultry. They save grit, shells and feed. They are automatic feeders, the food working down into the feeding space as fast as the fowls consume it. Fowl can positively not scratch the feed out, thus wasting the material. It has three spaces. Hangs on a nail. Holds 4 quarts. Each 50c, per dozen \$5.50.

## PRAIRIE STATE FOUNTAIN

The best, most serviceable, handiest and easiest cleaned. Can not be broken. Made of heavy galvanized iron.

## Bone Cutter

Poultry Raisers want eggs and want them in winter, when eggs are high. They also want fertile eggs for hatching. Green bone and raw meat produce both quantity and quality. The necessity for cut green bone in profitable poultry keeping is attested by all of America's leading poultrymen.

**The Humphrey Green Bone and Vegetable Cutter** *The Open Hopper Type.* Sold on a positive guarantee to cut more bone in less time and with less labor than any other bone cutter made. The Humphrey Green Bone and Vegetable Cutter is offered with the assurance that it is the best machine made today. We recommend it only because we feel certain that it will give perfect satisfaction. It runs so easily, works so rapidly, makes food of such fine quality, that it easily ranks first of all bone cutters. Full descriptive circular sent on application. Fully guaranteed.

# PRAIRIE STATE INCUBATORS AND BROODERS

285 FIRST PREMIUMS

285 FIRST PREMIUMS

Each Machine is Supplied with Complete Directions for Operating.

The **PRAIRIE STATE** is a hot air incubator, built of first-class material, neatly finished and thoroughly tested before leaving the factory. The improvements in this machine have so simplified hatching that a child can operate it without difficulty. The regulator is highly sensitive metal, extending above and beneath the egg tray. It can be set to any desired degree of temperature, and when so set will hold the temperature within the egg chamber without any variation, regardless of any variation of temperature outside the Incubator.

## Prairie State Baby, No. 1

This small Incubator will hatch eggs just as well as any other of the Prairie State. Dimensions,  $14\frac{1}{2} \times 24$  in. Capacity 50 eggs. One blank tray, one thermometer, no nursery. Weight 32 pounds; crated 45 pounds. **Price, \$6.00.**

## Prairie State No. 0

**Special** Dimensions,  $15\frac{1}{2} \times 26\frac{1}{2}$  in. Capacity 60 to 65 eggs. One blank tray and two turn-over trays, one thermometer, nursery under the tray. Wt. 70 pounds; crated, 80 lbs. **Price, \$12.00.**

## Prairie State No. 1

**Special** Dimensions,  $23 \times 34\frac{1}{2}$  in. Capacity 100 eggs. One blank and two turn-over trays, one thermometer, nursery under the trays.

Wt. 110 pounds; crated, 135 pounds. **Price, \$16.00.**

## Prairie State No. 2

**Special** Dimensions,  $28\frac{1}{2} \times 50$  in. Capacity 220 to 240 eggs.

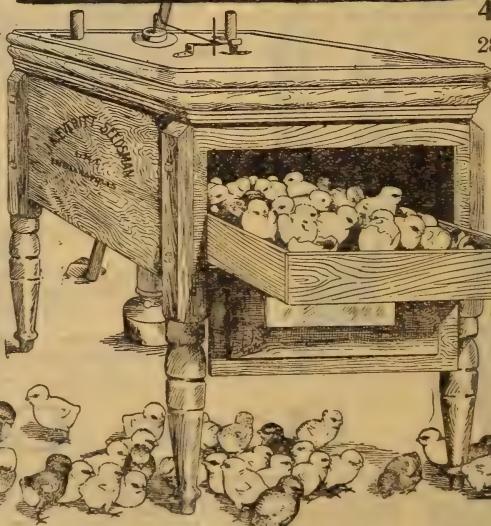

Two blank trays with three turn-over trays, two thermometers, nursery under the trays. Wt. 169 pounds; crated 200 pounds. **Price, \$24.00.**

Capacity 288 duck eggs,

336 hen eggs, three turn-over trays and one extra tray, three thermometers, nursery under trays. Weight 289 pounds; crated, 425 pounds. **Price, \$40.00.**

# PRAIRIE STATE BROODERS

## INDOOR BROODERS

**Style D, Hot Air, No. 1.** Dimensions, 25 $\frac{3}{4}$  x 36 inches. Capacity, 80 chicks. Weight, crated, 60 lbs.; boxed, gross, 71 lbs.; net, 39 lbs., cubic contents, 6 $\frac{2}{3}$  feet. Price, \$7.00.

**Style D, Hot Air, No. 2.** Dimensions, 35x 36 $\frac{1}{2}$  inches. Capacity, 125 chicks. Weight, crated, 65 lbs.; boxed, gross, 95 lbs.; net, 58 lbs.; cubic contents, 8 $\frac{3}{4}$  feet. Price, \$9.00.

## OUTDOOR BROODERS

**Style C, Hot Air, No. 1.** Dimensions, 36x 36 inches. Capacity, 100 chicks. Weight, crated, 125 lbs.; boxed, gross, 158 lbs.; net, 93 lbs.; cubic contents, 15 $\frac{1}{8}$  feet. Price, \$12.00.

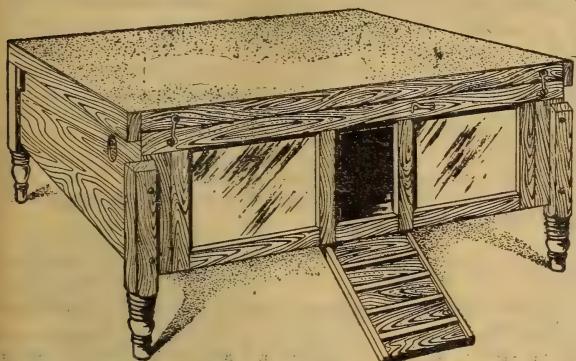

**Style C, Hot Air, No. 2.** Dimensions, 48x 48 inches. Capacity, 150 chicks. Weight, crated, 185 lbs.; boxed, gross, 263 lbs.; net, 146 lbs.; cubic contents, 26 $\frac{1}{2}$  feet. Price, \$16.00.

## SECTIONAL INDOOR HOT WATER PIPE BROODERS

These brooders have become well known among poultrymen, as well as amateurs, being top heat with movable floor. They will accommodate the chicks until they are good-sized broilers, thus enabling the operator to have a nursery and fattening room at the same time. In purchasing, be sure to get brooder of sufficient number of sections for all purposes, as sections cannot be added.

No. 2, 200 chicks, \$19.00; No. 3, 300 chicks, \$24.00; No. 4, 400 chicks, \$29.00.  
Large Illustrated Catalogue of Incubators and Brooders free.

**\$7.00** Description of the **PRAIRIE STATE** **\$7.00**  
New Outdoor Brooder, No. 0

no danger from rats or cats. There are two lights of glass in front, and also a small door, which is a run-way for the chicks, when open.

The heating device is entirely new and consists of a galvanized iron drum directly over the lamp chimney, with two cylindrical arms also of galvanized iron, radiating from the drum each way and extending through the sides of the brooder. The outside openings are covered so that no wind can blow the lamp out or affect the flame, and all the fumes from lamp are carried outside the brooder. Outside the heat drum there is a galvanized iron cylinder which keeps the chicks away from the heat-drum. This cylinder takes the air from the lamp box and conducts it under the hover, thus maintaining a forced movement of fresh air through the brooder continuously, keeping it pure and wholesome. The air supply for lamp is ample and so arranged that no wind can blow the lamp out affect the flame, or cause the lamp to smoke.

**\$7.00 EACH**

**IMPORTANT** If you are a friend of the **PRAIRIE STATE INCUBATORS**, and there are tens of thousands of them in the country, send to us for your machines and supplies. **Central location.** **Low transportation.** Tell your friends how well you like the **PRAIRIE STATE**, and influence them to send us their orders.

We request our customers to write orders on **SEPARATE SHEET** from their letter. This is very important.

# FERTO-INSECTONO

## THE GREAT INSECTICIDE AND FERTILIZER

ITS USES AND HOW TO USE IT  
AGENTS WANTED. THE TRADE SUPPLIED.

**WHAT IS FERTO-INSECTONO?** It is an inexpensive dark powder as fine as flour and extremely diffusible and completely covers with a fine dust all plants over which it is sprinkled. While powerful in its effects, it will not injure the plant or the leaves in the slightest degree, and is perfectly harmless to the person handling it.

**AS AN INSECTICIDE.** It is an absolute annihilator of all insects, bugs or beetles that prey on vegetation. Positively kills potato bugs, squash bugs, pumpkin bugs, melon bugs, currant worms, cabbage worms, etc. It will kill all kinds of creeping things that eat the leaves of vegetables or plants. It is the cheapest insecticide on the market and the best.

**A GOOD CROP OF CABBAGE** or any other vegetable cannot be obtained, no matter how good your soil and seed may be, or how favorable the weather, or how much care and labor you spend on them, unless the vines and leaves are kept vigorous and healthy. Such a condition cannot be kept up unless all insects and bugs are destroyed as fast as they appear.

**FERTO-INSECTONO AS A FERTILIZER.** This chemical compound possesses the quality of extracting the ammonia from the atmosphere as the wind passes over the plants to which it has been applied. This ammonia combines with the powder and forms a sulphate of ammonia, which is a powerful stimulant to vegetable growth. When we speak of stimulant don't think the plant or ground will be left in a worse condition when the effect has passed away. This is not the case. The properties are all taken from the air and the young growing plants are actually fed, nourished, assisted to send their roots deeper into the soil and the tops higher in the air. The benefit is permanent, hastening maturity and increasing production. "Ferto-Insectono" is peculiarly valuable in dry seasons, as it attracts and holds moisture. **Prices, 10 lb. package 35c, 25 lb. package 75c, 50 lb. package \$1.25, 100 lb. sack \$2.00, per ton \$35.00.**

J. A. Everitt, Indianapolis:

Dear Sir—Your Ferto-Insectono is certainly great. It saved me a fine crop of cucumbers from the ravages of the insects, and cabbages from the green worms. I will purchase one of your sifters and a larger order of Ferto-Insectono this year.

Potato growers buy Ferto-Insectono by the ton and say that it is the best investment they ever made, preventing blight as well as fertilizing and killing all the bugs.

HADDENVILLE, PA., Feb. 27, 1908.

Yours truly, ISAAC A. MOORE.

## NONE SUCH SIFTER

FOR APPLYING POWDERED INSECTICIDE, LIME, PLASTER, ETC.

The best Sifter made. Made on the only correct principle that insures a uniform distribution of any dry, fine powder with very little work, and will not clog. Fig. 1 shows the inside bottom with a few fairly large perforations. Fig. 2 shows the bottom with very fine perforations, except a large one in the center to allow any coarse particles to pass out. The perforations in each of these bottoms are so evenly balanced that the upper one never allows so much material to go on the bottom as to clog it, making the work easy and reliable. The bottom is so shaped as to spread the powder, thus covering large plants with one movement. This machine is not intended to do away with my Electric (Liquid) Bug Exterminator, or Sprayer,

as I always recommend that machine where liquids can be used. Some people, however, prefer to use dry material, and on every farm are some crops that must be treated dry, like cabbage for cabbage worm, vine crops for the striped bugs which cannot be poisoned with paris green. Vine crops can be saved by applying "Ferto-Insectono" with this Sifter. See above description. This will either kill the bugs or drive them away. **Price, 50c each. \$4.00 per dozen.**

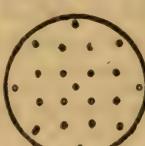

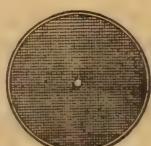

Fig. 2

# GIVE YOUR FEATHERED FRIENDS REST AND COMFORT BY USING LEAKE'S LICE EXTERMINATOR

This Preparation Destroys Lice, Mites and Fleas in Houses, on Chickens and all other Animals. No Poultry or Stock-Raiser can afford to be without it another day.

**LICE AND MITES** are greater enemies to poultry-raisers than cholera, roup, etc. In fact, other diseases are often the result of lice previously existing to torment the fowl and get it out of condition, when it is an easy prey for disease. Leake's Lice Exterminator is an infallible remedy, and every poultry and stock-raiser should always keep it on the place. Two or three dozen eggs will pay for a quart of Leake's Lice Exterminator, which if used will last a long time and cause your hens to lay many extra dozens for you. The best and most economical way to apply is with our Electric Sprayer. We guarantee this remedy to do the work or money refunded. **Price—1 quart 35c, 1 gallon \$1.00, 5 gallons \$4.00.**

**THE TRADE SUPPLIED**

## “FLY FUMA” The Animals’ Friend

Flies and Mosquitoes on Horses and Cattle, Fleas on Dogs and Cats, Lice on Chickens, etc. In short, every Bug, Fly or Insect that can crawl or walk or fly, leaves when “FLY FUMA” comes.

Why allow the terrible torment of your animals? Use “Fly Fuma” and you will be repaid a thousand fold in increased milk from your cows, service from your horses, and comfort of all your domestic animals. Gives horses a glossy coat. Use “Fly Fuma” and make many times its cost in increased flow of milk from your cows, as they can feed quietly, instead of tearing around the field or standing in the shade.

**DIRECTIONS.**—Spray lightly (or rub on with cloth) “Fly Fuma” on any animal to be protected, using the **Electric Bug Exterminator**, and on perches in the henry. Rub it on the heads of the fowls to destroy head lice. For horn fly, rub it into the hair at the base of horn. Repeat as necessary. Keep a supply of the **Electric Bug Exterminator** always ready. It is healing to all sores. “Fly Fuma” applied once a day is sufficient. **Price—1 qt. 35c, 1 gal. \$1.00, 5 gals. \$4.00.**

# LITTLE DEMONS THAT DESTROY OUR CROPS

Good bye! ye bugs, ye crawling devils,  
Who oft have brought us many evils;  
Your absence now may give some

room  
For better things in years to come.

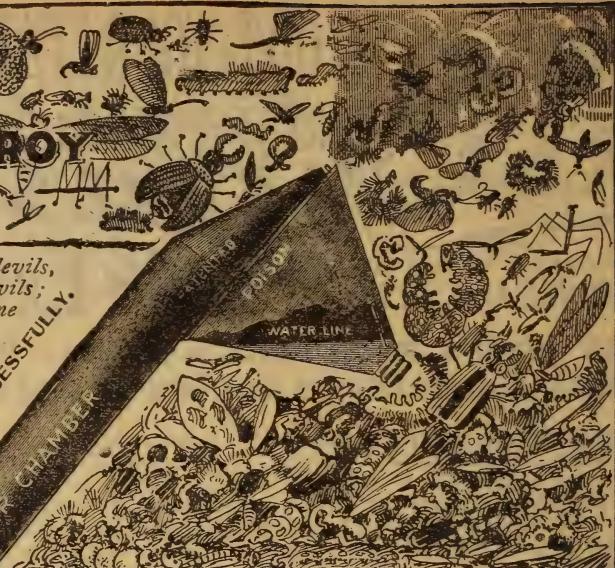

A high authority estimates that \$300,000,000 worth of crops are destroyed in the U. S. each year by bugs, worms and fungi. Only a small part of this loss would result, if some safe, cheap, simple and effective machine was available to apply the remedies.

THIS IS THE

Machine

THE ONLY ONE THAT SPRAYS UPWARD SUCCESSFULLY.

J. A. EVERITT'S PATENT, MARCH 7, 1899.

Your crops cost you much to plant and cultivate. Will you now leave them for myriads of insects to destroy? :: :: :: ::

OFF THE EARTH

No careful farmer will abandon his crops when they are nearly made, but he will purchase an **ELECTRIC SPRAYER** and quickly and easily drive all the bugs, worms and insects off the earth.

All other machines have their objections. **This is perfection. Perfection in Quantity and Quality of Work**, as well as the **Ease and Economy** of doing it.

Do you like an **Easy Way to do a Disagreeable Job?** There are similar machines on the market, but none other that will do all your work. Read on and you will see. Killing the bugs by the old way is about the most disagreeable job on the farm and is oftentimes neglected. With the **Electric Bug Exterminator**, however, all this is changed. It now becomes one of the preferred jobs, an easy and pleasant task. All the hard work is removed, as the machine weighs only a pound and about a pound more when filled ready for use. Contrast this with the old sprinkling can, bucket or even Knapsack sprayer.

Any liquid poison can be used in the **Electric Bug Exterminator**. The operation is so exceedingly simple as to recommend itself to every person. Simply put the poison in little packages of  $\frac{1}{4}$  teaspoonful each, and dump one in the can; fill with water and shake and you are ready. No extra vessels are required. There is no danger if the machine is left lying around. Stock can not get at the poison and it will not spill out if left in any position.

Plants are never burned nor damaged if sprayed with this machine. The spray is so fine and it covers so evenly that no damage can result, but every bug is killed with the greatest dispatch.

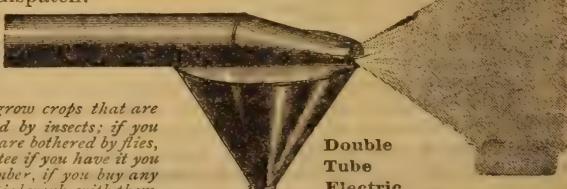

## Single and Double Tube Sprayers

In both Tin and Brass.

### See Here, Good Friend

If you grow crops that are troubled by insects; if you raise stock, such as cattle, hogs and poultry that are bothered by flies, lice, etc., you need this machine and we guarantee if you have it you will use it and save many times its cost. Remember, if you buy any one of the many other styles you can do only partial work with them. (See next Page) hence realize only a part of the benefit of this great machine.

Don't put off getting a machine until your crop is damaged. Begin early. With the **Electric Bug Exterminator** you can kill the hard shell potato bugs as readily as the soft ones. By beginning early you save the trouble of killing millions later, and all the vitality of your crop is saved. You should not let another hour pass without this machine on the place.

Double  
Tube  
Electric  
Sprayer.

# THE ELECTRIC BUG EXTERMINATOR

This Farmer is not Up-to-Date

One of the old ways.

Our Electric Sprayer is the only one that sprays upward successfully. It is patented and others can not accomplish this feat unless they infringe our patents.

## IS THE BEST MACHINE

For expelling and destroying potato bugs, cabbage, currant, tomato, tobacco and cotton worms, plum curculio, codling moth and canker worms; raspberry, strawberry, pear and rose slugs; striped flea beetle, cucumber and melon beetle, cattle, horse, hog and hen lice, clothes moth, dog fleas. It will also prevent mildew on grapes and diseases of plums, apples, peaches, cherries, berries, cotton and all kinds of fruit and vegetables, when the proper remedies are applied with this machine.

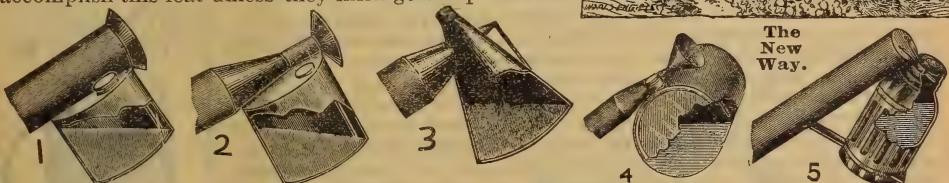

### How does this Strike You?

THIS FARMER IS UP-TO-DATE

The New Way.

Showing Faulty Styles of Sprayers. Don't Buy any of These.

Here we show other styles of Sprayers that will only spray downward. They are shown at a less angle than our Electric on the preceding page, but you will notice the liquid departs from the lower end of the tube long before the supply is exhausted and no spray can be produced, as the tube must be in the liquid. The Electric will spray upward until only a spoonful is left.

**Just Think of it!** Why wear your life out dragging a load of poison over your fields through the hot sun, when you can take a few packets of poison in your pocket, a bucket of water in your hand and go out and kill bugs on a whole field of potatoes or other crops? Put poison up in little packages like doctor's powders and empty in can as needed.

**CAUTION** Any Sprayer with an air chamber with tapering sides like shown in our ELECTRIC, attached to any kind of a reservoir, infringes our patents. We warn all people not to buy or use them.

**DOES SPRAYING PAY?** These two illustrations show the results of spraying potatoes at the Vermont Experiment Station. The sprayed vines yielded at the rate of 291 bushels per acre (see long pile), while the unsprayed vines yielded at the rate of 99½ bushels per acre (see short pile). A difference of 19½ bushels per acre! Then surely it pays to spray potatoes, and what is true of this crop is also true of other crops, especially fruit. Sprayed fruit yields more and sells better.

Spraying Trees with Electric Sprayer and Extension Handle.

THE ELECTRIC SPRAYER, with extension Handle Attached.

Sprayed Potatoes, 291 Bushels per Acre.

Unsprayed Potatoes 99½ Bushels per Acre.

### PRICE

Electric Sprayer, Made of heavy Tin.....	\$0.50
Electric Sprayer, Made of Heavy Brass.....	1.00
Extension Handle for Tree Spraying.....	.75

We have a Special Express Rate that allows us to prepay Single Sprayers to any Express office for 25c each and Extension Handles for 50c each. We advise customers to remit this extra, unless going with other goods.

# HIGH PRESSURE DOUBLE CYLINDER SPRAYER

## CAPACITY 4 GALLONS

We are at last able to offer an entirely reliable portable compressed air sprayer at a moderate price. Adaptable for all kinds of spraying. Filled and charged with air in a minute. When ready for use will throw spray continuously for 15 minutes. Will throw a stream 30 feet high. Especially recommended for work on a large scale: potato fields, vineyards, tobacco plantations, or large orchards, whitewashing, chicken house and greenhouse work, etc.

Made in the very best manner, with spun heads and double seams, amply braced and reinforced. Will throw coarse, medium or very fine spray. Capacity 4 gallons. Shipped complete, with 30 inches of hose and nozzle ready for use.

**No. 1. Made of Heavy Galvanized Iron, \$4.50.**

**No. 2. Made of 20-Ounce Copper; will Last a Lifetime, \$6.00.**

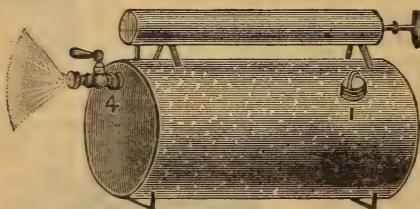

## The Myers Knapsack Spray Pump

This machine consists of a tank holding 5 gallons and a pump made entirely of brass, which can not corrode or rust. There is a large air chamber inside the tank which has sufficient capacity to keep up the pressure and continue to spray for one minute after the operator has quit pumping. Tank is fitted with lid and strainer which can be removed. We wish to call attention to the fact that this is the only Knapsack Sprayer with an agitator. It is a bucket spray pump with air chamber, ball valve, solid plunger and agitator. The Knapsack can be set on ground and operator work handle for washing buggies, windows, extinguishing fires, etc. The handle lever can be shifted from right to left shoulder at will of operator. No water can drip on the operator.

**PRICES** With Galvanized Iron Tank, Complete.....\$5.00  
With Copper Tank, Complete..... 8.00

## Lightning Compressed Air Sprayer, \$1.50

Capacity 2 gallons. Made of heavy Galvanized Iron.

The most convenient and handy compressed air sprayer on the market. Where a 4 gallon sprayer is too heavy to handle conveniently, this is just what you need. Well made, strong and durable. We can recommend it to our customers. Has a clean-out hole in bottom from which the valve can be oiled, which should always be done before putting it away after using. We furnish two latest improved nozzles with each machine, one for fine spraying and

one for tree spraying, washing windows, buggies, etc. Will throw a stream 20 feet high. Does the same work as our High Pressure Double Cylinder Sprayer, only it has but one-half the capacity.

Regular dealer's price, \$2.00.....OUR PRICE, ONLY \$1.50

## THE O. K. BULB SPRAYER, \$1.25

Capacity 2 Gallons. Made of Heavy Galvanized Iron

Provided with shoulder strap; and as it is carried in a horizontal position, it keeps the ingredients thoroughly agitated while spraying. Hose and Bulb are made of the very best white rubber. This sprayer is very easily operated. Simply squeezing the bulb forces out a whirling mist, and at the will of the operator a large or small spray is made. The operator can spray upward or downward equally well, as on the under side of leaves, etc. The valves in the rubber bulb are made of lead and will not rust, or corrode. The nozzle is made of brass.

The O. K. Bulb Sprayer is adapted for spraying potatoes, cabbage, tobacco plants and all kinds of vegetables, as well as for washing windows, buggies, and for greenhouse work. Has a strainer attached to the hose, inside the reservoir, and cannot clog or get out of order.

Regular dealer's price, \$1.75.

OUR PRICE, ONLY.....\$1.25

# PEERLESS SPRAY PUMPS

Fig. 1. Brass Bucket Pumps.

Fig. 1 represents our Peerless bucket pumps, made **entirely of brass**. Not affected by acids or arsenites; are fitted with patent agitator and return overflow caps and so constructed that all the work is done on the downward stoke. Large air chamber with ball valves. Throws continuous spray. Will throw solid stream 50 feet, for washing windows, buggies, putting out fires, sprinkling lawns, etc. Will throw coarse or fine spray as wanted. Fitted with a special sprinkler for flowers.

<b>PRICE:</b> Complete with patent agitator, hose and Imperial combination nozzle for fine and coarse spray and solid stream, with malleable foot rest .....	\$2.75
Same with Vermorel or Bordeaux nozzle added.....	3.25
For 8-foot extension pipe, for high work, add extra.....	.50

## The Peerless Barrel and Tank Pump

Shown by Fig. 2, is made in the best manner. Cylinder, valves, valve-seats and discharge pipe are all of brass. All working parts are constantly submerged, hence no priming is ever necessary. Patent agitators. Regularly equipped with two patent graduated Vermorel nozzles.

**PRICE:** Complete, with 5 feet of half-inch 3-ply hose, single

spray .....	\$5.80
Same fitted to throw two streams and with two leads of hose.....	6.50
For 8-foot extension pipe, add.....	.50

### Peerless Double Acting Barrel Spray Pump

Has brass upper and brass lined lower cylinders, brass bucket, brass valve and valve seat; in fact, all working parts are of brass. Patent jet agitator furnished regularly. Works both up and down stroke, throwing continuous stream, either solid, coarse or fine spray as wanted.

**PRICE:** Complete with suction pipe, strainer, 5 feet hose, with Vermorel or Bordeaux nozzle, and with jet or dasher agitator..... \$6.25

Same fitted to throw two streams, with two leads of hose and two nozzles .....	7.00
For 8-foot extension pipe, for high work, add.....	.50

Fig. 3.

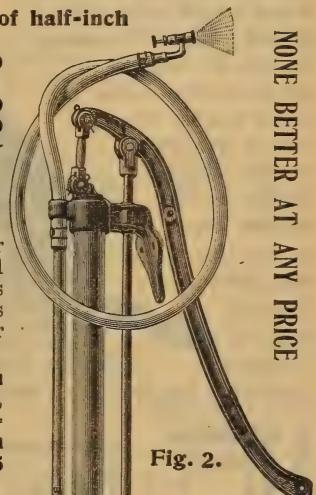

Fig. 2.

Barrel or  
Tank Pump

Barrel not  
Shown.

Always order Extension Pipes with these Pumps.

### Compare Our Prices with Others.

**Don't Risk** your crops on doubtful store seeds that may have been in Texas last year and Maine the year before—that may have been scorched in one store and stored in a damp cellar in another. They may be veritable tramp seeds, not able to find a resting place heretofore, and which will cause you trouble and loss if you take them into your garden. **Plant the O. K. SEEDS, and your Crops will be O. K.** Every Postoffice a branch store, where you can obtain the O. K. SEEDS.

# The "Adam" Family Grist Mill

\$3.00

This little mill has a well deserved reputation as the best of its class. Hand power. Can be attached to table, bin or box. Grinds corn, oats, barley, coffee, etc. You can make your own corn meal and graham flour fresh every day. Just the thing for cracking grain for poultry. Capacity 40 lbs. of coarse meal, or 25 lbs. of fine meal per hour. Made on honor and will wear a lifetime. **Price \$3.00.**

MILTON ILL., Apr. 6th, 1903.

MR. J. A. EVERITT, Seedsman, Indianapolis, Ind.:

DEAR SIR:—We received the Adam Grist Mill, and find it as represented. Would not sell it at any price, if I could not get another. Our neighbors think it a grand mill, and I think you will get several orders from our town.

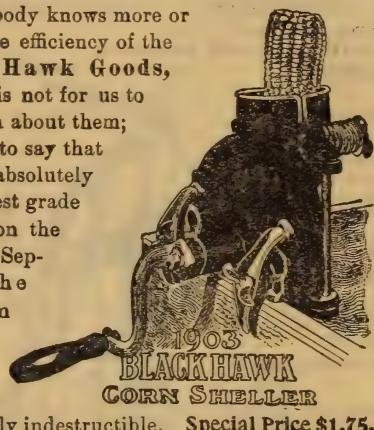

Weight 30 Pounds.

MRS. A. F. BROWN.

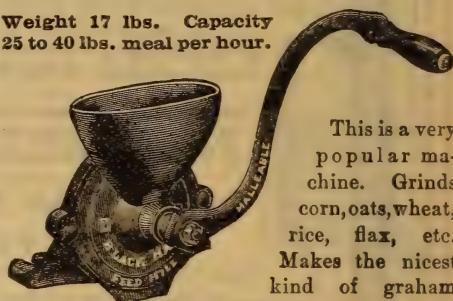

## Black Hawk Corn Sheller

Everybody knows more or less of the efficiency of the Black Hawk Goods, hence it is not for us to say much about them; suffice it to say that this is absolutely the highest grade Sheller on the market. Separates the cobs from the corn, runs easily and is practically indestructible. **Special Price \$1.75.**

## Black Hawk Grist Mill

Weight 17 lbs. Capacity 25 to 40 lbs. meal per hour.

This is a very popular machine. Grinds corn, oats, wheat, rice, flax, etc. Makes the nicest kind of graham flour and corn meal

for table use. Is just as good as the "Adam" Mill and is lighter and more easily handled.

**Special Price \$2.90.**  
Extra Grinders 40c a pair.

ONLY \$8.00

## FULLY WARRANTED PLATFORM FARM SCALES

A GOOD SCALE IS A NECESSITY ON EVERY FARM

Strongly made, of good materials, by experienced scale builders. Smoothly finished and handsomely painted. Each scale is carefully tested, with U. S. Standard Sealed Weights, before leaving the factory. Corners of platform positively warranted to weigh same as the center. The contrary is a very prevalent weakness with some other scales, sold at higher prices. Capacity 600 lbs., price \$8.00; Capacity 800 lbs., price \$9.00; capacity 1,000 lbs., price \$10.00; capacity 1,200 lbs., price \$11.00.

**LICE LIGHT OUT** quick as lightning—they leave the hen, the nest and the house, if you use the famous **EVAPORATING NEST EGG**. No trouble to use. You put it in the nest—it does the rest.

## EVAPORATING NEST EGGS

That kill lice. Keep your fowls healthy. Do not freeze or rot. One under the setting hen will absolutely insure the hen, nest and chicks free from lice and bring a better hatch. Placed in the hen house they will clear it of lice in short order. No trouble to use. Looks exactly like a real egg. Always at work for an entire year. Big thing for agents. Doz. \$1.00,  $\frac{1}{2}$  doz 60c, by express. Add 25c per dozen for postage if by mail.

# NATIONAL BROADCAST SEEDER

PATENTED JUNE 11, 1901.

J. A. EVERITT, Inventor.

Combines every good feature of every other Broadcast Seed Sower and is distinct and superior in many respects. The cheapest, simplest, strongest, most durable, most accurate and the handsomest Seeder made.

We have manufactured Broadcast Seed Sowers for many years, but only recently it occurred to us that we could improve these machines

AN AGENCY for this machine is worth much. We have agents who sold 1½ dozen in a day and over 200 machines in less than two months, at a profit of 50 cents each after paying freight. We warrant every NATIONAL SEEDER to give satisfaction to the user.

No careful, economical farmer will continue to sow his seed by hand (the old way) when he can get one of these machines at our low price. They will save their cost daily in the saving of seed,

to say nothing about saving of time and more even distribution which will have a great effect on the crop.

very materially over the styles in general use and afford to sell them at a greatly reduced price. After numerous attempts and the expenditure of much money, we believe we have produced a machine as nearly perfect as it is possible to make, with the fewest wearing parts, insuring long life, and so accurately made that it runs almost without an effort. Ball bearings are used wherever possible.

In the NATIONAL we have one cog wheel seven inches in diameter and a small pinion. In the old style machines four cog wheels were employed, and they frequently wore out or broke. The frame is so constructed that it allows the minimum of weight with greatest strength and rigidity. The feed is from the center of the base and the bottom is beveled to run the seed out very clean. The NATIONAL is the handsomest as well as the best machine on the market.

It will sow at a round, Wheat or Rye, 50 feet; Buckwheat, 45 feet; Flax Seed, Clover or Millet, 36 feet; Grass Seed, 20 to 36 feet; other seeds, etc., according to their nature and condition. Will also sow Plaster, Fertilizers, Salt, Ashes, Lime, etc. Full directions with each machine.

WARRANTED TO GIVE ENTIRE SATISFACTION. AGENTS WANTED.

Price, \$1.25 each, \$12.00 per doz. For 50c extra we will deliver single machines by mail or express within 500 miles of Indianapolis.

## NEW IDEA BROADCAST SEEDER

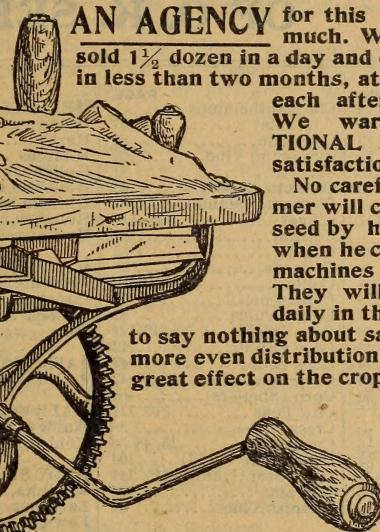

"The Noiseless Seeder" (J. A. Everitt's Patent

Jan. 2, 1900)

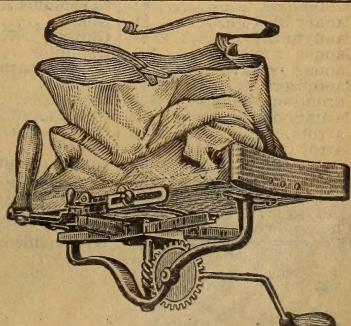

Is exactly like the National with the exception that the driving gear is a spiral, or worm gear. Has ball bearings, nickel-plated finish, and in fact, every good feature of every other seeder and in addition is noiseless in operation.

The "NEW IDEA" is the slickest "trick" in the seeder trade, and those of our customers who want something distinctly superior to everything else in the seeder line will buy the NEW IDEA. Price, \$1.50 each, \$13.00 per dozen. Agents wanted.

**Agents wanted.**

# What is Your Favorite Flower?

Wear beautiful floral buttons and help to encourage the growth of flowers; make our homes more beautiful and our lives happier. SEE THE NEXT PAGE.

Flowers can talk to you. By flowers, or these floral buttons you can express sentiment of friendship, regard, esteem and love, stronger than by words. There is a language of flowers. Do you want a beautiful little book entitled, "The Language of Flowers"? We will give one FREE with each shirt waist set. Read what others say of these beautiful Floral Buttons:

**MR. J. A. EVERITT,**

DEAR SIR:—I want to thank you for the beautiful floral buttons. Sister and I will fight to see who will get to wear them. We would love to have one of your books, "The Language of Flowers", for there is nothing more beautiful than flowers.

Miss Ida Howe, Indianapolis, Ind.

**MR. J. A. EVERITT,**

DEAR SIR:—Your floral shirt waist sets are certainly equal to the china painter's highest art. I have had numerous calls to purchase shirt waist sets for out of town friends, but none of them excel in design and execution your magnificent floral buttons. It gives me pleasure to assure you of my hearty wishes for a large demand for your beautiful premium offer.

Mayme Deal, Indianapolis, Ind.

**MR. J. A. EVERITT,**

DEAR SIR:—I received the floral buttons and I thank you. They will doubtless give much pleasure to your patrons.

Mrs. Wm. Jennings Bryan, Lincoln, Neb.

**MR. J. A. EVERITT,**

DEAR SIR:—The set of floral buttons received and will be worn with pleasure. There are hundreds of small house-holders in this city who cultivate flowers and take pleasure in their lawns. They do not leave their homes in the summer and they, no doubt, will be interested in your flower seeds and your beautiful premium.—Mrs. W. D. Pratt, Indianapolis, Ind.

**MR. J. A. EVERITT,**

DEAR SIR:—You will be pleased when I tell

Is this not enough evidence that you will be pleased with one or more sets? Any lady will be proud of them. Turn to the next page and see how exquisitely beautiful they are. These illustrations are exact representations except the buttons are a trifle smaller than the prints.

Many ladies wear single buttons as an ornament when not wearing a shirt-waist. Nothing is prettier or more appropriate. Also young men wear them instead of portrait buttons.

**OUR OFFER.** As explained on the next page, we will give a set of three (3) buttons on a handsome card with each 50 cent order for flower seeds, bulbs, or flower plants

We will give a set of three (3) buttons (different) not on a card with each 50 cents worth of flower seeds, etc., as above.

**KEEP UP CLUB** If you will send four (4) orders at 50 cents each, we will send you fifty cent worth of flower seeds, etc., and a set free. That is; five collections and sets for the price of four. In this way any person can make a nice sum of money as everybody will buy 50 cents worth of seeds etc. to get one of these beautiful sets.

ORDER BY NUMBER AND NAME and send all orders as below. You can't get these beautiful buttons elsewhere. Be sure to say you saw the offer in the O. K. SEEDS' CATALOGUE.

**J. A. EVERITT, Seedsman, Inc., Indianapolis, Indiana**

you that I wore a set of your floral shirt-waist sets to a very prettily arranged reception, and they were greatly admired. I am sure when your offer is given to ladies who appreciate dainty toilets your success will be almost unbounded.—(Mrs.) Julia Turner Williams.

**MR. J. A. EVERITT,**

DEAR SIR:—I received the shirt-waist set. It is very pretty. I will wear them with pleasure. I admire the pansy buttons more than any other flowers. I am sure your plan will please your flower loving customers, and secure to you a great number of new ones. I thank you very much.—Mrs. Jno. P. Stelle, Dahlgreen, Ill.

**MR. J. A. EVERITT,**

DEAR SIR:—I want to thank you for the very beautiful shirt waist-set. I think they will be much appreciated by every one.

Mrs. Wm. B. Burford, Indianapolis, Ind.

**MR. J. A. EVERITT,**

DEAR SIR:—I received the floral buttons. They are very pretty and I thank you for them. Nasturtiums are my favorite flower. I am sure all ladies and flower lovers (and who does not love flowers) will appreciate your great liberality in giving such beautiful gifts. (Mrs.) C. O. Barnard, Zion City, Ill.

**MR. J. A. EVERITT,**

DEAR SIR:—I am delighted with the "Daisy" shirt-waist set. They are beautiful and I am very certain that every lady would be pleased to receive such a beautiful gift with flower seeds.—Mrs. Jno. Oxenford, Indianapolis, Ind.
